1946-47

PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the thirty-seventh Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. ix to xxvi immediately following shows the general arrangement of the work. The special index (following the usual general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, owing to limitations of space, have been omitted or are not printed fully in the present volume.

Economic and financial conditions during recent years have caused a demand for new information, or information expressed in new terms, concerning many matters of finance, trade, prices, production and population, and some progress has been made in the later volumes towards bringing closer to present day requirements the Chapters dealing with these branches of statistics, while a diary of the principal financial and economic events of the years 1945 to 1948 is inserted after the last chapter.

It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter incorporated in the present volume, but attention may be drawn to the following :—

Chapter II. Physiography.—New map on Evaporation (pp. 41–2).
Chapter III. General Government.—Schemes for Pensions, Retiring Allowances, etc., for Members of Parliament (Commonwealth p. 1247, New South Wales, p. 66, Victoria, p. 68, Queensland, p. 1248, South Australia, p. 1248, and Western Australia, pp. 70 and 1249).; Commonwealth Government Departments—Matters dealt with and Acts administered (pp. 76–86).
Chapter IV. Land Tenure and Settlement.—Settlement of Returned Service Personnel: 1939–45 War (pp. 113–9).
Chapter V. Transport and Communication.—Post-war Control of Shipping (pp. 142–4); Maps showing Railway Systems (pp. 155–6) and Air Routes (pp. 191–2); Aviation Development in Australia and Overseas (pp. 181–94); Overseas Telecommunications Commission (pp. 220–4).
Chapter VI. Education.—The Australian National University (pp. 241–2); The Commonwealth Office of Education (pp. 243–4); Libraries, Museums and Art Galleries (pp. 254–65).
Chapter VIII. Public Benevolence, etc.—Commonwealth Unemployment and Sickness Benefits (pp. 304–8).
Chapter X. The Territories of Australia.—Northern Territory—Legislative Council (p. 328), System of Land Tenure (pp. 331–3), Education Facilities (p. 335); Australian Capital Territory—Progress of work since 1930 (pp. 337–8); Trusteeship Agreements (New Guinea) (pp. 354–5) and Nauru (pp. 366–7).
Chapter XI. Trade.—Reciprocal Tariffs, Trade Agreements, International Trade Discussions and Tariff Negotiations (pp. 377–82); Export Control (pp. 383–4); Trade Commissioner Service (pp. 395–6).
Chapter XII. Labour, Wages and Prices.—Commonwealth Employment Service (p. 496).
Chapter XIII. Local Government.—Roads—Summary according to Composition (pp. 536–7), Summary of Expenditure by Central Road Authorities (pp. 537–8).
Chapter XIV. Private Finance.—Banking Act 1947 (pp. 566–7); Additional and Reconstructed Tables on Business of Cheque-paying Banks (pp. 573–82).

32
MAR 12 1951

Chapter XV. Public Finance.—New Tables on Loan Raisings in Australia and Overseas (pp. 642–4); Taxes on Income—Income Year 1947–48 (pp. 690–5) and Income Year 1948–49 (pp. 1277–80).

Chapter XVI. Population.—Preliminary Results of 1947 Census for Population and Dwellings, and Revised Population Estimates for the Intercensal Period 1933–1947 (pp. 699 *et seq.*, and 1281).

Chapter XVII. Vital Statistics.—Marriages, Births and Deaths—For Earlier Periods statistics for single years replaced by annual averages for five yearly or ten-yearly periods (pp. 742 *et seq.*).

Chapter XVIII. Mineral Industry.—Government Aid to Mining (pp. 849–52)

Chapter XIX. Pastoral Production.—Classification of Sheep according to Age, Sex and Breed (p. 867); Average Weight of Sheep and Lamb Fleeces Shorn (p. 873); World Production of Wool by Type of Wool and Country (pp. 873–4).

Chapter XX. Agricultural Production.—F.A.Q. Standard of Wheat (pp. 902–3); Sorghum for Grain (pp. 925–6); Wheat Industry Legislation (p. 1295).

Chapter XXI. Farmyard, Dairy and Bee Products.—Commonwealth Subsidies on Butter, Cheese, Processed Milk Products, and Whole Milk (pp. 977–9); Whole Milk Production and Utilization (p. 980); Poultry Farming (pp. 993–1000).

Chapter XXII. Forestry.—Earlier Sections (pp. 1007–13) rewritten.

Chapter XXV. Water Conservation and Irrigation.—Special Article "The Conservation and Use of Water in Australia" (pp. 1096–1141) prepared by Mr. Ulrich Ellis.

Chapter XXVI. Defence.—Department of Defence (pp. 1142–4); Naval and Air Defence (pp. 1150–5); Casualties: Australian Services 1939–45 War (pp. 1156–60).

Chapter XXVII. Repatriation.—General Benefits (pp. 1178–80).

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

Printing difficulties are still being experienced and the delay in publication of this volume, while regrettable, has been unavoidable. Compared with the previous volume, however, the figures have been advanced by two years.

Later information which has been compiled since the various Chapters were sent to press has been incorporated in the Appendix (p. 1246) which is much more comprehensive even than in the previous issue. Opportunity has been taken therein to advance as far as possible, in summarized form, the more important statistics of the foregoing chapters. In many cases information has been extended to 1948.

My thanks are tendered to the State Statisticians, who have collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information; special mention should be made of the services of the Chief Draftsman of the Property and Survey Branch, Department of the Interior, who was responsible for the drawing of the graphs throughout this volume, and of those of Mr. Ulrich Ellis, who prepared the special article entitled "The Conservation and Use of Water in Australia" appearing in Chapter XXV.

An expression of keen appreciation is due in respect of the valuable work performed by Mr. S. H. Begley, Editor of Publications, Mr. J. M. Jones, B.A., Assistant Editor, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several sections of the Commonwealth Bureau of Census and Statistics, upon whom has devolved the duty of revising the Chapters relative to their respective sections.

ROLAND WILSON,
Commonwealth Statistician.

SYNOPSIS.

CHAPTER I.—DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

PAGE

§ 1. Early Knowledge and Discovery of Australia—

1. Introduction 1
2. Early Tradition 1
3. Discovery of Australia 1
4. Discoveries by the English .. 3

§ 2. The Annexation of Australia—

1. Annexation of Eastern Part of Australia, 1770 3
2. Original Extent of New South Wales 4
3. Extension of New South Wales Westward, 1825 4
4. Annexation of Western Australia, 1827 4

§ 3. The Creation of the Several Colonies—

1. New South Wales 5
2. Tasmania 5
3. Western Australia 5
4. South Australia 5
5. New Zealand 5
6. Victoria 5
7. Queensland 5

§ 4. Establishment of the Commonwealth of Australia—

1. General 6
2. Transfer of the Northern Territory to the Commonwealth 6
3. Transfer of the Australian Capital Territory to the Commonwealth .. 6
4. Transfer of British New Guinea or Papua 7
5. Transfer of Norfolk Island .. 7
6. Territory of New Guinea .. 7
7. Nauru 7
8. Territory of Ashmore and Cartier Islands 7
9. Australian Antarctic Territory .. 7
§ 5. The Exploration of Australia 8

§ 6. The Constitution of the States and of the Commonwealth—

1. General 8
2. Commonwealth Constitution Act .. 8
3. The Royal Proclamation .. 26

CHAPTER II.—PHYSIOGRAPHY.

§ 1. General Description of Australia—

1. Geographical Position 27
2. Area of Australia compared with Areas of other Countries .. 27
3. Areas of Political Subdivisions .. 29
4. Coastal Configuration 29
5. Geographical Features 29
6. Fauna, Flora, etc. 30

§ 2. Climate and Meteorology of Australia—

1. Introductory 30
2. Meteorological Publications .. 30
3. Equipment 30
4. General Description of Australia .. 30
5. Meteorological Divisions 31
6. Temperatures 31
7. Humidity .. 32

§ 2. Climate and Meteorology of Australia— *continued.*

8. Evaporation 32
9. Rainfall 43
10. Remarkable Falls of Rain .. 46
11. Snowfall 48
12. Hail 48
13. Barometric Pressures 48
14. Wind 48
15. Cyclones and Storms 49
16. Influences affecting Australian Climate.. 50
17. Rainfall and Temperatures, Various Cities 50
18. Climatological Tables 51
§ 3. Standard Times in Australia 58

CHAPTER III.—GENERAL GOVERNMENT.

1. Scheme of Parliamentary Government—

1. General 59
2. Powers and Functions of the Governor-General and of the State Governors 59
3. Governor-General and State Governors 59
4. The Cabinet and Executive Government.. 59
5. Number and Salary of Members of the Legislatures 61

3. Sea-borne Mail Services 203
4. Total Cost of Carriage of Mails .. 204
5. Transactions of the Dead Letter Offices 204
6. Money Orders and Postal Notes .. 204

§ 3. Telegraphs—

1. General 207
2. Telegraph Offices, Number .. 209
3. Telegraphs and Telephones, Length of Wire 209
4. Number of Telegrams Dispatched .. 210

§ 4. Oversea Cable and Radio Communication—

1. First Cable Communication with the Old World 211
2. General Cable Service 211
3. Merging of Cable and Wireless Interests 211
4. Oversea Cable and Radio Traffic .. 211
5. Cable and Beam Wireless Rates .. 212

§ 5. Telephones—

1. Telephone Services 213
2. Revenue from Telephones .. 216

§ 6. Radio, Telegraphy and Telephony—

1. General 216
2. Wireless Licences 216
3. Broadcasting 217
4. Oversea Communication by Wireless 219

CHAPTER VI.—EDUCATION.

§ 1. General—

1. Evolution of Educational Systems of the States 225
2. Later Development in State Educational Systems 225
3. School Age 225
4. Australian Council for Educational Research 226

§ 2. Census Records—

1. Persons Receiving Instruction .. 226
2. Ages of Scholars 227
3. Percentage of Persons not Receiving Instruction 227
4. Religions of Scholars 228

§ 3. State Schools—

1. General 228
2. Returns 229
3. Distribution of Educational Facilities 231
4. Training Colleges 232
5. Expenditure 232
6. School Banking 234

§ 4. Private Schools—

1. Returns 235
2. Growth of Private Schools .. 235
3. Registration of Private Schools .. 235
§ 5. Free Kindergartens 235

§ 6. Universities—

1. Origin and Development .. 236
2. Teaching and Research Staff .. 236
3. Students 237

§ 6. Universities—*continued.*

4. University Receipts 238
5. Principal University Benefactions .. 238
6. University Expenditure 240
7. Extra-University Activities .. 240
8. University Extension 241
9. The Australian National University 241
10. The Canberra University College ... 242
11. The New England University College 242
12. Workers' Educational Associations 242

§ 7. The Commonwealth Office of Education—

1. Establishment 243
2. Functions 243
3. Activities 244

§ 8. The Universities Commission—

1. General 244
2. Financial Assistance 245
3. Commonwealth Reconstruction Training Scheme 246

§ 9. Technical Education—

1. General 248
2. Schools, Teachers and Students .. 249
3. Expenditure 249

§ 10. Commonwealth Technical Training Scheme—

1. Origin of the Scheme 250
2. Administration 250
3. Progress 250
4. Persons Trained or in Training .. 251

CHAPTER VI.—EDUCATION—*continued.*

PAGE

§ 11. Commonwealth Reconstruction Training Scheme—
1. Object of the Scheme 251
2. Persons Eligible under the Scheme .. 251
3. Selection for Training 251
4. Types of Training 251
5. Allowances 252
6. Part-time Training 252
7. Legal Authority 252
8. Organization and Administration .. 252

PAGE

§ 12. Business Colleges and Shorthand Schools 253

§ 13. Miscellaneous—
1. Scientific Societies 253
2. Libraries 254
3. Public Museums 263

  - 4. Classes of Arrivals and Departures .. 733
- § **9. Immigration—**
  - (A) ASSISTED MIGRATION INTO AUSTRALIA.
  - 1. Joint Commonwealth and States' Scheme 734
  - 2. Number of Persons Assisted .. 734
  - 3. Suspension of Assisted Passage Scheme during War 734
  - 4. Free and Assisted Passage Agreement, March, 1945 735
  - (B) THE REGULATION OF IMMIGRATION INTO AUSTRALIA.
  - 1. Powers and Legislation of the Commonwealth 735
  - 2. Conditions of Immigration into Australia 736
  - 3. Persons Admitted Without Dictation Test 737
  - 4. Departures of Persons of Non-European Races 738
  - (C) PASSPORTS 738
- § **10. Naturalization—**
  - 1. Commonwealth Legislation .. 738
  - 2. Certificates Granted 739
- § **11. Population of Territories** 740
- § **12. The Aboriginal Population of Australia** .. 741

CHAPTER XVII.—VITAL STATISTICS.

- § **1. Marriages—**
  - 1. Number 742
  - 2. Crude Marriage-rates 743
  - 3. ,, Marriage-rates of Various Countries 743
  - 4. Age and Conjugal Condition at Marriage 744
  - 5. Previous Conjugal Condition .. 751
  - 6. Birthplace of Persons Marrying .. 751
  - 7. Occupation and Age of Bridegrooms 751
  - 8. Celebration of Marriages 751
- § **2. Fertility and Reproduction—**
  - 1. Introductory 752
  - 2. Number of Live Births 752
  - 3. Crude Birth-rates 754
  - 4. ,, Birth-rates of Various Countries 756
  - 5. Fertility-rates 757
  - 6. Specific Fertility-rates 757
  - 7. Gross and Net Reproduction Rates 758
  - 8. Gross and Net Reproduction Rates of Various Countries 759
  - 9. Fertility of Marriages 759
  - 10. Masculinity of Live Births .. 760
  - 11. Ex-nuptial Live Births 760
  - 12. Legitimations 761
  - 13. Multiple Births 761
  - 14. Ages of Parents 761
  - 15. Birthplaces of Parents 762
  - 16. Occupation of Fathers 762
  - 17. Age, Duration of Marriage and Issue of Mothers 762
  - 18. Interval between Marriage and First Birth 765
  - 19. Interval between Birth and Registration of Birth 767
  - 20. Still Births 767
- § **3. Mortality—**
  - 1. Number of Deaths 767
  - 2. Crude Death-rates 768
  - 3. Standardized Death-rates .. 768
  - 4. True Death-rates 769
  - 5. Crude Death-rates of Various Countries 770
  - 6. True Death-rates of Various Countries 771
  - 7. Australian Life Tables 771
  - 8. Infantile Deaths and Death-rates .. 772
  - 9. Deaths in Age-groups 777
  - 10. Deaths at Single Ages and in Age-groups 778
  - 11. Deaths of Centenarians 779
  - 12. Length of Residence in Australia of Persons who Died 779
  - 13. Birthplaces of Persons who Died .. 780
  - 14. Occupation of Males who Died .. 780
  - 15. Causes of Deaths 780
  - 16. Deaths from Principal Specific Causes 789
  - 17. Causes of Deaths in Classes .. 804
  - 18. Age at Death of Married Males and Females, and Issue .. 806
  - 19. Age at Marriage of Deceased Males and Females, and Issue 806
  - 20. Birthplace of Deceased Married Males and Females, and Issue .. 807
  - 21. Occupation of Deceased Married Males, and Issue 807
- § **4. Registration of Births, Deaths and Marriages in the Australian Capital Territory** 807

CHAPTER XVIII.—MINERAL INDUSTRY.

§ 1. The Mineral Wealth of Australia—

PAGE
1. Place of Mining in Australian Development 808
2. Extent of Mineral Wealth .. 808
3. Quantity and Value of Production 808
4. Value of Production 810
5. Total Production to end of 1945 .. 810
6. Quarries 811

§ 2. Gold—

1. Discovery in Various States .. 812
2. Production at Various Periods .. 812
3. Changes in Relative Positions of States as Gold Producers .. 813
4. Place of Australia in the World's Gold Production 814
5. Employment in Gold-mining .. 817
6. Tax on Gold 817
7. Bounty on Production 817

§ 3. Silver, Lead and Zinc—

1. Production 818
2. Production, Sales and Stocks of Refined Silver in Australia .. 819
3. World Production 819
4. Production of Lead in Australia .. 820
5. Prices of Silver, Lead and Zinc .. 821
6. Employment in Silver, Lead and Zinc-mining 821

§ 4. Copper—

1. Production 821
2. Sources of Production 822
3. World Production of Copper .. 823
4. Prices 824
5. Employment in Copper-mining .. 824

§ 5. Tin—

1. Production 824
2. Sources of Production 825
3. World Production 825
4. Prices 826
5. Employment in Tin-mining .. 826

§ 6. Zinc—

1. Production : States 826
2. ,, Australia 827
3. World Production 828
4. Prices and Employment 828

§ 7. Iron—

1. General 828
2. Production 829
3. Iron and Steel Bounties 829
4. Production of Iron and Steel—Principal Countries 829

§ 8. Other Metallic Minerals—

PAGE
1. Wolfram and Scheelite 831
2. Cadmium and Cobalt 831
3. Platinum and Platinoid Metals .. 832
4. Other 832

§ 9. Coal—

1. Production in each State 833
2. Distribution and Production of Coal in each State 833
3. Production in Various Countries .. 837
4. Exports 838
5. Consumption in Australia .. 838
6. Prices in Australia 840
7. Prices in New South Wales, Great Britain, Canada and the United States of America 841
8. Employment in Coal-mining .. 841
9. Accidents in Coal-mining .. 841
10. Commonwealth Board of Inquiry into the Coal Mining Industry .. 842
11. Joint Coal Board 842

§ 10. Coke—

1. General 843
2. Production at Coke Works .. 843
3. Total Production, Australia .. 843
§ 11. Other By-products from Coal 844

§ 12. Shale Oil and Mineral Oil—

1. Shale Oil 844
2. Coal Oil 844
3. Natural Oil 845
§ 13. Other Non-metallic Minerals 845

§ 14. Gems and Gemstones—

1. Diamonds 846
2. Sapphires 846
3. Precious Opal 846
4. Other Gems 846

§ 15. Number Engaged, Wages Paid, and Accidents in Mining—

1. Total Employment in Mining .. 847
2. Wages Paid in Mining 848
3. Accidents in Mining 848

§ 16. Government Aid to Mining—

1. Commonwealth 849
2. States 851
§ 17. Metallic Contents of Ores, etc., Produced 852

CHAPTER XIX.—PASTORAL PRODUCTION.

§ 1. Initiation and Growth of Pastoral Industry—

1. General 853
2. Live-stock Numbers since 1860 .. 853
3. Fluctuations 854
4. Live-stock in Relation to Population 854
5. Live-stock in Relation to Area .. 854
6. Minor Classes of Live-stock .. 855
7. Net Exports of Principal Pastoral Products 855
8. Value of Pastoral Production .. 856
9. Consumption of Meats 858
10. Marketing of Meat 858

§ 2. Horses—

1. Suitability of Australia for Horse-breeding 860
2. Distribution throughout Australia .. 860
3. Oversea Trade in Horses 860

§ 3. Cattle—

1. Purposes for which Raised .. 861
2. Distribution throughout Australia .. 861
3. Classification of Cattle according to Purpose 862
4. Comparison with other Countries .. 862
5. Imports and Exports of Cattle .. 863
6. Cattle Slaughtered 864
7. Production of Beef and Veal .. 864
8. Consumption of Beef and Veal .. 864
9. Export of Frozen Beef and Veal .. 865
10. Contract for Purchase of Exportable Surplus 866

§ 4. Sheep—

1. Initiation of the Pastoral Industry .. 866
2. Distribution throughout Australia .. 866
3. Classification of Sheep According to Age, Sex and Breed 867
4. Comparison with other Countries .. 867

CHAPTER XIX.—PASTORAL PRODUCTION—*continued.*

§ 4. Sheep—*continued.*

PAGE
5. Oversea Imports and Exports of Sheep 868
6. Sheep Slaughtered 869
7. Production of Mutton and Lamb .. 869
8. Consumption of Mutton and Lamb .. 869
9. Exports of Frozen Mutton and Lamb 870
10. Contract for Purchase of Exportable Surplus 871

§ 5. Wool—

1. General 871
2. Greasy and Scoured Wool .. 872
3. Production 872
4. Care Needed in Comparing Clips .. 873
5. Average Weights of Fleeces Shorn .. 873
6. World Wool Production 873
7. War-time Contracts 874
8. Australian Wool Realization Commission 875
9. Wool Publicity and Research .. 880

§ 5. Wool—*continued.*

PAGE
10. Consumption of Locally Processed Wool 880
11. Exports of Wool 880
12. Local Sales of Wool 882
13. Value 882
14. United Kingdom Importation of Wool 883
15. Principal Importing Countries and Sources of Supply 884

§ 6. Trade in Hides and Skins—

1. Extent of Trade 884
2. Sheepskins with Wool .. . 884
3. ,, without Wool .. 885
4. Hides 885
5. Other Skins 886
6. Marketing of Hides and Skins .. 886

§ 7. Tallow—

1. Production 888
2. Consumption 888
3. Marketing 888

CHAPTER XX.—AGRICULTURAL PRODUCTION.

§ 1. Introductory 889

§ 2. Progress of Agriculture—

1. Early Records 889
2. Progress of Cultivation 890
3. Area under Sown Pastures .. 890
4. Australian Agricultural Council .. 890

§ 3. Distribution, Production and Value of Crops—

1. Distribution of Crops 891
2. Relative Areas of Crops in States and Territories 891
3. Area of Principal Crops in Australia 892
4. Weights and Measures 892
5. Production of Principal Crops in Australia 893
6. Average Yield per Acre of Principal Crops in Australia 894
7. Gross Value of Agricultural Production in Australia 894
8. Value of Production—Gross and Net 894

§ 4. Wheat—

1. Royal Commission on the Wheat Industry 896
2. Wheat Production Costs Committee 896
3. Licensing of Areas Sown to Wheat, and Acreages Sown 896
4. Survey of Legislation Relating to Wheat Industry . .. 899
5. Wheat Farms 899
6. Area, Production and Average Yield 899
7. Varieties of Wheat Sown 902
8. F.A.Q. Standard of Wheat .. 902
9. Price of Wheat 903
10. Value of the Wheat Crop 904
11. Consumption of Wheat in Australia 904
12. Production and Disposal of Wheat in Australia 905
13. Exports of Wheat and Flour .. 905
14. Stocks of Wheat and Flour .. 907
15. Flour Milling 908
16. Voluntary Wheat Pools 908
17. War-time Marketing of Wheat .. 908
18. Special Tabulation of Wheat Holdings 912
19. World Area and Production of Wheat 912
20. Exports—Principal Countries .. 913
21. Imports— ,, ,, .. 914

§ 5. Oats—

1. Area, Production and Average Yield 915
2. Price of Oats 916
3. Value of Oat Crop 916
4. Imports and Exports 916
5. Oatmeal, etc. 916
6. World Production 916

§ 6. Maize—

1. States Growing Maize 917
2. Area, Production and Average Yield 917
3. Price of Maize 918
4. Value of Crop 918
5. Maize Products 918
6. Oversea Imports and Exports .. 919
7. World Production 919

§ 7. Barley—

1. Area, Production and Average Yield 919
2. Australian Barley Board 922
3. Prices 922
4. Value of Barley Crop 922
5. Imports and Exports 923
6. Malt 923
7. World Production 924
§ 8. Rice 924
§ 9. Sorghum for Grain 925
§ 10. Other Grain and Pulse Crops 926

§ 11. Potatoes—

1. Area, Production and Average Yield 926
2. Gross Value of Potato Crop .. 929
3. Consumption 929
4. Australian Potato Committee .. 929
5. Imports and Exports 930

§ 12. Onions—

1. Area, Production and Average Yield 931
2. Gross Value of Onion Crop .. 932
3. Consumption 932
4. Imports and Exports 932

§ 13. Hay—

1. General 932
2. Value of Hay Crop 934
3. Farm Stocks of Hay 935
4. Imports and Exports 935

CHAPTER XX.—AGRICULTURAL PRODUCTION—*continued*.

§ 14. Green Fodder—

PAGE
1. Nature and Extent 935
2. Value of Green Fodder Crops .. 935

§ 15. Sugar-cane and Sugar-beet—

1. Sugar-cane 935
2. Sugar-beet 940
3. Sugar Bounties 940
4. Sugar Purchase by Commonwealth Government 940
5. Sugar Agreement in Australia—Embargo on Imports, etc. .. 940
6. International Sugar Agreement .. 941
7. Net Return for Sugar Crop .. 941
8. Imports and Exports of Sugar .. 942
9. Sugar By-products 942
10. Sugar Prices 942
11. War and Post-war Arrangements .. 942

§ 16. Vineyards—

1. Progress of Cultivation 943
2. Imports and Exports of Wine .. 945
3. Overseas Marketing of Wine .. 945
4. Other Viticultural Products .. 946
5. Production and Disposal of Dried Vine Fruit 947
6. Exports of Raisins and Currants .. 947
7. War-time Contract 947
8. Post-war Contract 947
9. Overseas Marketing of Dried Fruits 948

§ 17. Orchards and Fruit-Gardens—

1. Area 948
2. Varieties of Crops 949
3. Principal Fruit Crops 950
4. Imports and Exports of Fruit .. 951
5. Marketing of Apples and Pears .. 953
6. Overseas Marketing of Canned Fruit 954

§ 18. Vegetables for Human Consumption—

1. Area and Production of Fresh Vegetables 955
2. Production of Canned Vegetables .. 956
3. Production of Dehydrated Vegetables 956
4. Imports and Exports of Vegetables 957

§ 19. Minor Crops—

PAGE
1. General 957
2. Grass Seed 957
3. Other Grains from Sorghums .. 957
4. Tobacco 958
5. Hops 959
6. Flax 960
7. Peanuts 961
8. Broom Millet 962
9. Nurseries 962
10. Cotton 962
11. Coffee 963
12. Other Crops 963

§ 20. Bounties, etc.—

1. Bounties 964
2. Other Financial Assistance to Primary Producers 964

§ 21. Fertilizers—

1. General 966
2. Fertilizers Acts 967
3. Imports 967
4. Exports 967
5. Quantities Locally Used .. 968
6. Local Production 968

§ 22. Ensilage—

1. Government Assistance in Production 969
2. Quantity Made 969
3. Stocks Held on Farms 969

§ 23. Agricultural Colleges and Experimental Farms 970

§ 24. Employment in Agriculture 970

§ 25. Number and Area of Rural Holdings and Permanent Employment Thereon—

1. General 970
2. Number and Area 970
3. Analysis of Holdings 971
4. Permanent Employment on Rural Holdings 972

CHAPTER XXI.—FARMYARD, DAIRY AND BEE PRODUCTS.

§ 1. Introductory—

1. General 974
2. Mixed Farming 974
3. Employment 974
4. Growth of the Dairying Industry .. 975
5. Official Supervision of the Dairying Industry 975

2. Dairy Cattle and Dairy Products—

1. Dairy Herds 975
2. Factory System 977
3. Butter and Cheese—Stabilization Schemes 977
4. Commonwealth Subsidies .. 977
5. Total Dairy Production 979
6. Whole Milk 980
7. Butter Production 981
8. Cheese Production 982
9. Condensed, Concentrated and Powdered Milk, etc., Production .. 983
10. Local Consumption of Butter and Cheese 983
11. Marketing of Dairy Products .. 984
12. Butter and Cheese Contracts .. 985
13. Oversea Trade in Butter, Cheese and Milk 987

§ 3. Pigs and Pig Products—

1. Pigs 988
2. Pork 989
3. Bacon and Ham 990
4. United Kingdom Contracts .. 991
5. Oversea Trade in Pigs and Pig Products 991

§ 4. Value of Dairy Production (including Pig Farming)—

1. Value of Production—Gross and Net 992
2. Net Value of Production 992

§ 5. Poultry-farming—

1. General 993
2. Numbers of Poultry 993
3. Recorded Production and Disposals of Eggs 993
4. Consumption of Eggs 996
5. Marketing of Eggs 996
6. Oversea Trade in Poultry Products 998
7. Value of Poultry Products—Gross and Net 1000

§ 6. Bee-farming—

1. General 1001
2. Production of Honey and Bees-wax 1001
3. Value of Production—Gross and Net 1002
4. Oversea Trade in Bee Products .. 1003

§ 7. Exports of Australian Farmyard, Dairy and Bee Products 1004

§ 8. British Imports of Dairy and Farmyard Products—

1. Summary, Principal Products .. 1005
2. Butter 1005
3. Cheese 1006
4. Bacon and Ham 1006
5. Pork 1006
6. Eggs 1006
7. Milk Products 1006
8. Other Products 1006

CHAPTER XXII.—FORESTRY.

PAGE

§ 1. General—
1. Objects of Forestry 1007
2. General Account of Forests and Timbers 1007
3. Extent of Forests 1009
4. Forest Reservations 1010
5. Plantations 1010

§ 2. Forestry Activities of the Commonwealth—
1. General 1011
2. Commonwealth Forestry Bureau ..1011
3. Wartime Control of Timber ..1011
4. Forestry and Timber Bureau ..1012
5. The Australian Forestry School ..1012

§ 3. Forest Congresses 1013

§ 4. State Forestry Departments—
1. Functions 1013
2. Forest Reservations 1014
3. Reforestation, Afforestation, etc. ..1014
4. Revenue and Expenditure ..1015

PAGE

§ 5. Forestry Production—
1. Timber 1015
2. Paper and Wood Pulp 1017
3. Other Forest Products 1018
4. Value of Production—Gross and Net 1019
5. Employment 1020

§ 6. Commercial Uses of Principal Australian Timbers—
1. General 1021
2. Nomenclature of Australian Timbers1021

§ 7. Oversea Trade—
1. Imports 1021
2. Exports 1022
3. Classification of Imports and Exports.. 1023

CHAPTER XXIII.—FISHERIES.

§ 1. General—
1. Fish Stocks 1026
2. Fishing Areas 1026
3. „ Boats and Equipment ..1026
4. Administration 1027

§ 2. Development and Present Condition of the Fishery—
1. Fisheries Proper 1027
2. Oysters and Shell Fisheries ..1028
3. Pearl-shell and Bêche-de-mer ..1028

3. Marketing and Distribution—
1. Marketing 1028
2. Consumption of Fish 1029
3. Processing, including Canning ..1029
4. By-products 1029

§ 4. Inquiries and Research—
1. General 1029
2. Conference-1927–1929 1029
3. Council for Scientific and Industrial Research, Division of Fisheries ..1030

§ 4. Inquiries and Research—*continued.*
4. Tariff Board Inquiry 1030
5. War-time Control 1030
6. Commonwealth Fisheries Authority 1031
7. Pearl-shell Fishery, Royal Commission 1031
8. Pearl-shell Fishery, Tariff Board Inquiry 1031
9. North Australia Development Committee 1031

§ 5. The Fishing Industry—
1. Boats and Men Engaged, and Take1032
2. Value of Production—Gross and Local 1034
3. Fish Preserving 1035
4. State Revenue from Fisheries ..1036

§ 6. Oversea Trade in Fishery Products—
1. Imports of Fish 1037
2. Exports of Fish 1038
3. „ Pearl and Other Shell..1038

CHAPTER XXIV.—MANUFACTURING INDUSTRY.

§ 1. Number of Factories—
1. Number of Factories in each State..1039
2. „ „ „ Industrial Classes ..1039

§ 2. Classification of Factories according to Number of Persons Engaged—
1. General 1040
2. States 1040
3. Australia 1041

§ 3. Power Equipment in Factories—
1. General 1042
2. Rated Horse-power of Engines in Factories other than Central Electric Stations 1042
3. Rated Horse-power of Engines Ordinarily In Use 1042
4. Capacity of Engines and Generators installed in Central Electric Stations 1044

§ 4. Employment in Factories—
1. Number Engaged 1044
2. Rates of Increase 1046
3. Persons Engaged in Classes of Industry 1046
4. Persons Engaged According to Grade of Employment 1047
5. Monthly Employment 1048
6. Distribution of Employees According to Age 1049

§ 5. Sex Distribution in Factories—
1. Distribution according to Sex of Persons Engaged 1050
2. Rate of Variation for each Sex ..1051
3. Masculinity of Persons Engaged in Factories 1051
4. Employment of Females in Particular Industries 1052

§ 6. Child Labour in Factories—
1. Conditions of Child Labour ..1053
2. Number of Children Engaged ..1053
3. Percentage of Children on Total Number of Persons Engaged ..1053
4. Industries Employing Child Labour1054
5. Apprenticeship 1054

§ 7. Salaries and Wages Paid and Value of Production—
1. General 1055
2. Salaries and Wages Paid.. ..1055
3. Power, Fuel and Light Used ..1059
4. Value of Materials Used 1060
5. Value of Output 1061
6. „ Production 1062
7. „ Output and Cost of Production 1063

§ 8. Value of Land, Buildings, Plant and Machinery—
1. General 1064
2. Value of Land and Buildings ..1064
3. „ Plant and Machinery ..1066
4. Depreciation of Land and Buildings and Plant and Machinery ..1067

§ 9. Individual Industries—
1. General 1068
2–41. Industries 1069–1094

CHAPTER XXV.—WATER CONSERVATION AND IRRIGATION.

PAGE

THE CONSERVATION AND USE OF WATER IN AUSTRALIA.

§ 1. Geographical and Climatic Factors—
1. General 1096
2. Topographical 1096
3. River Pattern 1096
4. Climate and Settlement 1096

§ 2. Water Resources and their Utilization—
1. Surface Supplies 1097
2. Irrigation 1097
3. Preservation of Catchments ..1100
4. Hydro-electric Power 1101
5. Sub-surface Supplies 1101
6. Industrial, Metropolitan and Country Town Supplies ..1105

§ 3. National and Interstate Aspects—
1. Constitutional Phases 1105
2. Murray River Scheme 1106
3. New South Wales—Queensland Border Agreement 1108
4. Snowy River Scheme 1109
5. Australian Pattern Summarized ..1110

§ 4. States and Territories—
1. New South Wales 1110
2. Victoria 1117
3. Queensland 1122
4. South Australia 1129
5. Western Australia 1133
6. Tasmania 1136
7. Northern Territory 1138
8. Papua and New Guinea 1139

§ 5. Select Bibliography 1140

CHAPTER XXVI.—DEFENCE.

§ 1. Department of Defence—
1. Introduction 1142
2. Post-war Functions and Organization 1142
3. Post-war Defence Policy.. ..1143
4. Co-operation in British Commonwealth Defence 1144
5. Australian Participation in the Occupation of Japan 1144

§ 2. Military Defence—
1. State Systems 1145
2. Commonwealth Systems 1145
3. British Commonwealth Occupation Force 1149
4. 1939–45 War 1150

§ 3. Naval Defence—
1. State Systems 1150
2. The Present System 1150
3. Ships of the Royal Australian Navy1152
4. Strength of Royal Australian Navy1154
5. Casualties, 1939–45 War.. ..1154
6. Decorations and Awards, 1939–45 War 1154

§ 4. Air Defence—
1. General 1154
2. Administration and Organization..1154
3. Aircraft 1155
4. Establishment 1155

(a) Owing to variation in classification effective comparison is impossible. (b) Australian produce, except gold which includes re-exports. Australian currency values. (c) In terms of greasy. (d) Includes copper base alloys. (e) Figures for first three years are averages for the December quarter; the remainder for the June quarter. All cheque-paying banks prior to 1931–32, nine trading banks only thereafter. (f) Decrease due to prohibition of re-issue. (g) Includes Commonwealth Savings Bank deposits. (h) First three years at 31st December; remainder 30th June.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTE.—The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

Year.

1788 N.S.W.—Arrival of "First Fleet" at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove. Formal proclamation of colony on 7th February. Branch Settlement established at Norfolk Island. French navigator Lapérouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.

1789 N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River.

1790 N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.

1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.

1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.

1793 N.S.W.—First free immigrants arrived in the *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.

1794 N.S.W.—Establishment of settlement at Hawkesbury River.

1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.

1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.

1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.

1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.

1800 N.S.W.—Hunter River coal-mines worked. First Customs House in Australia established at Sydney. Flinders' charts published.

1801 N.S.W.—First colonial manufacture of blankets and linen.

1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders.

1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of "The Sydney Gazette", first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.

1804 N.S.W.—Insurrection of convicts at Castle Hill. Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins, and at Yorktown by Colonel Paterson.

1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur. Portion of settlers from Norfolk Island transferred to Tasmania.

1806 N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.

1807 N.S.W.—Final transfer of convicts from Norfolk Island. First shipment of merchantable wool (245 lb.) to England.

1808 N.S.W.—Deposition of Governor Bligh.

1809 N.S.W.—Free school established.

1810 N.S.W.—Post Office officially established at Sydney, Isaac Nichols first postmaster. First race meeting in Australia at Hyde Park, Sydney. Tas.—First Tasmanian newspaper printed.

1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson and Blaxland. Macquarie River discovered by Evans.

1814 N.S.W.—Flinders suggested the name "Australia", instead of "New Holland". Creation of Civil Courts.

1815 N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.

Year.

1816 N.S.W.—Sydney Hospital opened.

1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.

1818 N.S.W.—Liverpool Plains, and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington by Captain King.

1819 N.S.W.—First Savings Bank in Australia opened at Sydney.

1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks

1821 Tas.—Establishment of penal settlement at Macquarie Harbour.

1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.

1824 N.S.W.—Constituted a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas Settlement formed at Melville Island, N. Terr.

1825 N.S.W.—Extension of western boundary to 129th meridan. Tas.—Van Diemen's Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.

1826 N.S.W.—Settlement in Illawarra District. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.

1827 N.S.W.—Colony became self-supporting. Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military Settlement founded at King George's Sound by Major Lockyer. First official claim of British Sovereignty over all Australia.

1828 N.S.W.—Second constitution. First Census. Sturt's expedition down Darling River. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs, and explored Brisbane River.

1829 N.S.W.—Sturt's expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.

1830 N.S.W.—Insurrection of convicts at Bathurst. Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Trouble with natives. Black line organized to force aborigines into Tasman's Peninsula, but failed. Between 1830 and 1835, however, George Robinson, by friendly suasion, succeeded in gathering the small remnant of aborigines (203) into settlement on Flinders Island.

1831 N.S.W.—Crown lands first disposed of at auction. Mitchell's explorations north of Liverpool Plains. Arrival at Sydney of first steamer, *Sophia Jane*, from England. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield's first colonization committee. W.A.—Appointment of Executive and Legislative Councils.

1832 N.S.W.—State Savings Bank established.

1833 N.S.W.—First School of Arts established at Sydney.

1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Bros. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarrah for continued attacks on settlers.

1835 Vic.—John Batman arrived at Port Phillip; made treaty with the natives for 600,000 acres of land; claim afterwards disallowed by Imperial Government. Foundation of Melbourne.

1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland. Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.

Year.	
1837	N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—Melbourne named by Governor Bourke. First overlanders from Sydney arrived at Port Phillip.
1838	N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—"Overlanding" of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
1839	N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
1840	N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payments for public works and expenditure on immigration. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George's Sound.
1841	N.S.W.—Gold found near Hartley by Rev. W. B. Clarke. W.A.—Completion of Eyre's overland journey from Adelaide to King George's Sound. Tas.—Renewal of transportation. New Zealand proclaimed a separate colony.
1842	N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
1843	N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
1844	Qld.—Leichhardt's expedition to Port Essington. S.A.—Sturt's last expedition inland.
1845	N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.
1846	N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia. W.A.—Foundation of New Norcia (Benedictine) Mission.
1847	N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
1848	N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds.
1849	N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignation of convicts per *Hashemy* to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
1850	N.S.W.—Final abolition of transportation. First sod of first Australian railway turned at Sydney. Sydney University founded. Vic.—Gold discovered at Clunes by Hon. W. Campbell. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
1851	N.S.W.—Payable gold discovered by Hargraves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. "Black Thursday," 6th Feb., a day of intense heat. W.A.—Proclamation of Legislative Council Act.
1852	N.S.W.—Arrival of the *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascended the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs
1853	Tas.—Abolition of transportation. Vic.—Melbourne University founded.

Year.

1854 Vic.—Opening of first Victorian railway—Flinders-street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.

1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).

1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.

1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoona gold rush.

1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.

1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent and named "Central Mount Stuart".

1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.

1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.

1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.

1864 Qld.—First railway begun and opened. First sugar made from Queensland cane. Tas.—First successful shipment of English salmon ova.

1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. S.A.—Introduction of camels for exploration, etc.

1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.

1868 W.A.—Arrival of the *Hougomont*, last convict ship. Tas.—First sod of first railway (Launceston and Western) turned by Duke of Edinburgh.

1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.

1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of transcontinental telegraph.

1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff. Launceston-Western Railway opened for traffic.

1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.

1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.

1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison. S.A.—University of Adelaide founded.

1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.

1876 N.S.W.—Completion of cable—Sydney (La Perouse) to Wellington (Wakapuaka). W.A.—Giles crossed colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aborigines.

1877 W.A.—Opening of telegraphic communication with South Australia.

1878 Qld.—Restriction of Chinese immigration.
Introduction of telephone into Australia.

1879 N.S.W.—First artesian bore at Killara. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.

Year.	
1880	N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne. Federal Conference at Melbourne and Sydney.
1881	N.S.W.—Further restrictions on Chinese immigration. Visit to Australia of T.R.H. Prince Albert Victor and Prince George. First Australia-wide censuses taken on same date.
1882	W.A.—Nugget of gold found between Roebourne and Cossack.
1883	N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities. Federal Conference held at Sydney. Federal Council created.
1884	Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.
1885	N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
1886	Tas.—Discovery of gold and copper at Mount Lyell. First session of Federal Council met at Hobart on 26th January.
1887	W.A.—Cyclone destroyed nearly the whole pearling fleet off the Ninety-Mile Beach, 200 lives lost. Gold discovered at Southern Cross. First "Colonial" Conference in London. Australasian Naval Defence Force Act passed.
1888	N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100. Qld.—Railway communication opened between Sydney and Brisbane. Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney.
1889	Qld.—Direct railway communication established between Brisbane and Adelaide. W.A.—Framing of new Constitution. Tas.—University of Tasmania founded.
1890	W.A.—Responsible Government granted. Meeting at Melbourne of Australasian Federation Conference.
1891	N.S.W.—Election to Legislative Assembly of 35 Labour members. Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison. First Federal Convention in Sydney, draft bill framed and adopted.
1892	W.A.—Discovery of gold by Messrs. Bayley and Ford at Coolgardie.
1893	N.S.W.—Departure by the *Royal Tar* of colonists for "New Australia". Financial crisis, chiefly affecting the eastern States.
1895	N.S.W—Free-trade tariff. Land and income taxes introduced. Conference of Premiers on Federation at Hobart.
1896	N.S.W.—People's Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
1897–8	Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
1898	N.S.W.—First time production of wheat exceeded consumption. Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
1899	First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).
1900	N.S.W.—Old-age pensions instituted. Contingents of naval troops sent to China. Commonwealth Constitution Act received Royal Assent, 9th July. Proclamation of Commonwealth signed, 17th September. Mr. (afterwards Sir) Edmund Barton formed first Federal Ministry.
1901	Proclamation of the Commonwealth at Sydney. First Federal Parliament opened at Melbourne by the Duke of Cornwall and York. Interstate free-trade established. Old-age pensions instituted in Victoria.

Year.	
1902	Opening of pumping station at Northam (W.A.) in connexion with Gold-fields water supply. Completion of Pacific Cable (all-British). First Federal Tariff.
1903	Coolgardie and Kalgoorlie Water Supply Scheme completed. Inauguration of the Federal High Court.
1904	Commonwealth Conciliation and Arbitration Act.
1905	Re-introduction of assisted immigration in New South Wales.
1906	Wireless telegraphy installed between Queenscliff, Vic., and Devonport, Tas. Papua taken over by Commonwealth. Excise Tariff Act imposed duties on agricultural machinery except when manufactured "under conditions as to the remuneration of labour which are declared . . . . to be fair and reasonable . . . . . ."
1907	First telephone trunk line service between Capital Cities, i.e., Sydney and Melbourne. Imperial Conference in London. Declaration of first basic wage in "Harvester Judgment".
1908	Canberra chosen as site of Australian Capital.
1909	Imperial Defence Conference in London—Commonwealth ordered two destroyers and one first-class cruiser for fleet unit. Visit of Lord Kitchener to report and advise on Australian military defence. Queensland University founded.
1910	Penny Postage. Arrival of *Yarra* and *Parramatta*, first vessels built for the Royal Australian Navy. Australian Notes Act passed and first Commonwealth notes issued. Admiral Sir R. Henderson visited Australia to advise on naval defence.
1911	First Federal Census. Transfer of Australian Capital Territory and Northern Territory to Commonwealth. Introduction of compulsory military training. Establishment of penny postage to all parts of British Empire. University of Western Australia founded.
1912	Opening of Commonwealth Bank. First payments of Maternity Bonus. First sod turned at Port Augusta of Trans-Australian Railway (Port Augusta to Kalgoorlie).
1913	Australian Capital named Canberra and foundation stone laid. Appointment of Interstate Commission.
1914	Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Federal Parliament. Visit of British Association for the Advancement of Science. Transfer of Norfolk Island to Commonwealth. European War declared 4th August. Australian Navy transferred to British Navy. Australian offer to equip and furnish 20,000 troops accepted. German possessions in South-West Pacific seized by Australian Naval and Military Expeditionary Force. German cruiser *Emden* destroyed by H.M.A.S. *Sydney* at Cocos Islands, 9th November. First contingent landed in Egypt. Australian and New Zealand Army Corps (A.N.Z.A.C.) formed under Sir William Birdwood.
1915	Opening of Broken Hill Proprietary's Ironworks at Newcastle, N.S.W. Navy Department created. Defeat of Third Fisher Government. Hughes Ministry formed. Australian and New Zealand troops landed at Gallipoli, 25th April. Evacuation, 18th–20th December. Australian warships with Grand Fleet, in Atlantic, Malaysia and elsewhere overseas during remainder of war.
1916	Purchase of steamships by the Commonwealth. Australian and New Zealand mounted troops organized in mounted divisions and camel corps, operating thereafter in Egypt, Palestine and Syria. Other troops transferred to France. First proposal for compulsory military service defeated by referendum.
1917	National Ministry formed under Rt. Hon. W. M. Hughes. Kalgoorlie-Port Augusta railway completed. Australian Flying Corps operating with R.F.C. in Palestine and France. Second proposal for compulsory military service defeated by referendum.

Year.	
1918	Population of Australia reached 5,000,000. Australia House (Strand, London) opened by the King. Five Australian divisions in France formed into army corps, 1st January. Armistice with Germany, 11th November. Repatriation Commission created.
1919	Messrs. Hughes and Cook represented Australia at Peace Conference. Return of Australian troops. Flight England to Australia by Capt. Sir Ross Smith and Lieut. Sir Keith Smith. Peace Treaty signed at Versailles, 28th June.
1920	Visit to Australia of H.R.H. the Prince of Wales.
1921	Second Commonwealth Census. Mandate given to Australia over Territory of New Guinea. First direct wireless press message, England to Australia.
1922	First lock on River Murray opened at Blanchetown, South Australia. Queensland Legislative Council abolished.
1923	First sod turned on the site of Federal Parliament House at Canberra.
1924	Directorate of Commonwealth Bank appointed. Australian Loan Council formed.
1925	Solar Observatory established at Canberra. Brisbane–Grafton railway joining Sydney and Brisbane by uniform gauge was commenced. Sydney Harbour Bridge commenced.
1926	Population of Australia reached 6,000,000. Council for Scientific and Industrial Research established. Imperial Conference. Dominion Status defined.
1927	Transfer of Seat of Commonwealth Government from Melbourne to Canberra. New Parliament House opened by H.R.H. the Duke of York. Beam wireless established.
1928	Visit of British Economic Mission to report on the development of Australian resources. Financial agreement of Commonwealth and States: referendum carried.
1929	Commonwealth Bank empowered to mobilize gold reserve. Substantial export of gold reserves towards end of year.
1930	Wireless phone service with other countries inaugurated. Export prices fell to half 1928 level. Cessation of oversea loans. Tariff embargoes and rationing of imports. Visit of Sir Otto Niemeyer, of Bank of England, to discuss financial questions. Heavy export on gold reserves. Exchange Pool formed. Gold bonus granted. First Australian—Right Hon. Sir Isaac Alfred Isaacs, G.C.M.G., Chief Justice of the High Court—appointed Governor-General of Australia. Telephone trunk line service established between Adelaide and Perth linking up the whole of the mainland States by telephone.
1931	Depression continues. Exchange rate at 130 in January; 10 per cent. cut in Federal basic wage. First experimental air mail England to Australia and return. Initiation of Premiers' Conference plan to meet the financial situation. Commonwealth Bank Act amended to provide for temporary lower reserve against notes; substantial export of gold reserves. England departed from gold standard in September; depreciation of Australian £1 on Sterling continued. Wheat bounty granted. Commonwealth Bank assumed control of exchange rate and lowered it to 125.
1932	Sydney Harbour Bridge opened. Australian Broadcasting Commission established. Lang Ministry dismissed in New South Wales. Emergency restrictions on imports relaxed. Legislation passed enabling note reserve to be held in sterling securities; subsequently gold was shipped to the United Kingdom. Imperial Economic Conference at Ottawa, with consequential tariff agreements.
1933	Third Commonwealth Census. World Economic Conference in London. Australia elected as a non-permanent member of Council of League of Nations. Secession Referendum carried (Western Australia). Referendum carried for reduction and limitation of number of members of Legislative Council (New South Wales). Antarctica and Ashmore and Cartier Islands taken over by the Commonwealth.

Year.

1934 Visit of H.R.H. the Duke of Gloucester to open Victorian Centenary Celebrations. Goodwill Mission to the East—Leader Rt. Hon. J. G. Latham. Record flight from England to Australia by Messrs. Scott and Black (Centenary Air Race) in 71 hours. Inauguration of England–Australia Air Mail Service.

1935 Empire Statistical Conference at Ottawa. Japanese Goodwill Mission to Australia.

1936 Trade dispute with Japan. Joint Commonwealth and State Marketing Schemes invalidated by decision of the Privy Council in the James case. Tasmania linked with mainland by submarine telephone cable.

1937 Imperial Conference in London. Commonwealth basic wage "Prosperity" loading of 5s. per week. Report of the Royal Commission on Monetary and Banking Systems in Australia.

1938 Australian Trade Delegation to review Ottawa Agreement. New Defence Programme involving expenditure of £63,000,000 over three years; militia forces to be raised to 70,000. New Trade Treaty with Japan.

1939 Death of the Rt. Hon. J. A. Lyons, Prime Minister. National Register and Wealth Census. War declared on Germany, 3rd September, by Britain and France after invasion of Poland. Prime Minister declared Australia at war on same date. Royal Australian Navy placed at disposal of Great Britain, 2nd September.

Middle East Campaign. Advance party of Australians embarked for Middle East, 15th December.

1940 Exchange of Ministers between Australia and United States of America. Appointment of Australian Minister to Japan. Exchange of High Commissioners between Australia and Canada. Population of Australia reached 7,000,000. Naval Dock commenced at Sydney. Petrol rationing introduced.

Cruiser *Sydney* crippled Italian cruiser *Bartolomeo Colleoni.*

Middle East Campaign. First Australian convoy (6th Australian Division) sailed for Middle East, 11th January.

1941 Appointment of Japanese Minister to Australia. Prime Minister's visit to London. Establishment of Commonwealth Child Endowment Scheme. Cessation of commercial relations between Australia and Japan. Exchange of Ministers between Australia and China. United States Congress passed Lend-Lease Bill. Atlantic Charter signed by Mr. Roosevelt and Mr. Churchill. Japanese attack on Pearl Harbour. Australia declared war on Japan, 9th December.

Australian destroyers in "Tobruk Ferry Run". *Sydney* lost after fight with *Steiermark.* R.A.A.F. in defence of Britain, in Middle East and at Singapore.

Middle East Campaign. Bardia, Tobruk, Derna, Benghazi, Giarabub (North Africa) captured, 5th January–21st March. British and Australians commenced withdrawal from area of El Agheila, 24th March. First engagement of Australian and German forces on Greek front, 10th April. Evacuation of Greece and Crete (April–May). Syrian Campaign, 8th June–12th July.

Malayan Campaign. Arrival of units of Eighth Australian Division in Malaya, 18th February.

1942 Darwin bombed. United States armed forces land in Australia. General Douglas MacArthur Supreme Commander of Allied Forces in South-west Pacific. Federal uniform taxation adopted. Commonwealth widows' pensions introduced. Japanese submarines sunk in Sydney Harbour. Rationing of commodities. Exchange of Ministers between Netherlands, Union of Soviet Socialist Republics and Australia. Constitutional Convention held in Canberra —Bill approved for reference to Commonwealth by States of powers to make laws in relation to post-war reconstruction.

Middle East Campaign. Ninth Australian Division launched first attack in British thrust at El Alamein (North Africa), 23rd October.

Malayan Campaign. First contact of Australian troops with Japanese, 14th January. Fall of Singapore, 15th February. R.A.N. suffered severely under almost constant Japanese air, submarine and surface attacks, while engaged in minesweeping, anti-submarine protection, patrolling and convoy escort work in Malayan waters.

Year.

1942— *contd.* *South-west Pacific Campaign.* Japanese landed at Rabaul, 23rd January; Java, 27th February; Lae, Salamaua, Finschhafen (New Guinea), 7th–10th March. R.A.A.F. at Port Moresby and Milne Bay. Australian cruisers in Coral Sea Battle (May). First contact between Australian and Japanese ground troops at Awala, 23rd July. Australians withdrew from Kokoda, 10th August. Australian cruisers lead attack on Solomon Islands (August). Japanese forced to withdraw from Milne Bay, 5th September. Australians recaptured Kokoda and Gorari, and captured Oivi, Wairopi, Gona, 2nd November–9th December.

1943 National Register of Civilians. High Commissioners appointed to India and New Zealand. Price Stabilization Scheme. Mortgage Bank Department of Commonwealth Bank opened. National Works Council formed.

South-west Pacific Campaign. Australians and Americans took Buna, 2nd January; Sananda, 22nd January. Australians counter-attacked at Wau and began drive to Salamaua, 3rd February. Australian and American paratroops, Australian artillery, engineers and pioneers took Nadzab, 5th September. Aerial movement of Australian troops into Markham Valley began 7th September. Australians captured Salamaua, Lae, Finschhafen, Dumpu, Satelberg Heights, Wareo, 11th September–8th December. Commencement in December of long series of amphibious operations in which R.A.N. ships of all types took part.

R.A.A.F. from 1943 till end of war operated on all fronts.

New Federal electoral boundaries approved by Parliament. International Trade Organization Act assented to. Nationality and Citizenship Act to confer on Australians the status of Australian citizens in addition to that of British subjects assented to. Defence (Transitional Provisions) Act, Parliamentary Retiring Allowances Act (to provide for pension of £8 per week), and National Health Service Act assented to.

OFFICIAL YEAR BOOK

OF THE

COMMONWEALTH OF AUSTRALIA, 1946 AND 1947.

CHAPTER I.

DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

§ 1. Early Knowledge and Discovery of Australia.

1. **Introduction.**—Only a brief summary of the more important facts relating to the early history of Australian discovery is given in this Chapter. A more complete account of this subject, together with bibliographical references thereto, may be found in Official Year Book No. 1 (pp. 45–51), although this account must be modified somewhat in view of later investigations.

2. **Early Tradition.**—It would appear that there was an early Chaldean tradition as to the existence of an Austral land to the south of India. Rumours to that effect in the course of time found their way to Europe, and were probably spread by travellers from Indian seas, more especially by the Greek soldiers who accompanied Alexander the Great [356–323 B.C.] to India. References to this *Terra Australis* are found in the works of Ælianus [A.D. 205–234], Manilius [probably a contemporary of Augustus or Tiberius Cæsar], and Ptolemy [A.D. 107–161]. In some of the maps of the first period of the Middle Ages there is evidence which might warrant the supposition of the knowledge of the existence of a *Terra Australis*, while some idea of the Austral land appears in the maps and manuscripts of the fourteenth and fifteenth centuries. But much of the map-drawing in these early days was more or less fanciful, and there is no evidence definitely connecting this so-called *Terra Australis* with Australia.

3. **Discovery of Australia.**—(i) *General.* The Venetian traveller Marco Polo [1254–1324] refers to a land called Locac, which through a misunderstanding of his meaning was long thought to be Australia. But Marco Polo knew nothing of any land to the south of Java, and in any case the description given of the so-called Locac could not possibly be applied to Australia, as the writer speaks of elephants, etc. On a Mappamundi in the British Museum, of not later date than 1489, there is a coast-line which has been considered to represent the west coast of Australia. Investigation by Wood and others proves this claim to be merely fanciful. Martin Behaim's globe, the oldest known globe extant, constructed in 1492, also shows what purports to be a part of Australia's coast-line, and a globe discovered in Paris bears an inscription to the effect that the *Terra Australis* was discovered in 1499. These also have other countries located in impossible positions. The term *Terra Australis* was, however, also applied to the region now known as Tierra del Fuego, hence little weight can be attached to this reference.

In the Dauphin map [about 1530–1536] Java la Grande has been supposed by some to represent Australia, but an inspection of the unreal animals and other figures thereon lends no weight to the idea. As a matter of fact much of this map drawing was simply an attempt to support the old notion that the land surface of the southern hemisphere must balance that of the northern.

(ii) *Arab Expeditions* It has been stated that the Arabs had come to Australia long before the Portuguese, the Spaniards or the Dutch, but there is no evidence to support the statement.

(iii) *Spanish and Portuguese Expeditions.* The last decade of the fifteenth century and the commencement of the sixteenth saw numerous expeditions equipped in the ports of Spain and Portugal for the purpose of exploiting the new world. The Portuguese rounded the Cape of Good Hope in 1487 and eleven years later pushed eastward to India. The Spaniards, relying on the scientific conclusion that the world was spherical, attempted to get to the East by deliberately starting out west, Magalhaens by so doing reaching the Philippine Islands in 1521.

In 1606 Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought that he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo.* After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian Continent, but no mention is made of this fact in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(iv) *Discoveries by the Dutch.* With the decline of Portuguese and Spanish naval supremacy came the opportunity of the Dutch for discovery. Cornelius Wytfliet's map, of which there was an English edition, published in Louvain in 1597, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria. The following oft-quoted passage occurs in Wytfliet's *Descriptionis Ptolemaicae Augmentum:* "The *Australis Terra* is the most southern of all lands. It is separated from New Guinea by a narrow strait. Its shores are hitherto but little known, since after one voyage and another, that route has been deserted and seldom is the country visited, unless when sailors are driven there by storms. The *Australis Terra* begins at one or two degrees from the equator, and is maintained by some to be so great in extent that, if it were thoroughly explored, it would be regarded as a fifth part of the world." According to Wood this passage has its origin in the voyages through the straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam to explore the islands of New Guinea. During March, 1606 the *Duyfken* coasted along the southern shores of New Guinea, and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again). Dirck Hartogs (on the plate in the Amsterdam Museum recording his voyage the name is written Dirck Hatichs), in the *Eendracht* in 1616, sailed along a considerable part of the west coast of the continent. It may be mentioned that the route was not definitely selected, but that the navigator simply went farther east than the usual course from the Cape to Java.

In 1618 the *Zeewolf* found land in latitude 20° 15′ south, and in the following year Frederik Houtman discovered the reef of the west coast, now known as *Houtman's Abrolhos.*

In 1622 the Dutch vessel *Leeuwin* rounded the Cape, which now bears that name, at the south-west of the continent, and in 1623 the Dutch vessels *Pera* and *Arnhem* discovered Arnhem Land, the peninsula on the western side of the Gulf of Carpentaria, which was so named in compliment to Peter Carpentier, Governor of the Dutch East India Company.

In 1627, Francis Thysz, Commander of the *Gulde Zeepaerd*, with Pieter Nuyts, of the Dutch Council of Seventeen, on board, coasted along a portion of the shore of the Great Australian Bight. In 1628, De Witt, Commander of the *Vianen*, discovered land on the north-west, namely, in about latitude 21° S. The *Batavia*, commanded by Francis Pelsart, was wrecked on the western coast of Australia in 1629. Pelsart was the first to carry to Europe an authentic account of the west coast of Australia, which, however, he described in the most unfavourable terms. The yachts *Amsterdam* and *Wesel*, under Gerrit Pool, visited the Gulf of Carpentaria in 1636.

Abel Janszoon Tasman, in command of two vessels, the *Heemskerck* and *Zeehan*, set out from Batavia in 1642 to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644, Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far down as the tropic of Capricorn.

William de Vlamingh landed at the mouth of the Swan River at the end of 1696 and an exploring squadron under Martin Van Delft explored and named part of the north-west coast in 1705, but the period of Dutch discoveries may be said to have ended with Tasman's second voyage, and, with the decline of her maritime power, the Dutch interest in Australian discovery disappeared.

4. **Discoveries by the English.**—In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnet*, a trading vessel whose crew had turned buccaneers. In describing the country, Dampier stated that he was certain that it joined neither Asia, Africa nor America. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

It was a question at the end of the seventeenth century whether Tasmania and New Zealand were parts of Australia, or whether they were separated from it, but themselves formed part of a great Antarctic Continent. Lieutenant James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Otaheite, had also for its objective to ascertain whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden, carrying about 85 persons, and accompanied by Sir Joseph Banks, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Otaheite, turned towards New Zealand, sighting that land on 7th October, 1769, in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772, Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertaining whether a great southern continent existed, and having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Flinders and Bass in 1798.

§ 2. The Annexation of Australia.

1. **Annexation of Eastern Part of Australia, 1770.**—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770, that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession "of the whole eastern coast, from latitude 38° to this place, latitude 10½° S., in right of His Majesty King George the Third." Cook, however, proclaimed British sovereignty only over what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip's Commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the "First Fleet."

A full historical account of the period referred to may be found in the *Historical Records of New South Wales* Vol. 1., parts 1 and 2.

2. **Original Extent of New South Wales.**—The Commission appointed Phillip "Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south, and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south."

Although in November, 1769, Captain Cook had taken possession of the North Island of New Zealand, and in January, 1770, also of the South Island, it is a matter of doubt whether, at the time when Captain Phillip's commission was drawn up, New Zealand was considered as one of the "islands adjacent in the Pacific Ocean." The facts that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, while in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have unequivocally become British territory until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February, the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. **Extension of New South Wales Westward, 1825.**—On 17th February, 1824, Earl Bathurst advised Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824, of the coast from the 135th to the 129th degree of east longitude. On 16th July, 1825, the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. **Annexation of Western Australia, 1827.**—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George III. Sound, sailed from Sydney on 9th November, 1826, landed at the Sound on 26th December following, and hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George's Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country," urging its occupation for the purpose of settlement. He left England in July, 1827, continuing his advocacy—notwithstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being mainly due to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River,

again asserting possession of "all that part of New Holland, which is not included within the territory of New South Wales." Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

§ 3. The Creation of the Several Colonies.

1. **New South Wales.**—In Governor Phillip's commission of 1786, the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not till 1798 that the contrary was known. In that year, by sailing through Bass Strait, Flinders and Bass proved that it was an island. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

2. **Tasmania.**—In 1825, Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

3. **Western Australia.**—The territory westward of the 129th meridian comprising 975,920 square miles was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, though until 1831 the settlement on King George's Sound remained under the latter jurisdiction.

4. **South Australia.**—On 15th August, 1834, the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province," and towards the end of the year 1836 settlement took place. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude, and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by the authority of the Imperial Act 24 and 25 Vic., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory comprising 523,620 square miles was, by letters patent, brought under the jurisdiction of South Australia, which therefore controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales, was, by letters patent of 16th November of that year, constituted a separate colony under the powers of the Act 3 and 4 Vic., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851, what was known as the "Port Phillip District" of New South Wales, was constituted the colony of Victoria, "bounded on the north and northwest by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia." The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland, by letters patent dated 6th June, 1859, although separation from New South Wales was not consummated until 10th

December, of the same year, upon the assumption of office of the first Governor. The territory comprised in the new colony was so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8′ south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition the area of Queensland became 670,500 square miles.

§ 4. Establishment of the Commonwealth of Australia.

1. **General.**—On 1st January, 1901, the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed into that of "States." The total area of the Commonwealth of Australia is 2,974,581 square miles. The dates of creation and the areas of its component parts, as determined on the final adjustment of their boundaries, are shown below :—

THE COMMONWEALTH OF AUSTRALIA : AREA, ETC., OF COMPONENT PARTS.

State.	Year of Formation into Separate Colony.	Present Area in Square Miles.	State.	Year of Formation into Separate Colony.	Present Area in Square Miles.
New South Wales(*a*)	1786	310,372	Tasmania ..	1825	26,215
Victoria ..	1851	87,884	Northern Territory	1863	523,620
Queensland ..	1859	670,500			
South Australia ..	1834	380,070	Area of the Commonwealth ..	..	2,974,581
Western Australia	1829	975,920			

(*a*) Including the Australian Capital Territory embracing an area of 911 square miles, and 28 square miles at Jervis Bay. See par. 3 below.

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907, the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory Surrender Act 1907 (assented to on 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the seat of Government of the Commonwealth. In December, 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the Jervis Bay

Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Transfer of British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles.

5. **Transfer of Norfolk Island.**—Although administered for many years by the Government of New South Wales, this Island was a separate Crown Colony until 1st July, 1914, when it was transferred to the Commonwealth under the authority of the Norfolk Island Act 1913. The Island is situated in latitude 29° 3′ 45″ S. longitude 167° 56′ 29″ E., and comprises an area of 8,528 acres.

6. **Territory of New Guinea.**—It was agreed by the Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25′ E. The mandate was issued by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the New Guinea Act 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under Trusteeship Agreement with the United Nations' Organization, approved 13th December, 1946. For further particulars see Chapter X.—The Territories of Australia.

7. **Nauru.**—In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in longitude 166° E., 26 miles south of the Equator, and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and a supplementary agreement of 30th May, 1923, giving the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. The administration under the mandate has operated from 17th December, 1920, and so far the administrators have been appointed by the Commonwealth Government. As with the Territory of New Guinea, Nauru is now administered under Trusteeship Agreement with the United Nations' Organization.

8. **Territory of Ashmore and Cartier Islands.**—By Imperial Order in Council dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the North-west Coast of Australia, were placed under the authority of the Commonwealth. The Islands were accepted by the Commonwealth in the Ashmore and Cartier Islands Acceptance Act 1933 under the name of the Territory of Ashmore and Cartier Islands and were transferred on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the 1933 Act in July, 1938 annexed the Islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

9. **Australian Antarctic Territory.**—An Imperial Order in Council, 7th February, 1933, placed under the authority of the Commonwealth the Antarctic Territories, comprising all the islands and territory, other than Adélie Land, situated south of 60° S. latitude, and lying between 160° E. longitude and 45° E. longitude. The Territory was

accepted by the Commonwealth under the name of the Australian Antarctic Territory in the Australian Antarctic Territory Acceptance Act 1933 which came into force on 24th August, 1936, by proclamation issued by the Governor-General.

§ 5. The Exploration of Australia.

A fairly complete, though brief, account of the exploration of Australia was given in Official Year Book No. 2 (pp. 20–39), and a summary of the more important facts relating to the subject was embodied in this Chapter in succeeding issues up to and including No. 22.

§ 6. The Constitutions of the States and of the Commonwealth.

1. **General.**—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to No. 22.

2. **Commonwealth Constitution Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely : " An Act to constitute the Commonwealth of Australia," as amended by the Constitution Alteration (Senate Elections) 1906, the Constitution Alteration (State Debts) 1909, the Constitution Alteration (State Debts) 1928, and the Constitution Alteration (Social Services) 1946 is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31st December, 1947.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT, 63 & 64 VICT., CHAPTER 12.

An Act to constitute the Commonwealth of Australia. [*9th July*, 1900.]

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established :

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.

2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.

3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.

4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.

5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State ; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.

6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

"The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

Chapter I.—The Parliament:
    Part I.—General:
    Part II.—The Senate:
    Part III.—The House of Representatives:
    Part IV.—Both Houses of the Parliament:
    Part V.—Powers of the Parliament:
Chapter II.—The Executive Government:
Chapter III.—The Judicature:
Chapter IV.—Finance and Trade:
Chapter V.—The States:
Chapter VI.—New States:
Chapter VII.—Miscellaneous:
Chapter VIII.—Alteration of the Constitution.
The Schedule.

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth."

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the Senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the Senators of the first class shall become vacant at the expiration of [the third year] *three years*,* and the places of those of the second class at the expiration of [the sixth year] *six years*,* from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before** the places are to become vacant.

---

* As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July** following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July** preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a Senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

---

* As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner :—

(i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators ;

(ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota ; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows :—

New South Wales ..	23	South Australia ..	6
Victoria	20	Tasmania	5
Queensland.. ..	8		

Provided that if Western Australia is an Original State, the numbers shall be as follows :—

New South Wales ..	26	South Australia ..	7
Victoria	23	Western Australia ..	5
Queensland.. ..	9	Tasmania	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the division in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provisions, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State ; but in the choosing of members each elector shall vote only once.*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

---

* The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918–1934 Section 39 (repealing an earlier provision made by the Commonwealth Franchise Act 1902).

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

(i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :

(ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

(i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or

(ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer : or

(iii) Is an undischarged bankrupt or insolvent : or

(iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or

(v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth :

45. If a senator or member of the House of Representatives—

(i) Becomes subject to any of the disabilities mentioned in the last preceding section : or

(ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors : or

(iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State :

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

(i) The mode in which its powers, privileges, and immunities may be exercised and upheld :

(ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

* The Parliamentary allowance was raised to £600 per annum in 1907 and to £1,000 per annum in 1920, but in the case of Ministers, the Presiding Officers of the two Houses, and the Chairmen of Committees, the allowance, in addition to the emoluments of office, was fixed at £400 per annum in 1907 and at £800 per annum in 1920. Several reductions under financial emergency legislation reduced the Parliamentary allowance to £750 per annum in 1932, but it was gradually restored to £1,000, the last reduction being removed in May, 1938. The latter Act also increased the allowance, in addition to the emoluments of office, to holders of Parliamentary Office to £1,000 per annum. In June, 1947, the Parliamentary allowance was increased to £1,500 per annum, and at the same time the additional allowance (1920) of £200 per annum to the Leader of the Opposition in the Senate and of £400 to the Leader of the Opposition in the House of Representatives were increased to £300 and £600 per annum respectively. In December, 1947, the Parliamentary Allowances Act was amended to provide for an additional allowance of £400 per annum to the Leader in the House of Representatives, other than the Leader of the Opposition, of a recognized political party, of which not less than ten members are members of the House of Representatives, and of which no member is a Minister of State.

Part V.—Powers of the Parliament.*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

(i) Trade and commerce with other countries, and among the States :
(ii) Taxation ; but so as not to discriminate between States or parts of States :
(iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth :
(iv) Borrowing money on the public credit of the Commonwealth :
(v) Postal, telegraphic, telephonic, and other like services :
(vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth :
(vii) Lighthouses, lightships, beacons and buoys :
(viii) Astronomical and meteorological observations :
(ix) Quarantine :
(x) Fisheries in Australian waters beyond territorial limits :
(xi) Census and statistics :
(xii) Currency, coinage, and legal tender :
(xiii) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
(xiv) Insurance, other than State insurance ; also State insurance extending beyond the limits of the State concerned :
(xv) Weights and measures :
(xvi) Bills of exchange and promissory notes :
(xvii) Bankruptcy and insolvency :
(xviii) Copyrights, patents of inventions and designs, and trade marks :
(xix) Naturalization and aliens :
(xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :
(xxi) Marriage :
(xxii) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
(xxiii) Invalid and old-age pensions :
(xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances :*
(xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States :
(xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States :
(xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
(xxvii) Immigration and emigration :
(xxviii) The influx of criminals :
(xxix) External affairs :
(xxx) The relations of the Commonwealth with the islands of the Pacific :
(xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
(xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
(xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :

---

* Particulars of proposed laws which were submitted to referenda are referred to in Chapter III., General Government.

† Under Section 2 of the Constitution Alteration (Social Services) 1946, the Constitution was amended by the insertion of this paragraph.

(xxxiv) Railway construction and extension in any State with the consent of that State :

(xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :

(xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides :

(xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :

(xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :

(xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

(i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :

(ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :

(iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed laws so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provisions therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only ; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendations.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.*

66. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth :—

Posts, telegraphs, and telephones :
Naval and military defence :
Lighthouses, lightships, beacons, and buoys :
Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of His Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.†

72. The Justices of the High Court and of the other Courts created by the Parliament—

(i) Shall be appointed by the Governor-General in Council :

(ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity :

(iii) Shall receive such remuneration as the Parliament may fix ; but the remuneration shall not be diminished during their continuance in office.†

---

* The Ministers of State were increased in 1915 to eight, in 1917 to nine, in 1935 to ten, in 1938 to eleven, and in 1941, as a special provision during the war, to nineteen. A sum of £1,650 was added to the annual appropriation for Ministers' salaries for each additional Minister and £800 per annum was allowed each Minister by the Parliamentary Allowances Act 1920 (increased from £400 per annum in 1907). Reductions under financial emergency legislation reached their maximum in 1932, when Ministers' salaries were reduced by 30 per cent. and their allowances as members by 25 per cent.; the reductions were gradually removed, finally in May, 1938, by the Parliamentary Salaries Adjustment Act 1938. This Act also made provision for an additional allowance of £1,500 per annum to the Prime Minister, and increased the Parliamentary allowance to Ministers from £800 to £1,000 per annum. The Ministers of State Act 1941 made provision for the salaries of Ministers, the appropriation, excluding the Prime Ministers' allowance, not to exceed £21,250. The Ministers of State Act 1935-1946 extended into peace-time the war-time special provision as to the number and salaries of Ministers, and the Ministers of State Act 1947 increased the appropriation for Ministers' salaries to £27,050. The Parliamentary Allowances Act 1947 increased the Parliamentary allowances to Ministers to £1,500 per annum.

† The Judiciary Act 1903 provided for a Chief Justice and two other Justices. Subsequent amendments to the Act increased the number of other Justices to four and six, and then reduced it to five. The Judiciary Act 1946 again increased it to six. The Judiciary Act 1903 also provided for the payment of a salary of £3,500 per annum to the Chief Justice and of £3,000 per annum to each other Justice. The Salaries (Statutory Offices) Adjustment Act 1947 increased these salaries respectively to £4,500 and £4,000 per annum.

73. The High Court shall have jurisdiction, with such exception and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

(i) Of any Justice or Justices exercising the original jurisdiction of the High Court:

(ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:

(iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

(i) Arising under any treaty:

(ii) Affecting consuls or other representatives of other countries:

(iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:

(iv) Between States, or between residents of different States, or between a State and a resident of another State:

(v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

(i) Arising under this Constitution, or involving its interpretation:

(ii) Arising under any laws made by the Parliament:

(iii) Of Admiralty and maritime jurisdiction:

(iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

(i) Defining the jurisdiction of any federal court other than the High Court:

(ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:

(iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

(i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:

(ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth :

(iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section ; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament :

(iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

(i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.

(ii) The Commonwealth shall debit to each State—

(*a*) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth ;

(*b*) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.

(iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth: and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But

no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

(i) Shall be appointed by the Governor-General in Council:

(ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity:

(iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the State shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (i) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

(*a*) *the taking over of such debts by the Commonwealth;*

(*b*) *the management of such debts;*

(*c*) *the payment of interest and the provision and management of sinking funds in respect of such debts;*

(*d*) *the consolidation, renewal, conversion, and redemption of such debts;*

(*e*) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*

(*f*) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(ii) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(iii) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(iv) *Any such agreement may be varied or rescinded by the parties thereto.*

(v) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(vi) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

---

* Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets are omitted.

† Under Section 2 of the Constitution Alteration (State Debts) 1928, the Constitution was amended by the insertion of this section.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

SCHEDULE.

OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

3. **The Royal Proclamation.**—The preceding Act received the Royal assent on the 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on the 17th September, 1900, constituted the Commonwealth as from the 1st January, 1901; it reads as follows:—

BY THE QUEEN.

A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

CHAPTER II.

PHYSIOGRAPHY.

§ 1. General Description of Australia.

1. **Geographical Position.**—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9′ E. and 153° 39′ E., while its northern and southern limits are the parallels of latitude 10° 41′ S. and 39° 8′ S., or, including Tasmania, 43° 39′ S. On its north are the Timor and Arafura Seas and Torres Strait—on its south the Southern Ocean and Bass Strait. The extreme points are "Steep Point" on the west, "Cape Byron" on the east, "Cape York" on the north, "Wilson's Promontory" on the south, or, if Tasmania be included, "South-East Cape."

(ii) *Tropical and Temperate Regions.* Of the total area of Australia nearly 40 per cent. lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is 23° 30′ S. (its mean value for 1944 was 23° 26′ 47.65″), the areas within the tropical and temperate zones are approximately as follows :—

AUSTRALIA : AREAS OF TROPICAL AND TEMPERATE REGIONS.

Area.	N.S.W. (a)	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total.
Within Tropical Zone sq. miles	..	..	359,000	..	364,000	..	426,320	1,149,320
Within Temperate Zone sq. miles	310,372	87,884	311,500	380,070	611,920	26,215	97,300	1,825,261
Total Area sq. miles	310,372	87,884	670,500	380,070	975,920	26,215	523,620	2,974,581
Ratio of Tropical part to whole State	..	..	0.535	..	0.373	..	0.814	0.386
Ratio of Temperate part to whole State	1	1	0.465	1	0.627	1	0.186	0.614

(*a*) Includes Australian Capital Territory.

Thus the tropical part is roughly about five-thirteenths of the whole of Australia (0.386) or, of the three territories with areas within the tropical zone, about one-half (0.530).

2. **Area of Australia compared with Areas of other Countries.**—The area of Australia is almost as great as that of the United States of America, four-fifths of that of Canada, more than one-fifth of the area of the British Empire, nearly three-fourths of the whole area of Europe, and about 25 times as large as Great Britain and Ireland.

This great area, coupled with a limited population, renders the solution of the problem of Australian development a particularly difficult one. The areas of Australia and of certain other countries are given in the following table :—

AREA OF AUSTRALIA AND OF OTHER COUNTRIES, *Circa* 1939.

Country.	Area.	Country.	Area.
Continental Divisions—	Sq. miles.	**Africa**—*continued.*	Sq. miles.
Europe	4,409,000	Italian East Africa ..	666,000
Asia	16,216,000	Angola	488,000
Africa	11,707,000	Union of South Africa ..	473,000
North and Central America and West Indies ..	8,665,000	Egypt	386,000
South America	6,937,000	Tanganyika Territory ..	374,000
Oceania, etc.	3,301,000	Nigeria and Protectorate ..	373,000
Total, excluding Arctic and Antarctic Conts.	51,235,000	South-West Africa ..	322,000
Europe—		Mozambique	298,000
U.S.S.R. (Russia) ..	2,316,000	Northern Rhodesia ..	290,000
Germany (*a*)	225,000	Bechuanaland Protectorate	275,000
France	213,000	Madagascar	229,000
Spain (inc. possessions) ..	195,000	Kenya Colony and Protectorate	225,000
Sweden	173,000	Other	1,130,000
Poland	150,000	Total	11,707,000
Finland	148,000	**North and Central America**—	
Italy (*b*)	131,000	Canada	3,695,000
Norway	125,000	United States of America ..	3,027,000
Rumania	114,000	Mexico	760,000
Yugoslavia	96,000	Alaska	586,000
United Kingdom ..	94,000	Newfoundland and Labrador	163,000
Other	429,000	Honduras	59,000
Total	4,409,000	Nicaragua	49,000
Asia—		Other	326,000
U.S.S.R. (Russia) ..	5,868,000	Total	8,665,000
China and Dependencies ..	4,287,000	**South America** —	
British India	865,000	Brazil	3,286,000
Arabia	1,004,000	Argentine Republic ..	1,078,000
Feudatory Indian States ..	716,000	Bolivia	421,000
Iran	635,000	Peru	482,000
Netherlands Indies (*c*) ..	735,000	Colombia (exc. of Panama)	440,000
Turkey	287,000	Venezuela	352,000
French Indo-China ..	286,000	Chile	287,000
Japan and Dependencies ..	262,000	Paraguay	153,000
Afghanistan	251,000	Ecuador	176,000
Burma	234,000	Other	262,000
Thailand	200,000	Total	6,937,000
Other	586,000	**Oceania, etc.**—	
Total	16,216,000	Commonwealth of Australia	2,975,000
Africa—		New Zealand and Dependencies	104,000
French West Africa ..	1,816,000	Territory of New Guinea ..	91,000
Anglo-Egyptian Sudan ..	969,000	Papua	90,000
French Equatorial Africa ..	960,000	Other	41,000
Belgian Congo	902,000	Total	3,301,000
Algeria	851,000	**British Empire**	13,354,000
Libya	680,000		

(*a*) Includes Austria (32,000 sq. miles) and Sudeten Territory (11,000 sq. miles). (*b*) Includes Albania (11,000 sq. miles). (*c*) Includes Dutch New Guinea.

The countries and areas given in the table are those obtaining before the 1939–45 War and were extracted from the *Statistical Year Book of the League of Nations.*

3. **Areas of Political Subdivisions.**—As already stated, Australia consists of six States and the Northern and Australian Capital Territories. The areas of these, and their proportions of the total of Australia, are shown in the following table :—

AUSTRALIA : AREA OF STATES AND TERRITORIES.

State or Territory.	Area.	Percentage on Total.
	Sq. miles.	%
New South Wales	309,433	10.40
Victoria	87,884	2.96
Queensland	670,500	22.54
South Australia..	380,070	12.78
Western Australia	975,920	32.81
Tasmania	26,215	0.88
Northern Territory	523,620	17.60
Australian Capital Territory ..	939	0.03
Total	2,974,581	100.00

4. **Coastal Configuration**—(i) *General.* There are no striking features in the configuration of the coast ; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1 an enumeration is given of the features of the coast-line of Australia (see pp. 60–68).

(ii) *Coast-line.* The lengths of coast-line, excluding minor indentations, of each State and of the whole continent, and the area per mile of coast-line, are shown in the following table :—

AUSTRALIA : COAST-LINE AND AREA PER MILE THEREOF.

State.	Coast-line.	Area per Mile of Coast-line.	State.	Coast-line.	Area per Mile of Coast-line.
	Miles.	Sq. miles.		Miles.	Sq. miles.
New South Wales(*a*)	700	443	South Australia ..	1,540	247
Victoria.. ..	680	129	Western Australia	4,350	224
Queensland ..	3,000	223	Continent (*b*) ..	11,310	261
Northern Territory	1,040	503	Tasmania ..	900	29

(*a*) Includes Australian Capital Territory. (*b*) Area 2,948,366 square miles.

For the entire Commonwealth of Australia this gives a coast-line of 12,210 miles and an average of 244 square miles for one mile of coast-line. According to Strelbitski, Europe has only 75 square miles of area to each mile of coast-line, and, according to more recent figures, England and Wales have only one-third of this, 25 square miles.

(iii) *Historical Significance of Coastal Names.* It is interesting to trace the voyages of some of the early navigators by the names bestowed by them on various coastal features—thus Dutch names are found on various points of the Western Australian coast, in Nuyts' Archipelago, in the Northern Territory, and in the Gulf of Carpentaria ; Captain Cook can be followed along the coasts of New South Wales and Queensland ; Flinders' track is easily recognized from Sydney southwards, as far as Cape Catastrophe, by the numerous Lincolnshire names bestowed by him ; and the French navigators of the end of the eighteenth and the beginning of the nineteenth century have left their names all along the Western Australian, South Australian and Tasmanian coasts.

5. **Geographical Features of Australia.**—In separate issues of earlier Official Year Books fairly complete information has been given concerning some special geographical element. The nature of this information and its position in the various issues can be readily ascertained on reference to the special index following the index to maps and graphs at the end of this issue.

6. **Fauna, Flora, Geology and Seismology of Australia.**—Special articles dealing with these features have appeared in previous issues of the Official Year Book, but limits of space naturally preclude their repetition in each volume. As pointed out in par. 5, however, the nature and position of these articles can be readily ascertained from the special index.

§ 2. Climate and Meteorology of Australia.*

1. **Introductory.**—In Official Year Book No. 3, pp. 79 and 80, some account is given of the history of Australian meteorology, including a reference to the development of magnetic observations. In Official Year Book No. 4, pp. 84 and 87, will be found a short sketch of the creation and organization of the Commonwealth Bureau of Meteorology, and a résumé of the subjects dealt with at the Meteorological Conference in 1907.

2. **Meteorological Publications.**—Reference to publications issued by the Central Meteorological Bureau appears in Official Year Book No. 22, pp. 40 and 41, and No. 34, p. 11. The following publications have since been issued :—Bulletin No. 28, " Duststorms in Australia " ; Bulletin No. 29, " Report on the Divergence Theory of the Formation of Cyclones " ; Bulletin No. 30, " Synoptic Analysis over South-West Pacific Area " ; Bulletin No. 31, " Coastal Fogs in Australia " ; Bulletin No. 32, " Frost in the Australian Region " ; Bulletin No. 33, " Discussion of Seven Years of Aerological Observations by Aeroplane at Sydney " ; Bulletin No. 34, " Bradfield Scheme for Watering the Inland " ; Bulletin No. 35, " A Study of Average Hourly Values of Temperature, Relative Humidity and Saturation Deficit in the Australian Region from Records of Capital City Bureaux " ; Bulletin No. 36, " Weather Conditions Affecting Aviation over the Tasman Sea "—Part IV., " Flying Conditions over the Tasman Sea " (1940–44) ; Bulletin No. 37, " Discussion of Four Years of Aerological Observations obtained by means of Aeroplanes near Perth " ; Studies in Applied Climatology, Western Australia—Pamphlet No. 1, " Climate of the West Australian Wheat Belt with Special Reference to Rainfall over Marginal Areas " ; " Analysis and Forecasting in the South-West Pacific Area " ; and " Set of Typical Summer and Winter Weather Charts (for use in Schools) ".

3. **Equipment.**—The determination of the climatological data has been made by records of the following instruments :—

(i) *Rainfall.* Rainfall has been measured by a cylindrical gauge generally 8 inches in diameter.

(ii) *Temperature.* Extreme daily temperatures have been recorded by means of self-registering maximum and minimum thermometers which are read and set daily.

(iii) *Humidity.* Humidities have been determined by the aid of tables from readings of dry and wet bulb thermometers.

(iv) *Atmospheric Pressure.* Pressures have been measured by mercurial barometers of the Kew (or Fortin) pattern.

(v) *Evaporation.* The standard evaporimeter in use consists of a cylindrical galvanized iron tank 3 feet in diameter and 3 feet deep, with a water jacket. Concrete tanks of similar form and dimensions are also used.

(vi) *Wind.* Data concerning wind have been obtained either by " Robinson " cup anemometer, " Dines " pressure tube anemometer or by " Machin " cup anemometer.

4. **General Description of Australia.**—A considerable portion (0.530) of three divisions of Australia is north of the tropic of Capricorn—that is to say, within Queensland, Western Australia and the Northern Territory, no less than 1,149,320 square miles belong to the tropical zone and 1,020,720 to the temperate zone. The whole area of Australia within the temperate zone, however, is 1,825,261 square miles ; thus the tropical part is about 0.386, or about five-thirteenths of the whole, or the " temperate " region is half as large again as the " tropical " (more accurately 1.588). By reason of its insular geographical position and the absence of striking physical features whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is, on the whole, more temperate.

---

* Prepared from data supplied by the Director, Commonwealth Meteorological Bureau.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little over 7,300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior is very limited, and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are large areas also which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character. Climatologically, therefore, Australia may be said to present a great variety of features.

5. **Meteorological Divisions.**—(i) *General.* Reference to the divisions adopted by the Commonwealth Meteorologist will be found in Official Year Book No. 22, p. 41.

(ii) *Special Climatological Stations.* The latitudes, longitudes and altitudes of special stations, the climatological features of which are graphically represented hereinafter, are as follows :—

SPECIAL CLIMATOLOGICAL STATIONS : AUSTRALIA.

Locality.	Height above Sea Level.	Latitude. S.		Longitude. E.		Locality.	Height above Sea Level.	Latitude. S.		Longitude. E.	
	Feet.	deg.	min.	deg.	min.		Feet.	deg.	min.	deg.	min.

Adelaide ..	140	34	56	138	35	Darwin ..	97	12	28	130	51
Brisbane ..	134	27	28	153	2	Alice Springs..	1,901	23	38	133	37
Sydney ..	138	33	52	151	12	Dubbo ..	870	32	15	148	37
Melbourne ..	114	37	49	144	58	Laverton, W.A.	1,506	28	40	122	23
Hobart ..	177	42	53	147	20	Coolgardie ..	1,389	30	57	121	10

6. **Temperatures.**—(i) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° Fahrenheit extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a higher temperature than 70°.

The extreme range of temperature is less than 100° over practically the whole of Australia, that figure being only slightly exceeded at a very few places ; it is mostly 70° to 90° over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° in some localities.

Along the northern shores of Australia the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8 4° maximum and minimum respectively, and the extreme readings for the year, or the highest maximum on record and the lowest minimum, show a difference of under 50°.

(ii) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that, in Australia, as in other continents, the range increases with increasing distance from the coast.

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° in the shade, and, considering Australia as a whole, frosts may occur within a few miles of the coastline over the entire continent except in the Northern Territory and in a considerable area of Northern Queensland. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine gold-fields, where the maximum shade temperature during the summer sometimes exceeds 100° continuously for days and weeks. The coldest part of Australia is the extreme south-east of New South Wales and extreme east of Victoria—the region of the Australian Alps. Here the temperature seldom, if ever, reaches 100° even in the hottest of seasons, while in winter, readings slightly below zero are occasionally recorded.

Tasmania as a whole enjoys a most moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° in the eastern part of the State.

(iii) *Monthly Maximum and Minimum Temperatures.* The normal monthly maximum and minimum temperatures can be best shown by means of graphs, which exhibit the nature of the fluctuation of each for all available years. In the diagram (page 33) for nine representative places in Australia, the upper heavy curves show the mean maximum, and the lower heavy curves the mean minimum temperatures based upon daily observations, while the length of the interval between these two heavy curves shows the average difference between the highest and the lowest temperatures of the twenty-four hours.

7. **Humidity.**—After temperature, humidity is the most important element of climate particularly as regards its effects on human comfort, rainfall supply, and conservation and related problems.

In this publication the humidity of the air has been graphically represented (page 33) by its vapour pressure (i.e., the partial pressure of the water vapour measured in inches of mercury). The humidity has also been expressed by the relative humidity which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., have been given in the tables of climatological data for the capital cities (para. 18). The mean monthly vapour pressure has also been added to these tables.

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities consisting as they do of the extremes for each month do not show the normal annual fluctuation which would be approximately midway between the extremes.

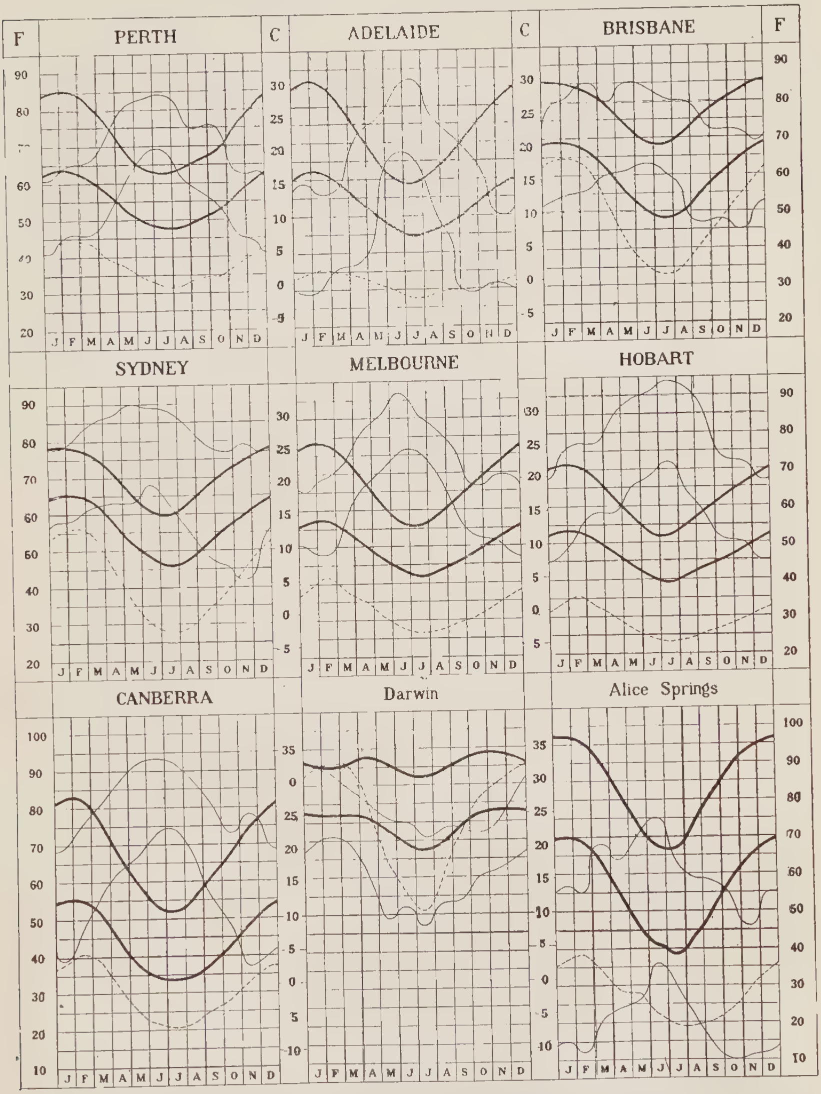
The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne. Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity diminishes in the order, Sydney, Canberra, Melbourne, Darwin, Hobart, Brisbane, Perth, Adelaide and Alice Springs.

8. **Evaporation.**—(i) *General.* The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia the question is, perhaps, of more than ordinary importance, since in its drier regions water has often to be conserved in " tanks "* and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (see page 41) which shows that the yearly amount varies from about 20 inches over Western Tasmania to more than 100 inches over central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and Eucla divisions of Western Australia, during no month of the year does the rainfall exceed the evaporation. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation more than twice as great as its rainfall; it is noteworthy that the vegetation over most of this region is characterised by acacia, semi-desert,

---

* In Australia artificial storage ponds or reservoirs are called " tanks."

AVERAGE ANNUAL FLUCTUATIONS OF NORMAL MAXIMUM AND MINIMUM TEMPERATURE AND HUMIDITY.



EXPLANATION.—The upper and lower heavy lines in each graph represent the mean maximum and mean minimum temperatures respectively. The Fahrenheit temperature scales are shown on the outer edge of the sheet under " F " and the centigrade scales in the two inner columns under " C ".

The broken line shows the normal absolute humidity in the form of 9 a.m. vapour pressures for which the figures in the outer " F " columns represent hundredths of an inch of barometric pressure.

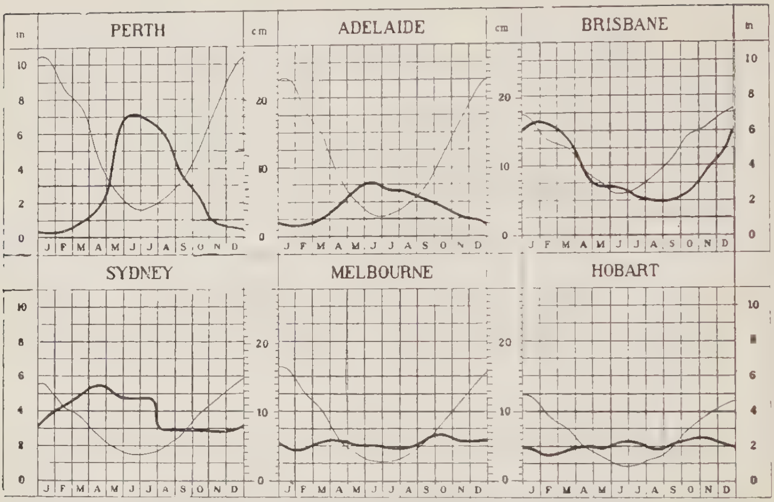
The upper and lower fine lines join the greatest and the least monthly means of relative humidity respectively, the figures under the outer columns " F " indicating percentage values.

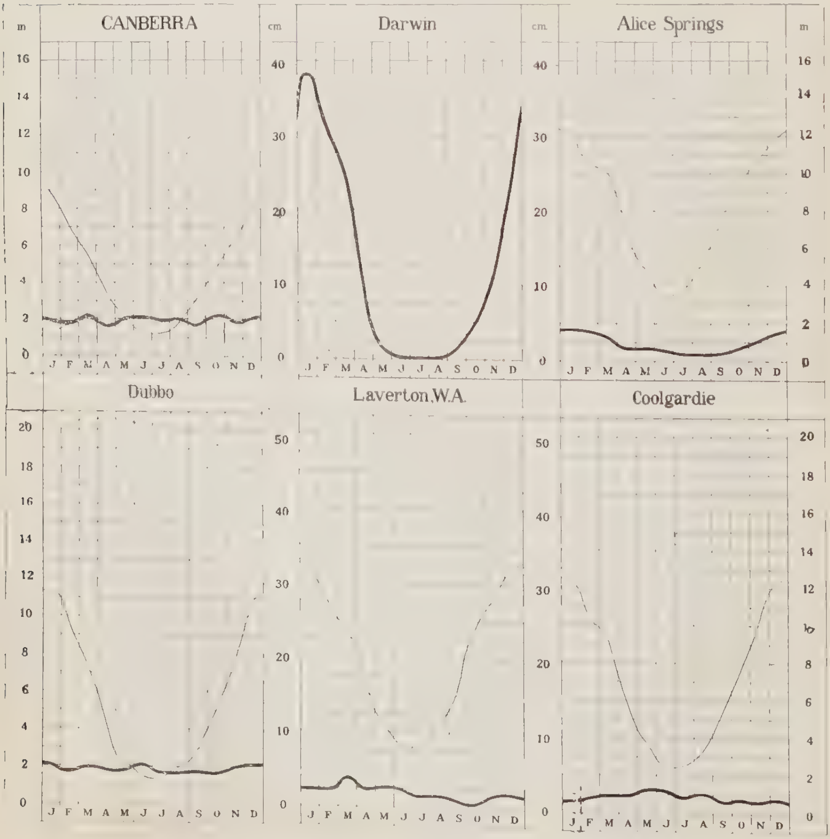
The curves for temperature and vapour pressure joining the mean monthly values serve to show the annual fluctuation of these elements, but the relative humidity graphs joining the extreme values for each month do not indicate any normal annual variation.

Comparison of the maximum and minimum temperature curves affords a measure of the mean diurnal range of temperature. At Perth in the middle of January, for instance, there is normally a range of 21° from 63° F. to 84° F., but in July it is only 15° from 48° F. to 63° F.

The relative humidity curves illustrate the extreme range of the mean monthly humidity over a number of years.

MEAN MONTHLY RAINFALL AND EVAPORATION.





EXPLANATION.—On the preceding graphs thick lines denote rainfall, and thin lines evaporation, and show the fluctuation of the mean rate of fall or evaporation *per month* throughout the year. The results, plotted from the Climatological Tables herein, are shown in inches (see the outer columns), and the corresponding metric scale (centimetres) is shown in the two inner columns. The evaporation is not given for Darwin.

At Perth, Adelaide, Brisbane, Melbourne, Hobart, Canberra, Alice Springs and Coolgardie the results have been obtained from jacketed tanks sunk in the ground. At Sydney and Dubbo sunken tanks without water jackets are used, whilst at Laverton (W.A.) the records are taken from a small portable jacket evaporation dish of 8 inches in diameter.

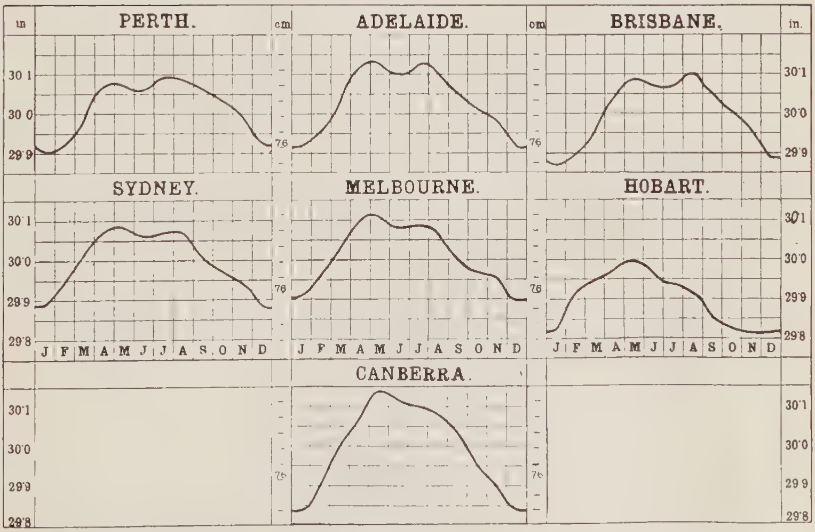
The distance for any date from the zero line to the curve represents the average number of inches, reckoned as per month, of rainfall at that date. Thus, taking the curve for Adelaide in the middle of January, the rain falls on the average at the rate of about three-fourths of an inch per month or, say at the rate of about 9 inches per year. In the middle of June it falls at the rate of a little over 3 inches per month, or, say, at the rate of about 37 inches per year. At Dubbo, the evaporation is at the rate of nearly 11¾ inches per month about the middle of January, and only about 1½ inches at the middle of June.

The mean annual rainfall and evaporation at the places indicated are given in the appended table.

MEAN ANNUAL RAINFALL AND EVAPORATION.

Place.	Rainfall.	Evaporation.	Place.	Rainfall.	Evaporation.
	In.	In.		In.	In.
Perth ..	34.95	65.91	Canberra ..	22.45	54.00
Adelaide ..	21.09	56.04	Darwin ..	60.60	..
Brisbane ..	44.58	56.36	Alice Springs ..	10.55	97.21
Sydney ..	46.35	40.17	Dubbo ..	21.83	66.37
Melbourne ..	25.54	39.15	Laverton, W.A.	9.12	95.80
Hobart ..	24.52	31.21	Coolgardie ..	10.24	84.42

MEAN BAROMETRIC PRESSURE.—CAPITAL CITIES.



EXPLANATION.—The lines representing the yearly fluctuations of barometric pressure at the State capital cities are means for long periods, and are plotted from the Climatological Tables herein. The pressures are shown in inches on about 2½ times the natural scale, and the corresponding pressures in centimetres are also shown in the two inner columns, in which each division represents one millimetre.

Taking the Brisbane graph for purposes of illustration, it will be seen that the mean pressure in the middle of January is about 29.87 inches, and there are maxima in the middle of May and August on about 30.09 inches.

MONTHLY DISTRIBUTION OF RAINFALL OVER AUSTRALIA

REVISED TO END OF 1939

EXPLANATION. The graphs show the average rainfall in each month of the year in the various Rainfall Districts, the boundaries of which are shown by the broken lines on the map. The numbers on the map refer to the districts. The corresponding district names are given in the insert on page 37.

The columns for the successive months, January to December, run from left to right.

The length of a vertical column represents the average monthly rainfall according to the scale given below.

shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more protected from the direct rays of the sun and from winds by means of suitable tree planting, the less will be the loss by evaporation. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* A map of average annual evaporation in Australia (*see* page 41) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263 [" Atmospheric Saturation Deficit in Australia "—J. A. Prescott (Trans. Royal Society, S.A., Vol. lv., 1931)]. Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings, and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula, $e = 263$ s.d., is not an exact relationship, but it takes account of one of the major factors in evaporation, i.e., the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have been applied accordingly. No evaporation records are available north of latitude 20°, and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (N.T.) and Winton (Q'land), and to a lesser degree Blackall (Q'land) and Marble Bar (W.A.).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

(iii) *Monthly Evaporation Curves.* The diagrams (page 34) showing the mean monthly evaporation in various parts of Australia disclose how characteristically different are the amounts for the several months in different localities.

9. **Rainfall.**—(i) *General.* The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its physiographical features.

Australia lies within the zones of the south-east trades and prevailing westerly winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude, and, with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island, upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable, generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall.* The average annual rainfall map of Australia (page 37) shows that the heaviest yearly falls occur on the north coast of Queensland (up to over 160 inches) and in Western Tasmania (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay (New South Wales) to the northern part of Cape York Peninsula, also around Darwin (Northern Territory), on the West Kimberley coast, near Cape Leeuwin (Western Australia), about the

Australian Alps in eastern Victoria and New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall.* Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to ; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over Southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania, and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior, but only infrequently and with irregular rains.

The map showing mean monthly distribution of rainfall over Australia (page 38) gives in graphic form information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Deeral on the north coast-line has an average annual rainfall of 182.01 inches and Tully on the Tully River 177.54 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russel Rivers have an average annual rainfall of between 143 and 169 inches. The maximum and minimum falls there are :—Deeral, 287.18 in 1945 and 109.74 inches in 1943, or a range of 177.44 inches ; Tully, 234.37 in 1936 and 104.98 inches in 1943, or a range of 129.39 inches ; Goondi, 241.53 in 1894 and 67.88 inches in 1915, or a range of 173.65 inches ; Innisfail, 211.24 in 1894 and 69.87 inches in 1902, or a range of 141.37 inches ; Harvey Creek, 254.77 in 1921 and 80.47 inches in 1902, or a range of 174.30 inches.

On four occasions more than 200 inches have been recorded at Goondi, the last of these being in 1910, when 204.82 inches were registered. The records at this station cover a period of 59 years.

In nineteen years of record Tully has exceeded 200 inches on eight occasions, whilst in a record of 28 complete years Harvey Creek has four times exceeded this figure At Tully 234.37 inches were recorded during 1936 and at Harvey Creek the total for 1921 was 254.77 inches. At the South Johnstone Sugar Experiment Station 202.52 inches were recorded in 1921.

In Tasmania the wettest part is in the West Coast region, the average annual rainfall at Lake Margaret being 144 inches, with a maximum of 175.12 inches in 1924.

The driest known part of the continent is in the Lake Eyre district in South Australia (the only part of the continent below sea level), where the annual average is only 5 inches, and where the total rarely exceeds 10 inches for the twelve months.

The inland districts of Western Australia were at one time regarded as the driest part of Australia, but authentic observations in recent years over most settled districts in the east of that State show that the annual average is about 10 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map (page 37) which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table :—

AVERAGE ANNUAL RAINFALL DISTRIBUTION.

Average Annual Rainfall.	N.S.W. (*a*)	Victoria.	Queensland.	South Australia	Western Australia.	Tasmania. (*b*)	Northern Territory	Total. (*b*)
	%	%	%	%	%	%	%	%

Total ..	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

(*a*) Includes Australian Capital Territory. (*b*) Over an area of 2,777 square miles no records are available.

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with a normal rainfall of 46.34 inches, occupies the chief place: Brisbane, Perth, Melbourne, Hobart, Canberra and Adelaide follow in that order, Adelaide with 21.09 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.49 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected. (See map on p. 38). The figures for Northern Rivers, District 14, show that nearly the whole of the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse for, while the summer months are dry, the winter ones are very wet. In the districts containing Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Curves of Rainfall and Evaporation.* The relative amounts of rainfall and evaporation at different times through the year are clearly indicated in the graphs (page 34). Inspection thereof and of the map on page 41 will show how large is the evaporation when water is fully exposed to the direct rays of the sun and to wind.

(vii) *Tables of Rainfall.* The table of rainfall for a fairly long period of years for each of the various Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

(*a*) Commonwealth Forestry Bureau; records in issues prior to No. 36 were for the station at Acton which closed down in 1939. (*b*) Records taken from present site commenced 1883.

10. **Remarkable Falls of Rain.**—The following are the most remarkable falls of rain in the various States and Territories which have occurred within a period of twenty-four hours. For other very heavy falls at various localities reference may be made to Official Year Book No. 14, pp. 60–64, No. 22, pp. 46–48 and No. 29, pp. 43, 44 and 51 :—

11. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where also the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciusko and similar localities the snow never entirely disappears after a severe winter.

12. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

13. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have, under anticyclonic conditions in the interior of the continent, ranged as high as 30.78 inches (at Kalgoorlie on 28th July, 1901) and have fallen as low as 27.55 inches. This lowest record was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. The mean barometric pressure for the Australian capitals is shown on graphs (page 35).

14. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the prevailing westerly winds. As the belt of the earth's atmosphere in which they blow apparently follows the sun's ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months the anticyclonic belt travels in very high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The prevailing westerly winds retreat a considerable distance to the south of Australia, and are rarely in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and only operate to the north of the tropics for the greater part of the winter. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from the Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, and occasionally penetrate to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence nor regularity of the Indian south-west monsoon but is sufficiently characteristic for the summer in the north of Australia to be called the "North-west Season". In Central and Eastern Queensland, the north-west monsoon in the summer has comparatively little effect and the trade winds, albeit weakened, are still dominant winds. With the migration of the sun northward in the autumn, the north-west monsoon is itself replaced first by light variable winds and then by the trade winds.

(iii) *Land and Sea Breezes.* The prevailing winds next in order of importance are the land and sea breezes. On the east coast the sea breezes which come in from the north-east, when in full force, frequently reach the velocity of a gale during the afternoon in the summer months, the maximum hourly velocity, ordinarily attained about 3 p.m., not infrequently attaining a rate of 35 to 40 miles per hour. This wind, although strong, is usually shallow in depth, and does not ordinarily penetrate more than 9 or 12 miles inland.

The land breezes on the east coast blow out from a westerly direction during the night.

On the western shores of the continent the directions are reversed. The sea breezes come in from the south-west, and the land breezes blow out from the north-east.

(iv) *Inland Winds.* Inland, the direction of the prevailing winds is largely regulated by the seasonal changes of pressure, so disposed as to cause the winds to radiate spirally outward from the centre of the continent during the winter months, and to circulate spirally from the seaboard to the centre of Australia during the summer months.

(v) *Prevailing Direction at the Capital Cities.* In Canberra at 9 a.m. the air is usually calm, particularly during the winter months, but such winds as do occur are predominantly north-westerly, though a proportion of south-easterly winds occur during the autumn. At 3 p.m. the predominant wind is north-westerly.

In Perth at 9 a.m. east to south-east winds prevail from September to March, while from April to August north-north-east to east winds predominate. At 3 p.m. the prevailing wind is south-west from October to May inclusive and westerly at other times.

In Adelaide at 9 a.m., the predominant wind is north-easterly from May to August, but during the rest of the year no particular direction is outstanding. At 3 p.m. the predominant wind is south-westerly for all months except May, June and July. Throughout the year winds with an easterly component are rare in the afternoon.

In Brisbane at 9 a.m. the most frequent winds during the colder two-thirds of the year come from the south or south-west, while in the warmer months south to south-east winds are more usual. At 3 p.m. winds with an easterly component predominate, especially north-easterlies during the warmer half of the year.

In Sydney at 9 a.m., by far the most prevailing wind is a westerly, particularly during the colder two-thirds of the year. At 3 p.m. during the warmer two-thirds of the year, winds with an easterly component are most frequent with a smaller proportion of southerlies and westerlies during the winter months.

In Melbourne at 9 a.m., northerlies are the most frequent winds during the period February to October with a moderate proportion of westerlies in the spring. During the summer months, winds with a southerly component are in evidence to a slightly greater degree than any others. At 3 p.m. southerly winds prevail during the warmer two-thirds of the year with the frequency of northerlies increasing during the colder months.

In Hobart at 9 a.m. the most favoured directions are from the north-west and north with a good proportion of south-easterlies showing up at 3 p.m. during the warmer months.

15. **Cyclones and Storms.**—The "elements" in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to cyclonic storms, evolved from the V-shaped depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, including the coast-line of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these cyclones are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east. Only a small percentage, however, reach Australia, the majority recurving in their path to the east of New Caledonia.

Very severe cyclones, locally known as "willy willies," are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive, and cause great havoc amongst the pearl-fishers. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appear in previous issues of the Official Year Book (see No. 6, pp. 84–86), and a special article dealing with "Australian Hurricanes and Related Storms" appears in Official Year Book No. 16, pp. 80–84.

16. **Influences affecting Australian Climate.**—(i) *General.* Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom subject to frosts, have, with the denudation of the surrounding hills from forests, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forest on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees, a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternative periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall has not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

17. **Rainfall and Temperatures, Various Cities.**—The Official Year Book No. 34, p. 28, shows rainfall and temperature for various important cities throughout the world, and for the Australian capitals.

18. **Climatological Tables.**—The averages and extremes for a number of climatological elements have been determined from long series of observations at the Australian capitals up to and including the year 1946. These are given in the following tables:—

* Early records relating to Temperature (Mean Max., Mean Min., Extreme Shade and Extreme Range) and Rainfall have been discarded owing to the use of a faulty instrument. The number of years of observation has therefore been considerably shortened.

§ 3. Standard Times in Australia.

Prior to 1895 the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each.

In November, 1892, an intercolonial conference of surveyors was held in Melbourne to consider, among other things, the advantages of introducing the system of standard time. In this system it was proposed to make the initial meridian that of Greenwich and to change local standard time by whole hours according to the longitude east or west of that of Greenwich. Thus for every difference of 15° in longitude a change of one hour would be required. The minutes and seconds would then be identical everywhere.

To give effect to this proposal it was suggested that Australia should be divided into three zones, the standard times for which should be respectively the mean solar times of the meridians of 120°, 135° and 150° E. longitude, thus giving standard times 8, 9 and 10 hours respectively ahead of Greenwich time. It was proposed that the 120° zone should comprise Western Australia, that the 135° zone should comprise South Australia and the Northern Territory, and that the 150° zone should comprise Queensland, New South Wales, Victoria and Tasmania.

The matter was also considered by several intercolonial postal conferences, and eventually in 1894 and 1895 legislation was enacted by each of the colonies in accord with the recommendations of the Surveyors' Conference of 1892.

In 1898 the South Australian legislature amended its earlier provision, and adopted the mean solar time of the meridian 142° 30′ E. longitude as the standard time for that colony, thus reducing the difference between the standard time of Adelaide and that of the capitals of the eastern colonies from an hour to half-an-hour. Particulars concerning these enactments are as follows :—

STANDARD TIMES IN AUSTRALIA.

State.	Date when Act came into Operation.	Meridian Selected.	Time Ahead of Greenwich Hours.
New South Wales ..	1st February, 1895 ..	150° E.	10
Victoria	1st February, 1895 ..	150° E.	10
Queensland	1st January, 1895 ..	150° E.	10
South Australia ..	1st February, 1895 ..	135° E.	9
South Australia ..	1st May, 1899	142° 30′ E.	9½
Western Australia ..	1st December, 1895 ..	120° E.	8
Tasmania	1st September, 1895 ..	150° E.	10

The standard time in the Australian Capital Territory is the same as in New South Wales, and in Northern Territory the same as in South Australia.

Consequent upon the opening of the Trans-Australian Railway an arrangement was made by which the change of time between South Australia and Western Australia (namely, 1½ hours) is divided into two changes of 45 minutes each. Going east from Kalgoorlie the first change is made at Rawlinna, 235.18 miles out, where the time is put forward by 45 minutes. The second change of the same amount is made at Tarcoola, 794.05 miles out. Thenceforward South Australian standard time is kept. The Commonwealth Observatory at Mount Stromlo, Canberra, and the State Observatories at Sydney, Adelaide, and Perth derive time by astronomical observations. A Commonwealth Time Service is at present being developed.

CHAPTER III.

GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government.

1. **General.**—A brief account of the general legislative powers of the Commonwealth and States is given in preceding issues of the Official Year Book (*see* No. 13, pp. 927–951, and No. 22, p. 64).

2. **Powers and Functions of the Governor-General and of the State Governors.**—A detailed statement of the powers and functions of the Governor-General and of the State Governors appears in preceding issues of the Official Year Book (*see* No. 18, pp. 78–80).

3. **Governor-General and State Governors.**—The present Governor-General of the Commonwealth of Australia is His Excellency the Right Honorable William John McKell, who assumed office on 11th March, 1947, in succession to His Royal Highness the Duke of Gloucester.

His Excellency Major-General Sir Winston Joseph Dugan, G.C.M.G., C.B., D.S.O., as Administrator of the Government of the Commonwealth of Australia, carried out the functions of the Governor-General from 18th January, 1947, the date of the departure of His Royal Highness for England, to 11th March, 1947.

The following is a list of the Governors of the various States of Australia in office in March, 1948 :—

New South Wales ..	Lieutenant-General John Northcott, C.B., M.V.O.
Victoria	Major-General Sir Winston Joseph Dugan, G.C.M.G., C.B., D.S.O.
Queensland ..	Lieutenant-General Sir John Dudley Lavarack, K.B.E., C.B., C.M.G., D.S.O.
South Australia ..	Lieutenant-General Sir Charles Willoughby Moke Norrie, K.C.M.G., C.B., D.S.O., M.C.
Western Australia ..	Lieutenant-Governor—The Hon. Sir James Mitchell, G.C.M.G.
Tasmania ..	Admiral Sir Hugh Binney, K.C.B., D.S.O.

4. **The Cabinet and Executive Government.**—(i) *General.* Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (His Majesty the King, and his representative, Governor-General or Governor) should perform governmental acts on the advice of his Ministers ; that he should choose his principal

Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates by means, chiefly, of constitutional conventions, customs or understandings, and of institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

Formally, the executive power is vested in the Commonwealth in the Governor-General, and in the States in the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by the Ministers of State, meeting, without the Governor-General or Governor, under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day are alone present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, all Ministers are members of the Cabinet. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is presided over by the Governor-General or Governor the members thereof holding office during his pleasure. All Ministers of State are *ex officio* members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings; for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form; appointments made; resignations accepted; proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the King's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. Australian practice follows, broadly, that of the United Kingdom When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Official Year Book (*see* No. 6, p. 942). It may be added, however, that subsequent legislation has, in most of the States, obviated the necessity of responsible Ministers vacating their seats in Parliament on appointment to office.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in March, 1948 :—

AUSTRALIAN PARLIAMENTS : MINISTERS IN UPPER OR LOWER HOUSES, MARCH, 1948.

Ministers with Seats in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
The Upper House ..	5	2	4	(*a*)	2	2	1	16
The Lower House ..	14	14	8	10	4	8	8	66
Total ..	19	16	12	10	6	10	9	82

(*a*) Abolished in 1922.

(vi) *Ministers of State.* (*a*) *Commonwealth.* A statement showing the names of Ministers of State who have held office from the inauguration of the Commonwealth Government to 1925 will be found in Official Year Book No. 18, pp. 82 and 83. The names of the present Ministers will be found on pages 73 and 74.

(*b*) *State Ministries.* A list of the members of the Ministry in each State in March, 1948, will be found in § 3 of this Chapter.

5. **Number and Salary of Members of the Legislatures.**—The following table shows the number and annual salary of members in each of the legislative chambers in March, 1948 :—

MEMBERS OF COMMONWEALTH AND STATE PARLIAMENTS, AND ANNUAL SALARIES, MARCH, 1948.

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
NUMBER OF MEMBERS.								
Upper House ..	36	60	34	(*a*)	20	30	19	199
Lower House ..	75	90	65	62	39	50	30	411
Total ...	111	150	99	62	59	80	49	610
ANNUAL SALARY.								
	£	£	£	£	£	£	£	
Upper House ..	(*b*)1,500	..	350	(*a*)	600	(*d*)960	(*e*)370-500	.
Lower House ..	(*b*)1,500	(*c*)1,375	650	850	600	(*d*)960	(*e*)400-500	..

(*a*) Abolished in 1922. (*b*) Increased from £1,000 to £1,500 as from July, 1947. (*c*) Increased from £875 to £1,375 as from July, 1947. (*d*) Increased from £600 plus basic wage adjustment to £960 as from October, 1947, plus £50 per annum where electorate is more than 50 miles from Perth. (*e*) According to area of electorate and distance from the Capital.

The use of the expressions " Upper House " and " Lower House " in the statement above, though not justified constitutionally, is convenient, inasmuch as the legislative chambers are known by different names in the Commonwealth and in some of the States.

6. **Enactments of the Parliament.**—In the Commonwealth, all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly or House of Assembly. The Governor-General or the State

Governor acts as Viceroy as regards giving the Royal Assent to or vetoing Bills passed by the Legislatures, or reserving them for the special consideration of the Sovereign. In the States, the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

§ 2. Parliaments and Elections.

1. **Qualifications for Membership and for Franchise.**—The conspectus in § 4 of "General Government" in Official Year Book No. 13 contains particulars, as in 1920, relating to the legislative chambers in the Commonwealth and State Parliaments, and shows concisely the qualifications necessary for membership and for the franchise in each House. (These were, in the main, applicable in 1946, but it must be remembered that Queensland abolished the Upper House in 1922, and that since 1934 the New South Wales Legislative Council has consisted of sixty members elected as required for a twelve-year term by the members of the two Houses.) It has further to be remembered that in 1925 the Commonwealth Parliament passed an Act removing the disqualification on racial grounds from (*a*) natives of British India and (*b*) persons who have become naturalized. Disqualification of persons otherwise eligible, either as members or voters, is generally on the usual grounds of being of unsound mind or attainted of treason, being convicted of certain offences, and, as regards membership, on the grounds of holding a place of profit under the Crown, being pecuniarily interested in a Government contract except as a member of an incorporated company of more than twenty-five persons, or being an undischarged bankrupt.

2. **The Commonwealth Government.**—The Senate consists of 36 members, six being returned by each of the original federating States. Members of this Chamber are elected for the term of six years, but by a provision in the Constitution half the members retire at the end of every third year, although they are eligible for re-election. In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as possible double that of the Senate. In the House of Representatives the States are represented on a population basis, and the numbers in March, 1948, were as follows :—New South Wales, 28 ; Victoria, 20 ; Queensland, 10 ; South Australia, 6 ; Western Australia, 5 ; Tasmania, 5 ; Northern Territory, 1—total, 75. The member representing the Northern Territory may join in the debates but is not entitled to vote, except on a motion for the disallowance of any ordinance of the Territory or on any amendment of any such motion. The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators, the whole State constitutes the electorate. For the purpose of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. In both Houses members are elected by universal adult suffrage. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book.

3. **Commonwealth Elections.**—There have been seventeen complete Parliaments since the inauguration of Federation. The fifth Parliament, which was opened on 9th July, 1913, was dissolved on 30th July, 1914, in somewhat unusual circumstances. Under Section 57 of the Constitution, it is provided that, should the Senate fail to pass, or pass with amendments, any proposed law previously passed by the House of Representatives, and should the latter House, after an interval of three months, again pass the proposed law, with or without the amendments of the Senate, and the Senate for a second time reject it or pass it with amendments to which the lower House will not agree, then the Governor-General may dissolve the two Houses simultaneously. For the first time in the history of the Commonwealth this deadlock between the Senate and the House of Representatives occurred in the second session of the fifth Parliament, and, in accordance

with the section of the Constitution referred to above, both Houses were dissolved by the Governor-General. Until 1927 the Parliament met at Melbourne; it now meets at Canberra, the first meeting at Parliament House, Canberra, being opened by H.M. the King, then Duke of York, on 9th May, 1927. The first session of the eighteenth Parliament opened on 6th November, 1946. Details of the electors enrolled and of those who handed in electoral papers, and the percentages of the latter on the former are shown below for each State in respect of the 1946 election :—

COMMONWEALTH ELECTION, 28th SEPTEMBER, 1946. (*a*)

State.	Electors Enrolled.			Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
New South Wales	902,533	956,216	1,858,749	865,688	891,462	1,757,150	95.92	93.23	94.53
Victoria ..	645,186	700,351	1,345.537	613,684	647,690	1,261,374	95.12	92.48	93.75
Queensland ..	334,109	326,207	660,316	310.172	301,998	612,170	92.84	92.58	92.71
South Australia ..	203.818	216,543	420.361	195 474	203,827	399,301	95.91	94.13	94.99
Western Australia	151,872	148,465	300.337	141,968	137.098	279,066	93.48	92.34	92.92
Tasmania ..	76,675	77,878	154,553	72,874	72,006	144.880	95.04	92.46	93.74
Total ..	2,314,193	2,425,660	4,739,853	2,199,860	2,254,081	4,453,941	95.06	92.93	93.97

(*a*) All electorates contested.

As, for the first time, all electorates were contested, the numbers involved are identical respectively for both Houses. Residents of the Australian Capital Territory do not possess the right to vote, while residents of the Northern Territory elect a non-voting member (*see* above) to the House of Representatives, but have no Senate representative. The figures in the accompanying tables exclude particulars of Northern Territory. The number of electors enrolled there in 1946 was 4,164 and the number of voters 3,053. Particulars regarding Commonwealth elections since 1931 are shown in the following table :—

COMMONWEALTH ELECTIONS.

Date.	Electors Enrolled.			Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
THE SENATE.									
19.12.1931	1,827,079	1,822,875	3,649,954	1,741,163	1,727,140	3,468,303	95.30	94.75	95.02
15.9.1934	1,954,339	1,948,338	3,902,677	1,862,749	1,845,829	3,708,578	95.31	94.74	95.03
23.10.1937	2,043,212	2,036,826	4,080,038	1,963,979	1,957,358	3,921,337	96.12	96.10	96.11
21.9.1940	2,113,169	2,126,177	4,239,346	1,989,381	2,027,422	4,016,803	94.14	95.36	94.75
21.8.1943	2,164,648	2,301,989	4,466,637	2,132,225*a*	2,169,430*a*	4,301,655*a*	98.50*a*	94.24*a*	96.31*a*
28.9.1946*b*	2,314,193	2,425,660	4,739,853	2,199,860	2,254,081	4,453,941	95.06	92.93	93.97
THE HOUSE OF REPRESENTATIVES. (CONTESTED ELECTORATES.)									
19.12.1931	1,724,730	1,733,343	3,458,073	1,643,604	1,642.870	3,286,474	95.30	94.78	95.04
15.9.1934	1,930,418	1,934,021	3,864,439	1,843,949	1,833 774	3,677,723	95.52	94.82	95.17
23.10.1937	1,928,786	1,919,234	3,848,020	1,854,770	1,844,499	3,699,269	96.16	96.11	96.13
21.9.1940	2,087,003	2,109,443	4,196,446	1,966,744	2,012,265	3,979,009	94.24	95.39	94.82
21.8.1943	2,134,547	2,272,960	4,407,507	2,103,636*a*	2,141,733*a*	4,245,369*a*	98.55*a*	94.23*a*	96.32*a*
28.9.1946*b*	2,314.193	2,425,660	4,739,853	2,199,860	2,254,081	4,453,941	95.06	92.93	93.97

(*a*) Includes members of Forces not enrolled. (*b*) All electorates contested, hence numbers identical with those for Senate.

The percentage of electors who exercised the franchise at each election rose from 53.04 for the Senate and 55.69 for the House of Representatives in 1901 to 77.69 and 78.30 respectively in 1917. The next election in 1919 showed a considerable falling off, and in 1922 the decrease was still more marked, the respective percentages for that year being 57.95 and 59.36, or very little more than those for 1901. Compulsory voting was introduced prior to the election in 1925, and an exceedingly heavy vote (over 91 per cent.) was cast in that year. This high percentage has been exceeded appreciably at subsequent elections, increasing in 1943 to 96.3 per cent. for both Houses. In the 1946 election it dropped to 94.0 per cent.

For the first time two women were elected to the Commonwealth Parliament in 1943. one to the Senate and the other to the House of Representatives. A further woman was elected to the Senate in 1946.

Under the Commonwealth Electoral (War-time) Act 1940 the franchise was extended to adult members of the forces who were or had been on active service outside Australia. Persons thus benefited comprised those then serving outside Australia, and those who had returned but were not enrolled. An amending Act of 1943 removed the limitation " outside Australia " from the general active service requirement, but extended the franchise to members of the forces under 21 who were serving or had served outside Australia, and to discharged persons not enrolled including those under 21 with service outside Australia. A 1944 amendment permitted certain accredited non-combatant persons to vote as members of the forces, but limited the application of the Act to British subjects.

Provision for voting in State elections also by service personnel was made in the several States.

4. **Commonwealth Referenda.**—(i) *General.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution must, in addition to being passed by an absolute majority of each House of Parliament, be submitted to a referendum of the electors in each State, and must further be approved by a majority of the States and of the electors who voted, before it can be presented for Royal assent. So far twenty-two proposals have been submitted to referenda and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referenda and the voting thereon were given in previous issues of the Official Year Book (*see* No. 18, p. 87, No. 31, p. 67, No. 35, pp. 60 and 961 and No. 36, p. 61).

(ii) *Post-war Reconstruction and Democratic Rights Referendum,* 1944. A Convention of representatives of Commonwealth and States Parliaments to consider the reference of powers by the States to the Commonwealth met at Canberra from 24th November to 2nd December, 1942 and adopted a resolution that adequate powers to make laws in relation to post-war reconstruction should be referred by the States to the Commonwealth for a period ending at the expiration of five years after the war, and finally approved of a draft bill (*see* page 62 of the Official Year Book No. 35 for full text) which was passed in the agreed form in only two States, viz. :—New South Wales and Queensland.

Following this failure to obtain the approval of all State Parliaments to the draft Bill agreed to at the Canberra Convention, the Commonwealth Government decided to submit the question of transfer of powers to a Referendum in accordance with section 128 of the Commonwealth Constitution (see *supra*, p. 25) and the bill for this purpose—the full text of which may be found on pages 64 to 66 of Official Year Book No. 35—was passed by an absolute majority of the members of both Houses of Parliament and submitted to the people at a Referendum on 19th August, 1944. Only two States—South Australia and Western Australia—were in favour of the proposed alteration.

(iii) *Social Services, Organized Marketing of Primary Products and Industrial Employment Referendum,* 1946. On 19th November, 1945, the High Court of Australia, in deciding an action brought by the Attorney-General of Victoria against the Commonwealth, declared that the Pharmaceutical Benefits Act 1944–1945 was *ultra vires* and void. This Act was designed to make available to all residents of the Commonwealth pharmaceutical benefits, without payment of price, after obtaining prescriptions from doctors. Following the decision of the High Court, the Commonwealth Cabinet sought the opinion of eminent constitutional lawyers regarding the validity, which now appeared doubtful, of a number of Commonwealth acts relating to social services. Consideration of the opinions obtained convinced the Government of the necessity for an amendment to the Constitution, in order to authorize the continuance of acts providing existing benefits in the nature of social services and to authorize the obtaining of similar benefits in the future. Accordingly, a bill was introduced on 26th March, 1946, to alter the Constitution by empowering the Parliament to make laws for the provision of maternity allowances, widows' pensions, child endowment, unemployment, sickness and hospital benefits, medical and dental services, benefits to students and family allowances. At the same time bills were introduced to empower Parliament to legislate for the organized marketing of primary products, unrestricted by section ninety-two (freedom of interstate trade) of the Constitution, and to legislate with respect to terms and conditions of employment in industry. During the war the organization of the marketing of primary produce had been handled, under Defence powers, by the Commonwealth Government, and it was desired to extend this practice to peace-time. The intention of the industrial employment bill was to enable the Parliament to regulate, either directly or indirectly, the terms and conditions of employment in industry on a nation-wide basis. Such powers were already possessed by the respective State Governments. After the three bills had passed the two Houses of Parliament in the required manner, they were submitted to the electors of the Commonwealth at a referendum conducted concurrently with the general election on 28th September, 1946. The majority of voters in the Commonwealth were in favour of the proposed amendments, but for one only—social services—was the other necessary condition, a majority in most States, fulfilled. Detailed results of the voting on each proposal are shown in the table below :—

SOCIAL SERVICES, ORGANIZED MARKETING OF PRIMARY PRODUCTS AND INDUSTRIAL EMPLOYMENT REFERENDUM, 28th SEPTEMBER, 1946.

(*a*) Excludes informal votes.

Consequent on obtaining the approval of the electors, the Constitution Alteration (Social Services) Act 1946 was assented to on 19th December, 1946. Section fifty-one (powers of the Parliament) of the Constitution is thereby altered by the insertion, after paragraph (xxiii), invalid and old-age pensions, of the following paragraph :—

> "(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances."

5. **Parliamentary Proceedings Broadcasting Act 1946.**—On 5th July, 1946, an Act to provide for the broadcasting, by the Australian Broadcasting Commission, of the proceedings of the Senate or of the House of Representatives was assented to. The Act provides also for the appointment of a Joint Committee on the Broadcasting of Parliamentary Proceedings, to determine the days and periods of broadcasting in accordance with general principles previously arrived at, and to determine the conditions governing the re-broadcasting of proceedings. The first broadcast of proceedings took place on 10th July, 1946, the subject of debate being the second reading of the Overseas Telecommunications Bill.

6. The Parliament of New South Wales.—(i) *Constitution.* The Parliament of New South Wales consists of two Chambers, the Legislative Assembly and the Legislative Council. The Assembly consists of ninety members, elected in single-seat electoral districts, who hold their seats during the existence of the Parliament to which they are elected. The duration of Parliament is limited to three years. Until 1934 the Council was a nominee Chamber, consisting of a variable number of members appointed for life without remuneration, but as from 23rd April, 1934, it was reconstituted and became a House of sixty members to serve without remuneration for a term of twelve years, with one-quarter of the members retiring every third year. The electorate comprises members of both Chambers, who vote as a single electoral body at simultaneous sittings of both Chambers. At the first elections in 1933, four groups of fifteen members were elected to serve respectively twelve years, nine years, six years, and three years. Any person resident for at least three years in Australia and entitled to vote at the election of members of the Legislative Assembly is eligible for election as a member of the Council, if nominated by two electors, an elector being a member of either of the two Houses for the time being.

(ii) *Particulars of Elections.* Since the introduction of responsible government in New South Wales there have been thirty-four complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-fourth was dissolved on 29th March, 1947. The thirty-fifth Parliament opened on 28th May, 1947. The elections of 1920, 1922 and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at the later appeals to the people. Particulars of voting at elections from 1932 to 1947 are given below :—

NEW SOUTH WALES LEGISLATIVE ASSEMBLY ELECTIONS.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1932	739,009	725,999	1,465,008	690,094	676,993	1,367,087	96.42	96.37	96.39
1935	769,220	759,493	1,528,713	654,383	640,369	1.294,752	96.09	95.60	95.85
1938	803,517	804,316	1,607,833	608,727	606,767	1,215,494	96.15	95.41	95.78
1941	834,752	850,029	1,684,781	698,100	727,652	1,425,752	90.99	94.03	92.52
1944*a*	833,300	899,406	1,732,706	610,904	699,368	1,310,272	81.62	92.85	87.47
1947	903,138	949,649	1,852,787	794,908	826,622	1,621,530	95.40	93.68	94.51

(*a*) Service and Section votes omitted in percentage calculations.

The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election and the percentage of electors who voted in contested electorates rose from 82.54 in 1927 to over 96 in 1932, but declined to 87 in 1944.

The franchise was extended to women (Women's Franchise Act) in 1902, and was exercised by them for the first time in 1904.

(iii) *Legislative Assembly Members Pensions Act* 1946. This Act provides for a Provident Fund for the purpose of paying pensions to persons who, after the commencement of the Act, cease to be Members of the Legislative Assembly. In the case of those who have served an aggregate of fifteen years or more the pension is £6 per week, and for those without this qualification, but who have been members in any three Parliaments, the pension is £5 per week. Provision is also made for the payment of £3 per week to widows of members with the necessary qualifications, or to widows of former members on pension. Persons ceasing to be members and who have not the qualifications for a pension, or their widows, are entitled to a refund of all contributions. Contributions are deducted from members' salaries at the rate of £78 per annum.

(iv) *Referendum on Closing Hour for Licensed Premises and Registered Clubs.* At a referendum, held on 15th February, 1947, submitting the closing hours of 6 p.m., 9 p.m. and 10 p.m. to the electors, the voting resulted in 1,051,260 in favour of 6 p.m., 604,833 for 10 p.m. and 26,954 for 9 p.m.

7. **The Parliament of Victoria.**—(i) *Constitution.* Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, as well as in the qualifications necessary for members and electors. The number of members in the Upper House is thirty-four, and in the Lower House, sixty-five. In the Legislative Council the tenure of the seat is for six years, but one member for each of the seventeen provinces retires every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years. Single voting is observed in elections held for either House, plurality of voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937; for the latter House, however, it is still possible for an elector to be enrolled for more than one province, and such elector may select the province for which he desires to record his vote. A preferential system of voting (see Official Year Book No. 6, p. 1182) was adopted for the first time in Victoria at the election held in November, 1911. Compulsory voting was first observed at the 1927 elections for the Legislative Assembly, and at the 1937 elections for the Legislative Council.

(ii) *Particulars of Elections.* Since the introduction of responsible government in Victoria there have been thirty-six complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the thirty-sixth was dissolved on 9th October, 1947. The thirty-seventh Parliament was opened on 2nd December, 1947. Particulars of voting at elections during the years 1931 to 1947 are given in the following table :—

VICTORIAN ELECTIONS.

LEGISLATIVE COUNCIL.

Year.	Electors Enrolled—Whole State.	Contested Electorates.		
		Electors Enrolled.	Electors who Voted.	Percentage of Electors who Voted.
1931	470,349	239,975	93,244	38.86
1934	469,395	160,980	47,375	29.43
1937	447,694	265,194	208,925	78.78
1940	471,843	235,784	178,666	75.78
1943	465,637	117,584	83,568	71.07
1946	517,719	393,907	291,295	73.95

LEGISLATIVE ASSEMBLY.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1932	510,809	544,492	1,055,301	335,512	351,530	687,042	94.60	93.82	94.20
1935	532,619	566,632	1,099,251	415,081	438,389	853,470	95.00	93.82	94.39
1937	550,618	585,978	1,136,596	383,507	413,923	797,430	94.22	93.72	93.96
1940	565,002	597,965	1,162,967	377,644	408,715	786,359	93.65	93.19	93.41
1943	596,595	665,035	1,261,630	392,160	491,519	883,679	81.87	91.57	87.00
1945	594,761	682,188	1,276,949	408,671	487,890	896,561	85.75	89.93	87.98
1947	645,342	700,188	1,345,530	585,028	621,787	1,206,815	94.44	92.52	93.44

The franchise was extended to women by the Adult Suffrage Act 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

(iii) *Parliamentary Contributory Retirement Fund Act* 1946. Under this Act provision is made for the establishment of a fund for the payment of pensions, retiring allowances etc., to persons who cease to be Members of Parliament after the commencement of the Act and to certain others. Those who have served as members for an aggregate of fifteen years or more are entitled to a pension at the rate of the basic wage for Melbourne. Under certain conditions persons without this qualification of fifteen years' service, but who have been members in at least three consecutive Parliaments, are also entitled to the pension. Certain other allowances and payments are prescribed in respect of the retirement or death of members not qualified for pensions. Widows of persons receiving pensions, or of those qualified for them, will be paid two-thirds of the pension originally paid, or due. The fund will be financed by deductions from members' salaries at the rate of £1 per fortnight, and, as necessary, by payments from Consolidated Revenue Fund.

8. **The Parliament of Queensland.**—(i) *Constitution.* As stated previously, the Legislative Council in Queensland was abolished in 1922, the date of Royal Assent to the Act being 23rd March, 1922. The Legislative Assembly is composed of sixty-two members, and the State is divided into that number of electoral districts. The Electoral Districts Act of 1931, assented to on 1st October, 1931, provided that from and after the end of the twenty-fifth Parliament (dissolved on 19th April, 1932) the number of members and electoral districts should be reduced from seventy-two to sixty-two. Preferential voting has been abolished and the system of election of the candidate obtaining the highest number of votes in the electorate now operates.

(ii) *Particulars of Elections.* Since the establishment of responsible government in Queensland there have been thirty complete Parliaments, the last of which was dissolved on 21st March, 1947. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date. but he duly attended on 29th May, 1860, and delivered the Opening Address.

At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. Of the number of electors enrolled at the 1944 elections, 87.55 per cent. went to the polls. Statistics regarding elections during the years 1932 to 1947 are given below :—

QUEENSLAND LEGISLATIVE ASSEMBLY ELECTIONS.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total
1932	274,986	250,958	525,944	236,266	220,628	456,894	92.59	93.14	92.86
1935	303,018	272,270	575,288	245,331	225,427	470,758	92.55	92.89	92.71
1938	318,402	288,157	606,559	280,841	258,196	539,037	92.09	92.97	92.51
1941	331,285	303,631	634,916	269,849	259,398	529,247	88.68	92.03	90.29
1944	329,028	326,956	655,984	251,119	261,662	512,781	85.62	89.48	87.55
1947(a)	357,083	340,322	697,405	324,869	308,040	632,909	90.98	90.51	90.75

(a) All electorates contested.

The election of 1907 was the first State election in Queensland at which women voted. the right being conferred under the Elections Acts Amendment Act 1905.

9. **The Parliament of South Australia.**—(i) *Constitution.* In this State there is a Legislative Council composed of twenty members and a House of Assembly with thirty-nine members, both Chambers being elective. For the Legislative Council the State is divided into five districts each returning four members two of whom retire alternately. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were forty-six members representing nineteen districts. A system of preferential voting is in operation.

(ii) *Particulars of Elections.* Since the inauguration of responsible government in South Australia there have been thirty-one complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-first Parliament was opened on 20th July, 1944, and was dissolved on 28th February, 1947. The thirty-second Parliament was opened on 26th June, 1947. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the Constitution (Quinquennial Parliament) Act 1933, but this Act was repealed by the Constitution Act Amendment Act (No. 2) 1939, and the three-year term was reverted to. Particulars of voting at the last six elections are given below :—

South Australia was the first of the States to grant women's suffrage (under the Constitution Amendment Act 1894), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly, provided for by the Electoral Act Amendment Act 1942, was first observed at the 1944 election.

10. **The Parliament of Western Australia.**—(i) *Constitution.* In this State both Chambers are elective. For the Legislative Council there are thirty members, each of the ten provinces returning three members, one of whom retires biennially. At each biennial election the member elected holds office for a term of six years, and automatically

retires at the end of that period. The Legislative Assembly is composed of fifty members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

(ii) *Particulars of Elections.* Since the establishment of responsible government in Western Australia there have been eighteen complete Parliaments, the first of which was opened on 30th December, 1890. The eighteenth Parliament was opened on 27th July, 1944, and expired on 31st January, 1947. The preferential system of voting in use in Western Australia is described in Official Year Book No. 6, p. 1184. Elections for membership of both Houses, which were due to be held early in 1942, were postponed by the Legislative Council Postponement of Elections Act 1942 and the Legislative Assembly Duration and General Elections Postponement Act 1941. Particulars of voting at the last six elections for each Chamber are given in the tables following :—

WESTERN AUSTRALIAN ELECTIONS.

1947	150,176	146,913	297,089	83,270	83,067	*b*166,904	85.65	85.60	*b*85.91

(*a*) Includes 18,478 members of Forces not enrolled. (*b*) Includes 567 members of Forces not enrolled.

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939, when the percentage of electors who voted in contested electorates rose from 70.13 to 90.01. The high percentage of 90.60 in 1933 was due to the fact that the Secession Referendum, in respect of which voting was compulsory, was taken on the Legislative Assembly election day.

(iii) *Secession Referendum.* On 8th April, 1933, the people of Western Australia voted overwhelmingly in favour of the State withdrawing from the Federal Commonwealth, the voting being :—In favour 138,653 ; not in favour, 70,706.

(iv) *Members of Parliament Fund Act* 1941–1944. In 1941 an act was passed providing for the establishment of a fund to pay a lump sum of £600 to a member of either House of Parliament upon loss of membership after at least seven years' service, or to his dependants. Where a member has not served at least seven years, provision is made for the repayment of double the amount contributed. The fund is financed by deductions of £24 per annum from each member's allowance. The amended Act 1944 provides for its operation from 1st July, 1944. A member's service dates from the commencement of the Act, but provision is made for the payment of a lump sum proportionate to any selected period of prior membership, entitling the member to benefit as if the selected period had been served subsequently.

11. **The Parliament of Tasmania.**—(i) *Constitution.* In Tasmania there are two legislative Chambers—the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the Constitution Act 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. Prior to the 1946 Act there were eighteen members elected from fifteen divisions, of which Hobart returned three members and Launceston two. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning six members elected under a system of proportional representation which first came into force at the 1909 elections (see Official Year Book No. 6, p. 1185). The life of the Assembly was extended from three to five years by the Constitution Act 1936.

(ii) *Particulars of Elections.* The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been twenty-seven complete Parliaments since the inauguration of responsible government. Particulars of the voting at the last six elections for the House of Assembly are given hereunder :—

TASMANIAN HOUSE OF ASSEMBLY ELECTIONS.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1928	55,058	56,898	111,956	46,769	44,910	91,679	84.94	78.94	81.90
1931	59,024	59,706	118,730	56,674	56,105	112,779	96.02	93.97	94.99
1934	63,841	63,840	127,681	60,623	59,999	120,622	94.96	93.98	94.47
1937	66,223	65,778	132,001	62,880	61,580	124,460	94.95	93.62	94.29

1946	78,420	79,336	157,756	71,414	72,260	143,674	91.07	91.08	91.07

The present members of the Legislative Council have been elected at various dates and the following particulars are given of the last contested elections in three divisions in 1946 :—Number of electors on the roll, 15,796 ; number of votes recorded, 12,100; percentage of enrolled electors who voted, 76.60.

The suffrage was granted to women under the Constitution Amendment Act 1903 and compulsory voting came into force on the passing of the Electoral Act in 1928.

§ 3. Administration and Legislation.

1. **The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by his Excellency the late Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King, the Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., being Prime Minister.

The following table gives the number and duration of Parliaments since Federation :—

COMMONWEALTH PARLIAMENTS.

Number of Parliament.	Date of Opening.	Date of Dissolution.
First	9th May, 1901	23rd November, 1903
Second	2nd March, 1904	5th November, 1906
Third	20th February, 1907	19th February, 1910
Fourth	1st July, 1910	23rd April, 1913
Fifth	9th July, 1913	30th July, 1914(*a*)
Sixth	8th October, 1914	26th March, 1917
Seventh	14th June, 1917	3rd November, 1919
Eighth	26th February, 1920	6th November, 1922
Ninth	28th February, 1923	3rd October, 1925
Tenth	13th January, 1926	9th October, 1928
Eleventh	9th February, 1929	16th September, 1929
Twelfth	20th November, 1929	27th November, 1931
Thirteenth	17th February, 1932	7th August, 1934
Fourteenth	23rd October, 1934	21st September, 1937
Fifteenth	30th November, 1937	27th August, 1940
Sixteenth	20th November, 1940	7th July, 1943
Seventeenth	23rd September, 1943	16th August, 1946
Eighteenth	6th November, 1946	.. ..

(*a*) On this occasion, the Governor-General, acting on the advice of the Ministry, and under Section 57 of the Constitution, granted a dissolution of both the Senate and the House of Representatives, this being the only occasion on which a dissolution of both Houses has occurred.

2. **Governors-General and Ministries.**—The following statements show the names of the several Governors-General, and the Ministries which have directed the administration of the affairs of the Commonwealth since its inception :—

4. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament up to the end of 1946 is indicated in alphabetical order in Vol. XLIV. "The Acts of the Parliament of the Commonwealth of Australia passed during the year 1946, in the Third Session of the Seventeenth Parliament of the Commonwealth, and portion of the First Session of the Eighteenth Parliament of the Commonwealth, with Tables and Index." A "Chronological Table of Acts passed from 1901 to 1946, showing how they are affected by subsequent legislation or lapse of time" is also given, and, further, "A Table of Commonwealth Legislation passed from 1901 to 1946 in relation to the several provisions of the Constitution", is furnished. Reference should be made to these for complete information. In issues of the Official Year Book prior to No. 23, an analytic table was included showing the nature of Commonwealth legislation in force at the end of the latest year available. A classification of legislation, according to its relation to the several provisions of the Constitution, up to the end of the year 1928 will be found in No. 22, pp. 76–84.

(ii) *Acts administered.* Standardization of Railways Agreement; Defence (Transitional Provisions) Act, insofar as it relates to the following Orders:—Control of New Commercial Motor Vehicles, and Control of New Motor Cars.

§ 5. Cost of Parliamentary Government.

The following statement shows the cost of parliamentary government in the Commonwealth and in each State, as well as the cost per head of population, for the year ended 30th June, 1946. In order to avoid incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure (with the exception of the item "Governor's salary") under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, and carried out at the request of the Government.

COST OF PARLIAMENTARY GOVERNMENT, 1945–46.

§ 6. Government Employees.

1. **Australia, 1939 to 1947.**—The following table shows at June in each of the years 1941 to 1947, in comparison with 1939, the number of employees of Commonwealth and Allied Governments, State Government and Semi-Government bodies, and Local Government authorities. These include not only administrative employees but also employees engaged in all other Government activities, e.g., business undertakings, public utilities, construction of public works, munitions manufacture and in factories connected with Government undertakings and utilities. Personnel serving in the Defence Forces are excluded.

1947 ..	120,287	38,187	158,474	296,982	50,121	347,103	54,783	3,778	58,561	472,052	92,086	564,138

(*a*) Includes British and United States of America authorities' civilian employees in Australia. (*b*) Partly estimated. (*c*) July.

The increase in number of employees of the Commonwealth and Allied Governments in 1941–42 and 1942–43 was due mainly to expansion of Government munition factories, Allied Works projects and administrative organizations of Allied Governments and war-time departmental controls. In 1943–44 and 1944–45 there was a decrease in Commonwealth Government employment following completion of certain munitions and defence works programmes, and a sharp decline occurred following the cessation of hostilities. Since then there has been an increase in employment because of the expansion of peace-time activities. The diminution in the number of employees of State, semi-Government and local authorities between June, 1942 and June, 1943, was due to a curtailment of peace-time work. Between June, 1945 and June, 1947, there was an increase in State and semi-Government authorities of more than 57,000, of which the major proportion was distributed between railways, works, education and administrative departments. Local government employment increased by more than 15,000 in the same period.

2. **Commonwealth and States, etc., June, 1946 and 1947.**—The number of employees of the Commonwealth and Allied Governments and of the State Governments, semi-Government and Local Government authorities in each State as at June, 1946, and 1947, are shown in the following table :—

GOVERNMENT EMPLOYEES, JUNE, 1946 AND 1947.

(*a*) Includes British and United States of America authorities' civilian employees in Australia.

§ 7. Diplomatic and other Representatives Overseas and in Australia.

Australia has diplomatic and other representatives in the United Kingdom, Canada, New Zealand, South Africa, Eire, India, Egypt, the United States of America, Brazil, Chile, China, France, the Netherlands, the Union of Soviet Socialist Republics and other countries, in all about twenty. In addition, there are the Australian delegates to the United Nations at New York and Australian liaison officers or representatives in Malaya, with the Supreme Commander for the Allied Powers, Tokyo, and with the Allied Control Council, Berlin.

Countries represented in Australia by diplomatic and other representatives include the following :—the United Kingdom, Canada, New Zealand, India, Eire, Malta, the United States of America, Brazil, Chile, China, Denmark, France, the Netherlands, Norway, Sweden and the Union of Soviet Socialist Republics. Including those with consular representatives, who number about 160, there are about fifty countries represented.

For particulars of the various diplomatic and other representatives overseas and in Australia *see* Chapter XXVIII.—Miscellaneous. Full details of British and foreign representation in Australia—diplomatic and consular—may be obtained from a publication issed by the Department of External Affairs, Canberra, entitled " Diplomatic and Consular List, including British Commonwealth Representatives and Trade Commissioners in Australia."

CHAPTER IV.

LAND TENURE AND SETTLEMENT.

§ 1. Introduction.

1. **General.**—A comprehensive description of the land tenure systems of the several States is given in Official Year Book No. 4 (pp. 235–333), while later alterations are referred to in subsequent issues. In this chapter a summary is given of the principal features of existing land legislation. In previous issues an account is given of the various tenures under which Crown lands may be taken up. (*See* Official Year Book No. 22, pp. 133–195; also par. 2 hereunder for a conspectus of legislation at present in force). Special sections are devoted to closer settlement, the settlement of returned soldiers on the land and advances to settlers. Particulars as to the areas of land alienated in each State and similar matter are also included.

2. **State Land Legislation.**—The legislation in force relating to Crown Lands, Closer Settlement, Returned Soldiers' Settlement and other matters dealt with in this chapter is summarized in the following conspectus :—

State Advances Act 1935: Closer Settlement Act 1929–1939: Unemployed (Assistance to Primary Producers) Relief Act 1930–1934: Farmers' Debt Adjustment Act 1936.

3. **Northern Territory Land Legislation.**—In the Northern Territory of Australia the legislation relating to Crown lands is embodied in the Crown Lands Ordinance 1931–1946: that relating to mining in the Mining Ordinance 1939–1945, the Mining (Royalty Suspension) Ordinance 1943, the Gold Dredging Act 1899, the Mineral Oil and Coal Ordinance 1922–1923, the Mining Development Ordinance 1939–1940, and the Mines Regulation Ordinance 1939: and that relating to advances to settlers in the Encouragement of Primary Production Ordinance 1931–1938.

4. **Australian Capital Territory Land Legislation.**—In the Australian Capital Territory the Ordinances relating to Crown lands are the Leases Ordinance 1918–1937, the City Area Leases Ordinance 1936–1938, the Church Lands Leases Ordinance 1924–1932, and the Leases (Special Purposes) Ordinance 1925–1943.

5. **Administration and Classification of Crown Lands.**—In each of the States there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown lands. The administrative functions of most of the Lands Departments are to some extent decentralized by the division of the States into what are usually termed Land Districts, in each of which there is a Lands Office, which deals with applications for selections and other matters generally appertaining to the administration of the Acts within the particular district. In some of the States there is a local Land Board or a Commissioner for each district or group of districts. In the Northern Territory the Administrator, under the control of the Minister for the Interior, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory the administration of the Leases Ordinances is in the hands of the Department of the Interior.

Crown lands are generally classified according to their situation, the suitability of the soil for particular purposes, and the prevailing climatic and other conditions. The modes of tenure under the Acts, therefore, as well as the amount of purchase-money or rent, and the conditions as to improvements and residence, vary considerably. The administration of special Acts relating to Crown lands is in some cases in the hands of a Board under the general supervision of the Minister.

In each of the States there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory there are several ordinances relative to mining.

6. **Classification of Tenures.**—The tabular statement which follows shows the several tenures under which Crown lands may be acquired or occupied in each State. In the Northern Territory, leases (excepting pastoral and "miscellaneous") are granted in perpetuity, pastoral and "miscellaneous" leases being restricted to periods of not more than 42 and 21 years respectively. The Lands Ordinance provides also for the grant in fee simple of town lands, agricultural lands, garden lands and tropical lands, and for the issue of grazing, occupation and "miscellaneous" licences. The mining leases and holdings are, generally speaking, similar to those of the States. In the Australian Capital Territory leases only are issued.

§ 2. Free Grants and Reservations.

1. **New South Wales.**—(i) *Free Grants.* Crown lands may, by notification in the *Gazette*, be dedicated for public purposes and be granted therefor in fee-simple. Such lands may be placed under the care and management of trustees, not less than three in number, appointed by the Minister.

(ii) *Reservations.* Temporary reservations of Crown lands from sale or lease may be made by the Minister.

(iii) *Areas Granted and Reserved.* During 1944–45 and 1945–46 7,308 and 3,907 acres respectively were permanently reserved or dedicated for miscellaneous parks and recreation reserves and for other public purposes, the number of separate localities or areas being 67 and 78 respectively. The areas reserved at 30th June, 1945 and 1946 were as follows :—

AREAS TEMPORARILY AND PERMANENTLY RESERVED : NEW SOUTH WALES.

(Acres.)

At 30th June—	Travelling Stock.	Pending Classification and Survey.	Forest Reserves.	Water and Camping Reserves.	Mining Reserves.	Recreation and Parks.	Other Reserves.	Total Area Reserved (a)
1945 ..	5,330,487	3,809,444	2,074,792	834,478	1,225,073	419,113	4,053,496	17,746,883
1946 ..	5,329,493	3,893,786	2,076,631	835,783	1,224,836	419,816	4,092,065	17,872,410

(a) Includes areas occupied under annual, special, scrub or forestry leases, or under occupation licences or permissive occupancy, included under the appropriate leasehold tenures in following sections.

During 1943–44 legislation was passed to reserve permanently the Crown lands within the snow belt and adjacent Crown lands as a National Park, to be known as the Kosciusko State Park. A trust was formed to control and develop the area—approximately one and a quarter million acres. Shortages of manpower and materials have to date prevented any substantial progress in developmental works.

2. **Victoria.**—(i) *Free Grants.* The Governor may grant, convey or otherwise dispose of Crown lands for public purposes.

(ii) *Reservations.* The Governor may temporarily or permanently reserve from sale, lease or licence any Crown lands required for public purposes, and may except any area of Crown lands from occupation for mining purposes under any miner's right.

(iii) *Areas Granted and Reserved.* During 1945 and 1946, 14 and 1 acres respectively were granted without purchase. The areas both temporarily and permanently reserved at the end of 1945 and 1946 were as follows :—

AREAS TEMPORARILY AND PERMANENTLY RESERVED : VICTORIA.

(Acres.)

At 31st December—	Roads.	Water Reserves.	Agricultural Colleges, etc.	Forest and Timber Reserves.		Reserves in the Mallee.	Other Reserves.	Total Area Reserved.
				Under Forests Acts. (a)	Under Land Acts.			
1945 ..	1,794,218	316,056	8,434	4,904,350	156,696	410,000	547,288	8,137,051
1946 ..	1,794,218	316,012	8,434	4,936,911	156,696	410,000	549,131	8,171,402

(a) Timber Reserves, included in figures, amounted to 717,582 acres in each year.

(iv) *Revoking of Agricultural Reservations.* Under the Agricultural Colleges Act 1944, the lands on which the agricultural colleges and experimental farms at Longerenong (2,386 acres) and Dookie (6,048 acres) are established, are permanently reserved as sites for the purposes of State Agricultural Colleges, and the remainder of the lands previously reserved has become unalienated for treatment as such under the Land Acts. *See also* § 5, para. 3 following.

3. **Queensland.**—(i) *Free Grants.* The Governor may grant in trust any Crown land which is or may be required for public purposes. Under the Irrigation Act, land to be used for the purpose of any undertaking under that Act may be vested in fee-simple in the Irrigation Commission.

(ii) *Reservations.* The Governor may reserve from sale or lease, either temporarily or permanently, any Crown land which is or may be required for public purposes. Reserved lands may be placed under the control of trustees who are empowered to lease them for not more than 21 years with the approval of the Minister.

Under the State Forests and National Parks Acts, the Governor may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(iii) *Areas Granted and Reserved.* During 1945 and 1946 respectively the areas granted in fee-simple without payment were nil and 15 acres, the area set apart as reserves 203,419 and 431,140 acres, and reserves cancelled 164,528 and 125,909 acres. The areas reserved, including roads, at the end of 1945 and 1946 were as follows :—

AREAS RESERVED : QUEENSLAND.

(Acres.)

At 31st December—	Timber Reserves.	State Forests and National Parks.	Aboriginal Reserves.	Streets, Surveyed Roads and Stock Routes.	General.	Total Area Reserved.
1945	3,055,123	4,069,433	5,938,476	3,425,000	5,655,357	22,143,389
1946	3,075,901	4,123,325	6,170,476	3,436,000	5,653,918	22,459,620

4. **South Australia**—(i) *Free Grants.* The Governor may dedicate Crown lands for any public purpose and grant the fee-simple of such lands, with the exception of foreshores and land for quays, wharves or landing-places, which are inalienable in fee-simple from the Crown.

(ii) *Reservations.* The Governor may reserve Crown lands for the use and benefit of aborigines, military defence, forest reserves, railway stations, park lands or any other purpose that he may think fit.

(iii) *Areas Granted and Reserved.* During 1944–45 and 1945–46 respectively, free grants were issued for areas of 75 and 42 acres, and reserves comprising 17,613 and 16,254 acres were proclaimed. At 30th June, 1945 and 1946, the total area of surveyed roads, railways and other reserves was 20,239,878 and 20,256,172 acres respectively including at each date, 16,726,400 acres in the north-west of the State set apart as an aboriginal reserve in 1921, and 595,200 acres at Ooldea, adjoining the transcontinental railway, reserved for a similar purpose in 1940.

5. **Western Australia.**—(i) *Free Grants.* The Governor may dispose of, in such manner as for the public interest may seem best, any lands vested in the Crown for public purposes, and may grant the fee-simple of any reserve to secure the use thereof for the purpose for which such reserve was made.

(ii) *Reservations.* The Governor may reserve any lands vested in the Crown for public purposes. Areas not immediately required may be leased by the Governor for periods up to 10 years. Reserves may be placed under the control of a local authority or trustees, with power to lease them for a period not exceeding 21 years, or may be leased for 99 years. Temporary reserves may also be proclaimed.

(iii) *Areas Granted or Reserved.* During the years ended 30th June, 1945 and 1946, approximately 31,960 and 5,187,802 acres respectively were reserved for various purposes. At 30th June, 1946 (figures at 30th June, 1945, in parenthesis), the total area reserved was 54,816,013 (49,628,211) acres, comprising State forests, 3,395,586 (3,392,926) acres, timber reserves 1,778,111 (1,778,111) acres, and other reserves 49,642,316 (44,457,174) acres.

6. **Tasmania.**—(i) *Free Grants.* No mention is made in the Crown Lands Act respecting free grants of land, and it is expressly stated that no lands may be disposed of as sites for religious purposes except by way of sale under the Act. Under the Returned Soldiers' Settlement Act of 1916, returned soldiers who applied prior to 31st March, 1922, were eligible to receive free grants of Crown land not exceeding £100 each in value, but these grants were conditional on the land being adequately improved.

(ii) *Reservations.* The Governor in Council may except from sale or lease, and reserve to His Majesty any Crown land for public purposes, and vest for such term as he thinks fit any land so reserved in any person or corporate body. Any breach or non-fulfilment of the conditions upon which such land is reserved renders it liable to forfeiture. A school allotment, not exceeding 5 acres in area, may also be reserved.

(iii) *Areas Granted or Reserved.* The total area reserved at the end of 1944, 1945 and 1946 was 2,828,033, 2,885,036 and 2,888,657 acres respectively excluding 22,042, 22,310 and 22,319 acres respectively of land occupied by Commonwealth and State Departments.

7. **Northern Territory.**—(i) *Reservations.* The Governor-General may resume for public purposes any Crown lands not subject to any right of or contract for purchase, and may reserve, for the purpose for which they are resumed, the whole or any portion of the land so resumed.

(ii) *Areas Reserved.* The total area of reserves at 30th June, 1945 and 1946, respectively was 69,257 and 69,334 square miles, comprising aboriginal native, 67,258 and 67,335 square miles; and other reserves, 1,999 square miles.

8. **Summary.**—The following table shows the total areas reserved in each State, and the grand totals, for the years 1942 to 1946 :—

AREAS RESERVED.

('000 Acres.)

Year.	N.S.W. (*a*)	Victoria. (*b*)	Q'land. (*b*)	S. Aust. (*a*)	W. Aust. (*a*)	Tasmania. (*b*)	Nor. Terr. (*a*)	Total.
1942 ..	18,009	8,209	21,694	20,202	49,161	2,817	44,315	164,407
1943 ..	17,566	8,213	21,705	20,219	49,231	2,828	44,324	164,086
1944 ..	18,319	8,216	21,720	20,222	49,596	2,828	44,324	165,225
1945 ..	17,747	8,137	22,143	20,240	49,628	2,885	44,324	165,104
1946 ..	17,872	8,171	22,460	20,256	54,816	2,889	44,374	170,838

(*a*) At 30th June. (*b*) At 31st December.

§ 3. Unconditional Purchases of Freehold.

1. **New South Wales.**—(i) *Auction Purchases.* Crown lands, not exceeding in the aggregate 200,000 acres in any one year, may be sold by public auction in areas not exceeding half-an-acre for town lands, 20 acres for suburban lands, and 640 acres for country lands, at the minimum upset price of £8, £2 10s., and 15s. per acre respectively. At least 10 per cent. of the purchase-money must be paid at the time of sale, and the balance within three months, or the Minister may allow the payment of such balance to be deferred for a period not exceeding ten years, 4 per cent. interest being charged. Town blocks in irrigation areas may also be sold by auction.

(ii) *After-Auction Purchases.* In certain cases, land offered at auction and not sold may be purchased at the upset price. A deposit in accordance with the terms and conditions under which the land was previously offered must be lodged, and, if the application be approved by the Minister, the balance of purchase money is payable as required by the specified terms and conditions.

(iii) *Special Purchases.* Under certain circumstances, land may be sold in fee-simple, the purchaser paying the cost of survey and of reports thereon, in addition to the purchase-money. The minimum upset price per acre is the same as in the case of land sold by auction. Areas not exceeding 5 acres in extent may be sold to recognized religious bodies and public authorities at prices determined by the local land board.

(iv) *Improvement Purchases.* The owner of improvements in land, in authorized occupation by residence under any Mining or Western Lands Act of land within a gold-field or mineral field, may purchase such land without competition at a price determined by the local Land Board, but at not less than £8 per acre for town lands or £2 10s. per acre for other lands. The area must not exceed ¼ acre within a town or village, or 2 acres elsewhere, and no person may purchase more than one such area within 3 miles of a similar prior purchase by him.

(v) *Areas Sold.* During the year ended 30th June, 1946 (figures for year ended 30th June, 1945, in parenthesis), the total area sold was 610 (1,675) acres, of which 4 (12) acres were sold by auction and 107 (56) acres as after-auction purchases, while 24 (22) acres were sold as improvement purchases and 475 (1,585) acres as special purchases. The amount realized for the sale of the whole area was £17,885 (£17,670).

2. **Victoria**—(i) *General.* Lands, not exceeding 100,000 acres in any one year, specially classed for sale by auction may be sold by auction in fee-simple at an upset price not less than £1 per acre. The purchaser must pay the survey fee at the time of the sale, together with a deposit of 12½ per cent. of the whole price ; the residue is payable in equal half-yearly instalments with interest. Any unsold land in a city, town or borough, areas specially classed for sale, isolated pieces of land not exceeding 150 acres in area, and sites for churches or charitable purposes, if not more than 3 acres in extent, may be sold by auction on the same terms. Swamp or reclaimed lands may also be sold by auction, subject to the condition that the owner keeps open all drains, etc., thereon.

(ii) *Areas sold at Auction and by Special Sales.* During 1945 and 1946 totals of 576 and 954 acres respectively were disposed of under this tenure, 469 and 672 acres being country lands, while 107 acres of town and suburban lands were sold by auctions each year.

3. **Queensland.**—(i) *General.* From 1917 to 1929 the law precluded land being made available for any class of selection which gave the selector the right to acquire the freehold title. Amending legislation giving power to make land available under freehold tenures was passed in 1929 but this provision was repealed by the Act of 1932.

(ii) *Areas Sold, etc.* During 1945, unconditional selections made freehold totalled 2,266 acres. In 1946 no unconditional selections were made freehold.

4. **South Australia.**.—(i) *Sales by Auction.* The following lands may be sold by auction for cash :—(*a*) special blocks ; (*b*) Crown lands which have been offered for lease and not taken up within two years ; (*c*) town lands ; and (*d*) suburban lands which the Governor excepts from the operations of the Land Board. A purchaser must pay 20 per cent of the purchase money in cash, and the balance within one month or within such extended time as the Commissioner of Crown Lands may allow. Town lands may be sold subject to the condition that they cannot be transferred or mortgaged within six years without the consent of the Commissioner. If the Commissioner of Crown Lands so determines, town lands may also be offered at auction on terms that the buyer may at his option purchase the lands for cash or on agreement for sale and purchase.

(ii) *Areas Sold, etc.* During the years ended 30th June, 1945 and 1946, the area of town lands and special blocks sold by auction was 31 and 30 acres respectively. In addition, 28,067 and 49,985 acres respectively were sold at fixed prices, and the purchases of 67,872 and 43,915 acres respectively on credit were completed, making a total of 95,970 and 93,930 acres respectively.

5. **Western Australia.**.—(i) *Sales by Auction.* Town, suburban and village lands must be sold by auction after being surveyed into lots and notified in the *Gazette.* Ten per cent. of the purchase-money must be paid in cash together with the value of any improvements, and the balance in four equal quarterly instalments. Suburban land must be fenced within two years, and no Crown grant may be issued until the land is fenced.

(ii) *Areas Sold.* During the years ended 30th June, 1945 and 1946, the area of town and suburban allotments sold by auction was 88 and 116 acres in 186 and 260 allotments respectively.

6. **Tasmania.**.—(i) *Sales by Auction.* Town lands may be sold by auction for cash or on credit. No town land, the price of which is less than £15, may be sold on credit.

(ii) *After-Auction Sales.* Town lands, not within 5 miles of any city, which, after having been offered at auction, have not been sold, may be sold at the upset prices by private contract.

(iii) *Sales of Land in Mining Towns.* Any person being the holder of a residence licence or business licence who shall be in lawful occupation of any residence area or business area, and who shall be the owner of buildings and permanent improvements upon such land of a value equal to or greater than the upset price of such area, shall be entitled to purchase such area at the upset price at any time prior to the day on which such area is to be offered for sale as advertised. The upset price for such area shall not be less than £10, excluding the value of improvements, cost of survey, and of grant deed. The area which may be so purchased may, with the consent of the Commissioner, exceed one-quarter of an acre, but shall not in any case exceed one-half of an acre.

§ 4. Conditional Purchases of Freehold.

1. **General.**—The various methods of obtaining Crown lands by conditional purchase in the several States are given in some detail in preceding issues of the Official Year Book (see No. 22, pp. 141–9).

2. **New South Wales.**—At 30th June, 1945 and 1946, the total number of incomplete conditional purchases in existence was 41,080 and 40,881 respectively, covering an area of 13,502,537 and 13,315,504 acres respectively. The following table gives particulars of conditional purchases, including non-residential conditional purchases and special area conditional purchases, for the years ended 30th June, 1945 and 1946, together with the total area for which deeds have been issued :—

CONDITIONAL PURCHASES : NEW SOUTH WALES.

Year ended 30th June—	Applications Received.(a)	Applications Confirmed.(a)		Areas for which Deeds have been Issued.	
	Number.	Number.	Area.	During the Year.	To end of Year.
			Acres.	Acres.	Acres.
1945	42	11	1,135	204,654	31,452,180
1946	60	26	1,192	189,744	31,686,702

(a) Excludes conversions from other tenures, 1944–45, 422 comprising 68,962 acres ; 1945–46, 559 comprising 83,423 acres.

3. **Victoria.**—Excluding selections in the Mallee country, the total area purchased conditionally in 1945 and 1946 was 3,673 and 3,349 acres respectively, all with residence. The number of selectors was 25 and 30 respectively. There were no selections in the Mallee in 1945 and 1946.

In addition the final payments were made during 1945 and 1946 on conditional purchases comprising 137 and 197 acres of Mallee lands.

4. **Queensland.**—The following selections were made freehold during 1945 and 1946 :—Agricultural farms, 212,755 and 171,075 acres ; agricultural homesteads, 602 and 133 acres ; prickly pear selections, 27,889 and 48,268 acres ; and prickly pear development selections 8,442 and 1,021 acres.

5. **South Australia.**—The land allotted under agreements to purchase during 1945–46 (figures for 1944–45 in parenthesis) was 11,278 acres, comprising Eyre's Peninsula railway lands 1,547 (29) acres, closer settlement lands 740 (859) acres, soldiers' acquired lands 2,276 (689) acres, surplus lands 6,606 (nil) acres, and other Crown lands 109 (322) acres.

6. **Western Australia.**—During the year ended 30th June, 1946 (figures for the year ended 30th June, 1945, in parenthesis) the number of holdings conditionally alienated was 354 (321), the total area involved being 228,906 (231,321) acres, comprising conditional purchases by deferred payments with residence of 225,641 (226,349) acres and free homestead farms 3,265 (4,972) acres. Under the heading "deferred payments (with residence)" are included conditional purchases of grazing lands.

In addition, Crown grants were issued during 1945–46 (1944–45 in parenthesis) for the following selections, the prescribed conditions having been complied with :—Free homestead farms 10,543 (7,457) acres and conditional purchases 110,066 (110,899) acres.

7. **Tasmania.**—During 1945–46 (figures for 1944–45 in parenthesis) conditional purchases of 27,428 (23,860) acres were completed. The total area sold conditionally was 4,598 (3,089) acres, comprising selections for purchase 4,288 (2,842) acres, and town and suburban allotments 310 (247) acres. The numbers of applications received and confirmed were 35 (34) and 158 (94) respectively.

§ 5. Leases and Licences under Land Acts.

1. **General.**—Information regarding the methods of obtaining leases and licences of Crown lands in the several States and Territories is given in preceding issues of the Official Year Book (see No. 22, pp. 149–63).

2. **New South Wales.**—On 30th June, 1946, the area of leases and licences under the control of the Department of Lands, the Water Conservation and Irrigation Commission, and the Western Lands Commission, comprised 112,545,323 acres of Crown lands, compared with 112,225,306 acres at the close of the previous year. Of the total area at 30th June, 1946, 77,327,534 acres were held under the Western Lands Act, and of the remainder, 23,295,972 acres were held under perpetual lease and 11,921,817 acres under other forms of lease, licence and permissive occupancy.

The following table shows the areas held under various descriptions of leases and licences at the end of 1944–45 and 1945–46 :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 30th JUNE : NEW SOUTH WALES.(a)

(Acres.)

Particulars.	1945.	1946.
Areas taken up under Crown Lands or Closer Settlement Acts.		
Occupation licences—ordinary	549,809	530,867
preferential	242,070	219,825
Conditional leases	11,960,746	11,909,374
Conditional purchase leases	161,796	161,555
Settlement leases	2,775,957	2,773,054
Improvement leases	63,423	68,264
Annual leases	458,675	514,276
Scrub leases	87,209	73,803
Snow leases	612,235	653,135
Special leases	928,151	957,383
Inferior land leases	15,460	15,460
Residential leases (on gold and mineral fields)	5,344	5,288
Church and school lands	11	11
Permissive occupancies (ordinary)	2,054,533	2,151,874
(Closer Settlement Acts)	55,460	49,793
Prickly pear leases	163,916	148,978
Crown leases	7,326,563	7,339,156
Homestead farms	4,628,919	4,735,123
Homestead selections and grants	1,671,047	1,671,584
Closer settlement leases (Closer Settlement Acts)	21,325	24,756
Settlement purchase leases (Closer Settlement Acts)	508,979	751,682
Suburban holdings	54,109	53,910
Week-end leases	206	206
Group purchase leases (Closer Settlement Acts)	90,312	160,391
Leases of town lands	65	66
Returned soldiers' special holdings	14,619	14,619
Irrigation areas	238,535	233,356
Leases, Licences and Permissive Occupancies under Western Lands Act.		
Conditional leases	98,025	98,025
Leases being issued—occupational leases	165,496	172,167
Perpetual leases	49,863,037	50,719,083
Other long-term leases	23,863,937	21,700,952
Permissive occupancies	1,191,458	2,862,945
Preferential occupation licences	2,353,879	1,774,362
Total	112,225,306	112,545,323

(a) Excludes mining leases and permits and forest leases and occupation permits.

During 1944–45, 510,206 acres were taken up under various forms of leasehold under the Crown Lands and Closer Settlement Acts, permissive occupancies (243,592 acres) being the largest group. During 1945–46, 356,162 acres were taken up under lease, permissive occupancies (125,526 acres) and snow leases (91,480 acres) being the largest groups. Leases, licences and permissive occupancies under the Western Lands Act, amounting to 3,108,853 acres in 1944–45 and 3,597,696 acres in 1945–46 made the grand total taken up in 1944–45 3,619,059 acres, and in 1945–46, 3,953,858 acres. Perpetual leases (1,312,617 acres) and preferential occupation licences (1,178,002 acres) in 1944–45 and perpetual leases (895,039 acres) and permissive occupancies (2,269,829 acres) in 1945–46 were the largest groups.

3. **Victoria.**—The area of Crown lands occupied under leases and licences in each of the years 1945 and 1946 is given in the following table :—

AREAS OCCUPIED UNDER LEASE OR LICENCE : VICTORIA.

(Acres.)

Particulars.	1945.	1946.
Grazing licences—Other than Mallee	5,738,112	5,768,625
Mallee lands	2,781,623	4,184,420
Auriferous lands (licences)	16,343	16,334
Perpetual leases—Other than Mallee	16,550	16,550
Mallee lands	67,444	67,444
Swamp lands (leases)	3,971	4,020
Agricultural college lands	(a) 66,974	(a) 66,974
Total	8,691,017	10,124,367

(a) Transferred under Agricultural Colleges Act 1944 to control of Department of Lands and Survey *See also* § 2, para. 2 (iv) *ante*.

4. **Queensland.**—The total area occupied under lease or licence, excluding mining leases, at the end of 1945 and 1946 was as follows :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 31st DECEMBER : QUEENSLAND.

(Acres.)

Particulars.	1945.	1946.
Pastoral leases	248,626,480	243,801,960
Occupation licences	13,914,120	17,986,440
Grazing selections and settlement farm leases ..	82,894,669	83,248,538
Special purpose leases—Crown land	475,452	466,208
Reserves	389,629	431,999
Perpetual lease selections and perpetual lease prickly pear selections	6,361,709	6,376,577
Auction perpetual leases, etc.	29,178	29,640
Prickly pear leases	23,960	11,080
Forest grazing leases (of reserves)	1,973,800	1,972,800
Total	354,688,997	354,325,242

During 1945 and 1946 the areas taken up were 4,007,546 acres and 2,614,284 acres respectively. Pastoral leases amounted to 3,025,440 acres during 1945 and to 1,561,560 acres during 1946.

5. **South Australia.**—The total area held under lease or licence, except mining lease and licence, at 30th June, 1945 and 1946, was respectively 133,400,975 acres and 134,233,765 acres, of which pastoral leases, 113,554,798 acres in 1945 and 114,131,213 acres in 1946, constituted the major proportion. The total area leased during 1944–45 was 955,106 acres, and during 1945–46 755,583 acres, pastoral, grazing and cultivation leases constituting 717,953 acres and 504,528 acres thereof.

6. **Western Australia.**—At 30th June, 1945, the total area held under lease or licence issued by the Lands Department amounted to 209,574,144 acres, of which 207,252,158 acres were under pastoral lease. Corresponding figures for 1946 were 209,104,036 acres and 206,708,452 acres. During 1944–45 the total area of leases issued was 1,949,169 acres (pastoral, 1,840,801 acres). Leases issued in 1945–46 totalled 1,163,490 acres (pastoral, 1,044,497 acres).

7. **Tasmania.**—Crown lands leased at 31st December, 1944, for other than mining purposes amounted to 2,800,008 acres, of which 2,104,864 acres were leased for pastoral purposes. At 31st December, 1945, corresponding figures were 2,771,362 acres and 2,112,992 acres and at 31st December, 1946, 2,740,842 acres and 2,098,617 acres. The area of land leased for pastoral purposes during 1943–44 was 131,679 acres, for 1944–45 131,617 acres, and for 1945–46, 94,967 acres.

8. **Northern Territory.**—At 30th June, 1945, the total area held under lease, licence and permit was 163,496,527 acres, of which pastoral leases accounted for 117,547,520 acres and grazing licences 43,679,909 acres. At 30th June, 1946, the total area under lease, etc., was 159,205,281 acres, and pastoral leases and grazing licences, 108,626,560 acres and 48,371,808 acres respectively. Total annual rentals for all leases were £30,390 and £29,202, in 1944–45 and 1945–46 respectively.

9. **Australian Capital Territory.**—The number of leases granted under the City Area Leases Ordinance 1936–1938 to 30th June, 1945 and 1946 (excluding leases surrendered and determined), was 581 and 673 respectively, representing a capital value of £244,558 and £266,928. There were 25 new leases granted during 1944–45 and 96 during 1945–46. The total area held under grazing, etc., lease and licence (including Jervis Bay area) amounted to 329,040 acres in 1945 and 329,260 acres in 1946.

Fourteen leases have been granted under the Church Lands and Special Purposes Ordinances for church and scholastic purposes. In addition, a lease in perpetuity has been granted under the Church of England Land Ordinance 1926 for church purposes.

10. **Summary.**—The following table shows particulars of the land held in each State under lease or licence for purposes other than mining and forestry, the total leased or licensed land in the Territories, and the grand totals, for the years 1942 to 1946 :—

AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING AND FORESTRY.

('000 acres.)

Year.	N.S.W. (*a*)	Victoria. (*b*)	Q'land. (*b*)	S. Aust. (*a*)	W. Aust. (*a*)	Tas. (*b*)	N.T. (*a*) (*c*)	A.C.T. (*c*) (*d*)	Total.
1942	111,455	8,147	345,489	130,965	208,914	2,749	133,558	322	941,599
1943	111,555	9,595	345,517	130,694	209,302	2,814	145,108	320	954,821

1946	112,545	10,124	354,325	134,234	209,104	2,741	159,205	329	982,607

(*a*) At 30th June. (*b*) At 31st December. (*c*) Leases and licences for all purposes
(*d*) Includes Jervis Bay area.

§ 6. Leases and Licences under Mining Acts.

1. **General.**—Information regarding the various forms of leases and licences under Mining Acts in the several States and the Northern Territory is given in preceding issues of the Official Year Book (see No. 22, pp. 170–7).

2. **New South Wales.**—The following table gives particulars of operations on Crown lands for the year 1945–46 :—

AREAS TAKEN UP UNDER MINING ACTS : NEW SOUTH WALES, 1945–46.

(Acres.)

Purposes for which Issued or Occupied.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining	839	10,919
Mining for other minerals	7,163	165,838
Authorities to prospect	43,282	2,232,840
Other purposes	513	7,865
Total	51,797	2,417,462

3. **Victoria.**—The following table gives particulars of the number of leases and licences granted during 1945 and 1946, and the area under occupation for mining purposes at the end of each year :—

AREAS TAKEN UP UNDER MINING ACTS : VICTORIA.

Particulars.	1945.		1946.	
	Leases and Licences Granted.	Total Areas Occupied at End of Year.	Leases and Licences Granted.	Total Areas Occupied at End of Year.
	No.	Acres.	No.	Acres.
Gold-mining leases	27	26,167	56	24,023
Petroleum prospecting licences	..	604,806	..	604,806
Coal leases	64	(a)13,048	86	(a)13,048
Other leases and licences		4,025		3,981
Total	91	648,046	142	645,858

(a) Includes State Coal Mine area 7,575 acres and State Electricity Commission area 2,800 acres.

The area covered by licences, etc., issued in 1945 was 1,554 acres, and in 1946, 3,155 acres. The rent, fees, etc., were £325 and £614 in 1945 and 1946 respectively.

4. **Queensland.**—During 1945 and 1946, the number of miners' rights issued was 1,890 and 2,622 respectively, and of business licences 4 in each year. The following table gives particulars of the areas of lands taken up under lease or licence and the total areas occupied for 1945 and 1946. In addition, an area estimated at 25,000 acres was held under miners' rights and dredging claims.

AREAS TAKEN UP UNDER MINING ACTS : QUEENSLAND.

(Acres.)

Particulars.	1945.		1946.	
	Areas Taken up during year.	Total Areas occupied at end of year.	Areas Taken up during year.	Total Areas occupied at end of year.
Gold-mining	341	2,833	509	3,176
Mining for other minerals	3,576	25,125	1,177	25,649
Miners' homestead leases	2,730	416,688	2,564	407,267
Petroleum-prospecting permits ..	64,000	408,500	6,400	414,900
Coal prospecting areas	2,439	7,419	4,939	7,819
Total	73,086	860,565	15,589	858,811

The area of land held under lease only, at 31st December, 1945 and 1946, was 444,646 and 436,092 acres respectively.

5. **South Australia.**—The following table gives particulars of operations for 1944–45 and 1945–46 :—

AREAS TAKEN UP UNDER MINING ACTS : SOUTH AUSTRALIA.

(Acres.)

Particulars.	1944-45.		1945-46.	
	Areas Taken up during year.	Total Areas occupied at end of year.	Areas Taken up during year.	Total Areas occupied at end of year.
Gold-mining leases	52	430	40	372
Mineral and miscellaneous leases ..	3,698	60,486	9,224	72,357
Claims	3,661	8,823	5,777	12,977
Occupation licences	..	..	3	31
Oil exploration licences	2,560,000	2,560,000	4,576,000	4,576,000
Total	2,567,411	2,629,739	4,591,044	4,661,737

6. **Western Australia.**—The following table gives particulars of operations for 1945 and 1946. The figures exclude holdings under miners' rights and mineral oil licences. Of the areas shown as taken up in 1946 (1945 in parenthesis), the area under lease was 4,614 (1,565) acres for gold-mining, 24 (77) for mining for other minerals, 125 (150) for miners' homesteads, and 94 (102) for miscellaneous—a total of 4,857 (1,894) acres. The balance was taken up under licences.

AREAS TAKEN UP UNDER MINING ACTS : WESTERN AUSTRALIA.

(Acres.)

Particulars.	1945.		1946.	
	Areas Taken up during year.	Total Areas occupied at end of year.	Areas Taken up during year.	Total Areas occupied at end of year.
Gold-mining	10,732	30,037	25,856	40,924

(*a*) Year ended 30th June. (*b*) Excludes lands held under miners' rights only. (*c*) Excludes holdings under miners' rights and mineral oil licences. (*d*) Excludes Northern Territory. (*e*) Not available.

§ 7. Closer Settlement.

1. **General.**—Particulars regarding the methods of acquisition and disposal of land for closer settlement in the several States are given in preceding issues of the Official Year Book (see No. 22, pp. 163–9).

2. **New South Wales.**—Since the inception of closer settlement in 1905 to 30th June. 1946, 1,857 estates totalling 4,197,540 acres have been purchased by the Crown at the cost of £15,355,585 for purposes of closer settlement of civilians and returned soldiers. The total areas set apart, and the values thereof, to 30th June, 1945 and 1946, are shown below :—

CLOSER SETTLEMENT AREAS (*a*) : NEW SOUTH WALES.

To 30th June—	Areas.			Values.		
	Acquired Lands.	Adjoining Crown Lands.	Total.	Cost of Acquired Lands.	Value of Adjoining Crown Lands.	Total.
	Acres.	Acres.	Acres.	£	£	£
1945	4,145,032	206,207	4,351,239	15,107,573	357,689	15,465,262
1946(*b*) ..	4,145,032	206,553	4,351,585	15,107,573	359,332	15,466,905

(*a*) Includes 70 long-term leases resumed for closer settlement, but excludes areas acquired for village sites, 3,665 acres. (*b*) Excludes 52,508 acres comprising three estates acquired at purchase price of £248,012 for War Service Land Settlement, 1939–45 War, but not set apart at 30th June, 1946.

The following table gives particulars regarding the disposal of the farms by closer settlement purchase at 30th June, 1945 and 1946 :—

CLOSER SETTLEMENT ALLOTMENTS : NEW SOUTH WALES.

At 30th June—	Farms Allotted to Date.			Total Amount received in respect of Closer Settlement Farms.
	Number.	Area.	Capital Value.	
		Acres.	£	£
1945	9,098	4,158,288	15,146,308	15,212,216
1946	9,127	4,168,535	15,197,447	15,779,548

3. **Victoria.**—The Closer Settlement Commission was abolished as from 31st December, 1938, and land settlement was placed under the control of the Department of Lands and Survey. On 31st March, 1939, all Closer Settlement and Discharged Soldiers' accounts were amalgamated, the settlers' accounts adjusted and the new debt made payable over an extended period. As separate details are not now available, the following statement shows the operations under the provisions of the Closer Settlement Acts to 30th June, 1938 :—

CLOSER SETTLEMENT : VICTORIA.

(INCLUDING IRRIGATED AREAS.)

To 30th June—	Total Area Acquired.	Total Cost of Purchases. (a)	How Made Available for Settlement.					Number of Farms, etc.	Total Receipts (Land and Advances).	Repayments of Principal (Land and Advances).	Area Available for Settlement at 30th June.
			Farm Allotments.	Workmen's Homes Allotments.	Agricultural Labourers' Allotments.	Town Allotments. (b)	Roads and Reserves.				
	Acres.	£	Acres.	Acres.	Acres.	Acres.	Acres.	No.	£	£	Acres.
1938	1,402,568	10,244,023	1,162,676	790	3,484	86,599	14,775	8,722	14,297,492	4,779,268	1,006

(a) Includes value of Crown Lands taken over. (b) Includes all land sold other than under Conditional Purchase Lease.

In the foregoing table the area and cost of land acquired for closer settlement purposes include, in addition to 133,128 acres purchased for £1,246,722 and transferred subsequently to discharged soldiers, a total area of 512,757 acres costing £4,125,822 which was purchased originally for the settlement of discharged soldiers.

4. **Queensland.**—Separate records relating to the closer settlement of re-purchased land are no longer kept by the Land Administration Board, and the operations under this heading are now included with "Leases and Licences under Land Acts." The total area acquired to 31st December, 1934, was 970,778 acres, costing £2,292,881. At the same date the area allotted amounted to 915,690 acres distributed over 3,048 selections, consisting of 2,155 agricultural farms, 257 unconditional selections, 544 perpetual lease selections, 9 prickly pear selections, 6 perpetual lease prickly pear selections and 77 settlement farm leases. An area of 13,038 acres was sold by auction.

5. **South Australia.**—The following table shows the area of land acquired for the purposes of closer settlement, and the manner in which it had been dealt with to 30th June, 1945 and 1946 :—

CLOSER SETTLEMENT : SOUTH AUSTRALIA.

(Acres.)

To 30th June—	Area of Lands Re-purchased (excluding land afterwards set apart for other purposes).	Agreements with Covenants to Purchase.	Total Area Leased as Homestead Blocks.		Perpetual Leases.	Miscellaneous Leases.	Sold.	Remainder Unoccupied (including roads and land in course of allotment).
			Right of Purchase.	Perpetual Lease.				
1945 ..	833,038	382,260	..	1,353	120,139	22,115	302,674	4,497
1946 ..	833,038	361,509	..	1,353	118,525	24,940	324,022	2,689

The total area re-purchased at 30th June, 1945 and 1946, was 927,582 acres at a cost of £2,890,135. Included in these figures are 64,766 acres purchased for £282,762 and afterwards set apart for discharged soldiers, 3,214 acres reserved for forest and waterworks purposes, the purchase-money being £16,185, and also 26,563 acres of swamp and other lands which were purchased for £111,580 in connexion with reclamation of swamp-lands on the River Murray. Of the total area, 828,541 acres in 1945 and 830,349 in 1946 have been allotted to 2,819 persons in each year, the average area to each being 294 acres.

6. **Western Australia.**—The total area acquired for closer settlement up to 30th June, 1946, was 915,893 acres, costing £1,192,891. Of this area, 20,972 acres have been set aside for roads, reserves, etc., leaving a balance of 894,921 acres available for selection. Particulars of operations under the Act for the year ended 30th June, 1946 (figures for year ended 30th June, 1945, in parenthesis), are as follows :—Area selected during the year 3,081 (1,678) acres; number of farms, etc., allotted to date 1,678 (1,673); total area occupied to date 788,326 (785,245) acres; balance available for selection 96,415 (99,496) acres; and total revenue £1,185,715 (£1,146,477).

7. **Tasmania.**—Up to 30th June, 1945 and 1946, 37 areas had been opened up for closer settlement, the total purchase-money paid by the Government being £368,210 and the total area acquired amounting to 103,363 acres, including 12,053 acres of Crown lands. The number of farms occupied at 30th June, 1945 and 1946, was 212 and 190 respectively.

8. **Summary.**—Because of the amalgamation, in some States, of closer settlement records with those of other bodies it is not possible to obtain up-to-date figures of the total area in Australia acquired and set aside for closer settlement purposes, and of the cost thereof. The following figures are aggregations of the State totals as at the latest dates available, and should be regarded as approximations intended only to give some idea of the extent of the scheme :—Area acquired and set aside, 8,700,000 acres; cost thereof, £32,000,000.

§ 8. Settlement of Returned Soldiers and Sailors : 1914-18 War.

1. **General.**—Information regarding the methods adopted in each State following the commencement of the 1914–18 War for providing land for the settlement of returned soldiers and sailors, together with the conditions under which such land could be acquired

is given in earlier issues of the Official Year Book (see No. 13, pp. 1016–23, and No. 18, pp. 187–9). Later modifications were made with a view to simplifying procedure and liberalizing the conditions under which holdings may be acquired.

Particulars respecting the position of soldier settlement in each State at the latest available date are given in the following paragraphs.

2. **New South Wales.**—At 30th June, 1946 (figures at 30th June, 1945, in parenthesis), the area set apart for soldiers of the 1914–18 War was 9,834,747 (9,769,651) acres, of which 1,762,780 (1,710,272) acres comprised acquired land purchased at a cost of £8,361,968 (£8,113,956). The number of settlers to whom farms, etc., had been allotted up to 30th June, 1946, was 9,799 (9,852). Five thousand, three hundred and sixty-nine (5,443) soldiers have either transferred or abandoned their farms, leaving 4,430 (4,409) in occupation of 6,384,864 (6,389,291) acres, of which 5,105,254 (5,104,583) acres were Crown lands (including 2,876,875 (2,876,875) acres in the Western Division taken up under the Western Lands Act), 1,212,116 (1,214,786) acres acquired lands, and 67,494 (69,922) acres within Irrigation Areas. These totals exclude 703 (703) discharged soldiers who purchased privately-owned land with their own capital and were granted advances for the purchase of stock and plant or for effecting improvements.

3. **Victoria.**—At 30th June, 1938, the area acquired or set apart for soldier settlement in respect of the 1914–18 War was 2,482,286 acres consisting of 1,763,241 acres of private land purchased at a cost of £13,361,266, 133,128 acres costing £1,246,722 taken over from Closer Settlement, and 585,917 acres of Crown lands valued at £447,622. Subsequently 512,757 acres valued at £4,125,822 were transferred to Closer Settlement. Up to 30th June, 1938, the number of settlers to whom farms, etc., had been allotted was 12,126, and the number of farms, etc., allotted was 9,784 (including 955 farms originally purchased for closer settlement purposes) containing 2,365,518 acres. In addition, 802 share farmers and holders of leasing agreements and private land had received assistance. The number of farms, etc., occupied at 30th June, 1938, was 8,426 (including 1,001 originally purchased for closer settlement) containing 1,734,379 acres. Later particulars cannot be given, as separate details are not available.

4. **Queensland.**—At 30th June, 1929, the area acquired or set apart for soldier settlement (1914–18 War) was 577,633 acres, of which 41,101 acres comprised private land, purchased at a cost of £270,480. The number of farms occupied was 1,148, containing 440,992 acres. Some of these selections were acquired under the ordinary provisions of the Land Act, and do not include areas specially set apart for soldiers.

As special records are not now kept respecting the areas held by discharged soldier settlers later information cannot be given.

5. **South Australia.**—At 30th June, 1945 and 1946, the area of land acquired or set apart for soldier settlement (1914–18 War) was 1,336,612 acres, of which 1,202,653 acres comprised private land purchased at a cost of £3,863,572. These figures exclude mortgages discharged, £494,770 on 360,403 acres representing 300 farms, etc., and 314 settlers. The number of soldiers to whom assistance had been granted under the Discharged Soldiers' Settlement Acts up to 30th June, 1946, was 4,165, and the area of farms, etc. (including mortgages discharged), on which assistance had been granted was 2,746,744 acres. At 30th June, 1946 (1945), farms, etc., occupied numbered 1,431 (1,531) containing 940,882 (1,051,164) acres.

6. **Western Australia.**—At 30th June, 1945 and 1946, the area of private land acquired for soldier settlement (1914–18 War) was 355,290 acres purchased at a cost of £617,524. Up to 30th June, 1946 (figures to 30th June, 1945 in parenthesis), assistance had been given to 5,213 (5,213) returned soldiers, and the Rural and Industries Bank held 1,779 (2,667) properties as security for advances amounting to £1,416,039 (£3,046,002), including capitalization of interest. The number of farms, etc., occupied by returned soldiers was 1,145 (1,145).

Separate particulars are no longer available of the area of land set apart for soldier settlement, but at 30th June, 1944, the figure was 13,942,533 acres. In addition, 345,110 acres of private land had been acquired at that date—a total of 14,287,643 acres in all.

7. **Tasmania.**—At 30th June, 1946 (figures at 30th June, 1945, in parenthesis) the area acquired or set apart for soldier settlement (1914–18 War) was 343,557 (343,557) acres, of which 274,193 (274,193) acres comprised private land purchased at a cost of £2,096,063 (£2,087,097). Up to 30th June, 1946, (figures to 30th June, 1945, in parenthesis) the number of settlers to whom farms, etc., had been allotted was 2,380 (2,380) and the number of farms, etc., allotted was 2,204 (2,204) containing 343,557 (343,557) acres. The number of farms, etc., occupied at 30th June, 1946, was 975 containing 185,887 acres compared with 1,039 containing 198,916 acres at 30th June, 1945.

8. **Summary.**—As with closer settlement, it is not possible to give up-to-date figures of soldier settlement (1914–18 War) for Australia as a whole. The following figures are aggregations of State totals as at the latest dates available :—Total areas acquired and set aside, 28,900,000 acres, including 5,500,000 acres of private land acquired at a cost of £29,800,000.

9. **Losses on Soldier Settlements.**—(i) *General.* At the Premiers' Conference in Melbourne in 1917, it was agreed that the States should undertake the work of settling on the land returned soldiers and munition and war workers, and that the Commonwealth should raise the necessary loans for the States for this purpose.

The original arrangement provided that the Commonwealth should take the responsibility of finding up to £500 per settler as working capital for improvements, implements, seed, etc., an amount which was subsequently increased to £625, together with £375 per settler for resumptions and works incidental to land settlement approved by the Commonwealth. Loans were to be advanced to the settlers by the States at reasonable rates of interest not exceeding 3½ per cent. in the first year, increasing by ½ per cent. each subsequent year to the full rate of interest at which the money had been raised, plus working expenses, the difference between these rates and the cost of the money to the Government to be borne equally by the Commonwealth Government and the State Government. This provision respecting interest loss was not ultimately carried out as passed, the Commonwealth Government assuming responsibility for more than one-half of the interest loss, namely, a rebate of interest equal to 2½ per cent. per annum during a period of five years from the date of payment to the State of each instalment of loan money.

(ii) *Report by Mr. Justice Pike.* In addition to this expected loss of interest other losses occurred in connexion with soldier settlement, and in 1927 Mr. Justice Pike, of the Land Valuation Court of New South Wales, was commissioned to report, not only on the losses, but on the principles on which financial responsibility should be divided. His report in 1929, to which reference should be made for fuller information, found that in all the negotiations concerning soldier settlement on the land the States insisted on undivided control, and that financial responsibility went along with control except so far as the Commonwealth definitely promised to give assistance. The undertaking of the Commonwealth to share equally with the States the cost of lower interest rates to soldier settlers was made the basis of a practical compromise, and the report recommended that the total loss should be shared equally between the two parties.

The gross losses were assessed at £23,525,522 distributed amongst the States as follows :—New South Wales, £7,003,950 ; Victoria, £7,721,891 ; Queensland, £1,853,315 ; South Australia, £3,565,829 ; Western Australia, £2,059,368 ; and Tasmania, £1,321,169. Other concessions granted by the Commonwealth Government increased its proportion of these gross losses (£11,762,760) to £12,333,000.

The total amount advanced by the Commonwealth to the States was £35,000,000. For further information on this subject *see* Official Year Book, No. 28, pp. 131–2, and earlier issues.

§ 9. Settlement of Returned Service Personnel : 1939-45 War.

1. **War Service Land Settlement Scheme.**—(i) *General.* At a conference of Commonwealth and State Ministers held at Canberra on 22nd August, 1945, certain proposals were agreed to with a view to the settlement, on land in the States, of discharged members of the Forces and other eligible persons. The War Service Land Settlement Agreements Act 1945, to authorize the execution by or on behalf of the Commonwealth of Agreements between the Commonwealth and the States in relation to War Service Land Settlement, was assented to on 11th October, 1945. In each State the proposals agreed to at Canberra on 22nd August, 1945, were ratified by State legislation and Agreements between the Commonwealth and the States were signed in November, 1945.

The execution of Agreements between the Commonwealth and the States of New South Wales, Victoria and Queensland is substantially in accordance with the form contained in the First Schedule of the Act, while the Agreements between the Commone wealth and the States of South Australia, Western Australia and Tasmania ar- substantially in accordance with the form contained in the Second Schedule of the Act.

FIRST SCHEDULE.

Under the conditions of the First Schedule, it was agreed that the States (New South Wales, Victoria and Queensland) should provide capital moneys required for the purpose of acquiring, developing and improving land for settlement and for advances to settlers, bear the cost of State administration, and make a capital contribution in respect of each holding, of an amount equal to one-half of the excess of the total cost involved in acquiring, developing and improving the holding over the sum of valuations of the land and improvements. The State bears one-half of the cost involved in the remission of rent and interest during the assistance period (the first year after allotment of the holding, and also one-half of any losses (to be assessed on a basis to be agreed upon by the Commonwealth and the State) incurred by the State on advances made to settlers for the purpose of providing working capital and paying for and affecting improvements and acquiring stock, plant and equipment. The Commonwealth makes a capital contribution of half of any excess of the cost over valuation of any holding and bears one-half of any losses arising from advances approved for working capital, and paying for and effecting improvements and acquiring stock, plant and equipment. The Commonwealth also bears one-half of the cost involved in the remission of rent and interest during the assistance period. The Commonwealth bears the cost of payment to each settler of a living allowance during the first year after allotment.

SECOND SCHEDULE.

In the Agreement with the States of South Australia, Western Australia and Tasmania, under the conditions of the Second Schedule, the State agreed to administer the Scheme on behalf of the Commonwealth. The Commonwealth accepts responsibility for policy decisions and exercises general supervision over the Scheme. The State bears the cost of State Administration of the Scheme and makes a capital contribution in respect of each holding equal to two-fifths of the excess of the total cost involved in acquiring, developing and improving the holding over the sum of valuations of land and improvements. The Commonwealth provides capital moneys required for the purpose of acquiring, developing and improving land for settlement, and for the making of advances to settlers, under and in accordance with the terms of the agreement, and makes a capital contribution in respect of each holding of an amount equal to three-fifths of the excess of the total cost involved in acquiring, developing and improving the holding over the sum of valuations of the land and improvements. The Commonwealth also bears any losses arising out of advances made to settlers for working capital, and paying for and effecting improvements and acquiring stock, plant and equipment, and all the cost involved in the remission of rent and interest and the payment of living allowances during the assistance period.

(ii) *Cost of Land, Valuations, Tenure.* An important provision of the Scheme is that land shall not be acquired by a State at a cost in excess of the values ruling as at the 10th February, 1942, when the Commonwealth Government's general price stabilization scheme was introduced.

Valuations are made by officers appointed by the Commonwealth and State for the purpose. In making the valuations the officers have regard to the need for the proceeds of the holding (based on conservative estimates over a long-term period of prices and yields for products) being sufficient to provide a reasonable living for the settler after meeting such financial commitments as would be incurred by a settler possessing no capital. Any excess of costs over the total valuation of a holding is written off.

A condition of the Agreements in the Second Schedule under which the States of South Australia, Western Australia and Tasmania operate, is that holdings must be allotted on perpetual leasehold tenure ; the general terms and conditions of the lease to be approved by the Commonwealth. Two of the three States operating under the First Schedule (New South Wales and Queensland) have voluntarily adopted the perpetual leasehold type of tenure.

(iii) *Principles of Operation.* It was agreed that under the Scheme, land settlement should be carried out in accordance with the following principles :—

(*a*) Settlement shall be undertaken only where economic prospects for the production concerned are reasonably sound ; and the number of eligible persons to be settled shall be determined primarily by opportunities for settlement and not by the number of applicants ;

(*b*) Applicants shall not be selected as settlers unless a competent authority is satisfied as to their eligibility, suitability and qualifications for settlement under the Scheme and their experience of farm work ;

(*c*) Holdings shall be sufficient in size to enable settlers to operate efficiently and to earn a reasonable labour income ;

(*d*) An eligible person deemed suitable for settlement shall not be precluded from settlement by reason only of lack of capital, but a settler will be expected to invest in the holdings such proportion of his own financial and other resources as is considered reasonable in the circumstances by the appropriate State Authority ;

(*e*) Adequate guidance and technical advice shall be made available to settlers through agricultural extension services.

(iv) *Method of Operation.* After a State has selected such land as it considers suitable for settlement, it submits to the Commonwealth detailed information regarding the property ; its location, climate, type of soils, water supply, production (past and proposed) and plans of development, improvement and subdivision of the land. Where Commonwealth approval has finally been given to a proposal, the State proceeds with the sub-division of the property, selection of settlers, and improvement of the holdings to a stage where they can be brought into production by the settler within a reasonable time, having regard to the type of production proposed.

A settler may be granted a living allowance, at a rate and under conditions fixed by the Commonwealth, during a period of one year after the allotment of a holding to him. This period is referred to as " the assistance period " and it may, under special circumstances, be extended. During this period the settler is not required to pay any rent or interest in respect of the holding, or make any payments on account of principal or interest in respect of advances, other than advances for working capital.

Each soldier settler is granted a residential course of eight weeks duration, at a Government Training Centre, in the " Principles of Farm Management ". This course provides an opportunity for those already possessed of sufficient practical knowledge and experience gained on the land to gain a knowledge on aspects of farming not normally acquired in farming occupations.

(v) *Summary of Operations to 30th June, 1947.* Up to 30th June, 1947, the States had submitted to the Commonwealth settlement proposals involving 5,378,628 acres, and of that total 3,842,883 acres had been approved as suitable for soldier settlement.

The tables hereunder show the position up to 30th June, 1947.

WAR SERVICE LAND SETTLEMENT (1939–45 WAR): SUMMARY TO 30th JUNE, 1947.

Total ..	99	547,671	626	1,939,944	141	1,464,052	362	1,535,745

NOTE.—At 31st December, 1947, land submitted totalled 6,473,539 acres, land approved for acquisition, 4,830,323 acres, land purchased, 3,706,458 acres, and land allotted, 2,279,657 acres.

The area approved in New South Wales as suitable for settlement to 30th June, 1947, was 2,672,336 acres. Sub-division of 59 properties, together with 62 single grazing leases, has resulted in 403 holdings, with an area of 2,185,220 acres, being made available to that date for ex-servicemen. The number of holdings allotted to settlers was 152, involving 1,324,277 acres. In Victoria, apart from the irrigation areas, Soldier Settlement is being concentrated mainly in the Western District, where there is an assured rainfall and where wool and fat lamb production and dairying will be the main forms of activity. Already 76,032 acres have been subdivided into 210 holdings and 137 holdings involving 55,960 acres have been allotted to settlers. In Queensland 102,319 acres have been submitted to the Commonwealth for soldier settlement and approved, and to 30th June, 1947, an area of 28,796 acres was subdivided into 32 holdings. There have been 21 holdings in 15,655 acres allotted to applicants and the lands will be used for dairy farming, pig raising, cereal growing and for the production of fat lambs and wool. The area submitted for soldier settlement by South Australia is 388,298 acres and 185,092 acres have been approved by the Commonwealth. Apart from the irrigation area at Loxton on the River Murray, proposals for settlement are mainly confined to the south eastern portion of the State and the Eyre Peninsula. To the 30th June, 1947, an area of 8,591 acres had been subdivided into 14 holdings, and only two small existing holdings had been allotted to settlers. In this State extensive developmental programmes have been undertaken and it is anticipated that many highly improved properties will be made available for application during the coming year. Western Australia has submitted 264 proposals for soldier settlement involving 751,087 acres, and 445,972 acres have been approved. There have been 60,101 acres sub-divided into 32 holdings and 74 existing single farms with a total area of 127,734 acres have been approved as suitable. There have been 50 holdings with an area of 68,111 acres allotted to ex-soldier applicants, 25 being dairy farms and 25 wheat and sheep properties. In the south-western portion of the State where heavy rainfall is assured each year, the holdings will be used for dairying and pig raising and developmental work is in hand for the establishment of a considerable number of additional dairy farms in that region. Where the conditions are favorable fat lambs will be raised. Inland, where the annual rainfall is not so heavy, wheat growing and sheep breeding for wool will be the basis of production. There have been 147,265 acres approved for soldier settlement in Tasmania and on King and Flinders Islands. Considerable developmental work is in progress and holdings will soon be available for allotment. Settlers will be engaged chiefly in dairying and sheep breeding for wool and fat lambs.

(vi) *Expenditure.* The following table shows a dissection of the Commonwealth expenditure on War Service Land Settlement to 30th June, 1947 :—

WAR SERVICE LAND SETTLEMENT (1939-45 WAR): EXPENDITURE TO 30th JUNE, 1947.

Advances to States.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	Total.
	£	£	£	£	£	£	£
For acquisition of land	..	..	..	888,477	829,495	251,750	1,969,722
For development and improvement of land	..	..	..	268,975	204,439	69,292	542,706
For payment of living allowances to settlers	10,968	..	1,000	1,099	2,000	..	15,067
To provide credit facilities to settlers	..	..	..	11,564	30,000	..	41,564
Total ..	10,968	..	1,000	1,170,115	1,065,934	321,042	2,569,059

NOTE.—Expenditure to 31st December, 1947, in the same order as above, was: £2,362,185, £796,491, £42,037, £45,034, total, £3,245,747.

(vii) *Proposed Developments.* Surveys have shown that some expansion of the sheep and wool, dairying, and citrus and dried fruit industries, in particular, can be undertaken with a reasonable degree of safety and it is mainly on the basis of those industries that settlement under the War Service Land Settlement Scheme is taking place.

Additional areas of land will be brought under irrigation. These lands are situated principally in the River Murray Valley in the States of New South Wales, Victoria and South Australia, but an area of 22,000 acres in the Maffra district in Gippsland, Victoria, will be irrigated from the Thompson River. In that State the areas under irrigation will be used for dairying and for growing citrus fruits, and fruits and grapes to be canned or dried. In New South Wales the irrigated lands will be used for the production of fat lambs, wool, dairy produce and rice. In South Australia, dried and citrus fruits will be produced. The area of land involved in irrigation proposals in each State to the 30th June, 1947, was—New South Wales, 122,060 acres ; Victoria, 104,400 acres ; South Australia, 11,830 acres ; total, 238,290 acres.

2. **Loans and Allowances (Agricultural Occupations) Scheme.**—(i) *General.* In June, 1945, the Commonwealth Parliament passed the Re-establishment and Employment Act which provides measures for the re-establishment of ex-servicemen in civil life and for facilitating their re-employment. The Act makes provision for the granting of a loan to an eligible ex-serviceman who needs financial assistance to enable him to engage in or resume any occupation, business or practice on his own account, as an active member of a partnership, as a share farmer or as a contract worker. The occupations include agricultural pursuits which are defined by the Act as occupations by way of farming, horticulture, viticulture, apiculture, dairy farming, poultry farming and pastoral or grazing operations. The Commonwealth prescribed the Director of War Service Land Settlement as the Authority to administer the Act insofar as it applies to agricultural occupations. This is set out in Divisions 3 and 4 of Part VI. In pursuance of the powers granted under the Act, and with the approval of the Treasurer, the Director of War Service Land Settlement concluded agreements with State Authorities for the detailed administration by them of loans and allowances to applicants engaged in agricultural occupations. The Re-establishment and Employment Act 1945 also makes provision for the granting of a financial allowance to an eligible ex-serviceman to enable him to establish or re-establish himself satisfactorily in civil life in an occupation, business or practice on his own account, as an active member of a partnership, as a share farmer, or as a contract worker.

(ii) *Loans (Agricultural Occupations).* The terms and conditions on which loans are made have been laid down by the Commonwealth. Loans are made from finance provided by the Commonwealth which also pays the cost of administration by the State Authorities. An applicant is required to satisfy the lending Authority that he has the ability and qualifications to engage, with a reasonable prospect for success, in the form of primary production in respect of which the loan is sought. He must also satisfy the authority that his engaging in the occupation is a suitable means of establishing or re-establishing himself in civil life and that he is likely to be able to repay the loan within a reasonable period. Loans of up to £1,000 can be made to eligible ex-servicemen for the purchase of land, effecting improvements on land, acquisition of tools of trade, livestock, plant or equipment, establishment of a co-operative business with other persons, reduction or discharge of a mortgage, bill of sale, etc. Repayment of loans by periodical instalments of principal and interest is required and security for the loan is taken by means of a mortgage over the land, a charge over stock, plant or equipment, a crop and/or wool lien, an assignment of income or a charge over any other assets. The total amount which may be loaned to any one eligible person shall not exceed £1,000, or 90 per cent. of the lending authorities' valuation of the security offered whichever is the less. Where the security is already encumbered, the total amount of the loan together with the amount of any such existing encumbrance or charge may not exceed 90 per cent. of the lending authority's valuation of such security. Repayment of the loan may be spread over a period of up to 30 years, but the actual period in each case shall be determined by the lending authority having regard to the anticipated useful life of the assets over which security is taken. The rate of interest payable on loans is—

(1) Where the total amount advanced for all purposes exceeds £50 but does not exceed £250—

For the first £50	Nil
For the amount over £50	2 per cent. per annum.

(2) Where the total amount advanced for all purposes exceeds £250 but does not exceed £1,000—

For the first £50	Nil.
For the next £200	2 per cent. per annum.
For the remainder	3¾ per cent. per annum.

Ex-servicemen are taking advantage of this means of re-establishing themselves and to the 30th June, 1947, the number of applications approved by State authorities on behalf of the Commonwealth was 6,211 for an amount of £4,394,480. The amount actually advanced to applicants to 30th June, 1947, was £2,515,881. The following table shows particulars for each State to 30th June, 1947 :—

LOANS (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 30th JUNE, 1947.

(a) After deduction of loans declined after approval—£319,873.

NOTE.—To 31st December, 1947, applications received totalled 11,608, and approved, 7,963 ; net amount approved, £5,213,580 ; amount advanced to applicants, £3,787,999.

(iii) *Allowances (Agricultural Occupations).* These allowances are payable only in respect of the period during which the income derived from the occupation by the ex-servicemen concerned is, in the opinion of the prescribed authority, inadequate. The rate per week of the allowance is determined by the prescribed authority, having regard to all the circumstances of the case, including the income of the person concerned. The maximum period for which the allowance is payable is twelve months from the date of entering into working occupation of the property, or from the date of resuming working occupation after war service if the property was occupied by the applicant prior to engagement on war service.

To the 30th June, 1947, there had been 5,977 applications approved and the amount paid was £706,640. The following table gives State details to 30th June, 1947 :—

ALLOWANCES (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 30th JUNE, 1947.

NOTE.—Totals to 31st December, 1947, were, New South Wales, £2,133,803 ; Victoria, £1,213,109 ; Queensland, £531,955 ; South Australia, £1,959,115 ; Western Australia, £2,738,844 ; Tasmania, £519,189 ; Grand total, £9,098,015.

§ 10. Tenure of Land by Aliens.

Information regarding the terms and conditions under which land can be held by aliens is contained in earlier issues of the Official Year Book (see No. 18, pp. 190–1). All tenure of land by aliens in April, 1948, was subject to the National Security (Economic Organization) Regulations, 1942.

§ 11. Advances to Settlers.

1. **General.**—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory appears in preceding issues of the Official Year Book (see No. 22, pp. 179–186).

In this section are summarized the loans and advances made by the various Government lending agencies in the States, including the transactions in lands acquired under closer and soldier settlement schemes. The balances owing on former Crown lands sold on the conditional purchase, etc., system, however, are not included.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of reappraisements of land values and the writing down of debts.

2. **New South Wales.**—The following table gives particulars respecting advances, etc., under State Authorities to 30th June, 1946 :—

ADVANCES TO SETTLERS : NEW SOUTH WALES.

(*a*) Includes capitalization of interest to principal. (*b*) Includes all advances made under Drought Relief Assistance and losses incurred.

The establishment of the Rural Industries Bank of Western Australia in October, 1945, resulted in a transfer of many of the developmental accounts to the new bank. At 30th June, 1945, the number of accounts and amounts outstanding were 13,588 and £9,372,992 respectively.

7. **Tasmania.**—The following table gives particulars respecting advances under State Authorities to 30th June, 1946. Although not regarded as outstanding advances by the Department of Agriculture the figures in connexion with closer and soldier land settlement have been included in the table for comparative purposes; the areas so purchased have been leased on 99 year terms having an option of purchase which the leaseholder may exercise at any time.

(*a*) Excludes £29,876 forfeited properties, and £138 written off under revaluation legislation. (*b*) Excludes £200,593 advances capitalized, £79,114 advances written off to bad debts, and £39,293 written off to revaluation. (*c*) Not regarded as outstanding advances by the Department. (*d*) Number of leaseholders including those to whom advances have been made.

8. **Northern Territory.**—During the financial years 1944–45 and 1945–46 no advances were made. The total amount advanced to 30th June, 1946, was approximately £25,549 (£25,549) (1945 figures in parenthesis). At 30th June, 1946, the balance outstanding from 16 (20) settlers, including interest, was £1,890 (£2,556).

9. **Summary of Advances.**—The following table gives a summary for each State and the Northern Territory to the 30th June, 1946. The particulars so far as they are available represent the total sums advanced to settlers, including amounts spent by the various Governments in the purchase and improvement of estates disposed of by closer and soldier land settlement, while the amounts outstanding reveal the present indebtedness of settlers to the Governments, including arrears of principal and interest but excluding amounts written off debts and adjustments for land revaluations.

§ 12. Alienation and Occupation of Crown Lands.

1. **General.**—The figures given in the previous parts of this chapter show separately the areas alienated, in process of alienation, or occupied under various tenures. The following tables set out in summarized form the position in regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during the latest year for which information is available—1946 in all cases. Particulars for each year from 1935 to 1945 appear in *Production Bulletin* No. 40, Part II., page 7. The area unoccupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases and licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of New South Wales is 198,037,100 acres of which 26.1 per cent. had been alienated at 30th June, 1946, 8.0 per cent. was in process of alienation, 58.0 per cent. was held under leases and licences and the remaining 7.9 per cent. was unoccupied or held by the Crown.

The following table gives particulars as at 30th June, 1946 :—

ALIENATION AND OCCUPATION OF CROWN LANDS : NEW SOUTH WALES, 30th JUNE, 1946.

Particulars.	Acres.	Particulars.	Acres.
1. *Alienated.*		3. *Held under Leases and Licences.*	
Granted and sold prior to 1862 ..	7,146,579	Homestead selections and grants ..	1,671,584

Conditional purchases	13,315,504		
Closer settlement purchases ..	2,097,161		
Soldiers' group purchases ..	235,763		
Other forms of sale	158,559		
Total	15,806,987	4. *Unoccupied* (*b*)—Particulars of Lord Howe Island not being available, the area, 3,220 acres, is included under unoccupied, (Approximate)	15,705,849

Total area of State—198,037,100 acres.

(*a*) At 31st December, 1945. (*b*) Of this area only 3,234,667 acres are available for selection, the balance being reservations for roads, various public purposes, water frontages, and river and lake surfaces.

3. **Victoria.**—The total area of Victoria is 56,245,800 acres, of which 52.2 per cent. had been alienated up to the end of 1946 : 5.6 per cent. was in process of alienation under deferred payments and closer settlement schemes ; 18.8 per cent. was occupied under leases and licences ; and 23.4 per cent. was unoccupied or held by the Crown.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : VICTORIA, 31st DECEMBER, 1946.

Particulars.	Acres.	Particulars.	Acres.
1 *Alienated*	29,351,245	3. *Leases and Licences held*—	
2. *In Process of Alienation*—		Under Lands Department—	
Exclusive of Mallee and Closer Settlement Lands	462,464	Perpetual Leases ..	83,994
Mallee Lands (exclusive of Closer Settlement Lands) ..	2,046,057	Agricultural College Leases	66,974
Closer Settlement Lands ..	649,997	Other Leases and Licences	20,314
Village Settlement	38	Temporary (Yearly) Grazing Licences	9,778,012
		Under Mines Department ..	648,046
		Total .. .	10,597,340
Total	3,158,556	4. *Occupied by the Crown or Unoccupied*	13,138,659

Total area of State—56,245,800 acres.

4. **Queensland.**—The total area of this State is 429,120,000 acres, of which, on 31st December, 1946, 5.2 per cent. was alienated; 1.3 per cent. was in process of alienation; and 82.7 per cent. was occupied under leases and licences. The remainder, 10.8 per cent., was either unoccupied or held as reserves or for roads.

The distribution is shown in the following table:—

ALIENATION AND OCCUPATION OF CROWN LANDS: QUEENSLAND, 31st DECEMBER, 1946.

Particulars.	Acres.	Particulars.	Acres.
1. *Alienated—*		3. *Occupied under Leases and Licences—*	
By Purchase	22,325,842	Pastoral Leases	243,801,960
Without Payment	92,116	Occupation Licences	17,986,440
		Grazing Selections and Settlement Farm Leases	83,248,538
		Leases—Special Purposes	(a) 898,207
		Under Mines Department	452,244
		Perpetual Leases Selections and Perpetual Lease Prickly Pear Selections	6,376,577
		Auction Perpetual Leases, etc.	29,640
		Prickly Pear Leases	11,080
		Forest Grazing Leases (of Reserves)	1,972,800
Total	22,417,958	Total	354,777,486
		4. *Reserves (Net, not leased), Surveyed Roads and Surveyed Stock Routes*	20,054,821
2. *In Process of Alienation*	5,365,855	5. *Unoccupied*	26,503,880

Total area of State—429,120,000 acres.

(a) Special leases of Crown Land, 466,208 acres; special leases of reserves, 431,999 acres.

5. **South Australia.**—The area of South Australia is 243,244,800 acres and at 30th June, 1946, 5.4 per cent. was alienated; 0.4 per cent. in process of alienation; 57.1 per cent. occupied under leases and licences; and 37.1 per cent. unoccupied or occupied by the Crown.

The subjoined table shows the distribution:—

ALIENATION AND OCCUPATION OF CROWN LANDS: SOUTH AUSTRALIA, 30th JUNE, 1946.

Particulars.	Acres.	Particulars.	Acres.
1. *Alienated—*		3. *Held under Lease and Licence—*	
Sold	12,919,364	Right of Purchase Leases	4,886
Granted for Public Purposes	134,732	Perpetual Leases, including Irrigation Leases	17,105,168
		Pastoral Leases	114,131,213
		Other Leases and Licences	2,992,498
		Mining Leases and Licences	4,661,737
Total	13,054,096	Total	138,895,502
2. *In Process of Alienation*	894,938	4. *Area Unoccupied (a)*	90,400,264

Total area of State—243,244,800 acres.

(a) Includes surveyed roads, railways and other reserves, salt water lakes, lagoons, and fresh water lakes.

6. **Western Australia.**—The total area of Western Australia is 624,588,800 acres, of which, at 30th June, 1946, 3.1 per cent. was alienated; 2.0 per cent. was in process of alienation; and 34.0 per cent. was occupied under leases and licences issued either by the Lands or the Mines Departments. The balance of 60.9 per cent. was unoccupied.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : WESTERN AUSTRALIA, 30th JUNE, 1946.

Particulars.	Acres.	Particulars.	Acres.
1. *Alienated*	19,583,418	3. *Leases and Licences in Force—*	
		(i) Issued by Lands Department—	
2. *In Process of Alienation—*		Pastoral Leases ..	206,708,452
Midland Railway Concessions ..	54,800	Special Leases ..	1,106,205
Free Homestead Farms ..	525,263	Leases of Reserves ..	1,284,198
Conditional Purchases ..	5,176,220	Residential Lots ..	5,181
Selections from the late W. A. Company	5,297	(ii) Issued by Mines Department—	
Selections under the Agricultural Lands Purchase Act ..	445,709	Gold-mining Leases ..	23,916
Homestead or Grazing Leases ..	5,987,359	Mineral Leases ..	38,539
Town and Suburban Lots ..	3,123	Miners' Homestead Leases	29,941
		(iii) Issued by Forests Department—	
		Timber Permits ..	2,966,461
		Total	212,162,893
Total	12,197,771	4. *Area Unoccupied* (*a*)	380,644,718

Total area of State—624,588,800 acres.

(*a*) Includes reservations for roads and various public purposes, 54,816,013 acres.

7. **Tasmania.**—The total area of Tasmania is 16,778,000 acres, of which, at 31st December, 1946, 36.1 per cent. had been alienated; 2.4 per cent. was in process of alienation; 16.3 per cent. was occupied under leases and licences for either pastoral, agricultural, timber, or mining purposes, or for closer or soldier settlement; while the remainder (45.2 per cent.) was unoccupied or reserved by the Crown.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : TASMANIA, 31st DECEMBER, 1946.

Particulars.	Acres.	Particulars.	Acres.
1. *Alienated*	6,048,520	3. *Leases and Licences*—continued.	
		(i) Issued by Lands Department—*continued.*	
2. *In Process of Alienation* ..	397,292	Soldier Settlement ..	168,795
		Short-Term Leases ..	15,517
		(ii) Issued by Mines Department	1,702
3. *Leases and Licences—*		Total	2,742,544
(i) Issued by Lands Department—			
Islands	125,142		
Ordinary Leased Land ..	1,973,475		
Land Leased for Timber	401,582	4. *Area Occupied by the Crown or Unoccupied* (*a*)	
Closer Settlement ..	56,331		7,589,644

Total area of State—16,778,000 acres.

(*a*) Includes reservations for roads and various other public purposes, 2,888,657 acres, and lands occupied by Commonwealth or State Departments, 22,319 acres.

8. **Northern Territory.**—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1946, only 0.1 per cent. was alienated; 47.5 per cent. was held under leases and licences; 13.3 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 39.1 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1946:—

ALIENATION AND OCCUPATION OF CROWN LANDS: NORTHERN TERRITORY, 30th JUNE, 1946.

Particulars.	Acres.
1. Alienated	457,269
2. Leased—	
Pastoral leases	108,626,560
Other leases, licences and mission stations	50,578,721
Total	159,205,281
3. Reserves—	
Aboriginal, defence and public requirements ..	44,373,812
4. Unoccupied and unreserved	131,080,438
5. Total area	335,116,800

The Darwin Lands Acquisition Act 1945, operating from 13th September, 1945, empowered the Commonwealth to acquire all land in Darwin and its environs. This caused a decrease of 20,494 acres in alienated area.

9. **Australian Capital Territory.**—Alienated land of the Territory (excluding the Jervis Bay area) at the end of 1946 comprised 9.9 per cent. of the total area, land in process of alienation 8.2 per cent., land held under lease and licence 54.5 per cent., land otherwise occupied, including city tenures 5.3 per cent., and unoccupied 22.1 per cent.

The following table gives particulars of land areas in the Australian Capital Territory (excluding the Jervis Bay area) at the end of 1946:—

ALIENATION AND OCCUPATION OF CROWN LANDS: AUSTRALIAN CAPITAL TERRITORY (a) 31st DECEMBER, 1946.

Particulars.	Acres.
1. Alienated	57,825
2. In process of alienation	47,993
3. Leased, etc.—	
Grazing, agriculture, etc., leases	313,647
Grazing licences	3,825
Total	317,472
4. Otherwise occupied (b)	30,870
5. Unoccupied	128,640
6. Total area (a)	582,800

(a) Excludes the Jervis Bay area of 18,000 acres—11,788 acres leased and 6,212 acres otherwise occupied—making a grand total of 600,800 acres. (b) Includes city area tenures.

10. **Summary.**—The following table gives a summary for each State and Territory of the alienation and occupation of Crown lands for 1944, 1945 and 1946:—

ALIENATION AND OCCUPATION OF CROWN LANDS : AUSTRALIA.

State or Territory.	Private Lands.				Crown Lands.				Total Area.

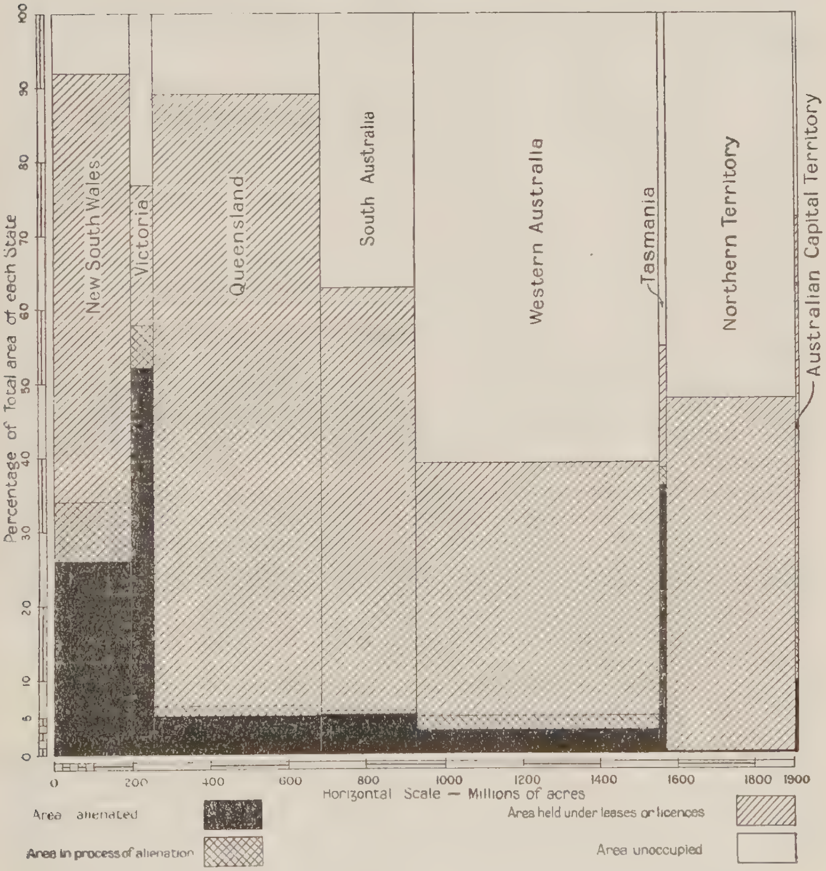
(*a*) At 30th June. (*b*) At 31st December.

11. **Diagram showing Condition of Public Estate.**—The following diagram shows the condition of the public estate during the year 1946. The square itself represents the total area of Australia, while the relative areas of individual States are shown by the vertical rectangles. The areas alienated from the State; those in process of alienation under various systems of deferred payments; and the areas held under leases or licences are indicated by the differently-shaded areas as described in the reference given below the diagram, and the areas unoccupied are left unshaded.

TENURE OF LAND.



CHAPTER V.

TRANSPORT AND COMMUNICATION.

A. SHIPPING.

§ 1. System of Record.

In the system of recording statistics of oversea shipping Australia is considered as a unit, and, therefore, only one entry and one clearance is counted for each voyage, without regard to the number of States visited (*see* also Section 5 following, paragraph 1.)

On the arrival at, or departure from, a port in Australia, whether from or for an oversea country or from another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month the information so obtained is forwarded to this Bureau. Similar documents furnish information regarding oversea migration and interstate migration by sea. This arrangement has been in operation since 1st July, 1924.

The net tonnage is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo. The unit of measurement is a ton of 100 cubic feet.

From 1st July, 1914, the Trade and Shipping of Australia have been recorded for the fiscal years ending 30th June.

Commencing with 1935–36 particulars of sailing vessels with auxiliary engines, previously included in the columns headed "Steam", have been included in those headed "Sailing", this classification being considered more correct as the main method of propulsion of these vessels is sail.

The outbreak of war with Japan in December, 1941, resulted in Australia becoming the land base of operations in the South-West Pacific Area. The outcome of this action was the transport by sea to Australia of large numbers of Allied troops with huge quantities of arms and equipment, munitions and stores, which resulted in a substantial increase in the volume of shipping in ports throughout Australia. Particulars regarding these vessels have been excluded from the following tables of "oversea" and "interstate" shipping movement except in Section 3, paragraph 1. The published tables, therefore (except Section 3, paragraph 1), relate primarily to vessels engaged in normal trade (i.e., carrying part or full cargo for civil purposes), and are strictly comparable with pre-war figures.

The total volume of all shipping including vessels carrying troops and war supplies which entered the principal ports of Australia during the years 1938–39 and 1942–43 to 1945–46 is shown in Section 3, paragraph 1. These particulars were compiled from information supplied by the State authorities controlling ports and harbours and include all vessels entering ports with the exception of warships. The year 1938–39 has been inserted for comparative purposes.

As a result of enemy activity the Customs Officers were withdrawn from the ports of Thursday Island (Queensland), Broome (Western Australia) and Darwin (Northern Territory) during February, March and April, 1942, respectively, and the ports closed as Customs Stations. Consequently, no particulars are available of shipping movements at these ports between the dates named and June, 1945, as they were still under the control of the defence authorities. Shipping in these ports during this period was predominantly military and naval in character. The port of Darwin (Northern Territory) was reopened as a Customs Station in July, 1945, Broome in December, 1945, and Thursday Island in August, 1946.

§ 2. Oversea Shipping.

1. **Total Movement.**—The following table gives the number and net tonnage of oversea steam and motor vessels and sailing vessels which entered Australian ports during the years 1935–36 to 1945–46 :—

OVERSEA SHIPPING : VESSELS ENTERED, AUSTRALIA.

Year.	Steam and Motor.		Sailing.		Total.	
	Vessels.	Net Tons.	Vessels.	Net Tons.	Vessels.	Net Tons.
		'000.		'000.		'000.
1935–36	1,550	6,200	(a) 65	(a) 38	1,615	6,238
1936–37	1,542	6,246	99	28	1,641	6,274
1937–38	1,800	7,096	105	32	1,905	7,128
1938–39	1,725	6,684	151	27	1,876	6,711
1939–40	1,573	6,459	101	7	1,674	6,466
1940–41	1,260	5,372	56	7	1,316	5,379
1941–42	1,248	5,166	28	8	1,276	5,174
1942–43	943	3,820	13	4	956	3,824
1943–44	1,085	4,482	9	2	1,094	4,484
1944–45	1,051	4,480	8	4	1,059	4,484
1945–46	1,140	5,260	6	3	1,146	5,263

(a) See § 1 above.

The average tonnage per vessel entered has risen from 3,862 tons per vessel in 1935–36 to 4,593 tons in 1945–46.

Particulars regarding the total oversea movement of shipping for each year from 1822 to 1920–21 will be found in Official Year Book No. 15, p. 507, for each year from 1921–22 to 1930–31 in Official Year Book No. 25, p. 189, and for each of the years 1931–32 to 1934–35 in Official Year Book No. 34, p. 81.

2. **Total Oversea Shipping, States.**—The following table gives the numbers and net tonnages of vessels which entered and cleared the various States direct from and to oversea countries during the year 1945–46 :—

SHIPPING ENTERED FROM AND CLEARED TO OVERSEA COUNTRIES DIRECT, 1945–46.

State or Territory.	Entered.		Cleared.	
	Vessels.	Net Tonnage.	Vessels.	Net Tonnage.
		'000.		'000.
New South Wales	452	2,124	437	1,768
Victoria	172	798	171	840
Queensland	193	704	273	1,061
South Australia	75	294	73	276
Western Australia	242	1,299	245	1,375
Tasmania	9	33	20	86
Northern Territory	3	11	6	24
Total	1,146	5,263	1,225	5,430

3. **Shipping Communication with various Countries.**—Records of the number and tonnage of vessels arriving from and departing to particular countries, as they are invariably made, may be misleading for the reason that the tonnage of a vessel can be recorded against one country only, notwithstanding that the same vessel on the same

voyage may carry cargo or passengers to or from Australia from or to several countries. For instance, a mail steamer on a voyage from the United Kingdom to Australia, through the Suez Canal, may call at Marseilles, Genoa, Port Said, Aden and Colombo, yet can be credited only to the United Kingdom, the country where the voyage commenced, to the exclusion of all of the others from the records. Also a number of vessels touch at New Zealand ports on their voyages to and from the United States of America and Canada, but their tonnages are not included in the records of Australian shipping trade with New Zealand. Similarly, the record of shipping engaged in trade between Australia and the United Kingdom via South African ports does not show tonnage to and from South Africa, the whole of it being included in the figures for United Kingdom. In view of this defect, statistics relating to the direction of the shipping to and from Australia are restricted to the following tables in which countries situated on the main trade routes are grouped together. This grouping into larger geographical divisions to some extent avoids the limitations referred to, except, as already pointed out, in the case of Africa and New Zealand.

DIRECTION OF OVERSEA SHIPPING : AUSTRALIA.

4. **Nationality of Oversea Shipping.**—Due to war conditions, shipping of British nationality progressively declined during the years 1939–40 to 1943–44 to 43.40 per cent. compared with 72.82 per cent. in 1938–39. On the other hand, shipping of United States of America nationality visiting Australia during the same period advanced to

33.07 per cent. in 1943–44 compared with 2.61 per cent. in 1938–39. There was a reversal of this position in the next two years, the shipping of British nationality having in 1945–46 increased to 68.10 per cent., while United States of America shipping declined to 18.72 per cent.

Particulars of the nationality of oversea shipping for the four years ended 30th June, 1946, compared with the year 1938–39, are given in the following table :—

OVERSEA SHIPPING : NATIONALITY OF VESSELS ENTERED, AUSTRALIA.

The Australian tonnage which entered Australia from overseas during the year 1945–46 represented 5.85 per cent. of the total tonnage entered and was mainly confined to the New Zealand and Pacific Island trade.

§ 3. Shipping of Principal Ports.

1. **Total Shipping, Australia.**—The following table, which has been compiled from information supplied by the State authorities controlling ports and harbours, shows the total volume of shipping—oversea, interstate and coastwise—which entered the principal ports of Australia during the years 1942–43 to 1945–46 compared with 1938–39, irrespective of whether these vessels were transporting civilian goods or troops and war equipment. Warships are excluded from the table.

(a) Port closed.

2. **Australia, New Zealand and United Kingdom.**—A table showing the total shipping tonnage which entered the principal ports of Australia, New Zealand and the United Kingdom during 1938 is published in Official Year Book No. 36, p. 112. Particulars relating to the ports of the United Kingdom are not available for the years subsequent to 1938.

§ 4. Vessels Built and Registered.

1. **Vessels Built.**—The following table shows the number and tonnage of vessels built in Australia during each of the calendar years 1938 and 1943 to 1946, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, does not, however, make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

3. **World's Shipping Tonnage.**—A table showing the number and gross tonnage of steam and motor, and of sailing vessels owned at the 1st July, 1939, by the most important maritime countries, together with the proportion of the grand total owned by each country is published in Official Year Book No. 36, p. 114. The figures, which were compiled from *Lloyd's Register of Shipping* are not available for later years.

§ 5. Interstate Shipping.

1. **System of Record.**—*Interstate Shipping* comprises two elements: (*a*) Vessels engaged solely in interstate trade: and (*b*) Vessels trading between Australia and oversea countries and in the course of their voyage proceeding from one State to another. (It should be mentioned that these vessels, except under special circumstances, do not now engage in interstate carrying.) No complexity enters into the record of those in category (*a*), but with regard to the method of recording the movements of the oversea vessels (*b*) some explanation is necessary. Each State desires that its shipping statistics (which are prepared in this Bureau) should show in full its shipping communication with oversea countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an oversea country—say United Kingdom—*via* another State, is recorded in the second State as from United Kingdom *via States*, thus distinguishing the movement from a *direct* oversea entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from United Kingdom *via* other States. On an inward voyage the *clearance* from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movement, must for the individual States be recorded as "Oversea *via* other States" or "Interstate" according to the direction of the movement. The significance of the record of these movements will be more clearly seen from the following tabular presentation of the inward and outward voyages to and from Australia of a mail steamer which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—*via* South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, and retrace its inward track.

ITINERARY OF AN OVERSEA VESSEL ON AUSTRALIAN COAST.

Particulars.	Recorded as—		
	For the State and for Australia.	For the States.	
Inward Voyage—			
Enters Fremantle from United Kingdom	Oversea direct		
Clears Fremantle for Adelaide ..	.. ..	Interstate direct	
Enters Adelaide from United Kingdom *via* Fremantle	.. ..	.. ..	Oversea *via* States
Clears Adelaide for Melbourne	.. ..	Interstate direct	
Enters Melbourne from United Kingdom *via* Adelaide	.. ..	.. ..	Oversea *via* Stat
Clears Melbourne for Sydney	..	Interstate direct	
Enters Sydney from United Kingdom *via* Melbourne	.. .	.. ..	Oversea *via* States
Outward Voyage—			
Clears Sydney for United Kingdom *via* Melbourne	.. ..	.. ..	Oversea *via* States
Enters Melbourne from Sydney . ..	.. ..	Interstate direct	
Clears Melbourne for United Kingdom *via* Adelaide	.. ..	.. ..	Oversea *via* States
Enters Adelaide from Melbourne ..	.. ..	Interstate direct	
Clears Adelaide for United Kingdom *via* Fremantle..	.. ..	.. ..	Oversea *via* States
Enters Fremantle from Adelaide ..	.. ..	Interstate direct	
Clears Fremantle for United Kingdom ..	Oversea direct		

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (*a*) The aggregate of all ships recorded for each State as "Oversea *direct*" gives the oversea shipping for Australia as a whole;

(*b*) the aggregate for all ships recorded in any State as "Oversea *direct*" plus those recorded as "Oversea *via States*" gives the total *oversea shipping* for that State; and (*c*) the aggregate for all ships recorded as "Oversea *via States*" may also be used, together with those recorded as "Interstate *direct*," to furnish figures showing the total interstate *movement* of shipping.

It should be remembered, however, that all oversea vessels do not follow the same itinerary as the vessel in the table above.

2. **Interstate Movement.**—(i) *Interstate direct.* The following table gives the number and tonnage of vessels recorded as having entered each State from any other State (including *oversea* vessels on interstate direct voyages) during each of the years 1942–43 to 1945–46 compared with the year 1938–39. The shipping of the Murray River, between the States of New South Wales, Victoria and South Australia, is excluded:—

INTERSTATE SHIPPING: NUMBER AND TONNAGE OF VESSELS ENTERED.

State or Territory.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.
			NUMBER.		
New South Wales ..	2,183	1,310	1,282	1,209	1,112
Victoria	2,243	1,356	1,210	1,143	1,104
Queensland	639	388	389	410	303
South Australia	1,036	527	562	573	482
Western Australia ..	382	159	209	192	221
Tasmania	1,301	845	773	739	695
Northern Territory ..	39	(*a*)	(*a*)	(*a*)	6
Total	7,823	4,585	4,425	4,266	3,923
			NET TONNAGE. '000.		
New South Wales ..	6,205	2,622	2,535	2,391	2,439
Victoria	4,751	1,888	1,741	1,798	1,815

Total	19,900	7,565	7,660	7,742	7,827

(*a*) Port of Darwin closed.

From 1938–39 the total net tonnage declined steadily each year until 1942–43, when it represented only 38 per cent. of the total for the pre-war year, and remained practically unchanged during the next three years, the total for 1945–46 being 39 per cent. of the 1938–39 total.

(ii) *Oversea via States.* To ascertain the aggregate movement of shipping between the States, including the total interstate movements of oversea vessels, the figures in the following table which give the number and tonnage of vessels entered from or cleared for oversea countries via other Australian States, must be added to those in the preceding table :—

SHIPPING ENTERED AND CLEARED FROM AND TO OVERSEA COUNTRIES VIA OTHER AUSTRALIAN STATES.

(*a*) Excluding purely day passenger accommodation. (*b*) Includes vessels under the control of the Australian Shipping Board.

§ 6. Tonnage of Cargo.

1. **Oversea and Interstate Cargo.**—(i) *Australia.* The table hereunder shows the aggregate tonnage of oversea cargo discharged and shipped and the tonnage of interstate cargo shipped in all ports for the years 1942–43 to 1945–46 compared with the year 1938–39. Cargo which was stated in cubic feet has been converted to tons measurement on the basis of 40 cubic feet to the ton.

CARGO MOVEMENT : AUSTRALIA.

Year.	Oversea Cargo.				Interstate Cargo.

(*a*) Tons weight and tons measurement combined. (*b*) Includes Netherlands East Indies.

Owing to war conditions the percentage of cargo carried in British vessels decreased from 72.43 in 1938–39 to 41.37 in 1943–44, but increased to 50.05 in 1944–45 and to 60.66 in 1945–46. On the other hand the percentage of cargo carried on foreign vessels increased from 27.57 in 1938–39 to 58.63 in 1943–44, but decreased to 49.95 in 1944–45 and to 39.34 in 1945–46.

§ 7. Control of Shipping.

1. **War-time Control.**—An account of the action taken by the Commonwealth Government to control and regulate shipping throughout Australian waters during the 1939–45 War is given in Official Year Book No. 36, pp. 121–130.

2. **Post-war Control.**—Following on the termination of hostilities in Europe and with the end of the war in the Pacific in prospect, a review was made of the war-time controls in the light of the then existing circumstances.

On 1st January, 1946, the Shipping Co-ordination Regulations were substantially amended. The amended Regulations provided for the establishment of an Australian Shipping Board to exercise the functions of the Shipping Control Board, Commonwealth Ships Chartering Committee and the Central Cargo Control Committee previously established separately under these Regulations; and also of the Marine Salvage Board which was constituted under other National Security Regulations. As a result of this action the activities of the various war-time shipping authorities were consolidated and considerable economies in administration were secured. The amendments also had the effect of repealing some war-time powers previously exercised by these bodies, notably the Cargo Control Committee.

At about the same time the Allied Consultative Shipping Council, the British-American-Australian Shipping Sub-Committee and the Port Equipment and Development Committee which had operated during the war, although not under any specific regulations, also lapsed.

During the war period allied control of shipping was exercised through an international body known as the United Maritime Authority which had branches in London and Washington and whose functions were, in brief, to allocate the available pool of shipping to the various Allied Nations so as to make the best overall use of the ships under the control of those Nations. The Agreement under which this body operated expired on the 2nd March, 1946. With the expiry of the United Maritime Authority the international war-time control of shipping lapsed and was replaced, under the auspices of the United Maritime Consultative Council, by arrangements for international co-operation, as, for example, through a voyage licensing system. A modified scheme was also continued which provided for the provision of ships for the lifting of relief supplies for Europe, and the United Maritime Consultative Council was utilized to facilitate the exchange of information on shipping as between Governments.

During the period the United Maritime Authority operated, Australia had been allotted a number of ships to assist in the carriage of cargoes around the coast and for the servicing of troops in operational areas. With the expiry of United Maritime Authority these vessels were returned to their owners. By arrangement with the United Kingdom Authorities, however, the Australian Shipping Board was able to negotiate for the charter of an average of 15 vessels for use on the coast and in June, 1947, these vessels were operating in Australian waters.

Following the cessation of hostilities, the majority of the vessels which had been operating under service control were released for commercial use and most of these, after necessary refitting, are now again operating in commercial employment. The end of the war relieved the Australian coastal fleet from its obligations in regard to the servicing of troops in operational areas, but the tonnage available to the Australian Shipping Board continued to be short of requirements, as the Commonwealth undertook the responsibility of assisting in the servicing of troops of the British Commonwealth Occupation Force in Japan, and a demand continued in the islands north of Australia for the return to the mainland of surplus war materials. Furthermore, the end of hostilities brought with it an increased demand on shipping space for the movement of goods necessary for the restoration of industries as well as for the regular movement of coal, iron-stone, sugar and other bulk products.

The difficulties were further increased by the climatic conditions which prevailed in New South Wales and Queensland during the 1944–45 and 1945–46 seasons, which necessitated the carriage of substantial quantities of wheat from other States to the afflicted areas. The net result of these demands was, as stated above, that shipping remained short of requirements, and in order to ensure that the tonnage available was used to the best possible advantage and that all ports received equitable treatment it has been found necessary to continue the requisitioning of vessels of the Australian coastal fleet.

On 18th August, 1947, all requisitioned vessels, with a few exceptions, were released to their owners immediately they returned to their home ports.

In March, 1947, legislation was passed providing for the setting up on a permanent basis of a Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Stevedoring Industry Commission which operated under the Shipping Co-ordination Regulations. The new Commission, appointed on 19th December, 1947, deals with all matters affecting the waterfront industry with the exception of standard hours of work and standard rates of pay which continue to be the function of the Arbitration Court.

The Maritime Industry Commission set up during the war also continues to function, and consideration is being given to the question of whether similar action will be taken to set up a permanent commission to control maritime industries as was done in the case of the waterfront industries.

§ 8. Miscellaneous.

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars were available was published in *Transport and Communication Bulletin* No. 14.

2. **Distances by Sea.**—The distances by sea between the ports of the capital cities of Australia and the most important ports in other countries which trade with Australia are shown in *Transport and Communication Bulletin* No. 37.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* gives a list of the ruling freight rates for general merchandise both in respect of oversea and interstate shipments. The latest figures available, which give the rates current at 31st March, 1948, show that the rate for general merchandise from Australia to United Kingdom and Continent was 123s. 0d. per ton weight or measurement, while the rates for wheat (bagged) and wool (greasy) were respectively 110s. 0d. per ton weight and $1\frac{15}{16}$ + 5 per cent. less $7\frac{1}{2}$ per cent. per lb. These rates, which are expressed in sterling, are subject to an adjustment of $25\frac{1}{2}$ per cent. when freight is prepaid in Australia.

4. **Depth of Water at Main Ports.**—A table, compiled from information supplied by the Director of Navigation, showing the depth of water available and tides at principal ports of Australia at 1st January, 1947, is included in *Transport and Communication Bulletin* No. 37.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a Magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping casualties reported on or near the coast during the years 1940 to 1946 are shown in the table below. This information also was furnished by the Director of Navigation :—

TOTAL SHIPPING CASUALTIES AND LOSSES : AUSTRALIA.

1946	..	..	..	173	395	..

(a) Less than 500 net tons.

6. **Commonwealth Navigation and Shipping Legislation.**—An account in some detail of the Commonwealth navigation and shipping legislation is contained in Official Year Book No. 17 (pp. 1053–5).

Under the provisions of the Navigation Act the coasting trade of Australia in passengers and cargo is reserved by Section 288 to ships licensed to engage in that trade. Licences are granted to ships complying with Australian conditions respecting wages, manning, crew accommodation, and so on, stipulations which have confined the trade to Australian-owned vessels.

Provision was made in the Act for permits to be granted to unlicensed British ships to carry cargo and passengers on the coast when it was shown that the licensed service was inadequate. The permit system, however, was not entirely satisfactory and in 1926 the Act was amended to allow the Governor-General, by notice in the *Gazette*, to permit unlicensed British ships of a specified size and speed to engage in the passenger trade between particular ports. Such a permit, however, could only be granted when it was shown that the tourist traffic was being injured or retarded. By a further amendment in 1935, this concession was revised to permit unlicensed British ships of not less than 10,000 tons and a sea speed of not less than 14 knots to carry passengers between any two ports in Australia not connected by rail. In every case the voyage must be made in one ship without break of journey, transhipment, or second call at any intermediate port. On arriving at the port of destination the passenger may be taken on to the next port of call of the ship, which may be his first port of embarkation, or a further port not connected by rail.

In the Navigation Act of 1935 also the carriage of wireless equipment was extended to all ships engaged in interstate trade. A similar provision for intra-state vessels has been made by some of the States.

The Navigation (Maritime Conventions) Act of 1934 was an amendment of the Navigation Act to enable the Commonwealth to give effect to the provisions of a number of maritime conferences of recent years, of which the most important were those dealing with the safety of life at sea and load lines.

The war-time and post-war control of shipping is referred to in Section 7.

7. **Ports and Harbours.**—A report in two volumes on "Transport in Australia," with special reference to Ports and Harbours facilities, was submitted to the Commonwealth Government by Sir George Buchanan, and published as two Parliamentary Papers (No. 86 printed 14th March, 1927, and No. 108 printed 9th May, 1927).

B. RAILWAYS.

§ 1. General.

1. **Introduction.**—The policy of Government ownership and control of railways has been adopted in each State and at 30th June, 1946, only 648 route miles of the 27,861 open for general traffic in Australia were privately owned, while 25,012 route miles and 2,201 route miles were owned by the State Governments and the Commonwealth respectively. In the following tables details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line are given in *Transport and Communication Bulletin* No. 37, issued by this Bureau, and also in Official Year Book No. 31, p. 125, et seq.

2. **Railways Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 will be found in Official Year Book No. 6, p. 681. Further information regarding railway communication in Australia is given in Official Year Book No. 22, pp. 259–61.

3. **Standardization of Railway Gauges.**—(i) *Sir Harold Clapp's Recommendations.* In March, 1944, Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport and formerly Chairman of Commissioners, Victorian Railways, was requested by the Commonwealth Government to submit a report and recommendation regarding the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge.

The report, which also covers the construction of certain strategical and developmental railways, was submitted in March, 1945, and the projects recommended, estimated to cost £76,751,000, were as follows :—(*a*) construction of an independent standard gauge line from Fremantle–Perth to Kalgoorlie (419 miles) ; (*b*) conversion to standard gauge of the entire South Australian 5 ft. 3 in. gauge system and the 3 ft. 6 in. gauge lines of the South Eastern Division (1,760 miles) ; (*c*) conversion to standard gauge of the entire Victorian 5 ft. 3 in. gauge system, and the Upper Ferntree Gully-Emerald section of the Gembrook 2 ft. 6 in. gauge line (4,980 miles) ; (*d*) acquisition of the Silverton Tramway Company's line (36 miles) between Cockburn (South Australia) and Broken Hill (New South Wales) and the conversion to standard gauge of such line, as well as the 3 ft. 6 in. gauge lines of the Peterborough Division of the South Australian Railways (366 miles) to provide a standard gauge line between Port Pirie and Broken Hill ; (*e*) provision of a standard gauge strategic and developmental railway linking Bourke (New South Wales) with Townsville and Dajarra and tributary lines (Queensland) via Cunnamulla, Charleville, Blackall, Longreach, Winton and Hughenden (1,544 miles) ; (*f*) construction of a standard gauge strategic and developmental railway between Dajarra (Queensland) and Birdum (Northern Territory) and the conversion to standard gauge of the Birdum–Darwin line (961 miles).

Other recommendations were that on agreement being reached between the Commonwealth and the States as to the carrying out of the foregoing projects arrangements be made for complete surveys, plans and estimates to be prepared for the standardization of the Queensland and Western Australian Railways not covered by the proposals mentioned.

The conversion to standard gauge of the 3 ft. 6 in. gauge Central Australia Railway (Port Augusta to Alice Springs) and the extension thereof beyond the existing terminal at Alice Springs was not recommended, nor was the introduction of standard gauge in Tasmania.

Projects (*a*) to (*e*) were estimated to take up to eight years to complete and (*f*) three years later. The work of constructing the last-mentioned line (Northern Territory) which is dependent on the completion of the standard gauge railway through Central Queensland to Dajarra would not be commenced until the sixth year.

Man-power to be absorbed in the projects would be equivalent to approximately 103,000 man-years. Something like 850,000 tons of steel for rails and fastenings, metal sleepers, rolling stock construction, etc., would be required, as well as 12 million timber sleepers and 26 million super. feet of sawn timber.

The project involves the conversion of 8,470 miles of existing railways, the construction of 1,600 miles of new railways, and the building of 578 locomotives and 9,746 items of rolling stock. In addition the scheme provides for the conversion of 412 locomotives and 26,000 items of rolling stock.

The report includes a chapter on standardization and modernization of railway equipment and the opinion is expressed that " standardization without modernization would not be justified ".

Modernization proposals cover increased speeds of trains, welding of rails, reductions in the tare weight of passenger and goods rolling-stock by the use of special alloy steels such as "Cor-Ten", modernization of passenger cars, greater use of electric traction on dense traffic routes, Diesel-electric locomotives for special work, Fork lift trucks and the establishment of a car and wagon interchange bureau.

The utilization of appropriate government ordnance and munitions factories and annexes with the existing personnel and plant is recommended to assist existing railway workshops in the very large locomotive and rolling stock construction programme involved.

(ii) *Agreement between the Commonwealth and New South Wales, Victoria and South Australia.* In order to implement the Commonwealth Government's desire to bring about the standardization of gauges Commonwealth–State discussions have taken place from time to time. Arising from these discussions a Railway Standardization Agreement was signed in 1946 between the Commonwealth of Australia and the States of New South Wales, Victoria and South Australia. This agreement was ratified by the Commonwealth of Australia on the 15th August, 1946, under the Railway Standardization Agreement Act (No. 50 of 1946).

Works for the standardization of railway gauges to be executed are set out under clause 10 of the Act as follows :—

(*a*) Conversion to standard gauge of the entire South Australian 5 ft. 3 in. gauge system, and of the 3 ft. 6 in. gauge lines of the South-Eastern Division, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion, and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

(*b*) Conversion to standard gauge of the entire Victorian 5 ft. 3 in. gauge system and the 2 ft. 6 in. gauge line from Ferntree Gully to Emerald, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion, and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

(*c*) Acquisition by the State of New South Wales and conversion to standard gauge of the 3 ft. 6 in. gauge line of the Silverton Tramway Company Limited between Cockburn, South Australia, and Broken Hill, New South Wales, and of the locomotives, rolling stock and equipment of that company, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

(*d*) Conversion to standard gauge of the 3 ft. 6 in. gauge lines of the Peterborough Division of the South Australian Railways, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion, and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

* (*e*) Conversion to standard gauge of the 3 ft. 6 in. gauge lines of the Commonwealth Railways from Port Augusta to Alice Springs, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion, and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

---

* Not included in Clapp Report recommendations. The undertaking for the construction of a north south trans-continental railway formed part of the obligations of the Commonwealth to South Australia under the Northern Territory Acceptance Act 1910.

(*f*) Construction of a new standard gauge line in New South Wales from Bourke to Barringun.

*(*g*) Construction of a new standard gauge railway from Alice Springs to Birdum and the construction of the standard gauge locomotives and rolling stock necessary to operate this line.

(*h*) Conversion to standard gauge of the 3 ft. 6 in. gauge Commonwealth Railway line from Birdum to Darwin, the conversion to standard gauge of existing locomotives and rolling stock suitable for conversion and the construction of standard gauge locomotives and rolling stock to the extent necessary to replace the existing capacity of all units unsuitable for conversion to standard gauge.

(*i*) The provision of terminal facilities rendered necessary by the conversion of any line specified in the foregoing provision of this clause.

The main financial provisions of the Act are covered under clause 23 as follows :—

(1) The Commonwealth shall bear the whole cost of the standardization works set out in paragraphs (*e*), (*g*) and (*h*) of clause 10 of this Agreement.

(2) The cost of the standardization works set out in paragraphs (*a*) and (*d*) of clause 10 of this Agreement shall be borne as follows :—

(*a*) The cost of construction of new locomotives and rolling stock to replace existing units of the South Australian railways system unsuitable for conversion, up to a maximum of £3,684,064 shall be borne by the State of South Australia, and if the total cost of such construction exceeds £4,912,085, the Commonwealth shall bear the amount of the excess.

(*b*) One-half of that part of the cost of the said standardization works which is not borne as mentioned in paragraph (*a*) of this sub-clause shall be borne by the Commonwealth, and the other half shall be borne by the States and shared on a *per capita* basis of population ;

(3) The cost of the standardization works set out in paragraph (*b*) of clause 10 of this Agreement shall be borne as follows :—

(*a*) The cost of construction of new locomotives and rolling stock to replace existing units of the Victorian railways system unsuitable for conversion up to a maximum of £8,462,768 shall be borne by the State of Victoria, and if the total cost of such construction exceeds £11,283,690, the Commonwealth shall bear the amount of the excess.

(*b*) One-half of that part of the cost of the said standardization works which is not borne as mentioned in paragraph (*a*) of this sub-clause shall be borne by the Commonwealth and the other half shall be borne by the States and shared on a *per capita* basis of population,

(4) One-half of the cost of the standardization works set out in paragraphs (*c*) and (*f*) of clause 10 of this Agreement shall be borne by the Commonwealth, and the other half shall be borne by the States and shared on a *per capita* basis of population.

The Act shall be inoperative until the Agreement has been approved by legislation in the States concerned.

The necessary legislation has been passed in the State of South Australia, but the States of New South Wales and Victoria have not approved the Agreement to date.

It is estimated that the construction of the uniform gauge in the three States will take seven years.

---

* Not included in Clapp Report recommendations. The undertaking for the construction of a north south trans-continental railway formed part of the obligations of the Commonwealth to South Australia under the Northern Territory Acceptance Act 1910.

(iii) *Historical.* For the history of the adoption of the various existing railway gauges by the several States and particulars of the scheme for unification of gauge advocated by a Royal Commission in 1921 *see* Official Year Book, No. 15, pp. 534–6.

4. **Government Railways. Lines under Construction and Lines Authorized, 1946.**—(i) *Lines under Construction.* In spite of the great extensions of State railways since 1875 and also the construction of various railways by the Commonwealth Government, there are still, in some States, immense areas of country which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States was to extend the existing lines inland in the form of light railways as settlement increased, and while it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting was kept in view.

(*a*) *New South Wales.* Construction work on the Sandy Hollow to Maryvale line (approximately 147 miles) and on the connecting link between St. James and Wynyard stations of the underground railway of Sydney has been recommenced following on funds being made available for this work. Work on the new Hawkesbury River railway bridge and approach tunnels was completed during the year and the bridge was opened for traffic on 1st July, 1946. The duplication of track on the main Southern line between Cootamundra and Junee has made good progress, and work was continued in stages on the comprehensive long-range scheme for the quadruplication of tracks on the main Western line between Lidcombe and Penrith. Preliminary surveys have been carried out and the permanent traverse of the base survey established for both the Eastern Suburbs railway (Central Station and Rushcutters Bay) and Southern Suburbs railway (Central Station and Redfern).

(*b*) *Other.* At 30th June, 1946, no construction work on new lines was in progress in Victoria, Queensland, South Australia, Western Australia, Tasmania, nor for the Commonwealth Government.

(ii) *Lines Authorized for Construction.* In the States of New South Wales, Victoria, Queensland, South Australia and Western Australia at the 30th June, 1946, there were certain lines authorized for construction but not commenced. These lines were authorized many years ago, some as early as 1910 and none later than 1933. Particulars may be found in Official Year Book No. 36, p. 133. There have been no later authorizations.

5. **Grafton-South Brisbane (Uniform Gauge) Line.**—The 4 ft. 8½ in. gauge line from Grafton (New South Wales) to Brisbane (Queensland) which was opened for traffic on 27th September, 1930, was constructed under agreement between the Commonwealth and the States of New South Wales and Queensland to overcome the break of gauge between Sydney and Brisbane; and was the first step towards uniform gauge railway communication between the capitals of the mainland States. To 30th June, 1946, the capital cost of construction and equipment was £4,362,500, and the working of the line, which is the responsibility of the New South Wales and Queensland Railway Commissioners, resulted in a profit of £90,124 being shown on the New South Wales section and a profit of £146,151 on the Queensland section. The interest charge for the year 1945–46 was £198,638, payable as follows—New South Wales, £63,457, and Queensland, £23,763, the remainder, £111,418, being borne by the Commonwealth. Figures relating to the operations, etc., of the line are incorporated as far as possible with those for New South Wales and Queensland in the tables which follow. Further particulars of the construction of the line will be found in Official Year Book, No. 31, p. 122.

6. **Mileage Open for Traffic, all Lines.**—(i) *General.* Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the conveyance of passengers or the public conveyance of goods, and it should be understood that the private lines included in the tables below form only a small part of all private railways in Australia.

The following table shows the route mileage of Commonwealth, State and private lines open for general traffic in each State at different periods since the inauguration of railways in Australia in 1854 up to the year 1945–46 :—

GOVERNMENT AND PRIVATE RAILWAYS : MILEAGE OPEN.

9. **Summary of Operations, 1945–46.**—In the following table a summary is given of the working of all railways open for general traffic in Australia during the year ended 30th June, 1946. In order to provide more accurate averages the basis of compilation has been altered as from 1941–42 in respect of the following items :—Capital cost per mile open, gross revenue, working expenses and net revenue per train mile run (private railways only), and average earnings of employees. The comparison with figures published for years earlier than 1941–42 is thereby impaired :—

GOVERNMENT AND PRIVATE RAILWAYS : SUMMARY OF OPERATIONS, 1945–46.

Particulars.		Commonwealth Railways.	State Railways.	Private Railways.(*a*)	Total for Australia.
Mileage open (route) 30th June, 1946	miles	2,201	25,012	648	27,861
Capital cost	£'000	18,091	311,877	5,138	335,106
Cost per mile	£	8,219	12,469	7,929	12,028
Gross revenue	£'000	1,566	68,610	739	70,915
,, ,, per train-mile ..	d.	206.70	194.09	185.30	194.05

Average number of employees	No.	(*b*) 2,781	(*b*) 125,039	(*c*) 1,294	129,114
,, earnings per employee	£	367	343	329	344

(*a*) Incomplete. Full particulars not available for all items. (*b*) Excludes construction staff (*c*) Employees at 31st December, 1945.

Details shown above relating to capital cost do not include particulars of amounts totalling about £61.5 million, written off during the period 1st July, 1927 to 1st July, 1937. If these are taken into account, the cost per mile for State Railways is increased to £14,928 and for all railways to £14,234.

§ 2. Government Railways.

1. **Cost of Construction and Equipment.**—The following table gives particulars of the mileage open and the capital cost of Government railways in Australia. The cost shown for Australia (£329,968,000) does not represent the total expenditure on construction and equipment, as legislation has been introduced in Victoria, Queensland, South Australia and Tasmania, for the purpose of reducing the capital indebtedness of the railways. Figures relating to capital cost do not include charges for works in the course of construction, surveys, and discounts and flotation charges on loans allocated to the railways.

GOVERNMENT RAILWAYS : MILEAGE AND COST TO 30th JUNE, 1946.

System.	Mileage Open.		Total Cost of Construction and Equipment.	Average Cost per Route-Mile Open.	Cost per Head of Population.	Route Mileage per 1,000 of Population.
	Route.	Track.				
	Miles.	Miles.	£'000.	£	£	Miles.
New South Wales	6,128	8,368	154,976	25,290	52.62	2.08
Victoria (*a*) ..	4,748	6,119	53,299	11,225	26.31	2.34
Queensland (*a*) ..	6,566	7,449	40,689	6,197	37.35	6.03
South Australia (*a*)	2,547	3,139	30,647	12,032	48.27	4.01
Western Australia	4,381	4,840	26,752	6,106	54.30	8.89
Tasmania (*a*) ..	642	694	3,068	4,779	12.17	2.55
Commonwealth ..	2,201	2,361	18,090	8,219	..	..
Australia (*a*) ..	27,213	32,970	(*b*)329,968	12,125	44.19	3.64

(*a*) See following paragraph. (*b*) Includes Commonwealth proportion Grafton-South Brisbane Line, £2,446,972.

The reductions made in the capital indebtedness referred to above were :—Victoria, £25,684,423 ; Queensland, £28,000,000 ; South Australia, £3,088,986 ; and Tasmania, £4,738,000. After adding these figures to the capital costs of the respective States and adjusting the route-mileage for New South Wales and Queensland to exclude portions of the Grafton-South Brisbane Line, the cost per route-mile open in each State and for the Commonwealth railways is as follows :—New South Wales, £25,290 ; Victoria, £16,635 ; Queensland, £10,572 ; South Australia, £13,245 ; Western Australia, £6,106 ; Tasmania, £12,159 ; Commonwealth, £8,219 ; and for all Government railways in Australia, £14,422. The lowest average cost is in Western Australia, and the highest is in New South Wales. Very few engineering difficulties were encountered in Western Australia, and the fact that contractors were permitted to carry traffic during the term of their contract considerably reduced expenditure.

Adjusted figures for the cost per head of population for each State and for Australia are as follows :—New South Wales, £52.62 ; Victoria, £38.99 ; Queensland, £63.05 ; South Australia, £53.13 ; Western Australia, £54.30 ; Tasmania, £30.98 ; all Government railways in Australia, £52.43.

2. **Expenditure on Construction and Equipment from Revenue and from Loans.**—The following table gives particulars of the expenditure on construction and equipment from revenue and from loans :—

GOVERNMENT RAILWAYS : CAPITAL EXPENDITURE FROM REVENUE AND FROM LOANS.

System.	Expenditure from Revenue to 30th June, 1946.	Net Loan Expenditure.			
		1938–39.	1944–45.	1945–46.	Total to 30th June, 1946.
	£'000.	£'000.	£'000.	£'000.	£'000.

Tasmania	..	35	143	90	(*d*) 8,008
Commonwealth ..	3,203,685	..	*Cr.* 41	*Cr.* 7	11,321
Australia ..	10,704,974	3,337	2,734	3,376	(*e*) 394,422

(*a*) From proceeds of sale of State lands, Consolidated Revenue Fund, National Recovery Loan, etc. (*b*) Gross Loan Expenditure. (*c*) Includes expenditure on railways provided in Unemployment Relief work programmes. (*d*) Includes losses funded. (*e*) Includes £2,446,972 Commonwealth Loan Expenditure on Grafton–South Brisbane Line.

3. **Gross Revenue.**—(i) *General.* The total revenue from all sources, the revenue per average mile worked and the revenue per train-mile run during the years 1942–43 to 1945–46 in comparison with 1938–39 were as follows :—

GOVERNMENT RAILWAYS : GROSS REVENUE.

Year.	N.S.W.(*a*)	Vic.(*b*)	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.	Australia.
TOTAL GROSS REVENUE.								
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.

(ii) *Coaching, Goods and Miscellaneous Receipts.*—(*a*) *Totals.* The gross revenue is composed of (*a*) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains ; (*b*) receipts from the carriage of goods and live stock ; and (*c*) rents and miscellaneous items. The following table shows the gross revenue for 1938–39 and 1942–43 to 1945–46 classified according to the three chief sources of receipts. The total of the three items specified has already been given in the preceding paragraph.

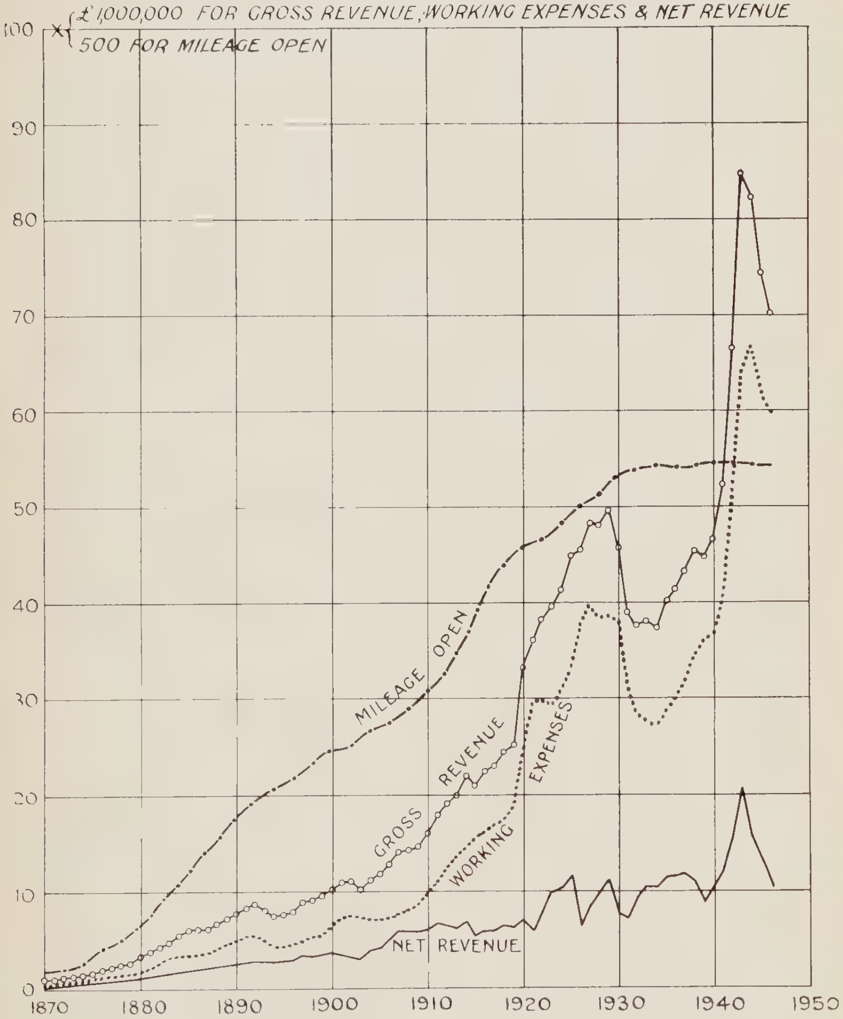
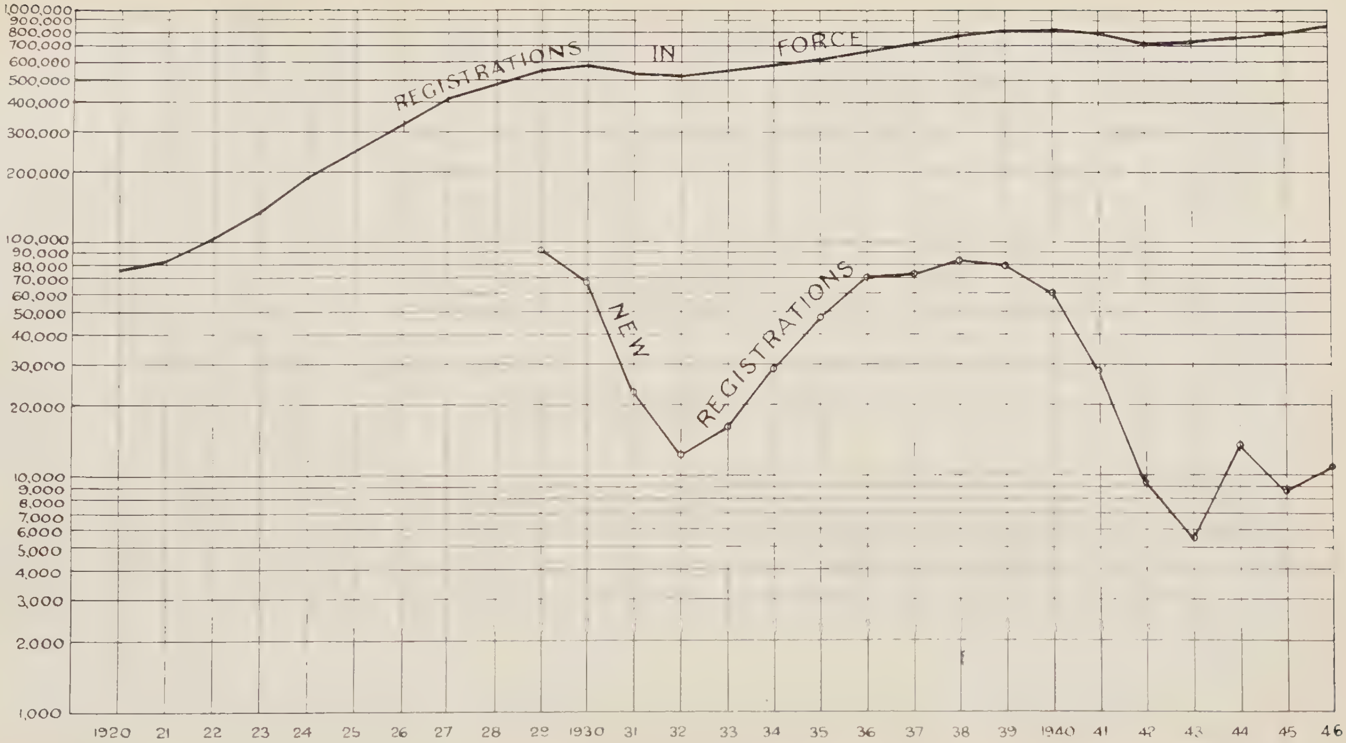
FINANCIAL POSITION OF THE GOVERNMENT RAILWAYS OF AUSTRALIA, 1870 TO 1946.



EXPLANATION.—The base of each square represents throughout ten years. The significance of the vertical height of each square varies according to the nature of the several curves.

In the curves for (i) gross revenue; (ii) working expenses; and (iii) net revenue, the vertical side of each square represents £10,000,000. The mileage open is shown by a broken line, the vertical side of each square representing 5,000 miles.

MOTOR VEHICLE REGISTRATION—AUSTRALIA, 1920 TO 1946.



(See page 175.)

EXPLANATION.—This is a ratio graph, the vertical scale being logarithmic, and the curves rise and fall according to the rate of increase or decrease. Actual numbers are indicated by the scale at the side of the graph.

The graphs show for all motor vehicles other than motor cycles the registrations in force at 30th June each year and the number of new registrations during the year.

(*b*) *Percentages.* The following table shows for each of the years 1944–45 and 1945–46 the percentage which each class of receipts bears to the total gross revenue :—

GOVERNMENT RAILWAYS : PERCENTAGES OF RECEIPTS.

System.	1944–45.			1945–46.

(*a*) Excludes particulars of North Australia Commonwealth Railways.

4. **Working Expenses.**—(i) *General.* In order to make an adequate comparison of the working expenses, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same systems. When traffic is light, the percentage of working expenses is naturally greater than when traffic is heavy ; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading.

During the war years large amounts were set aside by the Railways as reserves, mainly to provide for depreciation and accrued leave, to be expended as circumstances permit. War conditions subjected the Railways to heavy demands, and shortages in man-power and materials rendered it impossible to deal with the resulting rapid deterioration of stock, tracks and works. Leave accrued because shortages in staff prevented the taking of annual leave. The railway authorities therefore took the opportunity, which increased revenues offered, to provide for these future commitments. Particulars of the amounts thus set aside by each State during the years 1940–41 to 1944–45 are shown in the following table. These amounts are included in the maintenance of Way and Works and Rolling Stock sections following.

GOVERNMENT RAILWAYS : RESERVES MAINLY FOR DEPRECIATION AND ACCRUED LEAVE.

1945–46 ..	45.34	31.48	22.93	— 8.94	3.05	—30.29	8.35	28.91

In the graphs accompanying this Chapter the gross and net revenue and working expenses are shown from 1870 to 1946.

6. **Interest.**—The interest payments on expenditure from loans for the construction and equipment of the Government railways in Australia during the years 1938–39 and 1942–43 to 1945–46 were as follows :—

GOVERNMENT RAILWAYS : INTEREST PAYMENTS ON RAILWAY LOAN EXPENDITURE.

Year.	N.S.W. (a)	Victoria. (b)	Q'land. (a) (b)	S. Aust. (b)	W. Aust.	Tasmania. (b)	C'wealth.	Australia (a)
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
1938–39 ..	5,360	1,860	1,642	1,075	1,001	80	395	11,540
1942–43 ..	5,350	1,890	1,572	1,063	1,032	85	364	11,482
1943–44 ..	5,328	1,902	1,579	1,074	1,043	89	363	11,505
1944–45 ..	5,350	1,903	1,592	1,072	1,051	96	356	11,547
1945–46 ..	5,240	1,902	1,480	1,054	1,040	97	341	11,265

(a) Includes interest charges on the Grafton-South Brisbane Line, which for 1942–43 to 1944–45 amounted annually to £225,939 and were contributed by New South Wales, £72,179; Queensland, £27,029; and the Commonwealth, £126,731. During 1945–46 the annual interest charge was reduced to £198,638 and was contributed by New South Wales, £63,457; Queensland, £23,763; and the Commonwealth, £111,418. See par 5, p. 149. (b) Capital indebtedness reduced by legislation in these four States. See par. 1, p. 153.

The interest payable on the cost of construction and equipment as shown in the table in par. 1, p. 152, after the expenditure from Consolidated Revenue (£10,704,974 to June, 1946) for that purpose had been deducted, was at the rate of 3.62 per cent. in 1944–45 and 3.53 per cent. in 1945–46.

Exchange on interest payments abroad and certain other charges are not included in the table above. These items are not charged against the railways in Queensland and Western Australia and have been excluded for the purposes of comparison. In the remaining States the amounts paid on account of exchange in 1944–45 were—New South Wales, £760,000 ; Victoria, £200,026 ; South Australia, £125,714 ; and Tasmania, £6,878 ; and in 1945–46—New South Wales, £721,000 ; Victoria, £184,876 ; South Australia, £93,944 ; and Tasmania, £8,243.

7. **Profit or Loss.**—The following table shows, for the years 1938–39 and 1942–43 to 1945–46 the actual profit or loss after deducting working expenses and interest, but excluding exchange, from the gross revenue :—

GOVERNMENT RAILWAYS : PROFIT OR LOSS.

PROFIT OR LOSS AFTER PAYMENT OF WORKING EXPENSES AND INTEREST.

Year.	N.S.W. (a)	Victoria.	Q'land. (a)	S. Aust.	W. Aust.	Tasmania.	C'wealth.	Australia. (a)
	£'000.	£'000.	£'000.	£'000.	£'003.	£'000.	£'000.	£'000.
1938–39 ..	43	— 636	— 37	— 886	— 313	— 272	— 490	—2,718
1942–43 ..	2,179	1,100	5,055	86	— 62	— 207	1,212	9,237
1943–44 ..	2,438	766	1,689	— 308	— 452	— 354	575	4,227
1944–45 ..	2,354	524	542	— 758	— 539	— 363	— 45	1,588
1945–46 ..	1,939	242	11	— 1,291	— 960	— 378	— 277	— 825

(a) See note (a), par. 6, above.

For the first time since 1939–40 the Government railways of Australia as a whole showed a loss in 1945–46 after the payment of working expenses and interest.

8. **Traffic.**—(i) *General.* Reference has already been made to the difference in the traffic conditions on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern

and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to seaborne competition. In more recent years competition from air transport has become an important factor.

The following table gives particulars for the years 1942–43 to 1945–46 in comparison with 1938–39 :—

GOVERNMENT RAILWAYS : TRAFFIC.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.	Australia.

(ii) *Metropolitan and Country Passenger Traffic and Revenue*, 1940–41. A further indication of the difference in passenger traffic conditions is obtained from the comparison of the volume of metropolitan and suburban and country traffic during 1940–41 shown below. Figures for later years are not available for all States, because statistical compilations have been restricted owing to staff shortages and the extra work caused by war traffic.

GOVERNMENT RAILWAYS : METROPOLITAN AND SUBURBAN, AND COUNTRY PASSENGER TRAFFIC AND RECEIPTS, 1940–41.

Queensland	8,292	367
South Australia	3,619	330
Western Australia	2,928	322
Tasmania	778	321
Commonwealth	1,032	367
Australia	44,536	345

§ 3. Private Railways.

1. **Total Mileage Open, 1945–46.**—The bulk of the private railways in Australia has been laid down for the purpose of hauling timber, firewood, sugar-cane, coal and other minerals, and it is not generally used for the conveyance of passengers or for public goods traffic. In many cases the lines are practically unballasted and easily removable.

The railways referred to in this section include only lines open to the public for general passenger and goods traffic. Complete particulars of lines used for special purposes only are not available.

2. **Lines Open for General Traffic.**—The following statement gives a summary of the operations of private railways open for general traffic for 1945–46 :—

PRIVATE RAILWAYS : SUMMARY OF OPERATIONS, 1945–46.

State.	Route-Miles Open.	Capital Cost.	Gross Revenue.	Working Expenses.	Train-Miles Run.	Passenger-Journeys.	Goods, etc., Carried.	Employees.
	Miles.	£'000.	£'000.	£'000.	'000.	'000.	'000 tons.	No.
N.S.W.(*a*)	54	1,256	320	253	460	1,277	679	414
Vic. ..	13	44	10	9	12	10	21	17

S.A.(*a*) ..	51	524	(*b*)	(*b*)	72	74	1,196	163
W.A. ..	277	2,294	209	134	260	58	127	357
Tas.(*a*) ..	117	935	178	166	190	42	195	318
Australia(*a*)	648	5,138	739	584	1,050	1,461	2,354	1,294

(*a*) Incomplete. (*b*) Not available.

Some of the particulars given in the table are incomplete in respect of New South Wales, Queensland, South Australia and Tasmania. In New South Wales and Queensland several lines, although owned by private companies, are operated by the Government Railway Departments, and Government rolling stock is used thereon, while some of the companies are not able to supply particulars of the capital cost, revenue and working expenses of the lines which they operate. In some cases the figures relating to tonnage of goods, etc., include particulars of coal, ores, timber, sugar-cane, etc., carried for private purposes, as details relating to goods carried for the general public are not recorded separately.

C. TRAMWAYS.

1. **Systems in Operation.**—(i) *General.* Tramway systems are in operation in all the capital cities and in a number of the larger towns of Australia. The systems are operated mainly by governmental and municipal authorities, and from 1941–42 have been all electric.

In many parts of Australia private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways (see above), and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Total Mileage Open and Classification of Lines.* The following tables show for each State the total mileage of tramway lines open for general passenger traffic for 1945–46 classified (*a*) according to the controlling authority ; (*b*) according to gauge :—

TRAMWAYS : ROUTE MILEAGE OPEN, 1945–46.

Particulars—	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.

1944–45	603	1,036	87,756	1,069,716*b*	12.19	100	5,367
1945–46	606	1,056	88,878	1,049,254*b*	11.81	97	6,297

(*a*) Estimated. (*b*) *See* note (*a*) above. (*c*) Excludes particulars for Perth.

4. **State Details.**—(i) *New South Wales.* The electric tramways of Sydney and Newcastle are the property of the Government, and are under the control of the Department of Road Transport and Tramways. In Sydney and suburbs, at the 30th June, 1946, the Government tramways were divided into four distinct systems operated by electricity, and one, the Kogarah–Rockdale–Sans Souci line, by trolley bus (6 miles 32 chains). In addition, 2 miles 18 chains of trolley bus route operated in the city and suburban system. The gauge of all lines is 4 ft. 8½ in.

(ii) *Victoria.* In Melbourne, electric tramway systems with route mileages of 131 miles 29 chains are worked by the Melbourne and Metropolitan Tramways Board, while two electric tramways, (*a*) St. Kilda to Brighton 5 miles 14 chains and (*b*) Sandringham to Black Rock 2 miles 34 chains, belong to and are operated by the Railways Commissioners. The State Electricity Commission operates 11 miles 2 chains of electric tramways at Geelong, 13 miles 67 chains at Ballarat and 8 miles 51 chains at Bendigo.

A short account of the formation of the Melbourne Tramway and Omnibus Company and of the Tramways Board will be found in earlier issues of this work (see Year Books No. 7, page 652, No. 9, page 679, and No. 15, page 593).

With the exception of the St. Kilda-Brighton line, which is of 5 ft. 3 in. gauge, all the tramways of the State are of 4 ft. 8½ in. gauge.

(iii) *Queensland.* The electric tramways in the city and suburbs of Brisbane were controlled by a private company, with head office in London, until the 31st December, 1922, on which date they were purchased by the Queensland Government which, under the provisions of the Brisbane Tramways Trust Act 1922, appointed a Trust to control and operate the system until 1st December, 1925, when the control passed to the Brisbane City Council. The total length of the Brisbane tramways was 63 route miles at 30th June, 1946, the gauge of the line being 4 ft. 8½ in.

(iv) *South Australia.* The tramways in Adelaide and suburbs are controlled by a Municipal Tramways Trust created in 1907. Electric traction was inaugurated in 1909, and at the 31st January, 1947, the Tramways Trust operated a total route mileage of 80 miles of 4 ft. 8½ in. gauge. Over 16 miles of trolley bus route were included in the total route mileage operated (96 miles).

(v) *Western Australia.* The Perth electric tramways were taken over by the Government on the 1st July, 1913, and are now worked in conjunction with the Government railways. The length of route open at 30th June, 1946, was 50 miles. Trolley bus route miles included in this total amounted to 14. Electric tramways with a route mileage at 31st August, 1946, of 10½ miles and controlled by the municipal authorities, are in operation in Fremantle. In Kalgoorlie and Boulder a private company controls the electric tramways, of which, at the end of 1946, the length of line was 9·40 route miles. All the electric tramways of the State are of 3 ft. 6 in. gauge.

(vi) *Tasmania.* In Hobart there is a system of electric tramways consisting of 14 route miles of 3 ft. 6 in. gauge and 6 miles of trolley bus route controlled by the Hobart Municipal Council. The Launceston City Council operates a length of 14 miles of 3 ft. 6 in. gauge in that city.

(vii) *Summary of Operations.* The following table gives particulars of the working of electric tramways in each State of Australia for the years 1942–43 to 1945–46 in comparison with the year 1938–39 :—

(a) *See* note (a) to table in para. 2 above. (b) Includes motor omnibus employees in South Australia.

D. MOTOR OMNIBUS PASSENGER SERVICES.

1. **General.**—Motor omnibus passenger services have been in operation for some years in the capital cities and some of the larger towns of the States of Australia, and in the Australian Capital Territory.

Governmental and Municipal authorities operate certain services and the others are run by private operators; in the States the former are run in conjunction with the existing electric tramway systems.

2. **Government and Municipal Services.**—(i) *Summary of Operations*, 1945–46. In the following table a summary is given of the operations during the year ended 30th June, 1946 of omnibus systems controlled by Governmental and Municipal authorities.

GOVERNMENT AND MUNICIPAL MOTOR OMNIBUS PASSENGER SERVICES, 1945–46.

3. **Privately Controlled Services.**—(i) *General.* Particulars of motor omnibus passenger services under the control of private operators are recorded in the States of New South Wales, South Australia and Western Australia only.

In New South Wales, particulars are compiled for the Metropolitan and Newcastle Transport Districts only, but in South Australia and in Western Australia all operators throughout the State are covered.

(ii) *Summary of Operations.* The operations of motor omnibus passenger services under the control of private operators in these States during the five years ended June, 1946, are shown in the following table.

PRIVATE MOTOR OMNIBUS PASSENGER SERVICES : SUMMARY OF OPERATIONS.

E. FERRY (PASSENGER) SERVICES.

1. **General.**—In New South Wales ferry services have been established by private companies to transport passengers in the ports of Sydney and Newcastle. In Western Australia services are operated on the Swan River at Perth under both Government and private control. Passenger ferries in Tasmania are under both Government and private control and operate on the Derwent River at Hobart and also at Devonport. Inextensive services operate in the States of Victoria and Queensland, but no ferry services are in operation in South Australia.

2. **Summary of Operations.**—The following statement gives a summary of operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1942–43 to 1945–46 compared with the year 1938–39. Particulars of passengers carried on vehicular ferries are not included.

F. MOTOR VEHICLES.

1. **Motor Industry.**—Although motor cars have not hitherto been entirely manufactured in Australia the capital invested in assembling and body-building plants is considerable. The importance of the industry is shown by the following figures which relate to the local manufacture of motor bodies and the importation of motor cars, fuel and tyres during 1938–39 and the four years ended 1945–46.

MOTOR VEHICLES, ETC.: LOCAL MANUFACTURE AND IMPORTS, AUSTRALIA.

Particulars.	Unit.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.

	£A.	35,188	243,734	40,969	40,247	206,917

2. **Registration.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders thereof are not uniform throughout Australia. Methods of registration, licence fees payable, etc., in each State are referred to in Official Year Book No. 116, pp. 337–40, and later issues.

3. **Public Vehicles.**—In all the capital cities of the States and in many of the provincial centres taxi-cabs and other vehicles ply for hire under licence granted either by the Commissioner of Police or the Local Government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. **Motor Omnibuses.**—In both urban and provincial centres motor omnibus traffic has assumed considerable proportions during recent years, and has had a marked effect on railway and tramway services. The constitution of Boards empowered to allocate the routes over which omnibuses may operate arose from the belief that the economic waste, resulting from duplication by running services parallel with or contiguous to existing railway and tramway systems, is thus avoided. In some States the railway and tramway systems run motor services complementary to their main services to meet the competition of private enterprise and to endeavour to protect the existing transport utilities provided by public bodies. In addition, there has been a considerable replacement, during the last few years, of existing tramway services by trolley-bus and motor-bus services. (See Section D.)

5. **Motor Vehicles on the Register, etc.**—(i) *Year* 1945–46. Particulars of the registration of motor vehicles, licences issued and revenue received for 1945–46 are contained in the following table. A graph showing motor vehicle registrations since the year 1920 may be found on p. 158.

MOTOR VEHICLES : REGISTRATIONS AND REVENUE, 1945–46.

(*a*) Not available.

(iv) *Revenue per Motor Vehicle.* The following table gives the average revenue per vehicle (excluding motor cycles) received in respect of registration and motor tax in the several States for the year 1938–39 and for each year from 1942–43 to 1945–46. In some States the revenue from motor tax on cycles is not separately recorded. In these cases an amount based on the flat rate provided for cycles in the registration acts has been deducted from the total revenue received, and the average amounts shown must therefore be regarded as approximate only. Registration fees and motor taxes were reduced, during the year 1941–42, in the States of New South Wales, Victoria and Western Australia. In South Australia the reduction was made in the last half of

1940–41. The reduction was generally 25 per cent., except in the case of New South Wales, where it was 20 per cent. In July, 1942, Australian Capital Territory fees were reduced by 15 per cent.

AVERAGE REVENUE PER VEHICLE FROM REGISTRATION FEES AND MOTOR TAX (EXCLUDING MOTOR CYCLES).

(*a*) Excludes Northern Territory. (*b*) Includes vehicles registered as primary producers' vehicles, Victoria.

7. **World Motor Vehicle Statistics, 1947.**—The result of the 1947 World Motor Census, conducted by the "American Automobile" magazine, from which the following particulars have been extracted, shows that there were 44,887,058 motor cars, trucks, and buses registered in various countries of the world at 1st January, 1947. This shows an increase of 17.3 per cent. on the figure for the previous year, 38,249,581, and is the highest figure attained to that date.

The following table shows the numbers of motor vehicles registered in each continent at 1st January, 1947 :—

MOTOR VEHICLES: WORLD REGISTRATIONS AT 1st JANUARY, 1947.

Continent, etc.	Total Automobiles.	Motor Cars.(a)	Motor Trucks and Buses.(a)
Africa	608,900	432,454	163,767
America (exclusive of United States of America)	2,792,710	1,918,936	817,742
United States of America	33,233,975	27,496,096	5,737,879
Asia	421,938	201,665	191,898
Europe	6,580,951	3,711,482	2,815,879
Oceania	1,248,584	800,943	445,619
Total	44,887,058	34,561,576	10,172,784

(a) Not complete for all territories.

The next table gives particulars of the numbers of motor vehicles registered in various countries, together with their approximate populations for the purposes of comparison :—

COMPARATIVE MOTOR VEHICLE STATISTICS, 1st JANUARY, 1947.

Country.	Approximate Population in Millions.	Motor Cars, Trucks and Buses.
Australia	8	901,102
Argentine	16	285,610
Canada	12	1,587,795
France	40	1,300,000
Germany	66	142,527
Great Britain	48	2,448,065
India	311	170,000
Italy	46	205,000
Japanese Empire	75	47,000
New Zealand	2	287,398
Union of South Africa	2	354,740
United States of America	141	33,233,975

The foregoing figures are in some cases approximations based on estimates furnished by Trade Commissioners or representative motor trade organizations in the several countries, and in other cases are incomplete.

8. **Petrol Rationing.**—Petrol rationing was first enforced in Australia in October, 1940, a little more than twelve months after the commencement of the 1939–45 War. No very drastic cuts in consumption were made for some time, but, commencing in April, 1941, when the replenishment of stocks from overseas supply sources was becoming increasingly difficult and uncertain, progressive reductions in the monthly allowances to civilian users were made, the basic ration being finally reduced to the equivalent of only 800 miles of running per annum. The period of severest rationing lasted from late in 1941 until towards the end of 1944, non-military consumption during these three years or thereabouts being at a rate not very much in excess of one-third of the estimated pre-war rate of 30 million gallons per month.

With the improvement in the war situation in 1944, it was found possible, without making any specific amendment of the rationing schedules, to do something in the direction of granting claims for additional allowances of petrol in individual cases where circumstances appeared to justify this course and to relax to some extent the very heavy pressure which had been applied during the critical years of the war to enforce the use of producer gas units.

The first general increase in the ration scale was made in September, 1945, following the Japanese surrender, the allowances to private motorists and primary producers being increased by 25 per cent. A further all-round increase of 25 per cent. to all classes of users was made a month later, bringing the private motorist's allowance to 120 miles of running per month.

As essential users of motor spirit were already receiving practically their full requirements, such further liberalizing of the monthly allowances as became possible in the post-war period was mainly for the benefit of private motorists. By successive stages the monthly allowance for this class increased from 120 miles of running per month as at the end of 1945, to 270 miles as from December, 1946. An increase from 120 miles to 180 miles per month had been brought into effect as from February, 1946, with a further increase to 240 miles as from July, 1946. At the same time the rations of holders of private-plus-business licences and others of a like character were increased to an extent sufficient to avoid any anomaly as between such classes and the purely private motorist.

There was, perhaps, a good deal of justification for the popular expectation, following the cessation of hostilities in August, 1945, that, once the inevitable settling-down period had passed, and the supply lines had been restored to something approaching the pre-war normal, the end of petrol rationing would be in sight. Many factors, some of them unforeseen at the time and others entirely beyond Australian control or capacity to influence, conspired to postpone the date when war-time controls affecting petrol could be entirely removed ; Government action in this matter was accordingly directed to the further easing of restrictions and removal of anomalies and to ensuring that the supplies made available from overseas were distributed equitably and to the best advantage. Amongst other things, it was possible, with the ending of the war in Europe, to cease to enforce the use of producer gas units, with the result that, by the end of 1946, producer gas, which had played so valuable a part in reducing the civilian demand on imported motor spirit in the more difficult days, had practically ceased to be used as a substitute for liquid fuels.

Viewed on a world basis, i.e., sterling and dollar sources, the supply of petroleum products was, in general, sufficient in relation to world demands to have enabled petrol rationing to be lifted at the end of 1945, had this been the only consideration to be taken into account. The sterling-area production of motor spirit and the availability of sterling tankers were, however, not sufficient at that time to meet the unrationed demands of the sterling area, and imports into that area of large supplies of dollar-area oil in dollar tankers would have been necessary to enable restrictions on consumption to be completely removed.

The whole question of petrol rationing and supplies was reviewed by the Government from time to time between the end of 1945 and May, 1947. Partly because of industrial troubles which seriously affected railway and tramway services in some of the States in the latter part of 1946 and in the earlier months of 1947 (necessitating at times the transport by road of great quantities of goods normally carried by the railways and the authorization of special issues of petrol to a large number of road users), the monthly consumption of motor spirit rose to between 31 million gallons and 34 million gallons on several occasions between September, 1946, and March, 1947. This led to a decision by the Commonwealth Government, in March, 1947, after reviewing the supply position with the Government of the United Kingdom, to continue petrol rationing for an indefinite period and to administer the rationing plan somewhat more rigidly than had been the case for some time past. In reaching this decision, the Government was influenced, as on earlier occasions when the question had been under consideration, by the fact that, although Australia was still receiving almost the whole of its petrol supplies from the sterling area around the Persian Gulf, because the shortest tanker haul was thereby involved, production in that region was not sufficient to meet the demands of the whole sterling area, the effect of which was that the United Kingdom was under the necessity to draw its supplies largely from dollar sources—on the tanker short-haul principle. Larger allocations to Australia from the Persian Gulf to meet the steadily increasing consumption in Australia would necessarily have compelled Great Britain herself to draw more heavily on dollar supplies of petrol, thus aggravating the seriously deteriorating dollar-funds position. In the light of these facts and of the desire of the Government of the United Kingdom to have Australia's continued co-operation in this respect, the Commonwealth Government had no alternative but to maintain and tighten up the rationing system for the time being, especially in view of the need that still existed to charter a large number of American tankers each month (requiring payment of freight in dollars) for the carriage of sterling petrol. A further factor taken into account was that world prices of petrol were increasing, thus adding to the drain on the dollar funds needed to pay for that portion of the Empire's petrol requirements which had to be drawn from the dollar area. The need to conserve dollars became more acute during the latter part of 1947, with the result that an average overall reduction of approximately ten per cent. in the petrol consumption of all users operated from 1st October, 1947, followed by a further reduction of ten per cent. from 1st January, 1948. The current position is that essential transport is now, generally speaking, receiving most of its requirements of petrol, although the private motorist is still receiving less than his pre-war usage.

A more detailed account of the operation of petrol rationing up to February, 1946, appears in Official Year Book No. 36, pp. 160–3.

9. **Control of Tyres, Spare Parts and Mechanical Services.**—The war-time control of tyres, spare parts and mechanical services which was referred to in Official Year Book No. 36, page 163, has now been abolished.

G. TRAFFIC ACCIDENTS.

1. **General.**—The practice of reporting accidents occurring in public thoroughfares is not uniform throughout Australia. In some States the reporting of minor accidents has not been enforced, while other States require that all accidents be reported. Hence the figures for each State are not entirely comparable with regard to the number of accidents, and to a lesser extent with regard to the number of persons injured.

2. **Total Accidents Registered.**—(i) *Year* 1945–46. The following table gives particulars of the number of persons killed and injured in accidents (known to the police) which occurred in public thoroughfares during 1945–46 :—

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : PERSONS KILLED AND INJURED, 1945–46.

For further particulars of Traffic Accidents see *Transport and Communication Bulletin* No. 37.

H. AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration appears in Official Year Book No. 16, pp. 334–5.

2. **Foundation and Administration of Civil Aviation.**—A brief account of the foundation and objects of this Administration will be found in Official Year Book No. 19, p. 299. In 1936 the organization was changed and the responsibility of regulating and controlling civil aviation in Australia was entrusted to a Board, consisting of four members and a secretary. The Board was responsible to the Minister for Defence and continued to function as a unit of the Defence Department organization until November, 1938. In January, 1939, the Civil Aviation Board was abolished and the Civil Aviation Administration was made a separate Department under the Minister for Civil Aviation. The permanent Head of the Department is the Director-General of Civil Aviation.

The broad principles of the operations of the Administration of Civil Aviation are defined by Acts of Parliament and amplified by Regulations under the Acts. The more important relevant Acts and Regulations are (*a*) the Air Navigation Act and Regulations which prescribe the rules for the control of aircraft and air navigation ; (*b*) the Carriage by Air Act which gives effect to the International Convention for the unification of certain rules relating to International Carriage by Air ; and (*c*) the Quarantine (Air Navigation) Regulations which give effect to the International Sanitary Convention for Aerial Navigation.

The principal functions of the Administration are (*a*) the safety of civil flying ; (*b*) the licensing of pilots, ground engineers, navigators, and radio operators together with the supervision of all such work ; (*c*) the supervision of operations and licensing of airline companies for the carriage of mails, passengers, and freight ; (*d*) the making of contracts and payments of subsidies and payments for the carriage of mails ; (*e*) the construction and maintenance of aerodromes and seaplane bases and works in connexion therewith ; (*f*) the provision, operation, and maintenance of aeradio stations throughout Australia and Territories ; (*g*) the supervision of aircraft maintenance and aircraft design ; (*h*) the promotion of civil flying and training of pilots and ground staff ; and (*i*) liaison with international civil aviation organizations.

The organization is controlled from the head office in Melbourne, which directs the policy, planning, finance, and developmental aspects, and from out-stations throughout Australia and Papua-New Guinea at which are stationed the staff supervising aeradio, flight control, and maintenance.

A form of regional organization is under consideration by which a policy of decentralization will enable activities to be effected by a greater measure of local administrative control. In addition, certain field work could be undertaken by the proposed regional staff.

3. **International Activity.**—(i) *The Provisional International Civil Aviation Organization* (*PICAO*). Tremendous impetus was given to civil aviation in the international sphere by the International Civil Aviation Conference convened at Chicago by the United States of America during November and December, 1944, which was attended by 52 nations.

As a result of the deliberations of this Conference the following instruments were formulated :—(*a*) Interim Agreement on International Civil Aviation ; (*b*) Convention on International Civil Aviation ; (*c*) International Air Services Transit Agreement (conferring freedoms 1 and 2) ; (*d*) International Air Transport Agreement (conferring freedoms 1, 2, 3, 4 and 5).

The five freedoms in each other's territories to be granted to signatory States of the various Agreements were defined as—(*a*) the privilege to fly across its territory without landing ; (*b*) the privilege to land for non-traffic purposes ; (*c*) the privilege of disembarking passengers and unloading mail and cargo taken on in the territory of the State whose nationality the aircraft possesses ; (*d*) the privilege of embarking passengers and loading mail and cargo destined for the territory of the State whose nationality the aircraft possesses ; (*e*) the privilege of embarking passengers and loading mails and cargo destined for the territory of any other contracting State, and the privilege of disembarking passengers or unloading mails and cargo coming from any such territory.

By June, 1946, when the Interim Assembly met, twenty-eight nations had signed the Transit Agreement(*c*), but only sixteen had signed the Transport Agreement (*d*). Since then, four signatory states to the latter agreement have denounced their acceptance of it. Lacking a multilateral agreement, commercial rights in civil aviation are regulated mainly by bilateral pacts. Efforts are still being made to develop a multilateral agreement.

Under the Interim Agreement (accepted by 46 nations including Australia up to 30th January, 1946) which was designed to cover the period that would elapse before the Convention on International Civil Aviation was ratified by the minimum number of 26 States necessary to make it effective, a Provisional International Civil Aviation Organization was set up. This provisional organization consisted broadly of an Interim Assembly of all member States meeting annually and an Interim Council of 21 members on which Australia was represented, presided over by a President.

The only meeting of the Assembly of PICAO was convened at Montreal, Canada (the permanent seat of the organization) on 21st May, 1946, and Australia was represented by a strong delegation.

In the relatively short period of its existence PICAO made rapid strides in the investigation of many complex economic and technical problems facing international civil aviation. It planned for the many facilities and services required for safe international flight, and emphasized making arrangements to provide adequate air navigation facilities and to set up standards of operation and safety. It held Air Navigation Meetings in various areas of the world (including Melbourne, Victoria)—(1) to determine, within each region, the air navigation facilities available, and those required, for international civil air transport; (2) to develop regional operating procedures for air crew and grounds personnel; and (3) to recommend arrangements to collect and distribute data necessary for navigation in the region. ICAO will continue these meetings. At the request of PICAO, in September and October, 1946, the Governments of the United Kingdom, the United States of America and Australia demonstrated their latest radio communications and air navigation aids. This enabled delegates and observers to make recommendations to the Council for the progressive standardization of equipment. PICAO also evolved a plan to simplify and standardize customs, immigration, public health and other formalities.

(ii) *The International Civil Aviation Organization (ICAO). (a) Formation, Aims, Constitution, Functions, etc.* By 5th March, 1947, the necessary twenty-six ratifications of the Convention on International Civil Aviation had been received. By the time ICAO had come into legal being—4th April, 1947—nine more States had ratified the convention. Since then there have been further ratifications.

The aims and objectives of the new organization, as detailed in the Final Act of the Chicago Conference, are :—

> " To develop the principles and techniques of international air navigation and to foster the planning and development of international air transport so as to ensure the safe and orderly growth of international civil aviation throughout the world; to encourage the arts of aircraft design and operation for peaceful purposes; to encourage the development of airways, airports, and air navigation facilities for international civil aviation; to meet the needs of the peoples of the world for safe, regular and efficient air transport; to prevent economic waste caused by unreasonable competition; to ensure that the rights of Contracting States are fully respected, and that every Contracting State has a fair opportunity to operate international airlines; to avoid discrimination between Contracting States; to promote safety of flight in international air transportation; to promote generally the development of all aspects of international civil aeronautics."

ICAO consists of a legislative body (the Assembly) and an executive body (the Council). The Council's President is a salaried official and acts as its permanent representative. Functions of the Council include provision for the establishment of subsidiary working groups, including an Air Transport Committee and an Air Navigation Commission; the supervision and co-ordination of the work of the Council's principal committees; the consideration and transmission of their reports, together with the Council's own findings, to Member States; the making of recommendations to Member States; and the submission of a report to the Assembly. It must act as a tribunal to settle certain disputes, if ICAO's intervention is requested by one of the parties concerned.

The expenses of ICAO are borne by Member States in accordance with a set scale of contributions.

ICAO may, under certain conditions, provide technical and financial aid to Member States for the establishment, operation and maintenance of the aerodromes and navigational facilities required for the safe, regular, efficient and economic operation of international air services.

(*b*) *First Assembly Meeting.* The first Assembly meeting of ICAO extended from 6th to 27th May, 1947. It was held in Montreal, Canada, the permanent seat of the organization. Thirty-six contracting States, eleven non-contracting States and seven international organizations took part. The Honorable A. S. Drakeford (Australia) was elected President of the Assembly, which met nine times in plenary session, the remainder of its time being spent in commissions.

The plenary sessions were devoted to addresses of welcome, statements of national policy, the election of office-bearers, the establishment of the six commissions, the presentation of reports of the Interim Council and of the Air Transport Committee and the consideration of reports of the commissions, the election of the ICAO Council, etc. The Council has twenty-one members: Belgium, Brazil, Canada, France, Mexico, the Netherlands, the United Kingdom and the United States of America in Category A (" States of chief importance in air transport "); Argentina, Australia, China, Egypt, India, Ireland and Portugal in Category B (" States not otherwise included which make the largest contribution to the facilities for international civil air navigation "); and Chile, Czechoslovakia, Iraq, Peru, Sweden and Turkey in Category C (" States not otherwise included whose designation will ensure that all major geographical areas of the world are represented on the Council ").

Separate commissions dealt with each of the following subjects :—(1) Constitutional and general policy questions; (2) technical questions; (3) economic questions; (4) legal questions; (5) administrative and financial questions; and (6) financial and technical aid through ICAO.

(iii) *The International Commission for Air Navigation* (*ICAN*). ICAN, which was formulated in Paris in 1919 and of which Australia is a member, was the corner stone upon which the Air Navigation Regulations were built. In the terms of the Convention on International Civil Aviation formulated at Chicago, each contracting State undertook, immediately upon the coming into force of the Convention, to give notice of denunciation of ICAN, this organization to be replaced by ICAO as the co-ordinating body in international air navigation.

(iv) *British Commonwealth Talks—The Commonwealth Air Transport Council* (*CATC*) *and the South Pacific Air Transport Council* (*SPATC*). Immediately before and after the Chicago Conference on International Civil Aviation (see above), conversations in which Australia took part, affecting civil aviation in British Commonwealth countries, were held at Montreal and also at London. Out of these discussions came the decision to establish a Commonwealth Air Transport Council. This Council is representative of United Kingdom, Canada, Australia, New Zealand, South Africa, India, Newfoundland, Southern Rhodesia and the Colonial Empire and Eire. Its functions are—(*a*) to keep under review the progress and development of Commonwealth Civil Air Communications; (*b*) to serve as a medium for exchange of views and information between the Commonwealth Countries on Civil Air Transport matters; (*c*) to consider and advise on such civil aviation matters as any Commonwealth Government may desire to refer to the Council.

CATC held its first meeting in London in July, 1945. As a result of the meeting, the technical body known as CERCA (Commonwealth and Empire Conference on Radio for Civil Aviation) and a newly formed organization CANGO (Committee on Air Navigation and Ground Organization) were brought under the aegis of CATC. Additionally, of particular Australian interest, it was agreed (*a*) that Qantas Empire

Airways Ltd. and British Overseas Airways Corporation would be invited to operate parallel through services between United Kingdom and Australia via India ; (*b*) that a joint Australian-New Zealand-United Kingdom organization be established for operating, in parallel with a Canadian organization, the Pacific Trunk Route ; and (*c*) that consideration be given to the formation of a South Pacific Air Transport Council to deal with problems peculiar to the area.

In furtherance of the CATC meeting a conference on civil aviation problems affecting Australia, New Zealand and United Kingdom in the South Pacific region was held at Wellington, New Zealand, in February, 1946, as a result of which the following main recommendations were made :—(*a*) that there should be established an advisory body to be known as the South Pacific Air Transport Council open to the following membership —United Kingdom, Canada, Australia, New Zealand, Fiji and the Western Pacific High Commission ; and (*b*) that there should be established and registered forthwith in Australia a tripartite organization to be known as British Commonwealth Pacific Airlines for the operation of trans-Pacific trunk services between Australia and North America and between New Zealand and North America in parallel partnership with the designated airline of Canada.

At its first meeting in Canberra in December, 1946, SPATC approved the draft directive of the Governments of the United Kingdom, Australia and New Zealand to B.C.P.A. Ltd. to conduct the trans-Pacific air service. It also recommended the setting-up of two standing committees to supervise the running of the trans-Pacific and trans-Tasman services, and proposed certain changes to the draft contract under which Australian National Airways had agreed to operate an interim trans-Pacific service for B.C.P.A. Ltd.

(v) *Oversea Air Service.* (*a*) *Trans-Pacific Services.* In accordance with the decisions of the Wellington Conference, British Commonwealth Pacific Airlines Ltd. was registered in Sydney on 24th June, 1946, as a limited company with a nominal capital of £1,000,000 in proportionate shares of—Australia, 50 per cent. ; New Zealand, 30 per cent. and United Kingdom, 20 per cent. Following an agreement by the Canadian and Australian Governments to operate air services between Sydney and Vancouver, B.C.P.A. Ltd. began operations on 15th September, 1946, with an interim service. At first it was permitted to make only non-traffic stops in the United States of America, but under the Air Transport Agreement between Australia and the United States, signed on 3rd December, 1946, it can pick up and discharge international passengers, cargo and mail at all points on the Sydney–Vancouver route. In April, 1947, a fortnightly service was commenced between Auckland and Vancouver.

Pan-American Airways began operating a weekly San Francisco–Sydney air service in February, 1947. It also operates a fortnightly service to Auckland.

(*b*) *Australia–United Kingdom Air Service.* This service was suspended during the early period of the war. However, in order to meet the minimum needs for carriage of mails and priority passengers, a service by Catalina, and later, Liberator aircraft was established in June, 1944, by the United Kingdom Government via the Indian Ocean from Perth to Ceylon, where connexion was made with other services to the United Kingdom. Ground facilities were provided by the Commonwealth, and the net revenue received from mails by Australia was contributed towards the cost of the service. The service was operated by Qantas Empire Airways Ltd. under contract to the British Overseas Airways Corporation. In June, 1945, the terminal of the service was transferred to Sydney.

As from 12th May, 1946, in accordance with an agreement reached between Australia and the United Kingdom, a parallel service between the two countries was provided for, although the airlines designated to maintain the service—British Overseas Airways Corporation and Qantas Empire Airways Ltd.—were not at this period operating over the whole of the route. Payments were made by the two Governments to their respective operators on an agreed basis and any deficit on the combined operations was to be shared in proportion to the frequency of their own services—at this time equally. Three Lancastrian land plane and two Hythe flying boat trips weekly, in each direction, were being flown at 30th June, 1946. On 1st December, 1947, the Lancastrian land planes were replaced by Constellation planes and the Lancastrian planes were utilized for freight carrying purposes. In practice, Qantas Empire Airways Ltd. operated the sections between Karachi and Singapore of the Lancastrian and Hythe routes respectively, whilst British Overseas Airways Corporation operated west of those points.

(c) *Dutch Air Service to Australia.* The air service from Batavia to Sydney via Darwin, operated by the K.N.I.L.M. Company, ceased during the war years and has not been resumed.

(d) *Trans-Tasman Air Service.* A flying boat service between Sydney and Auckland was inaugurated in April, 1940, by Tasman Empire Airways Ltd., which was established under an agreement between the Governments of New Zealand, Australia and the United Kingdom. The company designated as the Australian shareholder was Qantas Empire Airways Ltd., and the services were operated under the control of the Tasman Air Commission, which comprises representatives of the three interested Governments. At the commencement of the service, the frequency was once weekly but increases were made, from time to time, and nine return trips per fortnight were being operated at 30th June, 1946.

(e) *Air Services in New Guinea.* The civil air services in New Guinea were interrupted by the advance of the Japanese during the early period of the South-West Pacific war. In 1945, Qantas Empire Airways Ltd. acquired the aviation interests of W. R. Carpenter & Co. Ltd. and resumed the operations of the service from Sydney to New Guinea. The temporary northern terminal of the service is Lae.

(f) *Air Service to Japan.* On 16th December, 1947 Qantas Empire Airways Ltd. commenced an air service to Japan, flying by way of Melbourne, Darwin and Manila (Philippine Islands). The service is under charter to the Royal Australian Air Force and replaces a Royal Australian Air Force courier service which had operated since the end of the war. The Lancastrian service was weekly until 2nd January, 1948 and thereafter twice weekly.

4. **Commonwealth Government Purchase of Qantas.**—The Qantas Empire Airways Agreement Act 1946 authorized the Commonwealth Government to purchase the United Kingdom Government's interest (in the form of the British Overseas Airways Corporation's shares) in Qantas Empire Airways Ltd. This involved the purchase of 261,500 fully paid-up £1 shares. The total paid-up capital of Qantas Empire Airways Ltd. was £523,000. On 3rd July, 1947, the sale to the Commonwealth Government of holdings in Qantas Empire Airways Ltd. by shareholders in Queensland and Northern Territory Aerial Services Ltd. was ratified in Brisbane. Qantas Empire Airways is now completely owned by the Commonwealth Government. All other main Empire airway units are owned by their respective Governments or groups of Governments.

5. **Regular Air Services within Australia.**—Since 1920 the grant of financial assistance for the establishment and maintenance of regular air transport services has been a part of the policy of the various Governments towards the development of civil aviation in Australia. On 30th June, 1946, nine companies were operating regular services within Australia under contracts with the Department of Civil Aviation.

During the war years, operations of the airline companies were devoted primarily to national purposes. A large number of aircraft was requisitioned for defence use, and thus was removed entirely from the control of the companies. Other aircraft were operated by the airline companies for defence purposes, including charter and reconnaissance duties in combat areas. As a result the regular air services were, for a long period, operated on a skeleton basis only. Owing to the demand for air travel for national purposes, a priority system, administered by the Department of Civil Aviation, was introduced to organize the flow of air traffic.

Towards the end of hostilities, the position was eased by the return of a number of aircraft to the airline companies and, also, by the acquisition of twelve Douglas aircraft by the Commonwealth Government under Lend-Lease. These military aircraft were converted to Douglas DC3 standard and hired by airline companies for use on regular air services.

An interesting development, during the period under review, has been the decision of the Australian National Airways Pty. Ltd., and later, of Guinea Airways Ltd. (on its Adelaide–Darwin service), Aircrafts Pty. Ltd. and Qantas Empire Airways Ltd. (on its major internal services and the Sydney–Lae service) to operate without direct Government subsidy. In accordance with the amount of mail carried, these companies receive payment at agreed rates. The contract with Guinea Airways Ltd. provides at a rate per pound for mails carried from the terminals of the service. Other companies are paid on a pound-mile basis.

In August, 1945, the Commonwealth Government established by Act of Parliament the Australian National Airlines Commission, a Government instrumentality authorized to operate interstate air services. The Act contained provisions to prevent competition with the Government airlines, but the High Court declared these provisions invalid. The Commission commenced operations on 9th September, 1946, with an interim service between Melbourne and Sydney. The operating body is Trans-Australia Airlines.

The following operators of regular air services appearing in Official Year Book No. 32 have ceased their airline activities :—Air Taxis Pty. Ltd., Adastra Airways Ltd., Airlines of Australia Ltd. (acquired by Australian National Airways Pty. Ltd.), W. R. Carpenter & Co. Ltd. (aviation interests acquired by Qantas Empire Airways Ltd.), North-Western Airlines Ltd., South Queensland Airways Ltd., and Victorian and Interstate Airways Pty. Ltd.

Extensive changes have been made in the network of internal Australian services since the issue of Official Year Book No. 32. Details of the services in operation as at 30th June, 1947, were as follows :—

Operating Companies and Services.	Route Mileage.	Aircraft Used.	Frequency (Return Trips unless otherwise indicated).
Trans-Australia Airlines—			
Melbourne–Sydney ..	460	DC3, DC4 ..	7 daily
Sydney–Brisbane ..	472	DC3, DC4 ..	4 daily

Sydney–Casino	374	Anson	3 weekly

6. **Air Ambulance Services.**—A brief statement of the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pp. 145 and 146.

Air Ambulance Services were maintained during the war years by the Flying Doctor Services of Australia and the Bush Church Aid Society. The medical base at Wyndham, which was removed during the period of the war years to Hall's Creek, was re-established at Wyndham, but there being no civil air ambulance available at Wyndham, the co-operation of either MacRobertson-Miller Aviation Co. Ltd., Connellan Airways, or the Royal Australian Air Force is sought whenever transport of a patient is necessary.

During the period under review, the annual grant of £7,500 made by the Commonwealth Government, on the recommendation of a Departmental Committee comprising representatives of the Department of Health, Postmaster-General and Civil Aviation, was maintained.

7. **Training of Air Pilots.**—(i) *Subsidized Aero Clubs.* A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, p. 146.

During the war years, the facilities of all subsidized Aero Clubs, with the exception of Broken Hill and Spencer's Gulf, were used by the Royal Australiar Air Force for training purposes. The payment of subsidies to all Clubs, with the exception of the abovementioned Clubs, was discontinued during this period.

Towards the end of 1945, financial assistance to the Aero Clubs by the Government was resumed. The basis of payment is £25 for each 50 hours flown by each club aircraft with a maximum of £100 per aircraft per annum. In addition, a bonus of £50 and £10 is granted for each private pilot's licence issued and each pilot's licence renewed respectively. Bonuses of £60 and £12 10s. respectively where club members were trained at centres other than club head-quarters are paid also.

The Royal Aero Club of New South Wales, Royal Victorian Aero Club, Royal Queensland Aero Club, Royal Aero Club of South Australia, Royal Aero Club of Western Australia, Tasmanian Aero Club, Newcastle Aero Club and Broken Hill Aero Club are in receipt of assistance.

(ii) *Unsubsidized Aero Clubs.* These organizations ceased their activities during the war years. By 30th June, 1946, however, a number had resumed training activities subject to the limits imposed by the Liquid Fuel Restrictions.

8. **Gliding.**—The subsidy which was granted by the Government to the gliding clubs was discontinued during the war years and has not been renewed.

9. **Airways Engineering.**—On the Australian mainland and in New Guinea an extensive network of radio communication and navigation stations has been established which completely encircles and crosses the continent and extends through New Guinea and Papua to Rabaul in New Britain. In the international sphere radio communication and navigation facilities are provided for aircraft entering Australia at Darwin and Sydney. The facilities now in use comprise—51 Aeradio Stations, 17 V.H.F. Radio Ranges, 43 Homers, 31 MF/DF Stations, 2 HF/DF Stations, 13 Radio-equipped Control Towers, and 4 Radio-equipped Control Launches.

There is published monthly by the Department of Civil Aviation a handbook entitled "ANFAC" in which are shown details of all communication and navigation aids available for aircraft flying in Australia and the South Pacific.

On the principal air routes high frequency radio range beacons provide a beam path for guidance of aircraft and at most stations radio homing beacons are installed for use in conjunction with the direction finding apparatus (radio compass) carried in the aircraft. These airway navigation facilities are backed up by a network of medium and high frequency direction finding stations, and to assist in the control of traffic using the busier airports ground radar stations are provided. In course of provision is an extensive network of V.H.F. 4-course radio range installations which will provide a more efficient "flying beam" service. These stations will be progressively modified to provide an omni-directional beam service, that is, one defining an infinite number of radial courses leading to the station location.

At all the principal airports, electrically operated runway lighting systems have been installed to define runways to be used for night landings. These installations are being extended both in scope and location. The later equipments, now being installed, have

the lighting fittings flush with the runway surface thus eliminating possible obstruction to aircraft and the light output is being directionally focussed to provide greater range of visibility in the desired direction.

10. **Air Traffic Control.**—With increasing aircraft traffic density at the principal aerodromes and on the main air routes a system of Air Traffic Control has been implemented to assist towards achieving safety of flight. The main services of the Air Traffic Control System are the Aerodrome Control Service and the Flight Control Service.

The Aerodrome Control Service operates from a specially constructed tower from which the entire aerodrome can be viewed. The aim of this service is to provide an orderly and safe system of arrivals and departures of aircraft to and from aerodromes. Radio communication equipment is provided in the control tower for communication with aircraft on the aerodrome and within the limited area of aerodrome control. The Flight Control Service is provided at the main aerodromes. Aircraft captains in co-operation with Flight Control Officers formulate flight plans and at regular intervals during flight, by means of radio communication with the aircraft, the Flight Control Service is able to determine at any time the estimated positions of all aircraft within the various areas of control. A Flight Control Centre is responsible for the supervision of all aerodrome controls within its area, the provision of a Flight Information Service and for initiating search and rescue procedures. The Flight Information Service provides air crews with complete information regarding the aerodromes and navigational and communication aids which may be used on any particular flight. Search and rescue assistance is provided mainly by the R.A.A.F.

11. **Meteorological Aids to Civil Aviation.**—Meteorological information and service are provided by the Meteorological Branch of the Commonwealth Department of the Interior.

12. **Airports and Landing Grounds.**—An account of the airports and landing grounds controlled and maintained by the Commonwealth Government will be found in Official Year Book No. 32, p. 148.

During the war period large numbers of aerodromes and landing grounds were constructed and maintained for defence purposes These aerodromes were mainly established at great distance from the centres of population and were not suitable for future civil aviation use. Those which can satisfactorily serve existing communities were taken over from the Royal Australian Air Force as they became surplus to requirements. To the 30th June, 1946, 35 such aerodromes had been transferred, and, in the future, a considerable number estimated to be valued at £7,000,000 will be taken over and directly controlled and maintained for civil aviation needs.

In order to bring landing grounds owned by municipal bodies or private persons to the required standards, technical assistance is provided by the Commonwealth Government for the planning of extensions or developments.

At the 30th June, 1946, there were 96 Government landing grounds, 73 emergency landing grounds, and 230 licensed public aerodromes within Australia.

13. **Construction of New Airports.**—During the war period improvements and developmental work were necessarily restricted to those airports and landing grounds required for defence purposes.

With the cessation of hostilities important developments were immediately planned for airports and landing grounds in Australia and New Guinea. With a view to the segregation of private and Aero Club flying from that of the regular transport services, the development of two airports is planned for each mainland capital city. In this manner congestion at major airports will be greatly reduced. Details of this scheme are as follows :—

Capital City.	Major Airport.	Minor Airport.
Sydney	Mascot	Bankstown
Brisbane	Eagle Farm	Archerfield
Adelaide	West Torrens	Parafield
Perth	Guildford	Maylands
Melbourne	Essendon	Site to be selected

Kingsford Smith Airport. After comprehensive investigation of all possible sites near Sydney, approval has been granted by the Government for the development of the existing Kingsford Smith Airport at Mascot to a combined land and water airport, conforming with international standards. The master plan of the aerodrome provides for four pairs of parallel runways, the longest being 10,000 feet and others between 5,000 and 8,000 feet complete with taxi strips, aircraft aprons, and parking facilities. The estimated cost of the first stage of the development programme is £5,000,000 and entails the diversion of Cook's river. The work proposed will extend over a period of from four to five years.

Essendon Airport. The first stage towards the development of a major airport at Essendon was nearing completion on 30th June, 1946. This stage consisted of the construction of a concrete runway 4,800 feet in length complete with taxiways and apron estimated to cost £300,000. Later stages of development will be carried out over the next four or five years.

14. **Aircraft Parts and Materials.**—The production of aircraft components and materials in Australia has increased considerably during recent years, so that most aircraft requirements can now be met by local production. One hundred and twenty-eight firms and organizations are authorized by the Department of Civil Aviation to issue release notes with their aircraft products, certifying that they have been manufactured to designs and specifications approved by the Department of Civil Aviation There are 48 distributors and agents approved by the Department of Civil Aviation who engage in the distribution of aircraft parts and materials, certifying their goods as being in conformity with approved specifications.

15. **Aircraft Maintenance, Certificates of Repair.**—All aircraft maintenance repair and overhaul is now carried out under the supervision of a works inspection section or licensed ground engineer, in workshops approved by the Department of Civil Aviation. Sixty-nine of these workshops are authorized to issue certificates of repair which serve as evidence to the licensed ground engineer responsible for the fitment of the part that the work so covered has been done in an authorized workshop by competent tradesmen and has been subjected to proper inspection. Such specialized work as the overhaul of instruments, electrical equipment, propellers, aeronautical pumps, and carburettors is carried out by these approved workshops.

16. **Test and Examination of Aircraft Parts and Materials.**—A number of laboratories has now been approved by the Department of Civil Aviation and is authorized to issue laboratory reports covering the physical test, chemical analysis, radiological and metallurgical examination of materials and parts used in connexion with the civil aircraft industry.

17. **Statistical Summary.**—The collection and compilation of aircraft statistics were undertaken by this Bureau as from 1st July, 1922. The following table gives a summary of operations for the year 1938–39 and the four years ended 30th June, 1946. Figures shown include particulars of Qantas Overseas Airways, but exclude particulars of the Trans-Tasman service. They exclude, as far as possible, the operations of aircraft chartered for defence purposes.

(a) At 30th June. (b) Not available. (c) July to September, 1941 only. Further particulars not available.

I. POSTS, TELEGRAPHS AND TELEPHONES.

§ 1. General.

1. **The Commonwealth Postal Department.**—Under the provisions of the Commonwealth Post and Telegraph Act 1901, the Commonwealth Postal Department was placed under the control of the Postmaster-General, being a responsible Minister. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Deputy-Director of Posts and Telegraphs.

The considerable expansion of postal business of all kinds is reflected in the gross revenue of the Department which in 1945–46 was 64 per cent. greater than in 1938–39.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices) in each State and in Australia at 30th June, 1946. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office as well as the number of inhabitants per office should be taken into account. In this and all succeeding tables the returns given for South Australia include those for the Northern Territory, and the returns for the Australian Capital Territory are included in those for New South Wales.

POSTAL FACILITIES : RELATION TO AREA AND POPULATION, AT 30th JUNE, 1946.

State.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices (*a*) ..	2,490	2,484	1,222	815	599	504	8,114
Number of square miles of territory to each office in State	124	35	549	1,109	1,629	52	367
Number of inhabitants to each office	1,189	815	892	792	823	500	920
Number of inhabitants per 100 square miles	954	2,305	162	71	50	961	251

(*a*) Includes "official," "semi-official," and "non-official" offices.

The foregoing table does not include "telephone" offices at which there is no postal business.

(ii) *Number of Offices.* The following table shows the number of post offices in each State for the years 1924, 1934, 1944 and 1946.

NUMBER OF POST OFFICES.

State.	At 30th June— 1924.		1934.		1944.		1946.	
	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.

All Branches—							
1938–39 ..	7,009	4,887	2,458	1,419	1,108	469	17,350
1942–43 ..	9,182	7,150	3,758	2,150	1,543	608	24,391
1943–44 ..	9,903	7,634	4,533	2,307	1,639	664	26,680
1944–45 ..	10,330	8,030	4,784	2,343	1,682	703	27,872
1945–46 ..	10,880	8,229	4,594	2,268	1,731	753	28,455
Total revenue per capita—	£	£	£	£	£	£	£
1938–39 ..	2.55	2.61	2.44	2.36	2.37	1.97	2.50
1942–43 ..	3.21	3.64	3.61	3.47	3.23	2.52	3.39
1943–44 ..	3.43	3.85	4.30	3.68	3.43	2.72	3.67
1944–45 ..	3.54	4.02	4.48	3.70	3.47	2.85	3.79
1945–46 ..	3.69	4.08	4.24	3.54	3.53	3.01	3.83

Compared with the corresponding figures for the previous year, an increase of 2.1 per cent. is shown in the gross revenue earned for the year 1945–46. Increases in the several branches were as follows :—Postal 1.1 per cent., Telegraph 4.2 per cent., Telephone 2.5 per cent. and Wireless 1.8 per cent.

The gross revenue in 1945–46 was 64.0 per cent. higher than in the last complete pre-war year, 1938–39, the corresponding percentage increases for the several branches being as follows :—Postal 60.0, Telegraph 142.1, Wireless 30.2, and Telephone 56.5.

4. **Expenditure, Postmaster-General's Department.**—(i) *Distribution.* The following table shows, as far as possible, the distribution of actual expenditure on various items in each State during the year ended 30th June, 1946. The table must not be regarded as a statement of the working expenses of the Department, since items relating to new works, interest, etc., are included therein.

POSTMASTER-GENERAL'S DEPARTMENT : DISTRIBUTION OF EXPENDITURE, 1945-46.

Particulars.	Central Office.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

(*a*) Expenditure on air-mail services etc. (*b*) Includes expenditure from loan. (*c*) Particulars of apportionment to States not available. (*d*) Includes expenditure not apportioned to States.

A similar table for the year 1944–45 is contained in the *Transport and Communication Bulletin* No. 36, p. 50.

(ii) *Total* 1938–39, 1942–43 *to* 1945–46. The next table gives the actual payments made as shown by records kept for Treasury purposes in respect of the Postmaster-General's Department, for each of the years 1942–43 to 1945–46 compared with the year 1938–39 :—

POSTMASTER-GENERAL'S DEPARTMENT : EXPENDITURE.

——	1938–39	1942–43.	1943–44.	1944–45.	1945–46.
	£'000.	£'000.	£'000.	£'000.	£'000.
Total expenditure ..	18,874	22,841	25,415	27,389	29,010

The total expenditure increased by 5.9 per cent. during 1945–46 and was 53.7 per cent. higher in 1945–46 than in 1938–39.

5. **Profit or Loss, Postmaster-General's Department.**—(i) *States*, 1945–46. The foregoing statements of gross revenue and expenditure represents actual collections and payments made and cannot be taken to represent the actual results of the working of the Department for the year. The net results for each branch in the several States, after providing for working expenses, depreciation and interest charges, including exchange, were as follows :—

POSTMASTER-GENERAL'S DEPARTMENT : PROFIT OR LOSS, 1945–46.

Branch.	Profit or Loss.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
		£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
Postal ..	Profit ..	924	722	263	161	121	77	2,268
	Loss ..	..	..	..	..	..	..	..
Telegraph ...	Profit ..	344	195	302	74	70	11	996
	Loss ..	..	..	..	..	..	..	..
Wireless ...	Profit ..	..	..	..	9	..	..	..
	Loss ..	51	22	39	..	34	7	144

	Loss ..	..	..	..	..	..	7	..
All Branches ..	Profit ..	2,633	1,859	962	422	228	74	6,178
	Loss ..	..	..	..	..	..	..	..

After providing for depreciation, pensions and retiring allowances and interest on capital, the year 1945–46 closed with a surplus of £6,177,624 compared with a surplus of £6,674,595 in 1944–45 and of £3,625,371 in 1938–39.

(ii) *Branches*, 1938–39 *and* 1942–43 *to* 1945–46. The following statement gives particulars of the operating results of each branch for the years 1938–39 and 1942–43 to 1945–46 :—

POSTMASTER-GENERAL'S DEPARTMENT : PROFIT OR LOSS, BRANCHES.

Year.	Branch Profits—				
	Postal.	Telegraph.	Wireless.	Telephone.	All Branches.
	£'000.	£'000.	£'000.	£'000.	£'000.
1938–39	2,105	52	76	1,392	3,625
1942–43	2,849	946	— 33	2,381	6,143
1943–44	2,336	952	— 24	3,033	6,297
1944–45	2,572	939	— 127	3,291	6,675
1945–46	2,268	996	— 144	3,058	6,178

NOTE.—Minus sign (—) represents deficit.

6. **Capital Account.**—The appended statement shows particulars of the fixed assets of the Postmaster-General's Department from 1st July, 1945 to 30th June, 1946 :—

POSTMASTER-GENERAL'S DEPARTMENT : FIXED ASSETS.

Particulars.	Net Value, 1st July, 1945.	Capital Expenditure, 1945–46.	Gross Value, 30th June, 1946.	Less Depreciation, etc., 1945–46. (a)	Net Value, 30th June, 1946.
	£'000.	£'000.	£'000.	£'000.	£'000.
Telephone service plant (excluding trunk lines)	50,825	4,183	55,008	699	54,309
Trunk and telegraph service plant (aerial wires, conduits, and cables)	16,246	551	16,797	71	16,726
Telegraph service plant ..	732	119	851	30	821
Postal service plant	556	33	589	..	589
Wireless service plant	776	74	850	2	848
Sites, buildings, furniture and office equipment	12,753	482	13,235	61	13,174
Miscellaneous plant	1,757	432	2,189	116	2,073
Total	83,645	5,874	89,519	979	88,540

(a) Includes dismantled assets, depreciation written off, and assets transferred.

At 30th June, 1946, the net value of fixed assets was 35.9 per cent. greater than at 30th June, 1939 (£65,135,000).

§ 2. Posts.

1. **Postal Matters Dealt With.**—(i) *Australia.* The following table gives a summary of the postal matter dealt with in Australia during the four years 1942–43 to 1945–46 in comparison with 1938–39. Although mail matter posted in Australia for delivery therein is necessarily handled at least twice, only the number dispatched is included in the following table, which consequently gives the number of distinct articles handled :—

POSTAL MATTER DEALT WITH : AUSTRALIA.

Year.	Letters, Postcards, and Letter-cards.		Newspapers and Packets.		Parcels.		Registered Articles other than Parcels.	
	Number ('000 omitted).	Per 1,000 of Population.	Number ('000 omitted).	Per 1,000 of Population.	Number ('000 omitted).	Per 1,000 of Population.	Number ('000 omitted).	Per 1,000 of Population
POSTED WITHIN AUSTRALIA FOR DELIVERY THEREIN.

(a) See explanation in para. 1.—(i).

Comparable figures of the number of articles dealt with during 1944–45 may be found in the *Transport and Communication Bulletin* No. 37, pp. 52–55.

2. **Cash on Delivery Parcels Post.**—(i) *General.* The Postal Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcel post within Australia, or between Lord Howe Island, Norfolk Island, Nauru, the Territory

of Papua-New Guinea, or Fiji and Australia, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, also to meet the requirements of traders and others who do not wish their goods to be delivered except on payment.

(ii) *Summary of Business.* The next statement gives particulars regarding the cash on delivery parcels posted in each State for the years 1942–43 to 1945–46 in comparison with 1938–39 :—

CASH ON DELIVERY PARCELS POST : SUMMARY OF BUSINESS.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.

1938–39	405,844	50,224	226,409	22,962	76,323	1,143	782,905
1942–43	464,996	147,796	195,351	32,070	45,458	2,636	888,307
1943–44	518,268	154,896	223,106	44,849	48,645	2,351	992,115
1944–45	521,647	146,062	260,638	52,774	55,126	2,375	1,038,622
1945–46	691,019	113,484	317,918	69,284	64,108	2,498	1,258,311
REVENUE INCLUDING POSTAGE, COMMISSION ON VALUE, REGISTRATION AND MONEY ORDER COMMISSION.							
	£	£	£	£	£	£	£
1938–39	45,097	4,867	24,881	2,587	8,207	102	85,741
1942–43	41,476	12,841	19,048	2,426	4,541	161	80,493
1943–44	49,283	13,575	19,135	4,566	4,225	151	90,935
1944–45	52,526	12,654	20,400	6,010	4,750	167	96,507
1945–46	54,220	8,635	25,598	6,019	5,526	177	100,175

The number and value of parcels forwarded in New South Wales and Queensland are much higher than in any of the other States, although the system has also found favour in South Australia and Western Australia. These States have the largest areas, and consequently more people at long distances from business centres avail themselves of the cash on delivery system.

3. **Sea-borne Mail Services.**—In earlier issues of this work particulars of sea-borne mail services were included, but the insertion of the information terminated with Official Year Book No. 22.

4. Total Cost of Carriage of Mails.—During 1944–45 and 1945–46 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows :—

CARRIAGE OF MAILS : TOTAL COST, 1944–45 AND 1945–46.

Year.	Inland Mails.			Coastwise Mails.	Overseas Mails.		Total.
	Road.	Railway.	Air.		Sea.	Air.	
	£	£	£	£	£	£	£
1944–45 ..	748,984	718,111	1,597,324	17,253	87,953	74,719	3,244,344

During 1944–45 and 1945–46 money and valuables to the amount of £139,483 and £213,439 respectively were found in postal articles sent to the Dead Letter Office.

6. Money Orders and Postal Notes.—(i) *General.* The issue of money orders and postal notes is regulated by Sections 74–79 of the Post and Telegraph Act 1901. A money order may be issued for payment of sums up to £20 within Australia, and not exceeding £40 (in some cases £20, and in Mauritius £10) in places abroad. A postal note, which is payable only within Australia and in Papua, cannot be issued for a larger sum than twenty shillings.

(ii) *States*, 1945–46. Particulars regarding the business transactions in each State for 1945–46 are given hereunder :—

MONEY ORDERS AND POSTAL NOTES : TRANSACTIONS, 1945–46.

State	Value of Money Orders Issued.	Value of Money Orders Paid.	Net Money Order Commission Received.	Value of Postal Notes Issued.	Poundage Received on Postal Notes.

(iv) *Classification of Money Orders Issued and Paid.* (*a*) *Money Orders Issued.* The next table shows the number and value of money orders issued during 1944–45 and 1945–46, classified according to the country where payable :—

MONEY ORDERS ISSUED : COUNTRY WHERE PAYABLE, 1944–45 AND 1945–46.

Where Issued.		Where Payable.				Total.
		Australia.	New Zealand.	United Kingdom.	Other Countries.	
		1944–45.				
Australia ..	No.	3,487,268	13,694	32,851	10,846	3,544,659
	Value £	26,882,479	31,272	77,248	28,722	27,019,721
		1945–46.				
Australia ..	No.	3,447,602	14,220	34,540	11,752	3,508,114
	Value £	26,905,166	31,469	81,607	32,324	27,050,566

(b) *Money Orders Paid.* The number and value of money orders paid during 1944–45 and 1945–46, classified according to the country where issued, are given hereunder :—

MONEY ORDERS PAID : COUNTRY OF ISSUE, 1944–45 AND 1945–46.

Where Paid.		Where Issued.				Total.
		Australia.	New Zealand.	United Kingdom.	Other Countries.	
		1944–45.				
Australia ..	No.	3,373,666	18,179	19,906	14,835	3,426,586
	Value £	26,849,371	39.649	133,049	100,642	27,122,711
		1945–46.				
Australia ..	No.	3,447,916	19,519	43,014	19,927	3,530,376
	Value £	26,791,592	44,366	273,749	164,054	27,273,761

In the tables above, money orders payable or issued in foreign countries, which have been sent from or to Australia through the General Post Office in London, are included in those payable or issued in the United Kingdom.

(v) *Postal Notes Paid.* The following table shows the number and value of postal notes paid in each State during 1944–45 and 1945–46. Particulars regarding the number and value of postal notes issued and paid in each of the last five years have been given in an earlier table.

POSTAL NOTES PAID : STATE OF ISSUE, 1944–45 AND 1945–46.

§ 3. Telegraphs.

1. **General.**—(i) *Development of System.* A review of the development of the Telegraph Services in Australia appears in Official Year Book No. 15, p. 625. During the past few years substantial improvements in both the speed and grade of telegraph service throughout Australia have been effected, the entire system being subjected to intensive reorganization.

(ii) *External Circulation or Routing of Traffic.* The external circulation system of the Australian telegraph service has been considerably modified, direct communication having been established between cities and towns which formerly were served through intermediate repeating centres. The reorganization has eliminated the loss of time in transit, improved the grade of service, and led to economy as regards the labour formerly required in manual re-transmission. As a result of the reorganization there are now only four repeating centres, nineteen centres having been abolished.

(iii) *Supra-Acoustic Carrier Wave System.* This system, which permits a number of messages to be transmitted simultaneously over the one pair of wires, is in operation between Perth and Adelaide, Adelaide and Melbourne, and Melbourne and Sydney, but has been superseded in recent years, to a great extent, by voice frequency telegraph carrier wave systems.

(iv) *Voice Frequency Telegraph Carrier Wave System.* This system, which enables a number of telegraph channels to be superposed on a single telephone channel by employing frequencies from 420 to 2,460 cycles per second, was introduced between Sydney and Tamworth during 1935. Between these two points 18 duo-directional channels were provided by adopting the voice-frequency principle, equivalent to 9,360 miles of uni-directional channels. This system has been extended to all the principal interstate and intra-State routes and 737,000 miles of uni-directional voice frequency telegraph carrier wave channels are now in operation.

(v) *Direct Telegraph Communication over Great Distances.* The telegraph system in Australia provides direct communication between many places separated by great distances as indicated in the following examples :—Sydney-Perth, 2,708 miles ; Perth-Wyndham, 1,933 miles ; Brisbane-Thursday Island, 1,775 miles ; Melbourne-Brisbane, 1,234 miles ; Brisbane-Cairns, 1,056 miles ; Brisbane-Cloncurry, 1,215 miles ; Adelaide-Perth, 1,642 miles ; Melbourne-Perth, 2,225 miles ; Adelaide-Darwin, 1,940 miles ; and Sydney-Adelaide, 1,066 miles. These direct channels provide a speedy service between the centres named, the average time involved in the transmission of a telegram being ten minutes.

(vi) *Machine Telegraphy.* In order to speed up transmission, machine printing telegraph systems have been introduced between capital cities and between important country centres. Murray multiplex machine apparatus is in operation between Sydney and Melbourne, Sydney and Brisbane, Sydney and Adelaide, Sydney and Perth, Sydney and Canberra, Sydney and Lismore, Sydney and Newcastle, Sydney and Wagga Wagga, Melbourne and Brisbane, Melbourne and Adelaide, Melbourne and Perth, Melbourne and Canberra, Adelaide and Perth, Brisbane and Rockhampton, and Brisbane and Townsville. These provide telegraph outlets which permit the carriage of very heavy loads with a minimum transit time. The operation of the apparatus has been steadily improved, and the system now gives a high output. Start-stop telegraph printing systems are in operation between Melbourne and Mildura, Melbourne and Hobart, Melbourne and Launceston, Sydney and Tamworth, Brisbane and Toowoomba, Brisbane and Mackay, Brisbane and Canberra, Perth and Fremantle, Perth and Kalgoorlie, Adelaide and Darwin, Hobart and Launceston, as well as between outlying centres and the large metropolitan and provincial offices.

(vii) *Phonogram Service.* Telephone subscribers may telephone telegrams for onward transmission, or have messages telephoned to them. The fee for the service is small, and the system means, in effect, that the telegraph system is brought into the home of every telephone subscriber. The number of telegrams lodged by telephone during the year ended 30th June, 1946, was 5,984,061 or 16.6 per cent. of the total lodgments, and the popularity of this service is growing.

(viii) *Radiograms within Australia.* On 1st May, 1929, the rates for radiograms between Flinders Island, Wave Hill, Brunette Downs and other places within Australia were reduced to 1½d. per word with a minimum charge of two shillings. Communication at these rates was extended to Lord Howe Island in August, 1929.

(ix) *Pedal Wireless Stations.* A number of privately operated wireless transceiver stations has been established at various centres throughout the Commonwealth, enabling telegrams to be exchanged with departmental telegraph offices. Stations sponsored by the Flying Doctor Service of Australia communicate by wireless with base stations established at Port Hedland, Cloncurry, Kalgoorlie, Broken Hill, Hall's Creek, Meekatharra and Alice Springs. Base stations which are operated by other enterprises are located at Yunta, Nonning, Port Lincoln and Wynyard. The radiogram rates of 1½d. per word with a minimum charge of two shillings apply to telegrams exchanged with these stations.

(x) *Picturegram Service* During the year ended 30th June, 1941, 351 picturegrams were transmitted between Sydney and Melbourne, the revenue being £862. Any kind of picture or document may be accepted for transmission, the charges varying from 30s. to 67s. 6d. according to the size of the picture or document and the grade of transmission desired. This service was suspended during September, 1942, but it will be restored as soon as the necessary equipment is obtained.

(xi) *Oversea Phototelegram Service.* An oversea phototelegram service, "via Beam," was inaugurated in October, 1934, permitting the transmission in either direction of facsimiles between Sydney or Melbourne and England, of dimensions up to a maximum of ten inches by seven inches. The tariff for this service was reduced on 1st January, 1940, and the charges are now calculated at the rate of one shilling and four pence per square centimetre with a minimum charge of £10 as for 150 square centimetres.

(xii) *Ornamental Telegram Forms.* The appropriately designed telegram forms used for conveying Christmas and new year greetings increased in popularity year by year until 1942 when all ornamental telegram forms and envelopes were withdrawn. In 1940, 453,886 of these greetings telegrams were sent, an increase of 214.9 per cent. on the number (144,102) sent in 1929, the year of inception of the service.

During 1933-34 telegram forms of special design and attractive colouring in connexion with Mothers' Day messages, birthday greetings and congratulatory telegrams were placed at the disposal of the public. The popularity of these facilities is indicated by the increase in the number of Mothers' Day telegrams from 16,091 in 1934 to 84,713 in 1941. Complete statistics are not available in respect of birthday greetings and congratulatory messages, but it is estimated that the number of telegrams in these categories is approximately 750,000 annually. In 1936 two additional greeting facilities employing ornamental telegram stationery were introduced, one for the conveyance of social greetings and the other for use during Easter-tide. The number of Easter Greeting telegrams in 1935, prior to the introduction of the special form for the occasion, was 4,164. This figure increased to 23,062 in 1941. Extensive use has been made of the social telegram service, which is popular for conveying "bon voyage" greetings and for making social engagements. The decorative telegraph stationery will be re-introduced as soon as the paper supply position will permit.

In December, 1945 the embargo on Christmas, New Year and Mother's Day greeting telegrams was removed.

(xiii) *Private Wire Teleprinter and Printergram Services.* In conformity with its policy of placing at the service of the public new developments in communication, the department introduced the teleprinter service in 1933. This may be briefly defined as typewriting over electrical circuits, teleprinters being similar in performance to typewriters, except that the keyboard and distant printer are electrically connected by means of a telegraph line.

This facility combines the speed of the telegraph and the flexibility and personal touch of the telephone with the accuracy and permanency of the printed word. It affords the great advantage of direct and instantaneous communication between points within the same building or separated by distances up to thousands of miles. Communications are automatically produced at both ends exactly as sent, and information may be dispatched with the utmost privacy even in exposed situations where other means are unsuitable. It affords two-way communications at speed up to 60 words a minute.

Printergram services connecting any business premises with the local telegraph office for the transmission and reception of telegrams are also available. This saves time and labour, while providing a permanent record of each transaction.

Two hundred and sixty-four private wire services utilizing more than 100,000 unidirectional channel miles of communication links were in use at the 30th June, 1946.

Two extensive interstate teletype networks were provided during the year ended June, 1946. One was provided for a civil aviation undertaking whose network comprised a service with connecting offices of the company in all States, and the second for a press association connecting the Melbourne office of the company with the offices of similar newspapers and the broadcasting undertakings in all States.

(xiv) *Telegraph Tariffs.* Important modifications of the telegraph tariff structure were introduced on 10th June, 1940. Under the amending Post and Telegraph Rates Act 1940 ordinary telegrams between offices not more than 15 miles apart are subject to a minimum charge of 9d. for 14 words and 1d. for each additional word, irrespective of whether the telegraph offices of origin and destination are in the same State. Ordinary telegrams between offices which are more than 15 miles apart are subject to a uniform charge of 1s. as for 14 words and 1d. for each additional word, irrespective of State boundaries. Double rates are applicable to urgent telegrams. Ordinary charges, instead of double rates as previously, are applied to ordinary telegrams lodged for transmission on Sundays, Christmas Day, Good Friday or after certain hours on other days. The prescribed press rates have also been extended to telegrams containing news intended for broadcasting.

2. **Telegraph Offices—Number.**—The following table shows the number of telegraph offices in each State during the years 1944–45 and 1945–46 :—

TELEGRAPH OFFICES : NUMBER.

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia

(a) Includes radiogram traffic with islands adjacent to Australia and to ships at sea.

A comparative table for the year 1944–45 may be found in the *Transport and Communication Bulletin* No. 36, p. 58.

(ii) *Australia.* The number of telegrams dispatched to destinations within Australia during each of the years 1938–39 and 1942–43 to 1945–46 was .—

TELEGRAMS DISPATCHED : AUSTRALIA.

Telegrams.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.
Number (*a*) ... '000	17,252	29,570	33,357	35,474	35,971

(*a*) See Note (*a*) above.

The volume of telegraph business has increased by over 108 per cent. since the year 1938–39.

§ 4. Oversea Cable and Radio Communication.

1. **First Cable Communication with the Old World.**—In earlier issues of the Official Year Book will be found a detailed account of the connexion of Australia with the Old World by means of submarine cables. (See No. 6, p. 770.)

2. **General Cable Service.**—Descriptions of the various cable services between Australia and other countries are given in Official Year Book No. 22, pp. 335–6.

3. **Merging of Cable and Wireless Interests.**—Following upon the recommendations of the Imperial Wireless and Cable Conference in London in 1928 which examined the situation that had arisen as the result of the competition of the beam wireless with the cable services, the Imperial and International Communications Limited (since renamed Cable and Wireless Ltd.) was formed and took over the operations of the Pacific Cable Board and the control of the Eastern Extension Cable Company and the Marconi Wireless Company. For further developments, leading eventually to the establishment of the Overseas Telecommunications Commission, see Section 6. Radio Telegraphy and Telephony, paragraph (iv).

4. **Oversea Cable and Radio Traffic.**—(i) *States.* The number of telegrams received from and dispatched overseas in each State during 1945–46 is given hereunder :—

INTERNATIONAL TELEGRAMS : STATES, 1945–46.

Particulars.	N.S.W.	Victoria.	Q'land	S Aust.	W. Aust.	Tasmania.	Australia.
Number received ..	571,607	296,487	65,437	34,616	46,775	8,967	1,023,889
,, dispatched	564,234	284,646	77,284	37,990	70,121	11,327	1,045,602
Total ..	1,135,841	581,133	142,721	72,606	116,896	20,294	2,069,491

(ii) *Australia.* The following table shows the number of international telegrams received from and dispatched overseas in Australia during the years 1938–39 and 1942–43 to 1945–46 :—

INTERNATIONAL TELEGRAMS : AUSTRALIA.

Particulars.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.
Number received ..	716,007	1,281,792	1,098,606	979,237	1,023,889
,, dispatched ..	745,754	1,682,940	1,363,588	1,116,050	1,045,602
Total ...	1,461,761	2,964,732	2,462,194	2,095,287	2,069,491

5. **Cable and Beam Wireless Rates.**—(i) *Ordinary Messages.* As from 25th April, 1938, the Cable and Beam Wireless rates per word for telegrams exchanged between Australia and British Empire Countries were reduced to the following levels :—Urgent, 2s. 6d. ; Ordinary, 1s. 3d. ; C.D.E. (5 letter code), 10d. (minimum 5 words) ; Deferred, 7½d. ; (minimum 5 words) ; Daily Letter Telegram, 5d. (minimum charge 10s. 5d. as for 25 words). Where, however, the charges between Australia and certain Empire countries (e.g., New Zealand, Fiji and some Pacific Islands) were below these levels, the rates were unaltered. No change was effected in the rates for traffic exchanged between Australia and foreign countries.

The following are the ordinary rates at present operating in regard to traffic with the principal countries, other than members of the British Empire :—

INTERNATIONAL TELEGRAM RATES.

To—	Rate per Word and Route.	
	Via Cable.	Via Beam.
European Countries	2s. 6d. to 2s. 7d.	1s. 11½d. to 2s. 5½d.
Asiatic Countries	2s. 5d. to 4s. 7d.	..
Africa	2s. 6d. to 5s. 6d.	2s. 2½d. to 2s. 11d.
United States of America	2s. 1½d. to 2s. 5d.	2s. 1½d. to 2s. 5d.
Central America	3s. 2½d. to 4s. 4½d.	2s. 11½d. to 4s. 4½d.
West Indies	3s. 0d. to 5s. 1d.	2s. 8½d. to 4s. 11d.
South America	3s. 9d. to 5s. 9d.	3s. 8d. to 5s. 2½d.

(ii) *Deferred Telegrams* (*via Cable or Beam*). Under this system a reduction of 50 per cent. in the ordinary charge for international telegrams is made under certain conditions. Deferred telegrams are transmitted after ordinary rate telegrams and ordinary press telegrams have been disposed of.

(iii) *Daily Letter Telegrams.* The daily letter telegram service was inaugurated in September, 1923, between Australia and Great Britain and Canada, later being extended to most countries in the British Empire and in Europe, to the United States of America and to certain other places. The charges are based on one-third of the tariff per word for ordinary messages, subject to a minimum charge as for 25 words. These messages are delivered on the morning of the second day following that of lodgment.

(iv) *Night Letter Telegrams.* A night letter telegram service was introduced between Australia and New Zealand on 1st May, 1924, and was extended to Fiji on 1st December, 1924. The minimum charge for messages is fixed as for 25 words, the rates being—to New Zealand, 3s. 9d. minimum, 2d. for each additional word beyond 25 ; Suva, 5s. 10d. minimum, 3d. for each additional word ; other places in Fiji, 7s. 4d. minimum and 4d. for each additional word. Night letter telegrams are delivered on the morning following the day of lodgment.

(v) *Oversea Press Telegrams.* The rate on ordinary press telegrams exchanged with Great Britain prior to 15th April, 1939, was 4d. per word and on deferred press 3d. per word. As from this date a uniform tariff of 2¼d. a word is applied uniformly to all Empire countries except Sudan. In all cases where the reduced rate applies the deferred press service has been abolished.

(vi) *Social Greetings Telegram Service.* As from 1st May, 1939, a social greeting service was introduced between Australia and Empire points.. The minimum charge for messages is 5s. for thirteen words, the indicator GLT being counted and charged for as one word. A charge of 5d. is made for each additional word. The text of such telegrams is restricted to messages of a social and greeting character. This service replaces the special Christmas, Easter and Jewish New Year greeting telegram service previously available to Empire points. These facilities are also available, on payment of the prescribed rates, to foreign countries which admit the service.

(vii) *De-Luxe Telegram Service.* A de-luxe telegram service was established between Australia and certain of the more important oversea countries in 1937. On payment of an additional fee of sixpence per telegram, the message will be delivered to the addressee on an ornamental form enclosed in a decorative envelope. This service, which was suspended during the late war, has not yet been restored.

(viii) *Radio-telegrams.* The prohibition of radio-telegrams to and from merchant ships, which was introduced on the outbreak of the late war on security grounds, was withdrawn as from 1st January, 1946.

§ 5. Telephones.

1. **Telephone Services.**—(i) *Mileage in Australia.* Particulars of the total mileage of lines used exclusively for telephone purposes are not now available, but are combined with all other line mileage. A table showing the total single wire mileage used for telephone trunk and/or telegraph purposes is shown in § 3 on page 210.

(ii) *Comparison with Other Countries.* During 1945–46 the total number of telephones added to the post office system was 28,055 compared with 28,133 in 1944–45. With an average of 125 telephones per 1,000 of population, Australia continues to hold a high place amongst the countries of the world in respect of telephone density. In February, 1942, restrictions were introduced on the provision of telephone facilities, unless required by the fighting services, organizations concerned actively with public defence, security or welfare, or persons engaged in the production and distribution of vital foodstuffs.

(iii) *Trunk Line System.* Twenty-five carrier wave telephone systems were installed during 1945–46 on trunk line routes serving capital cities and important provincial centres. The number of carrier systems now in service totals 266 representing a channel mileage of 171,087.

Special attention has been given to the provision of additional trunk line facilities between the capital cities, and 25 extra channels were provided between Sydney and Melbourne, 12 between Sydney and Brisbane, 13 between Melbourne and Adelaide, and 2 between Adelaide and Perth.

New 3-channel systems were installed between the following centres, Sydney–Kempsey, Parkes–Dubbo, Melbourne–Wangaratta, Melbourne–Horsham, Brisbane–Dalby, Brisbane–Bundaberg, Adelaide–Naracoorte, Adelaide–Yorketown, Adelaide–Berri, Adelaide–Whyalla, Adelaide–Mt. Gambier and Hobart–Launceston.

Satisfactory progress is being made with the installation of additional carrier units between the mainland and Tasmania, Melbourne, and Canberra and Sydney and Canberra.

(iv) *Automatic Exchanges.* The plan to convert the manual exchanges in the metropolitan networks to automatic working could not be implemented to any great extent during the year ended June, 1946, owing to interruption to deliveries of automatic exchange equipment which had been on order for long periods, the difficulties associated with the erection of new buildings to accommodate the apparatus, and the shortage of skilled man power. Consequently five only of this type of exchange were installed during the year ended June, 1946.

At the 30th June, 1946, there were 129 automatic exchanges in the metropolitan area and 160 in the country districts to which 503,518 telephones were connected representing 59 per cent. of the total number in use in Australia.

(v) *Rural Automatic Exchanges.* The establishment of automatic switching units which have been designed to meet the special needs of rural communities was also retarded by the effects mentioned above with the result that one new exchange only was provided during 1945–46.

There were 152 of these units in service at the end of June, 1946, and work is proceeding to enable many more additional exchanges to be established in the near future. Post-war plans provide for an additional 400 units to be installed in country areas.

(vi) *Summary for States.* Particulars relating to the telephone service in each State for the years ended 30th June, 1945 and 1946, compared with 1939 will be found in the following table :—

TELEPHONE SERVICES : SUMMARY.

Particulars.	Year (30th June).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

	1946	3,294	2,444	1,274	781	533	307	8,633
		%	%	%	%	%	%	%
Percentage of working expenses on earnings	1939	62.87	61.75	60.80	76.58	81.13	97.94	65.31
	1945	59.38	59.36	63.37	67.12	71.47	80.42	61.81
	1946	62.89	64.47	67.00	71.97	78.39	90.84	66.24

Of the total telephones (855,917) in service on 30th June, 1946, 314,382 or 36.7 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks. The number of telephone offices, including exchanges, decreased by 88 during the year 1945–46, bringing the total in Australia to 9,257.

(vii) *Subscribers' Lines and Calling-rates.* The next table gives the number of subscribers' lines and daily calling-rate at central, suburban and country telephone exchanges in the several States for 1945–46 :—

TELEPHONES : SUBSCRIBERS' LINES AND DAILY CALLING-RATE, 1945–46.

State.	Central Exchanges.		Suburban Exchanges.		Country Exchanges.	
	Sub-scribers' Lines.	Average Outward Calls Daily per line.	Sub-scribers' Lines.	Average Outward Calls Daily per line.	Sub-scribers' Lines.	Average Outward Calls Daily per line.
	No.	No.	No.	No.	No.	No.
New South Wales ..	23,981	11.90	129,467	4.66	83,495	2.65
Victoria	13,959	9.73	109,191	3.94	60,267	1.90

South Australia ..	6,635	9.64	24,360	2.90	20,307	1.76
Western Australia ..	7,179	8.45	11,783	4.51	10,802	2.20
Tasmania	3,971	5.57	2,510	2.89	10,533	2.50

Similar information for the year 1944–45 may be found in the *Transport and Communication Bulletin* No. 36, p. 62.

A comparison of the average daily calling-rates for each class of exchange shows that New South Wales registered the greatest number of calls per line at central and suburban exchanges and Queensland at country exchanges.

(viii) *Effective Paid Local Calls.* The numbers of effective paid local calls from subscribers and public telephones in the various States during the years ended 30th June, 1945 and 1946, appear hereunder :—

TELEPHONES : NUMBER OF EFFECTIVE PAID LOCAL CALLS.

South Australia ..	47,100	49,524	6,341	7,065	53,441	56,589
Western Australia ..	36,022	36,510	3,577	3,534	39,599	40,044
Tasmania	13,356	14,440	1,657	1,777	15,013	16,217
Australia ..	617,088	655,758	81,263	86,077	698,351	741,835

(ix) *Trunk Line Calls and Revenue.* In the next table the number of telephone trunk line calls recorded, the amount of revenue received, and the average revenue per call are shown for each of the States for the years 1944–45 and 1945–46 compared with 1938–39.

TELEPHONES : TRUNK LINE CALLS AND REVENUE.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia
Total Calls—	'000.	'000.	'000.	'000.	'000.	'000.	'000.
1938–39 ..	14,401	11,198	7,306	4,166	2,311	1,770	41,152
1944–45 ..	18,927	15,909	9,532	5,206	2,682	2,573	54,829
1945–46 ..	19,428	16,208	9,841	5,457	2,834	2,745	56,513
Total Revenue—	£	£	£	£	£	£	£
1938–39 ..	739,472	529,190	412,811	196,780	126,141	73,634	2,078,028
1944–45 ..	1,251,058	953,537	645,232	360,759	196,180	126,107	3,532,873
1945–46 ..	1,312,415	956,554	706,315	364,841	206,120	133,444	3,679,689
Average Revenue per call—	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*
1938–39 ..	12.32	11.34	13.56	11.34	13.09	9.98	12.12
1944–45 ..	15.86	14.40	16.25	16.25	17.55	11.76	15.46
1945–46 ..	16.21	14.16	17.23	16.05	17.45	11.66	15.63

The number of trunk line calls during 1945–46 increased by more than 1½ millions, or 3.1 per cent., compared with the figures for the previous year, whilst the average revenue per call increased slightly.

2. **Revenue from Telephones.**—Particulars regarding the revenue from telephone services are included in tables in § 1.

§ 6. Radio Telegraphy and Telephony.

1. **General.**—A statement in regard to the initial steps taken to establish radio telegraphy in Australia appears in Official Year Book No. 18, p. 343.

2. **Wireless Licences.**—(i) *General.* Particulars of the various types of licences appear in Official Year Book No. 34, p. 143.

The following table shows the number of each class of licence in force in each State and Territory as at 30th June, 1946 :—

NUMBER OF WIRELESS LICENCES : 30th JUNE, 1946.

Station Licence.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(*a*) Operated by Australian Broadcasting Commission. (*b*) Includes Short Wave Stations—Victoria, 3 ; Queensland, 1 ; Western Australia, 1.

(ii) *Broadcast Listeners' Licences.* The striking development of the use of the radio in Australia is illustrated by the following table, which gives the number of broadcast listeners' licences in force at 30th June, 1925, 1930, 1935, 1939, 1940 and 1943 to 1947 :—

NUMBER OF BROADCAST LISTENERS' LICENCES.

In force at 30th June—	N.S.W. (*a*)	Victoria.	Q'land. (*b*)	S. Aust. (*c*)	W. Aust.	Tasmania.	Australia.
1925 ..	33,719	19,243	1,061	3,118	3,417	501	61,059
1930 ..	111,080	139,887	23,263	25,671	5,715	6,032	311,648
1935 ..	278,648	236,886	67,369	76,365	41,176	20,088	720,532
1939 ..	433,029	327,579	133,217	117,307	79,262	39,392	1,129,786
1940 ..	458,155	348,158	151,110	124,891	87,764	42,182	1,212,260
1943(*d*) ..	552,044	390,950	177,846	151,258	97,785	49,910	1,419,793
1944 ..	560,032	409,325	180,090	155,253	99,246	50,356	1,454,302
1945 ..	570,312	412,317	184,341	160,210	102,065	50,557	1,479,802
1946 ..	575,864	415,785	191,286	164,724	106,529	51,992	1,506,180
1947 ..	679,505	499,944	228,066	180,909	121,149	61,674	1,771,247

(*a*) Includes Australian Capital Territory. (*b*) Includes Papua. (*c*) Includes Northern Territory. (*d*) Commencing in July, 1942, licences for receivers in excess of one are included.

3. **Broadcasting.**—(i) *The National Broadcasting Service.* The technical services for the National Broadcasting System are provided by the Postmaster-General's Department, and the programmes by the Australian Broadcasting Commission, a body consisting of five members, constituted under the provisions of the Australian Broadcasting Act.

At the 30th June, 1947, the National Broadcasting System of Australia comprised 37 transmitting stations as follows :—

Medium-wave Stations—

2FC and 2BL Sydney.
2NC Newcastle.
2NA Newcastle.
2CO Corowa.
2NR Lawrence.
2CR Cumnock.
2CY Canberra.
3LO and 3AR Melbourne.
3GI Sale.
3WV Dooen.
4QG and 4QR Brisbane.
4AT Atherton.
4QL Longreach
4QN Townsville.
4RK Rockhampton.
4QS Dalby.
5CL and 5AN Adelaide.
5CK Crystal Brook.
5DR Darwin.
6WF and 6WN Perth.
6WA Minding.
6GF Kalgoorlie.
6GN Geraldton.
7ZL and 7ZR Hobart.
7NT Kelso.
9PA Port Moresby.

Short-wave Stations—

VLG, VLH and VLR Lyndhurst, Victoria.
VLQ Brisbane, Queensland.
VLW Perth, Western Australia.

With the exception of the short-wave stations, all transmitters operate in the medium frequency broadcast band 550 to 1,500 kilocycles per second. From the short-wave stations, using frequencies within the band 6 to 20 megacycles per second, service is given to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, Northern Territory, and Northern and Central Queensland.

In addition to the short-wave stations under the National Broadcasting System the Department of Information operates three short-wave stations at Shepparton, Victoria (VLA, VLB, VLC) for oversea services only.

Programmes for country regional stations are normally relayed from the central studio of the nearest capital city, high quality programme transmission lines being used for the purpose. A number of programme channels is utilized to link national broadcasting stations in the capital cities of Australia, and frequently this system is extended to connect both the national and commercial broadcasting stations.

(ii) *Broadcast Listeners' Licences.*—(1) The general position regarding the fees payable for broadcast listeners' licences is as follows :—

	Zone 1.	Zone 2.
(*a*) For a single receiver possessed by a person ..	£1 ..	14s.
(*b*) For receivers in excess of one possessed by a person	10s. ..	7s.

(2) Free licences are granted to blind persons and to schools with an enrolment of less than 50 pupils. Invalid and age pensioners who live alone or with another such pensioner are required to pay only half the ordinary fees, i.e. :—

	Zone 1.	Zone 2.
(*a*) For a single receiver	10s. ..	7s.
(*b*) For receivers in excess of one	5s. ..	3s. 6d.

Zone 1 is the area within 250 miles of a National Broadcasting Station. Zone 2 is the remainder of the Commonwealth.

The Australian Broadcasting Commission receives the amounts shown below out of the fee for each broadcast listener's licence :—

Fee.	Amount paid to Commission.
s. d.	*s. d.*
20 0	11 0
14 0	11 0
10 0	5 6
7 0	5 6
5 0	3 0
3 6	3 0

(iii) *Commercial Broadcasting Stations.* The services of other broadcasting stations are conducted by private enterprise under licence from the Postmaster-General. Licences are granted on conditions which ensure satisfactory alternative programmes for listeners. The fee for a broadcasting station licence is £25 per annum, plus one-half of one per centum of the gross earnings from the operations of a station which has made a profit in the year preceding. The maximum initial period of a licence is three years, and it is renewed for a period of one year at the discretion of the Postmaster-General. Licensees of these stations do not share in the listeners' licence fees, but rely for their income on revenue received from the broadcasting of advertisements and other publicity. The number of these stations in operation at 30th June, 1947, was 100 and there are other stations in prospect.

(iv) *Radio Inductive Interference.* The Postmaster-General's Department takes active measures to suppress, so far as possible, interference with broadcast reception resulting from the radiations of energy from electrical machinery and appliances. During the year 1945–46 the Department investigated 4,074 complaints of interfering noises, which, in all but a few instances, were eliminated with the co-operation of the owners of the offending equipment.

(v) *Prosecutions under the Wireless Telegraphy Act.* During the year 1945–46 1,845 persons were convicted for using unlicensed broadcast receiving equipment. The total fines and costs amounted to £4,994.

4. **Overseas Communication by Wireless.**—(i) *Beam Radio Telegraph.* The beam wireless stations provided for under the agreement between the Commonwealth Government and Amalgamated Wireless (A/asia.) Ltd. were completed early in 1927 and a direct beam radio telegraph service to England was established on 8th April, 1927. A similar service to North America was opened on 16th June, 1928, and other radio telegraph services have since been established for communication with Barbados, Ceylon, China, India and United States of America. Satisfactory communication is maintained daily over a period of hours, and the services are well patronized by the public. On the 1st October, 1946, as a result of the Overseas Telecommunication Act all external radio services operated by Amalgamated Wireless (A/asia.) Ltd. were transferred to the Overseas Telecommunication Commission (Australia). A brief outline of the operations of the Oversea Telecommunication Commission will be found in para. (iv) of this section. A comparison of the rates charged for " Beam " and Cable messages is given in Section 4. Oversea Cable and Radio Communication. Particulars of international traffic via ' Beam " are given in paragraph (iii) (*a*) following.

(ii) *Radio Telegraph Communication in the Pacific.*—Radio telegraph services are in existence between Sydney and Manila (Philippine Islands), Noumea (New Caledonia), Port Moresby (Papua), Suva (Fiji) and China. Prior to the war with Japan, nine wireless telegraphy stations were established in New Guinea and Papua for communication with ships, while several internal point to point services were provided for use by administrative officials, gold exploration parties, missionaries and others. These services were suspended on the outbreak of hostilities in the Pacific and have not yet been restored.

(iii) *Radiotelegraphic Traffic.* (*a*) *International.* The following statement shows particulars of international traffic " via Beam " to and from United Kingdom and other places during the years ended 30th June, 1945 and 1946 :—

RADIO TRAFFIC : INTERNATIONAL, 1944–45 AND 1945–46.

Class of Traffic.	Number of Words Transmitted to—			Number of Words Received from—		
	United Kingdom.	Other Places.	Total.	United Kingdom.	Other Places.	Total.
Ordinary (*a*) ..	527,728	419,398	947,126	804,069	657,020	1,461,089
Deferred ordinary ..	1,395,143	1,071,469	2,466,612	1,803,770	1,067,685	2,871,455
Government (*a*) ..	60,677	155,746	216,423	108,003	487,481	595,484

(iv) *Overseas Telecommunications Commission.* (*a*) *Constitution and Purpose.* In the sphere of telecommunications the year 1946 was marked in Australia by important developments. The chief of these, and the one from which the others followed, was the passing by the Commonwealth Parliament of the Overseas Telecommunications Act 1946, assented to on 7th August, 1946. When full effect has been given to the programme authorized by the Act the wireless and cable services linking Australia with the rest of the world will have passed into public ownership. The change will bring to a close the long connexion of private enterprise with these services, and will open the way to their operation as a single integrated system. It will also bring them into a closer relationship with the internal telecommunications services, which have been owned and operated by the Commonwealth since federation.

The body set up under the Act to bring these changes into effect is the Overseas Telecommunications Commission (Australia). The Commission is a body corporate with perpetual succession and a common seal, and consists of five members appointed by the Governor-General. The Act also makes provision for the appointment of a general manager, who is the Commission's chief executive officer, and empowers the Commission to appoint such other officers as may be necessary. The Commission was formally constituted shortly after the passing of the Act, and has established its head office in Sydney. It operates under the ministerial direction of the Postmaster-General. The members of the Commission are Mr. J. Malone, M.C., F.I.R.E., formerly Deputy Director, Posts and Telegraphs, Sydney (Chairman), Mr. L. B. Fanning, I.S.O., Director-General, Postmaster-General's Department (Vice-Chairman), Mr. S. G. McFarlane, C.M.G., M.B.E., Secretary to the Commonwealth Treasury, Mr. G. T. Chippindall, Assistant Director-General, Postmaster-General's Department, and Mr. G. Gowans. The General Manager and Chief Executive Officer is Major General J. E. S. Stevens, C.B., D.S.O., E.D.

The action which is being taken in Australia is part of a general plan for the transfer to public ownership of the entire telecommunications network of the British Commonwealth of Nations. Under this plan the United Kingdom Government and the Governments of Canada, India, New Zealand, South Africa and Southern Rhodesia are also to take over the private interests in the external telecommunication services operated from their territories, and will arrange, as in Australia, for the services to be operated under unified national control. The various controlling authorities will each have complete autonomy within their separate spheres, but a central co-ordinating body, the Commonwealth Telecommunications Board, is to be set up with a view to securing close co-ordination in all matters of common concern. The plan as a whole represents an attempt to secure the advantages of co-ordination, together with public ownership, on the largest scale, while at the same time making full provision for the preservation of regional identity and freedom of action. The different Governments concerned have all agreed to introduce legislation as soon as possible to authorize the implementation of the plan.

(*b*) *Origin and Development.* From a historical standpoint the action now being taken is the result of a long process. In regard to the intergovernmental arrangements, this may be said to date from 1927, when the present Beam Wireless Service between the United Kingdom and Australia was inaugurated. This service, owing to the relatively low capital costs involved in its establishment, was able to offer rates lower than those charged by the cable companies, and it soon became clear that if unrestricted competition were to prevail the financial position of the cable companies would be seriously affected. On the other hand there was a strong case for the retention of the cables, in that they afforded the only completely secret means of communication in time of war, and were not subject to the daily fading and occasional prolonged interruptions which have to be contended with in long distance wireless transmission. Some plan combining the advantages of both systems had therefore to be found.

The first step in this direction was taken in 1928, when a merger of all the cable and wireless interests in Great Britain was effected under the sponsorship of the United Kingdom Government. The merger company, which subsequently became known as Cable and Wireless Limited, was made responsible for the operation of the cable and wireless services generally, and subject to certain conditions relating to charges to users, etc., was given exclusive rights in this connexion. These arrangements, however, did not quite fulfil the hopes of those who devised the plan, nor did the later modifications of the original plan which were made at intervals during the ensuing seventeen years. The whole position finally came up for review at a conference held in London in July and August of 1945. This conference, which was attended by representatives of all the Empire Governments, at length adopted the proposals which are now being carried into effect. It is noteworthy that the plan finally adopted was based very largely upon proposals put forward by the Australian and New Zealand representatives.

Within Australia, proposals for the nationalization of the external telecommunication services have also a long history. The internal telecommunication services, as has been mentioned above, have been owned and operated by the Commonwealth since federation, and the external wireless services, established in 1912 for the handling of traffic with ships at sea, were operated on the same basis until 1922, when they were transferred by the Government to the company now known as Amalgamated Wireless (Australasia) Limited. The earliest formal proposal for their re-acquisition by the Commonwealth was put forward in 1929, when the Government refused to ratify a plan for the merger of the cable and wireless services in Australia on a private basis, intimating that it favoured the operation of these services by a public instrumentality. Plans for action to give effect to this view were considered by several subsequent Governments, but no finality was reached until 1941. The plans now being put into effect were developed under decisions given then.

The cable services linking Australia with the rest of the world were opened originally by private operators, and, as regards the Cape and Gibraltar cables, have been uninterruptedly in private ownership throughout their history. The Pacific Cable System, however, which was opened in 1902, was sponsored and financed as an inter-governmental project, and was publicly owned until 1929, when it was transferred to Cable and Wireless Limited. The amalgamation of the cable and wireless services has been a basic feature of all the telecommunications plans which have been given governmental consideration in Australia since 1929.

(c) *Transfer of Services.* At the time of the passing of the Overseas Telecommunications Act the external radio services handling public correspondence to and from Australia were all operated by Amalgamated Wireless (Australasia) Limited. The transfer of these services to the Commission was effected on 1st October, 1946. The total consideration paid to the Company in connexion with the transfer was £1,400,000, plus an allowance of £25,000 to the company to cover the costs of re-locating a number of broadcasting installations erected on sites taken over by the Commission. The agreement entered into with the company provides that the transferred telecommunications services will be managed by the company on the Commission's behalf for an initial period, pending completion by the Commission of its arrangements for staffing and organization.

The services which the Commission took over on 1st October, 1946, comprise—

(*a*) The Beam Wireless Service which operates to London, Canada, China, Manila, Java, United States of America and Bombay.
(*b*) The Overseas Radio Telephone Services which operate at the moment to London, New Zealand, America, Rabaul, Port Moresby and Nauru—a much curtailed service compared with pre-war years, when it extended to India and, through London, to almost every country in Europe. In the case of these radio telephone services, the Commission will be responsible for technical operation. Calls will continue to be booked with, and connected by, the Postmaster-General's Department.
(*c*) The Coastal Radio Service which operates between the radio stations scattered round the Australian coastline and in adjacent islands and ships at sea, and also provides a service between Australia and adjacent islands.
(*d*) The Picturegram Service for the transmission of images between Australia and Great Britain, Canada, and the United States of America.
(*e*) Radio telegraph and telephone services to the Territories of the Commonwealth.
(*f*) Radio telegraph services between land stations and aircraft operating outside Australia.

The following are the locations at which stations were operating at the date of the transfer of the radio services to the Commission :—

Beam Stations—	
New South Wales	.. Pennant Hills (Transmitting). La Perouse (Receiving).
Victoria	.. Ballan (Transmitting). Rockbank (Receiving).
Coastal Radio Stations—	
New South Wales ..	.. Pennant Hills (Transmitting).
New South Wales ..	.. La Perouse (Receiving).
Victoria	.. Braybrook (Transmitting). Rockbank (Receiving).

Coastal Radio Stations—continued.

Queensland	Brisbane.
	Townsville.
	Rockhampton.
	Cooktown.
	Thursday Island.
	Willis Island.
South Australia	Adelaide.
Western Australia	Perth.
	Esperance.
	Geraldton.
	Broome.
	Wyndham.
Tasmania	Hobart.
	King Island.
	Flinders Island.
Northern Territory	Darwin.
New Guinea-Papua	Port Moresby.
	Lae.

Prior to the 1939–45 War stations were also operated in New Guinea-Papua at Madang, Manus, Samarai, Kavieng, Kieta and Rabaul. Action for the re-establishment of the services in Papua-New Guinea generally is being taken at the present time, though the new arrangements will probably differ in some respects from those of the pre-war period.

(*d*) *Cable Services.* The cable services in Australia are operated by Cable and Wireless Limited, the English company established in 1929 to take over the Empire cable network and the cable and wireless services in Great Britain. Negotiations for the taking over of the Australian portion of this great undertaking are in progress at the present time. The plans under discussion provide for the transfer of the services to the Commission at the earliest practicable date during 1947, leaving questions of compensation, etc., for determination at a later stage. Pending the transfer the services will continue to be operated by the company.

The transfer of the cable services to the Commission will place under the Commission's control the cable stations at Melbourne, Sydney, Adelaide, Perth, Southport (Queensland) and Norfolk Island.

In addition the Commission will probably assume responsibility on a slightly different basis for the stations at Suva and on Fanning Island. The cables themselves will pass into the hands of the national authority which is to be set up in England to replace Cable and Wireless Limited, and cable maintenance, etc., will be the responsibility of that body.

(*e*) *Traffic.* Over the beam wireless services some 40 million paid words per year are transmitted. Over the radio telephone services about 150,000 paid minutes of business are completed annually. The coastal radio service carries nearly 5 million paid words annually and, in addition, transmits nearly a million words, comprising weather messages, navigation warnings, etc., free of charge. These stations not only provide a communication service but they also provide definite aids to navigation in Australian coastal waters. Cable services carry about 40 million paid words annually.

(*f*) *Development and Research.* Other interesting aspects of the arrangements now being made by the various Partner Governments which have subscribed to the overall scheme are the provision for co-ordination and mutual consultation and the provision for development and research. On the first of these points steps are being taken to establish a Commonwealth Telecommunications Board, which will sit in London and on which all the Partner Governments will have equal and direct representation. The constitution and functions of the Board are defined in the Second Schedule to the Act under which the Commission itself is established. Research and development will be partly the responsibility of the various national authorities, including the Commission, and partly that of the Commonwealth Telecommunications Board, which will receive grants of money from the national authorities to enable it to further this important part of its work. The Commission in Australia is keenly alive to the necessity of keeping its equipment and methods fully abreast of current technical developments, and has in contemplation an extensive programme for overtaking the maintenance and development arrears which accumulated during the war. Provision is also being made for local research work on the specific and background problems of wireless and cable operation.

(g) *International Conferences.* A further point is that under its Act the Commission assumes responsibility, in association with the Postmaster-General's Department, for fulfilment of the obligations resting upon the Australian Government under the International Telecommunications Convention of 1932 and the many other international agreements relating to telecommunications traffic. An important series of international conferences on telecommunications matters is to be held during 1947, including a Plenipotentiary Conference for the revision of the Convention of 1932, and it is contemplated that the Commission will have representatives in attendance at all discussions. In addition to the matters to be dealt with by the Plenipotentiary Conference questions for discussion will include the general subject of rates, on which important steps in the direction of simplification were made at a conference held at Bermuda in 1945, and the technical developments which have taken place during and since the war. The allocation of the radio frequency spectrum amongst the very numerous national and functional claims for frequencies will also be considered. Over 60 nations will probably be represented at the conferences.

CHAPTER VI.

EDUCATION.

§ 1. General.

1. **Evolution of Educational Systems of the States.**—As the first settlement in Australia was in New South Wales, it was but natural that Australian education should have had its beginning in that State, and consequently the mother State has played a leading part in the evolution of educational method and system in Australia. The subject is dealt with in some detail in the first two issues of the Official Year Book, which also contain a more or less detailed account of the origin and earlier development of the educational systems of the other States.

2. **Later Development in State Educational Systems.**—Issues of the Official Year Book up to No. 22 contain an outline of later developments of the educational systems of the various States. The educational systems of the States may now be considered as more or less homogeneous entities, the various stages succeeding one another by logical gradation from kindergarten to university.

3. **School Age.**—The statutory school age for children in each State, set out briefly, is as follows :—New South Wales, 6 to 15 years ; Victoria, 6 to 14 years ; Queensland, 6 to 14 years ; South Australia, 6 to 14 years ; Western Australia, 6 to 14 years ; and Tasmania, 6 to 16 years. In New South Wales the statutory school age was from 7 to 14 years during 1917 to 1939 ; from 6 to 14 years in 1940 ; from 6 to 14 years 4 months in 1941 ; from 6 to 14 years 8 months in 1942 ; and from 6 to 15 years in 1943. In Tasmania the statutory school age was from 7 to 14 years, but legislation passed in 1943 reduced the lower age limit to 6 years. In 1942 the school leaving age was increased to 16 years but was not to operate till after the war. This provision was proclaimed to operate from 1st February, 1946. Legislation was passed in 1943 in Victoria and Western Australia increasing the school leaving age to 15 years, but neither of these provisions had been proclaimed at the end of September, 1947. In South Australia legislation was passed in 1946, enabling the Governor-in-Council to raise the leaving age by proclamation to an age not exceeding 15 years.

It is provided in some States that where a child is living outside stated distances from a State school, the age at which the child must commence school is increased. Provision is also made that a scholar having attained a certain standard of education may leave school before reaching the statutory leaving age.

At the 1936 Conference of Directors of Education a resolution was passed urging the necessity of raising the compulsory school leaving age to 15 years. This resolution was submitted to a conference in Sydney of Ministers of Education who agreed to recommend to their respective Governments legislation to implement the proposal by the year 1940, but owing to war conditions its operation was postponed.

4. **Australian Council for Educational Research.**—This Council was constituted on 10th February, 1930, as the result of an endowment from the Carnegie Corporation of New York. The endowment terminated in December, 1942, by which time the total value in Australian currency of the annual payments had amounted to £120,000. The Council now receives grants from the Commonwealth Government and the six State Governments which in 1947 amounted to £7,500 a year.

The Council consists of nine members of whom six are elected by State Institutes for Educational Research established in each of the Australian States. The functions of the Council are to conduct surveys and inquiries in the educational field, to make grants to approved investigators, to act as a centre of information on educational developments both within Australia and overseas, to provide services of a technical character such as those connected with the assessment of knowledge and aptitude, and to provide training for research workers. In general, through the publication of reports and in other ways, the Council aims at improving the standards of education and at stimulating thought about educational problems. So far about 90 reports have been published, two of the latest being respectively " A Brief Guide to Australian Universities " and a study of the problem of the supply of teachers. The Council also issues a series of information bulletins.

The Council is autonomous, but maintains close contact with State educational authorities, with the Commonwealth Office of Education, with the Universities and with other educational bodies. Its present investigations include a comparative survey of the courses of study and examinations for children between twelve and sixteen years, made at the request of the State Education Departments, and a study of the prediction of success of University students.

During the 1939–45 War the Council was called upon for advice and service by the following Commonwealth departments :—Labour and National Service, Man Power, Post-war Reconstruction, Home Security, War Organization of Industry and the Department of the Army. The Council acts as the chief centre in Australia for the preparation and distribution of standardized tests of general intelligence, special aptitude, and educational attainment. It has recently set up a Test Research and Construction Section to deal with this aspect of the work.

The head-quarters of the Council are at 147 Collins-street, Melbourne, C.1, Victoria

§ 2. Census Records.

1. **Persons Receiving Instruction.**—The Census and Statistics Act 1905–1938 specified " Education " as a subject for inquiry at a Census, but did not indicate the nature or range of the information to be furnished. The Census and Statistics Act 1946, however, provided for the omission of this subject. At earlier Censuses an inquiry regarding the degree of education was restricted to a question as to ability to read and write, but under the system of compulsory education the number of persons in Australia who reach maturity without being able to read and write is very small, and this question was

omitted at the 1933 Census. The only question asked concerned those receiving instruction at the time of the 1933 Census and related to the nature of the school they were attending. Details for the Censuses of 1911, 1921 and 1933 were as follows :—

PERSONS RECEIVING INSTRUCTION AT THE DATE OF THE CENSUS, AUSTRALIA, 1911 TO 1933.

Receiving Instruction at—	Number.			Percentage.		
	1911.	1921.	1933.	1911.	1921.	1933.
				%	%	%

17	4,799	4,521	611	494	110,208	120,633
18	2,480	2,087	565	1,224	120,434	126,790
19	1,257	893	403	1,463	121,637	125,653
20 and over ..	1,511	1,480	879	5,243	4,183,749	4,192,862
Total ..	904,383	224,994	33,126	8,525	5,458,811	6,629,839

(a) Includes those aged under 3 years.

3. **Percentage of Persons not Receiving Instruction.**—The compulsory school age in the various States ranged from 6 to 14 years. From the foregoing table it will be seen that the proportion of children aged last birthday from 6 to 13 years receiving instruction was 94.1 per cent. Conversely 5.9 per cent. of the children within the compulsory range were not indicated as receiving instruction at the date of the Census. The corresponding ratio in 1921 was 6.7 per cent.

As the minimum compulsory school age in New South Wales and Tasmania at the date of the Census was 7 years, and as exemptions from further attendance for special reasons on attaining age 13 obtain throughout the States, a more reliable estimate of the percentage of children not receiving instruction may be obtained by ignoring the extreme ages of the compulsory range. The elimination of these ages reduces the percentage from 5.9 to 4.3 per cent. Attendance at school was known to be affected by the severe economic conditions prevailing at the time of the Census, and this latter figure was consequently in excess of the corresponding percentage of 3.7 in 1921. The effect of accessibility to schools may be seen in the further reduction of the percentages of these ages not receiving instruction in the metropolitan areas to 3.5 in 1933 and to 2.9 in 1921.

4. **Religions of Scholars.**—The following table shows the class of school at which the young adherents to the principal religious denominations were being educated at the date of the Census :—

ADHERENTS RECEIVING INSTRUCTION AT DIFFERENT KINDS OF SCHOOLS, AUSTRALIA, 30th JUNE, 1933.

Denomination.	Government School.	Private School.	University.	Home.	Total Specified.
Baptist	17,473	998	166	304	18,941
Catholic, Roman(*a*) ..	84,763	146,197	1,339	6,263	238,562
Church of Christ	10,822	479	86	214	11,601
Church of England ..	397,717	37.442	3,263	14,612	453,034
Congregational	9,274	1,112	202	224	10,812
Lutheran	8,257	910	45	217	9,429
Methodist	116,365	5,926	1,023	2,723	126,037
Presbyterian	108,870	9.836	1,302	3,814	123,822
No Reply	119,130	18,415	646	3,805	141,996
Other	31,712	3,679	453	950	36,794
Total	904,383	224,994	8,525	33,126	1,171,028

(*a*) Including Catholic, Undefined.

The most prominent feature of the results given above is the relatively small proportion of Roman Catholics attending State schools. Of the Roman Catholics reported as receiving instruction, 34.66 per cent. were attending State schools compared with 86.84 per cent. for the rest of the community, the proportion for the whole being 77.23 per cent.

§ 3. State Schools.

1. **General.**—The State schools, or, as they are sometimes termed, the "public" schools, of Australia comprise all schools directly under State control, in contradistinction to the so-called "private" schools, the bulk of which, though privately managed, nevertheless cater for all classes of the community. Separate information regarding technical education is given in § 9, but the junior technical schools are included hereunder. The returns include figures relating to correspondence schools as well as subsidized schools, but evening schools and continuation classes, where such are in existence, are not included, but are dealt with separately in par. 3 (v) following.

2. **Returns for Year 1945.**—(i) *General.* The following table shows for 1945 the number of State Schools, together with the teachers employed, teachers in training and the number of individual children in attendance :—

STATE SCHOOLS, 1945.

State or Territory.	Schools at end of year.	Teachers Employed (excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
	No.	No.	No.	No.
New South Wales(*a*)	2,690	11,214	1,403	364,927
Victoria	2,404	8,408	656	209,132
Queensland	1,523	4,962	346	137,146
South Australia	818	2,872	254	72,360
Western Australia	637	2,244	94	(*b*)57,670
Tasmania	370	1,314	107	33,779
Northern Territory(*c*)	5	12	..	407
Australia—1945	8,447	31,026	2,860	875,421
1944	8,651	31,200	2,458	878,428

(*a*) Includes Australian Capital Territory. (*b*) Average weekly enrolment. (*c*) Year ended 30th June, 1946.

(ii) *Average Enrolment and Attendance.* The methods of calculating enrolment are not identical throughout the States. The unit in South Australia is the daily enrolment while New South Wales, Victoria, Western Australia and Tasmania employ the weekly enrolment. In Queensland no average enrolment is compiled, and the mean of the four quarterly gross enrolments is the only figure available.

As with enrolments there is not complete uniformity in arriving at the average attendance, but most of the States aggregate the attendances for the year and divide by the number of school sessions. New South Wales and Western Australia, however, employ averages of term averages. The matter of securing uniformity in these respects has been under consideration for some time, and the Australian Council for Educational Research, already referred to in § 1, par. 4, is devoting attention to the question of securing greater uniformity in methods of collection and presentation of educational data generally. This matter was discussed at a meeting of Directors of Education at a conference held in Sydney in July, 1947. The average enrolment and attendance in each State during 1945 are shown below :—

STATE SCHOOLS : AVERAGE ENROLMENT AND ATTENDANCE, 1945.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance on Enrolment.
	No.	No.	%
New South Wales	335,915	293,251	87.29
Victoria	198,239	177,027	89.30
Queensland	131,607	110,527	83.98
South Australia	70,110	64,301	(*a*) 91.47
Western Australia	57,670	52,452	90.95
Tasmania	31,800	28,497	89.61
Northern Territory(*b*)	407	385	94.59
Australia—1945	825,748	726,440	87.94
1944	823,600	722,942	87.74

(*a*) Excludes correspondence students. (*b*) Year ended 30th June, 1946.

The percentage of attendance on enrolment is lowest in Queensland, but this figure is not comparable with those of the other States, as no average enrolment is available for Queensland.

Extraordinary epidemics apart, it would appear from the steadiness of the returns in recent years that the percentage of attendance on enrolment is approaching its maximum under present conditions in Australia. Recurring epidemics of contagious diseases, minor illnesses, bad weather and long distances are all serious factors limiting the full attendance of pupils at school.

The average attendance at the State Schools in Australia is shown below for the year 1891 and at varying intervals to 1945 :—

STATE SCHOOLS : AVERAGE ATTENDANCE, AUSTRALIA.

Year.	Total Population. (a)	Average Attendance.	Year.	Total Population. (a)	Average Attendance.
1891	3,421	350,773	1939	7,005	744,095
1901	3,825	450,246	1941	7,144	732,116
1911	4,574	463,799	1942	7,201	686,330
1921	5,511	666,498	1943	7,270	706,650
1931	6,553	817,262	1944	7,348	722,942
1933	6,657	805,334	1945	7,431	726,440

(a) At 31st December, in thousands.

It is possible, for Census years, to relate with reasonable accuracy the average attendance of scholars at State Schools to the number of children who are approximately of school age. For this purpose the ages 5 to 15 years, both included, have been taken and the average attendance per thousand children was :—1891, 455 ; 1901, 464 ; 1911, 477 ; 1921, 544 ; and 1933, 585. Although other factors might have affected the results in a minor degree it would appear that considerable improvement has taken place in school attendance.

(iii) *Schools in the Northern Territory.* During 1945–46 five public schools were in operation, the number of pupils enrolled being 407, with an average daily attendance of 385. By arrangement between the Commonwealth and the South Australian Governments, the South Australian Education Department undertook the work of education in the Northern Territory from 1st January, 1945. The Commonwealth Government provides the schools and furniture, while the South Australian Education Department provides the teachers and determines the curricula for the various types of schools. Prior to this arrangement teachers from the South Australian Education Department taught at Alice Springs and Tennant Creek while teachers from the Queensland Education Department taught at Darwin and the more northern parts of the Territory.

(iv) *Schools in the Australian Capital Territory.* During 1945 eleven State Schools were in operation in the Australian Capital Territory ; individual pupils enrolled numbered 1,785 ; average attendance was 1,637. By arrangement with the Commonwealth Government these schools are conducted by the New South Wales Education Department in the same way as the ordinary State Schools, the Department being recouped for expenditure. The cost of the teaching staff in 1945–46 was £41,000, while the cost of general maintenance items for the year amounted to £15,854. Ample provision has been made for both primary and secondary education, and this will be increased to meet requirements. The figures quoted exclude enrolment, etc., at the Trade School and the Evening Continuation School. A reference to the Canberra University College will be found in § 6, par. 10. For further particulars of education facilities in the Australian Capital Territory see Chapter X.—The Territories of Australia, Australian Capital Territory, par. 10.

3. Distribution of Educational Facilities.—(i) *In Sparsely-settled Districts.*

(*a*) *General.* The methods adopted in the various States to carry the benefits of education into the remotest and most sparsely-settled areas are set out in some detail in previous issues of the Official Year Book (see No. 22, pp. 430–1).

(*b*) *Correspondence Teaching.* Teaching by correspondence has been adopted to meet the needs of children out of reach of the ordinary means of education, including those prevented from attending school through physical ailment. Approximately 17,400 children received instruction in this way during 1945, the respective numbers in each State being: New South Wales, 6,272; Victoria, 1,179; Queensland, 5,515; South Australia, 1,993; Western Australia, 2,030: and Tasmania, 399.

(ii) *Centralization of Schools.* The question of centralization of schools adopted so successfully in America and Canada has received considerable attention in Australia. It is recognized that a single adequately staffed and well equipped central institution can give more efficient teaching than a number of small scattered schools in the hands of less highly trained teachers, and the small schools in some districts were therefore closed and the children conveyed to the central institution. The principle was first adopted in New South Wales in 1904, and in 1945 a sum of £27,374 was expended in boarding allowances and conveyance to central schools. Cost of conveyance to State Schools in Victoria during 1945–46 amounted to £195,277. In Queensland during 1945–46 the cost of transport by rail, road and boat, amounted to £29,353. In South Australia the sum of £58,141 was disbursed in travelling expenses of school children in 1945, while £62,918 was spent in Western Australia during 1945–46, £46,015 in Tasmania in 1945 and £5,288 in the Australian Capital Territory in 1945–46.

(iii) *Area Schools.* A new feature in education are the " Area Schools " established since 1936 in rural districts in Tasmania. These schools cater for certain groups of children brought from surrounding districts by buses and give instruction with a distinct rural inclination. In 1945 there were 15 area schools in operation having an average weekly enrolment of 3,488 scholars with a daily average attendance of 3,086. The total expenditure on these schools in 1945 was £68,806.

(iv) *Education of Backward and Defective Children.* This subject was referred to at some length in preceding issues of the Official Year Book (see No. 22, pp. 431–2).

(v) *Evening Schools.* Evening Continuation Schools have been in existence for many years in some of the States, but their progress has been uncertain. The aim of these schools is to provide a means of furthering the education of those who have left school at the termination of the primary course. Practical and cultural subjects are combined in the curriculum to be of assistance to those attending in their occupations and their civic life. In New South Wales the 26 Evening Youth Colleges had an average weekly enrolment in 1945 of 1,665 and an average attendance of 991. The schools are divided into three groups, junior technical, domestic science, and commercial. Attendances at the schools for boys numbered 831, and at those for girls 160. The cost of maintaining these schools in 1945 was £6,047.

(vi) *Higher State Schools.* In all the States higher schools have been established which provide advanced courses of instruction for pupils who have completed the primary grades. Reference to the development of these schools will be found in preceding Official Year Books (see No. 22, pp. 433–4).

(vii) *Agricultural Training in State Schools.* Extended reference to the methods adopted in the teaching of agriculture in State Schools was incorporated in preceding Official Year Books (see No. 22, pp. 434–7).

(viii) *Medical and Dental Inspection of School Children.* This subject is dealt with in detail in Chapter IX. " Public Hygiene ".

(ix) *Broadcasts to Schools.*—It is estimated that about 45 per cent. of schools in Australia are listening regularly to the Australian Broadcasting Commission's school broadcasts. The broadcasts are made throughout Australia on week-days at times decided upon after consultation with the State Education Departments, bringing to even the most distant schools the benefits of talks by specialists in certain subjects, and talks on subjects which follow closely the syllabus prepared for each of the several public examinations. Some States have directed their efforts towards the provision of minimum standards for school listening sets. There are special broadcast sessions for the benefit of correspondence pupils throughout Australia.

Audio-visual education, a method combining the radio and the film as teaching aids, has been developed, and the lessons are broadcast from studios in Victoria and Western Australia concurrently with the use of the film projectors in the schools.

The "Kindergarten of the Air" is broadcast by all regional and two short-wave stations, as well as from Darwin and Port Moresby, for the benefit of children unable to attend kindergarten schools.

The weekly session for post-school youth "Over to Youth" has developed steadily. Monthly posters are sent to 500 Youth Clubs throughout Australia. Audience participation broadcasts in Sydney and Melbourne have attracted large numbers of young people.

4. **Training Colleges.**—The development of the training systems of the various States is referred to at some length in earlier issues of the Official Year Book (see No. 22, pp. 437–9).

5. **Expenditure.**—(i) *Maintenance — All Schools.* The net expenditure on maintenance in all grades of schools, excepting senior technical schools, and in Victoria and Tasmania junior technical schools, and the cost per head of average attendance for 1939 and the five years ended 1945 are shown in the following table. The figures do not include expenditure on buildings, which is given separately in a subsequent table. In all expenditure tables the figures for Victoria, Queensland and Western Australia relate to the financial year ended six months later than the calendar year.

STATE SCHOOLS : NET EXPENDITURE ON MAINTENANCE.

Year.	N.S.W. (*a*)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.
				TOTAL (INCLUDING SECONDARY SCHOOLS).				
	£	£	£	£	£	£	£	£
1939	4,508,376	2,667,094	1,481,399	854,037	730.500	320,616	6,802	10,658,824
1941	4,897,223	2,660,924	1,487,293	881,117	773,680	343,034	8,827	11,052,098
1942	4,767,475	2,732,122	1,429,800	884,382	753,730	403,437	4,074	10,975,020

(*a*) Gross figures, receipts not being available.

(ii) *Maintenance—Secondary Schools.* The figures given in the preceding table refer to expenditure on maintenance of all State primary and secondary schools, excluding senior technical colleges. It has been thought desirable by the State Education Departments to give separate information in regard to the cost of secondary education. The difficulty of making any satisfactory allocation of the kind, however, will be understood when it is realized that both elementary and higher education are in some instances given in the same school and by the same teacher. Unfortunately, too, the term "secondary" has not the same meaning in all States. It might be mentioned here that similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted in regard to cost hereunder have been mainly extracted from the Reports of the State Education Departments, and are subject to those qualifications.

STATE SECONDARY SCHOOLS : EXPENDITURE ON MAINTENANCE.

State.	1944.		1945.	
	Cost.	Cost per Head of Population.	Cost.	Cost Per Head of Population.
	£	s. d.	£	s. d.
New South Wales	1,165,374	8 1	1,385,701	9 6
Victoria	707,729	7 1	801,588	7 11
Queensland	210,474	4 0	236,290	4 5
South Australia	232,947	7 6	260,237	8 4
Western Australia	(a)171,580	7 2	(b)187,037	7 9
Tasmania	54,264	4 5	66,514	5 4

(a) Year 1943–44. (b) Year 1944–45.

The figures in all cases exclude the cost of buildings. In Victoria the total includes the expenditure on "intermediate" education amounting (excluding administration costs) to £189,983 in 1944–45 and to £206,312 in 1945–46. For Queensland, the figure quoted excludes the cost of the Agricultural High School and College, which amounted in 1944 to £29,114 and in 1945 to £38,980. For Western Australia the total for 1943–44 includes £111,872 and for 1944–45, £115,284 on account of "post-primary" education.

(iii) *Buildings.* Expenditure on State School buildings, excluding Technical Colleges, for the years 1939 and 1941 to 1945 was as follows :—

STATE SCHOOLS : EXPENDITURE ON BUILDINGS.

(Including Loan Fund Expenditure.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.
	£	£	£	£	£	£	£	£
1939	411,720	206,481	174,725	85,539	56,994	60,011	539	996,009
1941	288,855	164,568	67,406	58,541	30,987	50,907	..	661,264
1942	471,167	149,750	25,655	40,813	19,069	26,192	30	732,676
1943	362,596	114,261	47,614	67,748	40,354	39,951	944	673,468
1944	409,483	176,892	101,780	103,863	78,492	61,828	2,444	934,782
1945	425,397	256,048	114,069	165.642	99,489	70,288	2,303	1,133,236

The totals for the various States in 1945 include the following amounts expended from loan and other funds; figures for 1944 are shown in brackets—New South Wales, £60,022 (£87,415); Victoria, £164,972 (£65,155); Queensland, £63,091 (£66,007); South Australia, £98,687 (£58,669); Western Australia, £75,431 (£43,440); and Tasmania, £46,540 (£40,653).

(iv) *Total.* The net total cost of education in State Schools including buildings, during the years 1939 and 1941 to 1945 was as follows :—

STATE SCHOOLS : NET TOTAL COST.

Year.	N.S.W. (*a*)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total. (*b*)
	£	£	£	£	£	£	£	£
1939	5,010,096	2,873,575	1,656,124	939,576	787,494	380,627	7,341	11,654,833
1941	5,186,078	2,825,492	1,554,699	930,658	804,667	393,941	8,827	11,713,362
1942	5,238,642	2,881,872	1,455,455	925,195	772,799	429,629	4,104	11,707,696
1943	5,332,892	3,059,360	1,558,182	990,055	844,758	461,635	5,587	12,252,469
1944	5,540,187	3,339,087	1,812,540	1,116,511	897,347	483,251	6,595	13,195,518
1945	5,811,809	3,521,249	2,170,478	1,266,111	1,016,812	562,394	7,488	14,356,341

(*a*) Gross figures, receipts not being available. (*b*) See footnote (*a*).

The figures in this and the preceding tables refer to all grades of State Schools (with the exception of senior technical schools and in Victoria and Tasmania junior technical schools). Including buildings, the net cost per scholar in average attendance for the whole of the State Schools in Australia amounted in 1945 to £19 15s. 3d., and £18 5s. 1d. in 1944, as compared with £4 9s. 3d. in 1901.

6. **School Banking.**—With the object of inculcating principles of thrift amongst the children, agencies of the Savings Banks have been established at most of the schools throughout Australia. Particulars of operative accounts for each State and Territory at 30th June, 1947, were as follows :—

SCHOOL SAVINGS BANKS AT 30th JUNE, 1947.

State or Territory.	Agencies.	Depositors.	Amount on Deposit.	Average per Depositor.		
	No.	No.	£	£	*s.*	*d.*

§ 4. Private Schools.*

1. **Returns for 1945.**—The following table shows the number of private schools together with the teachers engaged therein, and the enrolment and average attendance in 1945 :—

PRIVATE SCHOOLS, 1945.

State or Territory.	Schools.	Teachers.	Enrolment.	Average Attendance.
New South Wales	733	5,321	111,841	97,951
Victoria	506	2,986	83,278	(*a*) 81,667
Queensland	222	1,565	35,949	32,651
South Australia	140	858	15,854	13,871
Western Australia	155	739	18,536	16,939
Tasmania	59	321	7,189	5,799
Northern Territory(*b*)	2	9	167	146
Total—1945	1,817	11,799	272,814	249,024
1944	1,807	11,612	274,793	245,006

(*a*) Net attendance. (*b*) Year ended 30th June, 1946.

The Roman Catholic schools comprise the largest group of private schools in Australia. On the basis of the figures available, approximately 200,000 children, or 77 per cent. of the total in private schools, are educated in Roman Catholic schools.

The figures for Queensland include the returns from Grammar schools, of which there are eight—five for boys and three for girls, with an enrolment of 1,456 boys and 793 girls. These schools are governed by boards of trustees, partly nominated by the Government, and partly by the subscribers to the funds. The trustees make regulations regarding the fees of scholars, the salaries of teachers, and generally for the management of the schools. The Government endowment received in 1945 amounted to £13,525. In addition, a sum of £19,515 was received by way of fees for the tuition of State scholarship holders while £51,461 was paid to denominational schools. The Grammar schools are inspected annually by officers of the Department of Public Instruction.

2. **Growth of Private Schools.**—The enrolment and average attendance at private schools in 1891 and at varying intervals to 1945 were as follows :—

PRIVATE SCHOOLS : ENROLMENT AND ATTENDANCE.

Year.	Enrolment.	Average Attendance.	Year.	Enrolment.	Average Attendance.
1891	124,485	99,588	1939	247,482	219,171
1901	148,659	120,742	1942	250,022	217,249
1911	160,794	132,588	1943	264,433	233,538
1921	198,688	164,073	1944	274,793	245,006
1931	221,387	189,665	1945	272,814	249,024

3. **Registration of Private Schools.**—Conditions in regard to the registration of private schools were referred to in previous Official Year Books (see No. 18, p. 451).

§ 5. Free Kindergartens.

The following information regarding Free Kindergartens has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia where the details were furnished by the Education Department. It refers to kindergarten unions or associations, and excludes the kindergarten branches in the Government schools of the various States.

---

* Private schools include all schools not wholly under State control. The term "private," though popularly applied, is, of course, a misnomer.

FREE KINDERGARTENS, 1946.

State.	No. of Schools.	Average Attendance.	Permanent Instructors.	Student Teachers.	Voluntary Assistants.
		No.	No.	No.	No.
New South Wales ..	29	1,184	105	156	95

South Australia(*a*) ..	35	978	77	41	27
Western Australia ..	11	359	21	6	
Tasmania	9	389	24	2	5
Total—1946 ..	131	4,893	373	274	200
1945 ..	124	4,563	305	268	159

(*a*) Includes affiliated suburban and country centres.

Only twelve of these 131 kindergartens in 1946 were located outside metropolitan areas; these were as follows :—New South Wales—two at Newcastle, one at Parramatta; Victoria—two at Geelong, one each at Ballarat, Castlemaine, Euroa and Mildura; and Tasmania—two at Launceston and one at Devonport. In each capital city, excepting Hobart, there is a training college and the number of students in training during 1946 was 150 in Sydney, 106 in Melbourne, 45 in Brisbane, 41 in Adelaide, and 40 in Perth.

§ 6. Universities.

1. **Origin and Development.**—A brief account of the origin and development of the Universities in the various States is given in preceding issues of the Official Year Book (see No. 22, pp. 442–3).

2. **Teaching and Research Staff.**—The following table shows the number of professors, readers, associate and assistant professors, lecturers in charge, lecturers, demonstrators, tutors, honorary lecturers and demonstrators, on the teaching and research staffs of the Universities during the years 1944 to 1946 :—

UNIVERSITIES : TEACHING AND RESEARCH STAFF, 1946.

University.	Professors.	Readers, Associate Professors, Assistant Professors, Lecturers in Charge.	Lecturers, Assistant Lecturers.	Demonstrators and Tutors.	Honorary Lecturers and Demonstrators.	Total.

1944 ..	9,729	170	1,041	91	2,061	12,966

(*a*) Adjustment made for students enrolled in more than one course. (*b*) Includes 19 students enrolled but attending Canberra University College.

Of the total students in 1946, 19,346 were males and 6,239 females. Included in those enrolled for degrees, were 67 enrolled for higher degree courses in Melbourne, 63 in Adelaide, and 21 in Western Australia.

(ii) *Commonwealth Reconstruction Training Scheme Students.* The number of Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities during 1945 and 1946 is shown in the following table :—

UNIVERSITIES : COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1946.

University.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total. (*a*)
		Post-Graduate.	Sub-Graduate.

New England University College	33	4	..	..	..	37
Canberra University College	74	..	61	..	10	145
Total 1946 ..	6,789	100	949	118	568	8,519
1945 ..	982	6	95	..	38	1,121

(*a*) Adjustments made for students enrolled in more than one course. (*b*) Includes 10 students enrolled but attending Canberra University College.

Of the total Commonwealth Reconstruction Training Scheme students in 1946, 8,196 were males and 323 females. Included in those enrolled for degrees were 6 enrolled for higher degrees in Melbourne, 4 in Adelaide and 1 in Western Australia.

(iii) *External Service Personnel.* In addition to the students shown in the previous tables there were External Service Forces Personnel enrolled at the various universities. the total numbers for years 1944 to 1946 being as follows :—1944, males 2,068, females 120 ; 1945, males 2,661, females 79 ; and 1946, males 1,652, females 27.

4. **University Receipts.**—The receipts of the Universities are derived principally from Government grants, students' fees, and income from private foundations, etc. The receipts for the general University functions from all sources other than new bequests during 1946 are shown in the table below. In South Australia Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute. The receipts and expenditure for extra-university activities are shown in para. 7 following.

UNIVERSITIES : RECEIPTS, GENERAL ACTIVITIES, 1946.

University.	Government Grants.	Students' Fees.	Interest, Rent, Dividends and Donations.	Other.	Total
	£	£	£	£	£
Sydney	201,645	236,207	54,574	9,672	502,098
Melbourne	211,444	149,167	36,081	27,378	424,070
Queensland (Brisbane) ..	93,523	55,643	18,806	10,613	178,585
Adelaide	105,505	60,463	24,935	10,555	201,458

Total 1946 ..	761,240	520,816	135,649	87,163	1,504,868
1945 ..	507,489	303,207	119,924	60,811	991,431
1944 ..	508,689	245,609	122,993	53,034	930,325

The figures in the foregoing table do not include the value of new foundations received by the Universities during 1946, which were as follows :—Sydney, £19,810 ; Melbourne, £88,911 ; Queensland, £2,076 ; and Adelaide, £6,926.

5. **Principal University Benefactions.**—In preceding issues of the Official Year Book information is given in some detail in regard to the extent to which the Universities have benefited from private munificence. Space will permit of reference herein to the more important benefactions only.

The endowments to the Sydney University include the Challis Fund, £404,373 ; the G. H. Bosch Fund, £268,928 ; the P. N. Russell Fund, £101,456 ; the Oswald Watt Fund, £115,744 ; and the Fisher Estate, £43,407. In addition. the University receives a large annual revenue from the trustees of the McCaughey bequest. Excluding the principal of the latter, the credit balances of the private foundations amounted to £1,641,689 at 31st December, 1946.

Mr. David Edward Lewis in 1941 bequeathed approximately £700,000 to trustees to provide scholarships at the Melbourne University for boys from State elementary and secondary schools. This bequest is the largest made in Australia for educational purposes. Mr. Sidney Myer's gifts for various special and general purposes amounted to £60,000, while Sir Samuel Gillott, Mr. Edward Wilson (Argus Trust), and Sir Samuel Wilson contributed £41,000, £34,000, and £30,000 respectively. The estate of the late Miss Helen Mackie provided £40,000 for the endowment of pre-clinical chairs, while Mr. R. B. Ritchie's gifts for the endowment of a Chair of Economics amounted to £30,000, and two sums of £30,000 and £25,000 were received from the Supreme Court Library Fund for the endowment of a Chair of Public Law and for the development of law teaching respectively. Dr. James Stewart founded scholarships in Anatomy, Medicine and Surgery to the capital value of £26,000. The Hon. Francis Ormond contributed £20,000 to the University as an endowment for the Chair of Music and for scholarships in music, as well as benefactions to Ormond College amounting to considerably over £100,000, and the late Dr. F. Haley left £49,000 for medical research. Bequests of approximately £20,000 each for general purposes were made by Mr. John Hastie and Mr. C. D. Lloyd, while similar sums were bequeathed by the late Sir John Higgins for research scholarships in industrial chemistry and bio-chemistry as related to the pastoral and agricultural industries and by Mr. R. J. Fletcher for medical research. The late Mr. E. Truby Williams gave £52,000 for the Conservatorium of Music, the library and general purposes. Mr. Russell Grimwade has given £40,000 of a premised gift of £50,000 for a new school of bio-chemistry, and the trustees of the W. L. Baillieu Trust have given £36,000 as a first instalment of a gift of about £100,000 with which a new library will be built. The Melbourne *Herald* gave £30,000 to establish the first Chair of Fine Arts in Australia.

From the estate of the late Mr. W. P. Greene £23,000 has been received for cancer research and from the Baillieu family £20,000 for the erection of a Metallurgy Research School. A bequest of £22,500 from the estate of late Dr. Georgina Sweet will provide three fellowships.

Queensland University, to 30th April, 1947, had received £246,046 from the McCaughey estate and £40,051 from the Walter and Eliza Hall Trust, while the Hon. T. C. Beirne gave £20,000 in 1935 for the endowment of a Chair of Law in Queensland. The permanent site for the University and other land valued at £62,000 were presented by Dr. and Miss Mayne. In 1937 the trustees of Mr. W. Robertson bequeathed £19,400 for the Chair of Agriculture.

The chief benefactors to the Adelaide University have been Sir Thomas Elder, £100,000; Sir George Murray, £96,000; Sir Langdon Bonython, £72,000; Miss M. T. Murray, £45,000; Mr. T. E. Barr Smith, £45,000; Dr. F. Lucas Benham, £44,000; Mrs. R. F. Mortlock and J. T. Mortlock, £32,000; Mrs. Jane Marks, £30,000; Edward Neale, £27,000; family of John Darling, £25,000; Sir William Mitchell, £25,000; Mrs. A. M. Simpson and Miss A. F. Keith Sheridan, £21,000; and R. Barr Smith and family, £20,000. Several valuable properties, in addition to shares which realized £58,450, were also bequeathed to the University by Mr. Peter Waite, the total value of the bequest being estimated at £100,000.

Under the will of Sir Winthrop Hackett the University of Western Australia received £425,000 for the erection and maintenance of University buildings and for studentships, scholarships, bursaries and other financial help for deserving students. In addition, an endowment of £18,000 was made in 1913 for the Hackett Chair of Agriculture. The late Robert Gledden bequeathed an estate valued at £60,000, particularly to provide travelling scholarships, and numbers of bequests, aggregating about £55,000, have been made to the University mainly for the establishment of a medical school or research in connexion therewith.

6. **University Expenditure.**—The principal item of disbursements under the general University activities consists of the salaries of teaching and research staff representing 69.4 per cent. of the total compared with 70.8 per cent. in 1945 and 69.1 per cent. in 1944. The following table gives the expenditure, excluding capital expenditure on buildings, during the years 1944 to 1946 :—

UNIVERSITIES : EXPENDITURE, GENERAL ACTIVITIES, 1946.

University.	Administration.	Maintenance of— Teachers' Department.	Premises.	Libraries.	Other.	Total.
	£	£	£	£	£	£
Sydney	41,397	388,645	35,201	12,856	24,246	502,345

7. **Extra-University Activities.**—(i) *General.* The tables shown in paragraphs 4 and 6 relate to the general University activities while those following show the financial position of all extra-university activities. The heterogeneous character of the items in the statements for these activities varies to such extent between the Universities that comparisons of the totals are misleading, but they include all items excluded from the general statement and give useful information within limits.

(ii) *Receipts, Extra-University Activities.* The following table shows the main receipts for the years 1944 to 1946 :—

UNIVERSITIES : RECEIPTS, EXTRA ACTIVITIES, 1946.

University.	Government Grants.	Interest, Rent, and Dividends.	Candidates' Fees, Public Examinations.	Special Research Grants.	Other.	Total.
	£	£	£	£	£	£
Sydney	12,223	43,824	17,378	36,497	3,940	113,862
Melbourne	13,537	67,192	44,831	24,485	(*a*)75,434	225,479

1944 ..	27,918	50,237	23,467	89,738	93,686	285,046

(a) Includes University Press, £23,185; Superannuation Fund, £14,964. (b) Includes Scholarships £24,121, and the University Press, £7,021. (c) Includes Scholarships, £2,520.

8. **University Extension.**—Some account of the initiation and progress of university extension is given in preceding Official Year Books (see No. 22, p. 446).

9. **The Australian National University.**—By the Australian National University Act No. 22, 1946 (assented to 1st August, 1946, proclaimed to commence 7th February, 1947) provision is made for the establishment and incorporation of a University in the Australian Capital Territory. The University is to consist of a Council of not more than 30 members (of whom two are to be elected by each House of the Parliament, not more than eight to be appointed by the Governor-General, not more than nine to be elected by Convocation, three to be elected by the teaching staff and three by the students, together with the Vice-Chancellor and co-opted members), and Convocation, which is to consist of the graduates of the University and other persons admitted as members. Until the Council is constituted in accordance with the Act, there is an Interim Council appointed by the Governor-General, which is authorized to take such steps as are considered necessary for the establishment of the University and the commencement of its functions. Provision is made for the appointment of a Vice-Chancellor, in the first instance by the Governor-General and therafter by the Council. Professor D. B. Copland has been appointed as the first Vice-Chancellor.

The following members of the Interim Council were appointed :—

> Professor R. C. Mills, Director of the Commonwealth Office of Education and Chairman of the Universities Commission (Chairman); Mr. J. D. G. Medley, Vice-Chancellor, University of Melbourne (Vice-Chairman); Professor Eric Ashby, Professor of Botany, University of Sydney (now of University of Manchester); Professor K. H. Bailey, Commonwealth Solicitor-General; Dr. H. C. Coombs, Director-General of Post-War Reconstruction; Mr. C. S. Daley, Assistant-Secretary, Department of the Interior; Sir Frederic Eggleston, formerly Australian Minister to China and to the United States of America; Sir Robert Garran, formerly Commonwealth Solicitor-General, and Chairman of the Council of the Canberra University College; Mr. H. J. Goodes, Assistant Secretary, Commonwealth Treasury; Sir David Rivett, Chairman of the Council for Scientific and Industrial Research; and Professor R. D. Wright, Professor of Physiology, University of Melbourne.

The Registrar is Mr. R. G. Osborne.

The University is required by the Act to provide facilities for post-graduate research, including a School of Medical Research (to be known as the John Curtin School of Medical Research), and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. It may also provide facilities for university education generally, for the incorporation in the University of the Canberra University College, and for specialist training for officers of the Public Service.

The Act provides that after the expiration of the period of five years from 1st July, 1946 (during which such funds as may be required are to be provided by the Treasurer), the University is to receive an annual grant of £325,000.

The Interim Council has since its appointment been engaged in the preparatory work in connexion with the establishment of the University and has in addition granted a number of Research Fellowships, and invited to Australia distinguished overseas scientists (including Professor M. Oliphant of Birmingham, and Professor R. W. Gerard of Chicago), who have conducted seminars in Canberra for research workers and visited the other Universities. The Council has also established an Academic Advisory Committee in England, consisting of Sir Howard Florey, F.R.S., Professor Raymond Firth, Professor W. K. Hancock and Professor M. Oliphant, F.R.S., which advises the Council in connexion with the establishment of the research schools.

While the building programme is being planned and executed, the Council will appoint research scholars for training in appropriate universities and research institutes both in Australia and overseas.

10. **Canberra University College.**—The Canberra University College Ordinance of the Australian Capital Territory made possible the establishment of the college, which was founded in 1930. The ordinance provides for a council consisting of ten members. The College is associated with the Melbourne University, through a temporary regulation, by virtue of which the University recognizes the teaching of the College, examines students and confers degrees or awards and diplomas. Lecturers are appointed by the College and approved by the University.

In addition to the University of Melbourne courses the College conducts a full-time course in Diplomatic Studies extending over two years. The course is specially directed to the needs of diplomatic cadets appointed to the Department of External Affairs, but a few qualified students, other than diplomatic cadets, are admitted. In 1947 the students numbered 301, while the teaching staff consisted of nine full-time and sixteen part-time lecturers.

11. **New England University College.**—New England University College, comprising a Faculty of Arts and Economics and a Faculty of Science, is governed by the University of Sydney. It is situated at Armidale, on the Northern Tablelands of New South Wales. The College is almost entirely residential. The original university building stands in 183 acres of land and was presented to the University College by Mr. T. R. Forster in 1937. The Government of New South Wales bore the expense of converting it to its present use. Two large additional buildings providing lecture theatres and laboratories have already been erected and others are planned. Lectures began at the College on 14th March, 1938. Students wishing to proceed to degrees in the Sydney Faculties of Medicine, Veterinary Science and Agriculture and Economics may take the earlier courses at the College. In 1946 there were 24 lecturers, including four part-time, eight demonstrators and tutors of whom six were part-time, and fifteen honorary lecturers. One hundred and seventy-seven students were taking courses leading to degrees, 25 students were taking diploma courses; of these 37 were studying under the Commonwealth Reconstruction Training Scheme. Extension Board courses were also conducted during the year.

12. **Workers' Educational Associations.**—In 1913, Workers' Educational Associations were formed in all the States of Australia, and later in New Zealand. The movement has for its object the bringing of the University into closer relationship with the masses of the people, and thereby providing for the higher education of the workers in civic and cultural subjects. There are now direct grants from all State Governments except Western Australia and Queensland. The particulars of grants for classes and discussion groups organized by the Association and serviced by their respective State Universities in 1946 were as follows :—New South Wales, £15,373, 83 tutorial classes, 107 discussion

groups ; Victoria, £5,906, 51 tutorial classes, 1 " carry on " group and 56 " box scheme " groups and extension work ; South Australia, £2,250, 6 tutorial classes, 22 lecture classes, 4 study circles, and extension lectures at country centres.

Direct grants were made to the Associations for both organizing work and a teaching service as follows :—New South Wales, £4,747, 15 classes, 22 week-end and holiday schools, 14 short courses of public lectures, 98 lectures given to various organizations including W.E.A. clubs ; in Tasmania, £3,700 with 23 classes ; in South Australia the Association receives a grant of £240 for general organizing purposes. In Queensland the Association conducted 4 classes, and has 430 subscribers to the library. It now receives a subsidy from the State Library Board equivalent to one-half of the amount spent on the purchase of books for the library. The Carnegie Corporation has shown its interest in the work, by allotting at various times substantial grants to the Association and to the Universities. The Association's primary interest has been in subjects related to social change such as Industrial History, Economics, Political Science and Sociology. In recent years, however, there has been a substantial increase in the number of classes studying Psychology, History, Literature, Music and Biology. The Universities in New South Wales, Victoria and South Australia co-operate with the W.E.A. in the formation of a joint committee for tutorial classes, which supervises the work with the assistance of a University officer with the title of Director of Tutorial Classes. This arrangement may be changed in Victoria in 1947 with the establishment by the State Government of a statutory body to be known as the Adult Education Council, which will take over responsibility for all State supported adult education work.

§ 7. The Commonwealth Office of Education.

1. **Establishment.**—Although, as has been explained elsewhere, education is primarily a concern of the State Governments, the activities of the Commonwealth Government in other directions inevitably brought it into the field of education at a number of points. It thus became necessary to create a permanent Commonwealth authority capable of providing the Government and others with reliable expert advice on the many educational problems that arise. To fulfil this need the Commonwealth Office of Education was established in 1945.

For administrative purposes the Office is attached to the Ministry of Post-war Reconstruction, and at present is accommodated in Sydney. Under the Minister, the control of the Office rests with the Director whose appointment is direct from the Governor-General in Council. By the Education Act, the Director is also *ex-officio* Chairman of the Universities Commission. The administrative staff of the Universities Commission is housed with the Office of Education and shares its facilities. The special work of the Universities Commission is dealt with in the next section of this chapter.

2. **Functions.**—By the Education Act 1945 the functions of the Office of Education are defined as follows :—" (*a*) to advise the Minister on matters relating to education ; (*b*) to establish and maintain a liaison, on matters relating to education, with other countries and the States ; (*c*) to arrange consultation between Commonwealth authorities concerned with matters relating to education ; (*d*) to undertake research relating to education ; (*e*) to provide statistics and information relating to education required by any Commonwealth authority ; and (*f*) to advise the Minister concerning the grant of financial assistance to the States and to other authorities for educational purposes, and shall include such other functions in relation to education as are assigned to it by the Minister ".

3. **Activities.**—Thus the Commonwealth Office of Education maintains no schools and employs no teachers. It advises the Commonwealth Government and its various Departments on educational matters relative to the States and overseas countries. It provides a very useful channel for negotiations between State Departments of Education and the Commonwealth Government; it organizes consultations between education authorities generally.

Information about recent important developments in education is collected continually from many sources within Australia as well as from countries overseas and is disseminated to State Education authorities and others in a number of ways, one of which is the distribution of a bi-monthly publication " Education News ".

General research into educational problems is one of the important activities of the Office. In addition, close attention is being given to special fields of education such as school broadcasting, visual aids to education, and the education of handicapped children. From time to time the results of survey and research work done in the office or sponsored by the office are published in monograph form.

The Office of Education is a Commonwealth authority with which overseas countries may deal on educational questions concerning Australia as a whole. Close contact in international education is maintained through a representative of the Office on the staff of Australia House in London. A very important post-war development in this international sphere is that of the United Nations Educational Scientific and Cultural Organization. The responsibility for implementing the constitution of UNESCO in Australia, and for advising the Government on such matters, rests with the Office of Education. To further the aims of UNESCO twelve National Co-operating Bodies have been set up together with a Co-ordinating Committee. The Office of Education acts as the secretariat of these bodies.

A substantial part of the work of the Office is concerned with fostering the development in Australia of general educational and cultural activities. A series of publications for use as youth and adult education material has been commenced. A fortnightly " Current Affairs Bulletin " is provided at bulk rates to discussion groups and other bodies. Regular " Wall Charts " and other pamphlets are also produced.

§ 8. The Universities Commission.

1. **General.**—The Universities Commission is a Commonwealth instrumentality which was set up at the beginning of 1943 under National Security (Universities Commission) Regulations primarily to achieve the following objects :—(*a*) To advise the Commonwealth Government on questions of man-power insofar as they relate to the training of university students ; (*b*) to arrange for the training of adequate numbers of the graduates for all kinds of national service and to attract able students to the University for such training ; and (*c*) to administer the scheme of financial assistance.

Thus the Commission was concerned with war-time problems. From the commencement of the 1939–45 War the Commonwealth Government had recognized the vital necessity of a continuing flow of properly trained graduates from certain of the faculties of the Universities, particularly from the six faculties of Medicine, Dentistry, Engineering, Science, Veterinary Science and Agriculture. The policy of the Government was to reserve students to commence and continue their studies in these faculties. In 1943 reservation was extended to cover the faculties of Arts, Economics, Law and Architecture.

With the passing of the Education Act 1945 the Universities Commission became associated with the Commonwealth Office of Education. Its revised functions are set out in Section 14 of Part 3 of the Act which is quoted below :—

> " 14. The functions of the Commission shall, subject to the regulations and any directions of the Minister, be—
>
> (*a*) to arrange, as prescribed, for the training in Universities or similar institutions, for the purpose of facilitating their re-establishment, of persons who are discharged members of the Forces within the meaning of the Re-establishment and Employment Act 1945 ;
>
> (*b*) in prescribed cases or classes of cases, to assist other persons to obtain training in Universities or similar institutions ;
>
> (*c*) to provide, as prescribed, financial assistance to students at Universities and approved institutions ; and
>
> (*d*) to advise the Minister with respect to such matters relating to university training and associated matters as are referred by the Minister to the Commission for advice."

With cessation of hostilities, the Commission was no longer called upon to administer the scheme of reservation but added to its functions that of administering training under the Commonwealth Reconstruction Training Scheme insofar as it applies to Universities and similar institutions. The end of war meant a large increase in the number of applicants for university-type training under the Commonwealth Reconstruction Training Scheme.

To deal effectively with the increased number of intending students it was found necessary at the end of 1945 to establish Branch Offices in each of the five main Universities, that is, Sydney, Melbourne, Adelaide, Queensland and Western Australia, and to have a Branch Officer stationed in Hobart. The Branch Offices handle all applications for assistance under both the Commonwealth Reconstruction Training Scheme and the financial assistance scheme and give individual consideration to each case. They work in close co-operation with the Universities.

2. **Financial Assistance.**—(i) *General.* In order to make the best possible use of university facilities, the Commonwealth Government has adopted, through the Universities Commission, the policy of endeavouring to attract able students to the Universities. To this end, various steps are taken to explain to the students leaving school the opportunities available at Universities. Moreover, a scheme of financial assistance has been introduced to assist able students.

Under this scheme, assistance is available (subject to a means test) to enable students to continue their education at Universities and other approved institutions. Originally it was available only to reserved students enrolled in the degree courses of Medicine, Dentistry, Engineering, Science, Veterinary Science and Agriculture. When the scheme of reservation was extended to cover students in Arts, Law, Economics and Commerce, assistance was granted to them also.

Assistance was further extended to cover students at the Western Australian Dental College, students doing courses for the Diploma of Social Studies at the Universities of Sydney, Melbourne and Adelaide, students doing the degree courses in Music at the Universities of Adelaide and Melbourne, students in Almonry at the New South Wales Institute of Hospital Almoners, Sydney, and the Melbourne Institute of Hospital Almoners, Melbourne, and full-time day Diploma students in Science, Engineering and Architecture in Senior Technical Colleges approved for that purpose.

(ii) *Scale of Assistance.* The maximum amount of assistance granted to a student is the payment of all his university fees plus a living allowance of £117 per annum if he is living with a parent, or £156 per annum if he is not living with a parent. In addition, an allowance of up to £10 may be made over the whole course towards the cost of the purchase or hire of necessary instruments. The maximum assistance is payable when the adjusted income does not exceed £250 per annum. For every £10 by which the adjusted income exceeds £250 per annum, the assistance is reduced by £5 4s. per annum.

The adjusted income is ascertained by taking the taxable income of the student and of his parents and by deducting therefrom £50 for each dependent child under sixteen years of age. The assistance is supplementary to any other assistance which a student receives and the Commission deducts from its assistance the value of any scholarship or other award held by a student.

(iii) *Number of Students Assisted.* The following table gives a comparison of students assisted in the various faculties in each University in 1945 and 1946 :—

NUMBER OF STUDENTS ASSISTED IN EACH FACULTY, 1945 AND 1946.

Faculty.	Year.	University.						
		Sydney.	Melbourne.	Queensland.	Adelaide.	Western Australia.	Tasmania.	Total.
Medicine ..	1945	252	120	58	69	3	2	504

	1946	761	355	169	255	174	37	1,751

(a) Includes Applied Science and Medical Science.

The number of students assisted in Technical Colleges was 215 in 1945 and 272 in 1946.

3. **Commonwealth Reconstruction Training Scheme.**—(i) *Benefits.* A general description of the Commonwealth Reconstruction Training Scheme is given in section 11 which is devoted to the scheme as a whole. In addition to the normal benefits there described, some further benefits are available to university students.

At the request and the cost of the Commission, Guidance Officers have been appointed to help Reconstruction Trainees, and students are encouraged to consult the Guidance Officers on any of their problems. As they are members of the staffs of the Universities, the Guidance Officers have contacts with the teaching and administrative staffs of the Universities and are able to obtain advice regarding the students' progress and difficulties.

One of the main activities of Guidance Officers has been to arrange for full-time and part-time interim training in the period between the date of discharge and the commencement of the university year. A limited amount of special concurrent tutorial assistance also was arranged in 1945 and subsequent years.

(ii) *Numbers of University and University-Type Trainees.* The following table gives a comparison of the numbers of full-time trainees in the various university-type courses in the various States. It also gives a comparison of the numbers of trainees from the various services in the various courses :—

NUMBERS OF RECONSTRUCTION TRAINEES WHO HAD COMMENCED FULL-TIME UNIVERSITY-TYPE COURSES UP TO 27th DECEMBER, 1946.

Youth Leadership	..	17	..	..	..	..	5	3	9	17
Others	15	15	..	..	1	1	12	7	13	32
Totals ..	4,469	2,815	1,073	909	747	199	4,285	773	5,165	10,223

(*a*) Includes one at Canberra University College. (*b*) Includes nine at Canberra University College.

In addition, 6,105 reconstruction trainees had commenced part-time courses at 27th December, 1946. Of these, 4,774 were still in training, 728 had completed their courses and 603 had discontinued.

(iii) *University Facilities.* With the influx of students under the Commonwealth Reconstruction Scheme immediate provision had to be made for the alterations and extensions of existing University buildings and for the erection of new ones. Additional equipment also had to be supplied.

The Commonwealth Government offered to provide finance on the following terms and each State and University accepted these terms :—

"(*a*) That the Commonwealth meet the cost in the first instance of erecting essential additional buildings and plant required for Reconstruction Training at Universities ;

(*b*) In the case of temporary buildings or plant of a temporary nature, the assets to remain the property of the Commonwealth and to be disposed of as necessary after the need for their use is ended ;

(*c*) Where the buildings or plant are of a permanent nature the Commonwealth to meet the cost of erection in the first instance so as to ensure expedition on the distinct understanding that the buildings and plant will be taken over by the University on a basis to be determined by agreement between the Commonwealth and State and the University having regard to the permanent value of the buildings and plant to the University ; and

(*d*) The Commonwealth would bear the cost of special internal structural alterations ".

The following table shows the amount of Commonwealth moneys allocated to finance buildings at the Universities :—

University.	Permanent Buildings.	Permanent Alterations.	Temporary Buildings.	Total.
	£	£	£	£
Sydney	191,256	14,238	63,118	268,612
Melbourne	177,725	1,498	14,159	193,382
Queensland (Brisbane)	..	..	4,322	4,322
Adelaide	262,589	..	..	262,589
Western Australia (Perth)	89,247	..	25,069	114.316
Tasmania (Hobart)	11,672	1,500	32,302	45,474
New England University College	..	..	39,180	39,180
Total	732,489	17,236	178,150	927,875

For equipment the following amounts have been allocated :—

University.	Permanent Equipment.	Temporary Equipment.	Gift.	Total.
	£	£	£	£
Sydney	..	..	40,000	40,000
Melbourne	98,015	3,525	..	101,540
Queensland (Brisbane)	109,318	15,271	..	124,589
Adelaide	97,556	7,628	..	105,184
Western Australia (Perth)	42,786	3,513	..	46,299
Tasmania (Hobart)	19,766	..	..	19,766
Total	367,441	29,937	40,000	437,378

The Commonwealth Government agreed to pay the Universities the full cost of teaching all Reconstruction Trainees. The Universities Commission therefore pays each University a subsidy as running costs in addition to fees.

In 1946 the Commission made fee payments to Universities for Reconstruction Trainees amounting to approximately £210,000 and in addition paid subsidies amounting to approximately £235,000.

§ 9. Technical Education.

1. **General.**—Although provision has been made in all of the States for many forms of technical education, the total expenditure figures still indicate a low proportion in comparison with the total educational votes. The rapid expansion of manufacturing industries in recent years, however, is increasing the demand for technically trained personnel, while the technical training by the Department of Labour and National Service and the Commonwealth Reconstruction Training Schemes is being rapidly expanded. (See §§ 10 and 11 following.)

In preceding issues of the Official Year Book an outline was given of the origin and development of technical education in each State (see No. 22, pp. 447–51), but considerations of space preclude the inclusion of more up-to-date information.

2. **Schools, Teachers and Students.**—The numbers of schools, teachers and enrolments of individual students during 1945 are given in the following table :—

TECHNICAL EDUCATION : SCHOOLS, TEACHERS AND ENROLMENTS, 1945.

State.	Schools or Colleges.	Teachers.			Individual Students Enrolled.	
		Full-time.	Part-time.	Total.	Male.	Female.
New South Wales ..	37	498	1,590	2,088	30,940	11,827
Victoria(*a*)	31	975	994	1,969	33,880	10,882
Queensland.. ..	12	92	132	224	7,111	2,938
South Australia ..	19	(*b*)	(*b*)	396	7,998	6,180
Western Australia ..	9	61	179	240	4,372	2,619
Tasmania(*a*) ..	6	58	200	258	2,694	1,195
Total 1945 ..	114	..	..	5,175	86,995	35,641
1944 ..	119	..	..	4,373	80,226	32,494

(*a*) Includes junior enrolments, 9,332 males and 1,525 females in Victoria, and 886 males and 52 females in Tasmania, as teaching staff and expenditure cover both senior and junior sections. (*b*) Not available.

The numbers of individual scholars enrolled during the years 1939 and 1942 to 1945 are given in the table following. In order to make the figures comparable, enrolments at Junior Technical Schools are omitted from the Victorian and Tasmanian figures.

TECHNICAL EDUCATION : INDIVIDUAL STUDENTS.

State.	1939.	1942.	1943.	1944.	1945.
New South Wales ..	37,264	39,381	34,940	39,750	42,767
Victoria	28,844	24,304	27,389	31,533	33,905
Queensland	6,397	6,785	6,659	8,416	10,049
South Australia	9,721	9,768	10,952	12,534	14,178
Western Australia ..	5,673	5,323	5,499	5,417	6,991
Tasmania	1,316	2,073	2,130	2,559	2,951
Total	89,215	87,634	87,569	100,209	110,841

3. **Expenditure.**—The expenditure on technical education in each State for 1945 is shown below :—

TECHNICAL EDUCATION : EXPENDITURE, 1945.

(Including Loan Fund Expenditure.)

State.	Salaries and maintenance.	Equipment.	Buildings.	Total.	Receipts—Fees, etc.	Net Expenditure.
	£	£	£	£	£	£
New South Wales ..	490,121	74,725	100,807	670,594	134,844	535,750
Victoria(*a*)	522,417	39,796	174,726	791,062	131,940	..
Queensland.. ..	98,748	24,902	5,951	129,601	26,240	103,361
South Australia ..	113,268	3,816	8,812	126,656	24,246	102,410
Western Australia ..	54,601	9,854	1,486	65,941	7,896	58,045
Tasmania(*a*) ..	55,131	6,335	3,731	65,197	8,018	57,179
Total 1945 ..	1,334,286	159,428	295,513	1,849,051	333,184	..
1944 ..	1,163,232	125,820	265,818	1,611,150	286,544	..

(*a*) Includes the expenditure on Junior Technical Schools.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is largely financed from loan moneys, the sums provided from this source in 1945 being (the expenditure in 1944 is shown in brackets) :—New South Wales, £66,221 (£63,728); Victoria, £173,422 (£109,251); Queensland, £3,848 (£2,547); South Australia, £5,032 (£14,078); Western Australia, £783 (£10,384); and Tasmania, £1,928 (£4,514).

The expenditure on maintenance for technical education in Australia in 1945 amounted to 4s. per head of population, as compared with 35s. 7d. per head expended on maintenance for primary and secondary education.

§ 10. Commonwealth Technical Training Scheme.

1. **Origin of the Scheme.**—The Commonwealth Technical Training Scheme was originated to provide for the training of civilians and Armed Services personnel to make up the deficiency of skilled artisans for the production of munitions and to meet the demands of the Armed Services for skilled technicians.

In September, 1939, an expert Advisory Committee, representative of the Technical Educational Authorities, the Munitions Department and employers' and employees' organizations, was established and a scheme was developed for the training of additional artisans to meet the requirements of the Department of Munitions and Aircraft Production.

The subsequent development of the Empire Air Training Scheme, and the mechanization of the Armed Forces created a further demand for additional skilled tradesmen and technicians for the Fighting Forces.

In May, 1940, the Commonwealth Government entered into an agreement with the engineering trades employer and employee organizations relating to the dilution of skilled labour in war production factories, and the National Security Dilution Regulations which provided for the training of " Dilutees " and " added tradesmen " were proclaimed.

With the co-operation of the State Education Authorities, the existing facilities of State-controlled Technical Schools and Colleges were made available to their full extent to give intensive courses of instruction to civilians and members of the Armed Forces. Where necessary, these facilities were supplemented by additional machines, and equipment was made available on loan by the Commonwealth.

2. **Administration.**—Prior to February, 1941, the scheme was administered by the Department of Munitions, and after that date by the Industrial Training Division of the Department of Labour and National Service. The main functions of that Department were to organize, co-ordinate, and generally direct the training through the administrative machinery of the State Education Departments and other suitable agencies. Close collaboration was maintained with the Departments of the Navy, Army, Air, Munitions and Aircraft Production in respect of training for these Services and with the Central Dilution Committee in respect of training in civilian dilution trades authorized under the Commonwealth National Security Dilution Regulations. The cost of the training, including financial provision for all additions to premises, equipment and teaching personnel, was met by the Commonwealth Government.

3. **Progress.**—The first class for the training of Servicemen was established on the 18th December, 1939—two and a half months after the outbreak of War—and was quickly followed by the establishment of courses in technical schools and colleges throughout Australia. Training Centres were established in sixty Technical Colleges and in most Centres day and night classes were put into operation. With the entry of Japan into the War, the training programme was increased considerably, and six months later the trainees were completing their training at a rate of over 4,000 per month.

Instruction was given in seventy-eight different types of courses, ranging from Armourers, Cooks, Draughtsmen, and Fitters, to Photographers, Wireless Mechanics and X-ray Technicians. The courses of training varied in length from eight weeks to twenty-four weeks of full-time instruction, depending on the nature of the course and the degree of proficiency to which it was desired to bring the trainee.

4. **Persons Trained or in Training.**—Up to the 30th June, 1947, 119,655 persons had completed a course of training or were undergoing a course of training under the Scheme. The figures for each State and Service are as follows :—

SUMMARY OF TRAINING AS AT 30th JUNE, 1947.

Service.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	A.C.T.	Total.
Navy	17	325	..	137	..	..	..	479
Army	7,199	7,607	6,099	1,165	3,215	300	..	25,585
Air	21,391	24,055	51	15,644	3,726	249	5,223	70,339
Munitions and Aircraft Production	6,223	9,819	2,609	2,433	1,321	533	314	23,252
Total	34,830	41,806	8,759	19,379	8,262	1,082	5,537	119,655

§ 11. Commonwealth Reconstruction Training Scheme.

1. **Object of the Scheme.**—The object of the Commonwealth Reconstruction Training Scheme is to provide the necessary training for-ex-servicemen and women to enable them to become re-established in suitable civilian occupations. Except in the case of living allowances, the provisions for men and women are identical.

2. **Persons Eligible under the Scheme.**—Application for full-time training under the scheme may be made by Servicemen and Servicewomen who have at least six months' service and have been honorably discharged, provided that they come within one of a number of categories, which may be summarized as follows :—

(*a*) Those who because of incapacity due to the war are unable to return to their pre-war occupation. (This category also covers members of organizations affiliated with the Services, such as the Australian Women's Land Army, War Correspondents, Photographers, etc., and members of the Merchant Navy, incapacitated by war service) ;

(*b*) Those who enlisted or were called up on or before their twenty-first birthday. and are suitable for professional or vocational training ;

(*c*) Those who require a short refresher course, or who desire to complete a full-time professional course interrupted by war service, or who contemplated such a course prior to their war service and are suitable therefor ;

(*d*) Those who either have been self-employed prior to enlistment and are unable to resume their former activities, or possess vocational skill now in over-supply, and who in either case can be suitably trained for re-establishment in another occupation ; and

(*e*) Those who have displayed, during their war service conspicuous ability and are suitable for professional or vocational training.

Widows of Servicemen whose death was due to war service, are also eligible for training.

3. **Selection for Training.**—Training under the scheme is not designed as a reward for war service and if a serviceman or woman is already well qualified in a suitable trade or profession, he or she will not be encouraged to train for some new occupation except in special cases. In making selections care is taken to ensure that the applicant is suitable for the desired course of training and that there are reasonable openings or prospects for the profitable pursuit of the calling.

4. **Types of Training.**—The Commonwealth Reconstruction Training Scheme provides three main types of training :—

(*a*) University type (professional) ;
(*b*) Technical type (professional or vocational) ; and
(*c*) Rural Training.

Professional training follows normal lines at a University or similar institution. Vocational training includes all types of trade training usually given at technical colleges or schools. Training covers from 3 to 12 months and is continued until the trainee attains a standard of proficiency equal to an earning capacity of not less than 40 per cent. The trainee is then placed in suitable employment for training "on the job" and receives the normal award rate for adults, the percentage proficiency being supplemented by the Commonwealth Government until the trainee reaches 100 per cent.

Rural training will take the following forms according to circumstances in each case :—

(*a*) Practical training for a period of up to two years on an approved farm ;
(*b*) An intensive course in farm management of about eight weeks duration ;
(*c*) Training at technical training institutions for such vocations as wool classing, meat inspection ; and
(*d*) Courses at agricultural colleges.

5. **Allowances.**—For full-time training, all tuition and examination fees are paid for the trainees, also allowances for books, tools and other essential equipment. Living allowances are paid during training, ranging from £3 10s. per week for a man without dependants. A woman living with parents receives £2 15s. per week while one maintaining herself receives £3 10s. per week. Dependants' allowances are paid to both men and women. Additional allowances are paid where the trainee is required to live away from his or her home town, and 5s. per week is paid to trainees for fares in addition to allowances.

6. **Part-time Training.**—The scheme also makes provision for part-time training up to a limit of £60 allowance to a member with six months' service, if it will improve his or her occupational status and this is given, as far as possible, through Universities and Governmental institutions.

7. **Legal Authority.**—Legal authority for the scheme is contained in the Re-establishment and Employment Act, No. 11, 1945, Part III.

8. **Organization and Administration.**—The Scheme is administered by executive committees within the Ministry of Post-war Reconstruction. The Commonwealth Reconstruction Training Committee as the central committee has the functions of general planning, organization and direction. Membership of this committee comprises representatives of the Ministry of Post-war Reconstruction (Chairman), Repatriation Commission, Universities Commission and the Department of Labour and National Service, and three members appointed by the Minister and drawn from organizations of employers, employees and ex-servicemen.

The detailed administration and execution of the scheme is carried out by Regional Reconstruction Training Committees, of which there is one in each capital city. Associated with the Regional Committee are Professional, Industrial and Rural Sub-Committees made up of employee and employer representatives in the particular calling with a representative of the training authority concerned.

To 30th May, 1947, full-time enrolments have spread over 300 different courses and part-time enrolments over 650 subjects or courses.

The scheme commenced to operate in a limited way in March, 1944, and the number of ex-servicemen and women who had commenced training under the scheme at 30th May, 1947, was as follows :—

NUMBER OF TRAINEES AT 30th MAY, 1947.

Particulars.	Male.	Female.	Total.
Technical Type Training—			
Full-time	30,982	3,808	34,790
Part-time	89,289	9,495	98,784
University Type Training—			
Full-time	12,327	2,187	14,514
Part-time	7,626	639	8,265
Rural Training—Full-time	1,746	16	1,762
Total	141,970	16,145	158,115

§ 12. Business Colleges and Shorthand Schools.

Particulars at the latest available date of privately conducted institutions which give instruction in business methods, shorthand, typewriting, the use of calculating machines, etc. are given in the following table. Owing to the varying methods employed in the States it is not possible to give any comparative figures of enrolment :—

BUSINESS COLLEGES, SHORTHAND SCHOOLS, ETC., 1945.

State.	Schools.	Teachers.	Average Attendance of Students.	
			Males.	Females.
New South Wales (*a*)	54	331	(*b*) 2,555	(*b*) 5,460
Victoria	20	134	2,201	3,136
Queensland	10	41	128	950
South Australia	10	62	(*c*) 1,484	(*c*) 1,653
Western Australia	12	78	(*b*) 3,533	(*b*) 1,966
Tasmania	3	13	6	198
Total	109	659	9,907	13,363

(*a*) Year 1941. (*b*) Average weekly enrolment ; attendance figures not available. (*c*) Individual students enrolled.

In addition to those shown above for South Australia there were 2,613 males and 169 females receiving instruction from interstate schools by correspondence. Particulars regarding fees received in 1945 are available for Western Australia and Tasmania only, the respective figures being £40,826 and £2,631.

§ 13. Miscellaneous.

1. **Scientific Societies.**—(i) *Royal Societies.* In previous issues of the Official Year Book an outline was given of the origin and progress of the Royal Society in each State (see No. 22, pp. 454–5). The accompanying table contains the latest available statistical information regarding these institutions, the head-quarters of which are in the capital cities.

ROYAL SOCIETIES : PARTICULARS, 1947.(*a*)

Particulars.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.
Year of foundation ..	1866	1854	1884	1834	1913	1843
Number of members ..	314	225	224	160	189	316
Vols. of transactions issued	79	91	55	68	30	80
Number of books in library	40,143	18,000	3,100	1,000	6,100	21,385
Societies on exchange list ..	314	348	240	269	187	285
Income .. .. £	1,524	712	174	730	377	626
Expenditure .. £	1,269	527	143	730	290	617

(*a*) The Royal Society of Australia, with head-quarters at Canberra, was founded on 25th July, 1930, and received permission to use its title on 14th January, 1931. The members numbered 58 in 1947. Income and expenditure for the year amounted to £31 and £14 respectively.

(ii) *The Australian and New Zealand Association for the Advancement of Science.* This Association was founded in 1887. Its head-quarters are at Science House, Gloucester-street, Sydney, and meetings are usually held biennially within the various States and in the Dominion of New Zealand. The last meeting was held in Perth in August, 1947.

(iii) *Other Scientific Societies.* The Linnean Society of New South Wales, with head-quarters in Sydney, was founded in 1874. The soundness of its present position is due to the benefactions of Sir William Macleay, who during his lifetime and by his will endowed the society to the amount of £67,000, which has been increased by judicious investment to over £85,000. The Society maintains a research bacteriologist and offers annually 4 research fellowships in various branches of natural history. One fellowship was awarded in 1946. The library comprises some 16,000 volumes, valued at about £8,000. Seventy-one volumes of proceedings have been issued, and the Society exchanges with about 240 kindred institutions. The ordinary membership at the end of 1946 was 182.

The British Astronomical Society has a branch in Sydney, and in each of the States the British Medical Association has a branch.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

2. **Libraries.**—(i) *Commonwealth.* (*a*) *Parliamentary and National Library.* When the Commonwealth Parliamentary Library was created in 1902, it was recognized that when the Australian Capital was established it would be necessary to have available there, for the use of Members, Government Departments and the public, a library sufficient for their requirements, and therefore wider in scope than a purely Parliamentary Library. The ideal of a great general library was kept in view, and standard works were systematically acquired. At the same time, the first Library Committee conceived the idea of a National Library for the use and benefit of the people of Australia. The policy was therefore pursued of securing, as far as possible, all works and documents connected with the discovery, settlement and early history of Australia, New Zealand and the Pacific Islands.

In 1909 a valuable collection of *Australiana*, comprising about 10,000 volumes and 6,500 pamphlets, maps, documents and pictures—the library of Mr. E. A. Petherick—was acquired. In 1912 a provision was included in the Commonwealth Copyright Act requiring the publisher of every book, pamphlet, etc., printed in Australia to supply a copy free to the library. In the same year the publication of the *Historical Records of Australia* was begun, and 34 volumes were issued before publication was temporarily suspended in 1926. During 1945 arrangements were completed for the microphotographic copying of all material relating to Australia and the Pacific in the Record Office, London. This project, which was interrupted by the war, is being undertaken by the Commonwealth National Library and the Mitchell Library in partnership, and will enable compilation of the *Historical Records of Australia* to be resumed.

The rapid development of the Australian and National sections of the Library, together with the purchase of the Cook manuscripts, persuaded the Library Committee in 1923 that the title "Commonwealth National Library" should be adopted. Consequent upon the transfer of the Library to Canberra in 1927 the policy of dividing the library into two sections was adopted—the Parliamentary reference collection to be housed in Parliament House and the National and Public section in a separate building, both to remain under the one general administration. The erection of the first wing of the permanent National Library building was completed in 1935, and is designed to meet the requirements of University students and the general public, to whom the privileges of the Library have been extended in respect to borrowing as well as reference. The design for the complete building makes ample provision for the housing of special collections and for the proper display of the valuable records of Australian history which the Library possesses. In 1936 a further development in the scope of the National Library was the establishment of an Historical Film and Speaking Record Section.

The work of the National Library was also extended in 1936 as the result of a grant of $7,500 in three annual instalments of $2,500 from the Carnegie Corporation of New York for the establishment of library and reading facilities in outlying Australian Territories. This amount was subsidized by the Commonwealth Government on a £1 for £1 basis. The war resulted not only in the cessation of much of this service, but in the loss of much material in New Guinea, Papua and the Northern Territory. The system is being reconstituted in an enlarged way on the basis of free library service provided by various Commonwealth administration authorities.

In 1940 Gregory M. Mathews, O.B.E., presented to the Library his collection of Australian ornithological works comprising approximately 4,000 items.

To meet the increased demands made on the Library by Government Departments and war authorities, and because many departments are in Melbourne, the library opened a liaison office there in 1942. Since April, 1946, the work has been undertaken by the Melbourne office of the Department of Post-war Reconstruction.

Consequent on the report of the War Archives Committee appointed by the Prime Minister in 1942 the Library was created a provisional archives repository for administrative records of the non-service departments, and the War Memorial for those of the Services.

During the war overseas information libraries were established in six countries, those in London and New York being administered by trained officers of the Library. In 1946, following an agreement between the Departments of External Affairs, Information, and Commerce and Agriculture, the Library undertook to provide information and reference libraries for all overseas posts where there was official Australian representation. The amount provided for these services has risen from £500 in 1944 to £2,500 in 1946, the number of overseas libraries having increased from two in 1944 to thirty in 1947.

With the establishment of the National Film Board early in 1945, the National Library became a central library and distributing agency for educational and documentary films. Films to the value of £5,000 have been ordered from Great Britain and the United States, and a provisional catalogue of known films at present in Australia has been issued.

The number of volumes in the National and Parliamentary collections was, at the end of June, 1946, 211,653, the outstanding feature of the National section being a unique collection of Captain Cook manuscripts, while the Parliamentary section contains an extensive series of official publications of Great Britain, the Dominions, and foreign countries. The following publications are issued by the Library :—Historical records of Australia—34 volumes, 12s. 6d. per volume ; Parliamentary Handbook and record of elections—ten issues, 10s. 6d. per volume ; Annual catalogue of Australian publications—ten issues, 2s. per volume ; Select list of representative works dealing with Australia (reprinted from the Official Year Book)—ten issues ; Australian Public Affairs Information Service : Subject index to current literature (monthly).

Training of librarians has been undertaken by the Library since 1939, and there is now a formal course for departmental and other librarians, lasting approximately 39 weeks.

(*b*) *Patent Office Library.* The free library attached to the Commonwealth Patent Office, Canberra, contains over 56,000 volumes. Patent specifications of inventions are received from the principal countries of the world, together with official publications dealing with Patents, Trade Marks and Designs. A wide range of technical literature and periodicals is available.

(*c*) *Other Departmental Libraries.* Several Commonwealth Departments in Canberra now have libraries. The following Departments have specialized collections in their own fields, and in addition draw largely on the National Library :—Attorney-General's Department, Australian War Memorial, Commonwealth Bureau of Census and Statistics, Department of Commerce and Agriculture, Department of External Affairs, Department of Health and Department of Trade and Customs. Libraries established in various war-time departments have functioned chiefly as reference and borrowing agencies, having very small book collections of their own.

For the past few years the library of the Department of Commerce and Agriculture has had its main activities in Melbourne, where important sections of the Department were located in the war years. The Department of Labour and National Service has its main library in Melbourne, and a branch library in Sydney. Other departmental libraries in Melbourne are those of the Department of Air, Department of Defence, Department of Social Services and Postmaster-General's Department. The library of the Commonwealth Office of Education was begun in Sydney during 1945.

(*d*) *Council for Scientific and Industrial Research.* In addition to the library at the head office at East Melbourne, the Council for Scientific and Industrial Research now has libraries of varying sizes attached to each of its Divisions, Laboratories and Sections. Of these, there are six in New South Wales, six in Victoria and one in South Australia. The head office catalogue records all material held in branch libraries.

(ii) *States.* Library activity has developed to a marked degree in recent years, and in five States legislation has been passed to increase the scope and usefulness of library service.

(*a*) *Metropolitan Public Libraries.* In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favorably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the Public Library of each capital city at 30th June, 1946 :—

METROPOLITAN PUBLIC LIBRARIES, 30th JUNE, 1946.

City.	Number of Volumes in—			Total.
	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra(*a*)	211,653	..	(*b*)	211,653
Sydney	(*c*) 435,589	(*d*)	110,935	546,524
Melbourne	551,839	77,906	13,739	643,484
Brisbane	46,137	..	..	46,137
Adelaide	205,638	9,821	(*e*) 35,334	250,793
Perth	175,504	..	(*f*) 26,954	202,458
Hobart	26,155	12,749	(*g*) 27,327	66,231

(*a*) Includes Parliamentary section. (*b*) Books are lent to libraries or students throughout Australia whenever necessary for research work. (*c*) Includes 143,590 volumes in the Mitchell Library. (*d*) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. At 31st December, 1946, the books numbered 67,519. (*e*) Includes 5,287 volumes in Children's Branch and 15,527 in Children's Box Service. (*f*) Includes 8,449 volumes in the School Libraries Branch. (*g*) Includes 13,763 volumes in the Children's Branch.

(*b*) *New South Wales.* The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act, 1939, which was fully proclaimed as from 1st January, 1944. The Library Board was fully constituted in 1944, and came into effective operation in September of that year. Sixty-one local authorities have adopted the Library Act, and during 1946 spent £40,699 on their libraries from rates, as well as £19,267 received in subsidy. This represents in all 2s. per head for 24.72 per cent. of the State's population. There are 36 libraries being operated by 48 councils.

The State Library has been housed since 1942 in a new building, whose reading room provides seating accommodation for 500 persons, and has 50,000 volumes in open access. Within four years, however, the old building had to be reoccupied in part owing to lack of space caused by the Library's extended functions.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central book buying and master cataloguing service for departmental libraries, and municipal and shire libraries constituted under the 1939 Act.

The Library School, which was established in 1939, has increased rapidly in numbers, until in 1946 the number of students reached 60. Students are trained in librarianship and are prepared for the examinations of the Australian Institute of Librarians.

In 1943 the Banks Memorial Trust was set up to report on the best use of funds which had accumulated since 1905. The government has approved of a memorial at Kurnell, and of the publication of the Banks Papers, a project which will be undertaken by the State Library in the next two or three years.

The State Library has undertaken to reorganize the libraries of the University Tutorial Class and the Workers' Educational Association, and all class libraries, discussion notes, and gramophone records for university tutorial classes are circulated from the State Library.

The State Library grant, after being unchanged for about twenty years, has been increased by £500 in each of the last two years, while the vote for the Country Circulation Department has nearly trebled. In connexion with the Country Circulation Department it may be noted that books are forwarded on loan to State schools, to Schools of Arts and to individual students. During 1946–47, 78,227 books were lent to small State schools, 13,791 to Schools of Arts and small country libraries, while 43,753 reference works were lent to individual country students.

The Mitchell Library in Sydney of more than 60,000 volumes and pamphlets, and 300 paintings, principally relating to Australasia and the Southern Pacific, and valued at £100,000, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testators stipulated that the regulations of the British Museum were to be adopted as far as was practicable, hence the library is the resort of specialists. There are now 143,590 volumes in the library in addition to valuable manuscripts, collections of Australian postage and fiscal stamps, and various pictures, coins, etc.

In Newcastle, Dr. Roland Pope has given his collection, worth £10,000, which is being housed temporarily at the School of Arts until a reference library is built.

Other important libraries in New South Wales are the Australian Museum, 32.025 volumes; Teachers' Colleges, 73,063; Technical Colleges, 20,846; Public Schools (Primary only), 583,996; Railways' Institute, 146,969; Road Transport and Tramways Institute, 39,134; and the Cooper Library of the New South Wales Public School Teachers' Federation and the library at the National Herbarium, each of 10,000 volumes. At 30th June, 1946, the Parliamentary Library contained 95,990 volumes.

(c) *Victoria.* A Library Service Board was appointed in 1940 to inquire into the adequacy of existing library service and prepare plans for development. In November, 1944, it produced a comprehensive report, which recommended the establishment of a State Libraries Board, and suggested a plan for State financial aid. This has been implemented by the passing in December, 1946, of the Free Library Service Board Act, and the establishment of a Free Library Service Board of nine members representing the Public Library of Victoria, municipalities within and outside the metropolis, the Library Association of Victoria, the Education Department, the Victorian Branch of the Australian Institute of Librarians, and the Government itself. The functions of the Board are to assist in the organization and promotion of free library services by municipal and other authorities, to register libraries, recommend the allocation of grants, promote library service in State schools, and to provide advisory services to registered free libraries and associated institutions. The Act empowers the Public Library of Victoria, after consultation with the Board, to establish a school for the training of librarians, and to conduct examinations in librarianship.

Present library service in Victoria is for the most part confined to Mechanics' Institutes, which are not largely effective apart from those at Geelong and Ballarat. Several excellent municipal libraries exist in the metropolitan area.

The Government makes a grant of £5,500 to country libraries, distributed as follows:—Each applicant library receives £10 10s.; a further grant of £2 for £1 is made to libraries which receive grants from their own municipal authorities, while £1 for £1 is granted for local donations. The maximum amount granted to any library is £200. The main condition is that the library make a certain number of books (not a fixed number, and not necessarily all its books) freely accessible to the public. The subsidy of £1 for each £1 donated is reckoned on the total donations received, even if they are in very small individual amounts.

To assist in the training of librarians a course of eleven weekly lectures was given in 1945, with an attendance of 80. A vacation school, primarily for teachers, held in May, 1945, had an attendance of 80, while 154 applications were received for a course of weekly lectures in 1946 to prepare candidates for examinations of the Australian Institute of Librarians. The Victorian Association of Special Libraries and Information Services held a course of 30 lectures during 1946 for specialized library work.

Two bibliographical works issued recently in Victoria are a union list of medical periodicals in Melbourne hospitals and libraries, compiled by the staff of the University Library, and a list of periodicals held by all branches of the Council for Scientific and Industrial Research.

With the passing of the Public Library Act 1944, the Public Library of Victoria was separated for administrative purposes from the National Gallery and the Museum, and is now controlled by a Board of seven members concerned with the Library only. The Library provides reference services with a collection of some 550,000 volumes, 2,500 current periodicals and 450 current newspapers; lending services to metropolitan borrowers; country lending services to individual readers throughout the State; and travelling library services by a box system to rural and provincial libraries.

The Reference Library reading room ranks amongst the finest in the world. It was opened in 1913 and has a diameter and height of 114 feet, and is capable of seating 320 readers at a time, with an additional 50 readers in a special Art Room. The Library is particularly strong in Australiana, early and fine modern printing, English county records and genealogy, Shakespeariana and the fine arts. Associated with the Reference Library is the Victorian Historical Collection containing 13,000 documents, maps, paintings and other items illustrating the history of the State.

(*d*) *Queensland.* The Libraries Act 1943 constituted a Library Board "to attain efficient co-ordination and improvement of the library facilities of the State with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally throughout the State". To the Board which has been appointed are entrusted the control and management of the Public Library and of branches which, under the Act, may be established in various parts of the State by the Governor-in-Council. It is expected that when the Act, which also provides for the establishment of library services by local authorities and for the preservation of public records, has been fully implemented the library system of the State will be well organized and of high standard.

During the war the Public Library maintained its position as a centre of adult education by co-operating with the Army Educational Services in supplying books to members of the forces.

Country readers may obtain the loan of educational books from the Public Library, while the organization of the Schools of Arts in many parts of the State under the auspices of the Schools of Arts Association has led to an increase in their activities. An annual government grant of £500 is made, and the annual issue is about 15,000 volumes.

The Queensland Book Club arranges for books to circulate direct from one country reader to another instead of being returned to head-quarters each time. A grant of £300 for 1946–47 was made by the Library Board.

The John Oxley Memorial Library was established under the terms of a Declaration of Trust dated 26th August, 1926. The principal function of the Library is to promote the study of Queensland authors of literature relating to Queensland. Since its opening in April, 1934, it has grown from a few hundred items to over 30,000. Originally financed by funds collected at the centenary of Brisbane's settlement in 1823, the library has for some years received government assistance. It is at present housed in the Public Library.

(*e*) *South Australia.* Following the Price Report of 1937, which stressed the need for a free lending service for metropolitan and country readers, and suggested the establishment of a State Libraries Board, the Public Library of South Australia was separated from the Museum and Art Gallery early in 1940 and became a government department, administered by a Principal Librarian and a Libraries Board.

In March, 1946, the greater part of the Library was thrown open for free public borrowing. Over 12,000 borrowers have been enrolled and books are being lent at the rate of about 160,000 volumes a year.

The Library's Country Lending Service, begun in 1938, has registered 11,395 borrowers, including children, and has built up its collection from 4,000 to 16,510 volumes for adults and 17,245 books for children. In addition 629 schools use the box service, 73,224 books being issued during 1945–46.

A Research Service, established in 1942, receives about 300 inquiries per month. It supplies lists of references, and arranges for borrowing of books and periodicals selected from those lists as well as books and photostats procured from interstate and overseas libraries. The service has an extensive trade catalogue collection.

During the year ended 30th June, 1946, books added to the reference library numbered 2,311, making a total of 205,638. In addition there were 7,505 in the Symon Library, 14,520 in the Country Lending Service, 5,287 in the Children's Library, 15,527 in the Children's Box Service, making a total of 248,477 at 30th June, 1946.

In 1921 the Archives Department of the Public Library of South Australia was established for the collection of original South Australian historical material. Legislation has been passed forbidding the destruction of government documents without reference to the Libraries Board. Considerable use is made of the collections, which on 30th June, 1946, consisted of 356,350 documents, 20,015 views, and 1,668 maps.

The Institutes Association in 1945 comprised 256 suburban and country libraries with 715,000 volumes.

(*f*) *Western Australia.* During 1944 the Government appointed a provisional committee to report on the question of establishing free lending libraries in country centres. The scheme outlined in its report of January, 1945, was accepted, and a permanent Country Free Lending Libraries Committee established. In order to commence a library service for rural areas £1,000 was placed on the estimates for 1945 and 1946, funds being made available on a £1 for £1 basis up to £50. By July, 1945, eight such libraries had been started, and by 1947, 38 libraries were receiving aid under the scheme, which is worked through the Municipalities and Road Boards. In each case the local authority makes its own arrangements for the supervision and lending of books.

In 1945 an Archives Branch was established at the Public Library, through which historical material is able to be collected, indexed and made available to the public. Also, the collection of the Western Australian Historical Society is being housed at the Public Library.

An Adult Education Library, in existence for the past ten years, reaches readers in metropolitan and country areas. A Free Library Movement, with a provisional committee formed in 1945, aims at free library service in the metropolitan area.

(*g*) *Tasmania.* Library service in Tasmania has expanded rapidly during the past few years. The second annual report of the Tasmanian Library Board, presented to Parliament in 1945, stated : " Tasmania is now contributing to the upkeep of its library system on a scale exceeding that of any other State in Australia ". In just over two years the amount expended on free library service rose from 4d. to 2s. 1d. per head of population, and during 1944–45 an additional 9d. per head was contributed for additional children's library services. Municipalities representing 80 per cent. of the population now have free libraries or book stations.

Under the Libraries Act 1943, the Tasmanian Library Board was constituted, and the State Library of Tasmania was established on 1st January, 1944. The Board, in addition to administering the State Library head-quarters in Hobart, is responsible for the extension of library services throughout the State and for the control of State aid. Municipalities adopting the Act spend the proceeds of local rates on library premises, salaries and maintenance, and books for permanent retention. State aid is provided in the form of books of a value equal to the amount collected in rates, which are exchanged at intervals. Only in Launceston is State aid given in cash. The Launceston City Council now contributes approximately £2,100 per annum, and a like amount is received in State aid. Since the library became free under the Act, membership has increased from 1,000 to 10,000. The newly established children's library has enrolled over 2,300 members in a few months.

The State Library conducts regular showings of documentary films and has assumed responsibility for the extension of these programmes throughout the State. It arranges, on its own behalf or in association with other bodies, winter recitals of recorded music and other extra library and adult education activities such as summer vacation schools, lectures, library weeks in country centres, puppetry demonstrations, etc.

(iii) *University Libraries.* The libraries of the Australian Universities perform two important functions in Australian life and development; they provide material not only for the education of graduates and undergraduates, but for scholars, research workers and practical investigators all over the continent, since no genuine student is refused access to them. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries, whose resources they are thus able to supplement. They lend to one another and to State and private institutions as well as to individual investigators, and they both lend to and borrow from the public and scientific libraries. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size the Library of the University of Sydney is the third in Australia, and the Libraries of the Universities of Adelaide and Melbourne are respectively seventh and eighth. The following table shows the sizes and rates of growth and expenditure of the Australian university libraries; it is impossible to give borrowing statistics, as they differ too widely to be comparable without much explanation.

UNIVERSITY LIBRARIES, 1946.

University.	Volumes.	Accessions during year.	Expenditure.
	No.	No.	£
Sydney	292,793	6,244	12,856
Melbourne	139,999	5,155	10,796
Queensland	85,942	2,074	4,246
Adelaide	149,063	4,995	8,808
Western Australia	75,487	2,947	4,[illegible]91
Tasmania	57,211	3,011	3,295
New England University College	12,275	913	1,285
Canberra University College	3,967	674	396

The first books were bought for the Library of the University of Sydney as early as 1851; only since 1910, however, has it possessed a building of its own. It is named after its principal benefactor, Thomas Fisher, who bequeathed to it in 1885 the sum of £30,000. It contains an up-to-date bookstack of glass and steel and a fine reading room in which since the beginning of 1941 about 18,000 volumes of the collection have been made available on open access shelves. In addition, members of the teaching staff and certain classes of undergraduates are admitted to the bookstacks; all readers are encouraged to borrow freely. The Library possesses a large number of periodicals, especially scientific, valuable collections of seventeenth-century pamphlets and Elizabethan translations from the classics, and an extensive collection of Australian literature. Besides a medical branch, there are a number of departmental libraries.

Early in 1854 the Council of the University of Melbourne made its first allocation for books, but the Library was housed in temporary and unsatisfactory quarters for a number of years, and consequently growth was slow and complaints were frequent. In recent years the university authorities have treated the Library generously, and there have been some welcome benefactions, but accommodation is insufficient and a new library building is one of the most pressing needs of the University. The W. L. Baillieu Trust has given £36,000 as the first instalment of a £100,000 gift with which a new library will be built. All the books are accessible on open shelves and though the Library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The Library is administered from the centrally situated general library; there is a large medical branch library specially rich in periodicals, and smaller branch libraries are accommodated in some of the science departments.

The Library of the University of Queensland began 33 years ago with £3,000 worth of books, £2,000 having been raised by public subscription and £1,000 granted by the Government. At present it shares a building with a science department. There are several departmental libraries.

The Adelaide University Library bears the title of its original benefactor, Robert Barr Smith, who, with members of this family in and after 1892, gave the University about £50,000 for library purposes. Some 20,000 volumes are shelved in the reading room and are available to the ordinary student. Up-to-date steel bookstacks provide accommodation for about 100,000 volumes, and additions now planned will be capable of housing a further 500,000. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are medical and law departmental libraries. The medical library has on permanent loan the collection of the Institute of Medical and Veterinary Science, and also incorporates the library of the British Medical Association (South Australian Branch).

In the University of Western Australia the first permanent library staff was not appointed until 1927. Provision of permanent library accommodation was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. Extensions to the temporary quarters are in progress. The whole collection, consisting of about 80,000 volumes, is accessible on open shelves, and there are several departmental libraries. A special feature is the use made of student co-operation.

The Library of the University of Tasmania was founded in 1893, but for many years it comprised little more than a collection of text-books. In 1913 a substantial increase of funds was allotted and important gifts were received. In 1919 it was organized for the first time in accordance with modern library practice. A full-time librarian was appointed for the first time at the end of 1945, and the staff increased during 1946 from two to seven. Although accommodation for both books and readers has been more than doubled, space is still an acute problem and plans are being prepared for a new building. The grant from University funds for books and periodicals has been doubled, and an additional special grant is being provided by the Government to fill some of the more serious deficiencies in the collection. The Library is now providing a cataloguing service for the library of the Royal Society of Tasmania.

The New England University College Library was founded in 1938, and bears the name of its first benefactor, Sir William Dixon. At the end of 1946 it contained some 12,000 volumes mainly on open shelves.

The Canberra University College Library was established in 1938. At the end of 1946 it contained 3,967 volumes, which are on open shelves; reference books may be borrowed.

(iv) *Children's Libraries and School Libraries.* A survey conducted early in 1946 revealed that only a small percentage of children was being catered for by adequate library service. The effective use made of the few existing children's libraries is proof that the growing interest being taken in this branch of library work will be well rewarded.

During November, 1945, a Children's Book Week was held for the first time in several States, to stimulate interest in children's reading.

(*a*) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. Three formerly independent children's libraries at Mosman, Wollongong and Moss Vale are now departments of municipal and shire libraries and have greatly increased budgets.

From 1937–38 school library work has been fostered by the State Library in co-operation with the Education Department. A "Model School Library" was established, and vacation classes for teacher librarians are held. To date these classes have been attended by 409 teachers and about 30 voluntary children's librarians. Books are circulated to 24 school libraries.

(*b*) *Victoria.* Since 1943–44 children's libraries have shared a grant of £500 between them, the number participating in 1945 being 27.

The Education Department has an annual grant which it distributes among approximately 1,000 schools. In addition, the Government subsidizes the purchase of approved books for school libraries on a £1 for £1 basis, with a maximum of £25. During 1945–46 the total government contribution was £5.362. A State Schools' Library Advisory Committee has been set up by the Education Department to advise on all matters pertaining to school libraries, and two teachers underwent a full course of library training during 1946 in order to be able to direct and supervise library service within the Department.

In several country districts circulating group libraries have been established, financed by school committees and municipal authorities. Boxes of books are despatched to each school in the group, usually at the commencement of the school term. Financed by a bequest by the late William Gillies, a scheme of circulating libraries for schools, particularly remote ones, has been operating for some years. In 1945, 38 groups, each comprising three schools, were operating under this scheme.

The Kirby survey of secondary schools, 1945, revealed that only 5 per cent. have satisfactory libraries, and 50 per cent. are without libraries or merely possess collections of books. Most of the larger government and private schools are making an effort to establish better libraries.

(*c*) *Queensland.* The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Public Instruction on a £1 for £1 basis. The subsidy was suspended from 1931 to 1943.

In 1937 a system of Circulating Supplementary Readers was commenced. Books are graded for age levels and are moved from school to school, sufficient copies of each book for a whole class being sent, and reading being done in school. There are 96,000 such books now in use, the distribution at present being confined to primary schools.

(*d*) *South Australia.* The Children's Library houses 5,000 volumes. Its work lies largely with classes from metropolitan schools which come to study subjects, for simple library instruction, or epidiascope talks. Week-ends and school holidays bring many readers. A lending service has not yet been established. (*See also* Country Lending Service, page 259.)

The government recently recognized the importance of children's reading by appointing an organizer of school libraries.

(*e*) *Western Australia.* A travelling library service to country schools has been operated from the Public Library for some years, and has been extended since 1938 through the Charles Hadley Schools Travelling Library, which has been financed by the teachers of small country schools, with the addition of grants by the government and Teachers' Union. Up to date £920 has been received, and 140 boxes equipped. Children in isolated areas are catered for by books sent out by the State Correspondence Schools Library.

A fortnightly radio talk is given relating to books available from the library, and illustrated outlines and questionnaires are posted to the children in advance. There is as yet no general scheme to serve children in the metropolitan area.

The Federation of Police Boys' Clubs of Western Australia aims at establishing a system of circulating boxes of books at an estimated cost of £10,000, of which £1,500 has already been received.

(*f*) *Tasmania.* Early in 1945 an appeal fund was opened for the establishment of Lady Clark Memorial Children's Libraries. Subscriptions amount to £15,000, and five libraries have been established, while books are in hand for many more. An American librarian trained in children's work has been appointed to take charge.

Practically all State secondary schools in Tasmania have libraries, with full-time trained librarians in three of them. The Hobart High School library contains some 8,000 volumes, and is among the foremost libraries of its kind in Australia. A Schools'

Library Service has been established in Tasmania to assist with loans of curriculum books, 30 at a time, and to provide advice and guidance in the use of books. In primary schools the majority have libraries, and a centrally located school library services many schools with a box system.

Selected students at the Teachers' College are receiving instruction in library techniques.

(v) *Industrial Libraries.* Before the war industrial libraries were practically unknown in Australia, but during recent years many manufacturing firms have found it necessary to establish libraries to keep their scientific staffs informed of the latest technical advances. At present there are seventeen libraries staffed by trained librarians attached to commercial organizations in Sydney, and 38 libraries in government and semi-government departments and scientific institutions. There are some 30 industrial libraries in Victoria, and several in other States.

(vi) *Microfilms.* Several libraries in Australia have adopted the practice of providing microfilm or photostat copies of material required for borrowing. In addition to the great convenience of this method of borrowing, it has the advantage of lessening the possibility of the loss or deterioration of valuable library material. A small charge is usually made for the service. The following is a list of libraries which undertake this service. The letter " P " signifies photostat supplied and " M " microfilm supplied :—Australian Capital Territory—Australian War Memorial (P), Commonwealth National Library (PM) ; New South Wales—Metropolitan Water Sewerage and Drainage Board (P), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM) ; Victoria—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch), (P), University of Melbourne (PM) ; South Australia—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P) ; and Tasmania—University of Tasmania (PM).

3. **Public Museums.**—The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing fine collections of the usual objects to be met with in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building to 30th June, 1946, was £84,000. The number of visitors to the institution in 1946 was 189,000, and the average attendance on week-days 444, and on Sundays 1,129. The expenditure for 1946 amounted to £17,500. A valuable library containing 32,025 volumes is attached to the Museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, while afternoon lectures for school children are provided. Nature talks are also broadcast by radio. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The " Nicholson " Museum of Antiquities, the " Macleay " Museum of Natural History, and the Museum of Normal and Morbid Anatomy, connected with the University, and the National Herbarium and Botanical Museum, at the Sydney Botanic Gardens, are all accessible to the public. There is a fine Technological Museum in Sydney, with branches in five country centres. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus, and the gums, kinos, tanning materials, and other economic products of native vegetation generally.

The National Museum at Melbourne, devoted to Natural History, Geology, and Ethnology, is located in the Public Library Building. The National Art Gallery is situated in the same building. The Industrial and Technological Museum, also housed under the same roof, contains about 10,000 exhibits. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the Schools of Mines in the chief mining districts.

The Queensland Museum founded in 1855 comprises exhibited and reference collections of zoology, geology and ethnology. It is entirely maintained by the State Government. The collections are principally but not exclusively, Australian ; there is, for example, the excellent series of ethnological material formed by Sir William McGregor in New Guinea. The publication is *Memoirs of the Queensland Museum* which was preceded by the *Annals of the Queensland Museum.* The library is extensive and valuable, and of great assistance to research workers in the State.

Under the Public Library Act of 1884 the South Australian Institute ceased to exist, and the books contained therein were divided amongst the Museum, Public Library, Art Gallery of South Australia, and the Adelaide Circulating Library. The Museum has considerable collections of most branches of natural history and was attended by 102,000 visitors in 1945–46. Cost of construction of the Museum building was returned as £65,000. In 1945–46 expenditure was £8,261.

The latest available returns show that the Western Australian Museum and Art Gallery contains altogether 177,000 specimens, of an estimated value of £100,000. The Museum, Art Gallery, and Library are housed in one building, and the visitors to the combined institutions during the year reached 54,000. At the 30th June, 1946, the structure was valued at £65,500.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral, and miscellaneous products. The Museums received aid from the Government during 1945 to the extent of £5,477. The cost of construction in each case is included in that of Art Galleries given below.

4. **Public Art Galleries.**—The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. Cost of construction of the present building amounted to about £96,000. At the end of 1946 its contents, which are valued at £239,000, comprised 954 oil paintings, 606 water colours, 1,655 black and white, 226 statuary and bronzes, and 1,050 ceramics, works in metal and miscellaneous. During the year the average attendance on week-days was 395, and on Sundays 1,232. Since the year 1895 loan collections of pictures have been regularly forwarded for exhibition in important country towns.

The National Gallery at Melbourne at the end of 1944 contained 1,007 oil paintings, 7,578 objects of statuary, bronzes, ceramics, etc., and 21,043 water colour drawings, engravings, and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £439,000. Cost of purchases to end of 1944 amounted to £548,200. Several munificent bequests have been made to the institution. That of Mr. Alfred Felton, given in 1904, amounts to about £8,000 per annum. In 1913, Mr. John Connell presented his collection of art furniture, silver, pictures, etc., the whole being valued at £10,000. There are provincial Art Galleries at Ballarat, Bendigo, Geelong, Castlemaine and Warrnambool and periodically pictures are sent on loan from the National Gallery.

The Queensland National Art Gallery, situated in the Executive Buildings, Brisbane, was founded in 1895, and contains a small, but well chosen collection of pictures. At the end of 1945 there were on view 225 oil paintings, 105 water colours, 234 black and white, and 42 pieces of statuary, together with various prints, mosaics, and miniatures. Exclusive of exhibits on loan, the contents are valued at about £22,500. Visitors during the year averaged 1,034 on Sundays and 249 on week-days.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2,000 in the purchase of pictures, which were exhibited in the Public Library Building in 1882. The liberality of private citizens caused the gallery rapidly to outgrow the accommodation provided for it in 1889 at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir Thomas Elder, the Government erected the present building which was opened in April, 1900. The Gallery also received bequests of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and valuable prints and £3,000 in 1907 from Mr. David Murray. In 1935 Mr. Alex Melrose gave £10,000 for the extension of the building. At the 30th June, 1946, there were in the Gallery 1,325 paintings in oil and water colour, 402 drawings and black and white, and 67 items of statuary, the contents being valued at £77,470. Building and site are valued at upwards of £48,000. Visitors during the year 1945–46 numbered 86,000. The cost of construction of the Art Gallery amounted to £48,000.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, and, as in the case of Melbourne, the Public Library, Museum, and Art Gallery are all situated in the one structure. The collection comprises 186 oil paintings, 107 water colours, 353 black and white, 276 statuary, and 1,200 ceramic and other art objects, the whole being valued at £30,750. Cost of construction of the buildings amounted to £10,000.

In Tasmania, the Art Gallery at Hobart was opened in 1887. Its present contents consist of 72 oil paintings, 36 water colours, 4 black and white, 3 statuary, and 10 etchings, engravings, etc. The cost of construction of the building was £5,000.

The Art Gallery at Launceston was erected in 1888 at a cost of £6,000, and opened on the 2nd April, 1891. Only a small proportion of the contents belongs to the gallery, the bulk of the pictures being obtained on loan. At latest date there were on view 102 oil paintings, 50 water colours, and 48 statuary, engravings and miscellaneous exhibits.

§ 14. State Expenditure on Education, Science and Art.

The expenditure in each State on education, science and art during the years 1944–45 and 1945–46 is shown in the following tables. Owing to the details not being available in all States, the figures exclude officers' pensions, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical inspection of school children is also excluded, as this service is more appropriately classified under Public Health, etc. :—

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART.

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
			1944–45.			
	£	£	£	£	£	£

South Australia ..	1,524,712	94,656	..	1,619,368	37,569	1,581,799
Western Australia	1,137,675	76,973	..	1,214,648	45,664	1,168,984
Tasmania ..	721,926	69,058	..	790,984	1,325	789,659
Total ..	17,478,047	903,916	25,610	18,407,573	428,577	17,978,996

(a) In addition, fees in respect of technical education amounting to £109,251 in 1944–45 and £131,490 in 1945–46 were received and spent by the School Councils.

CHAPTER VII.

PUBLIC JUSTICE.

§ 1. Lower (Magistrates') Courts.

1. **General.**—In considering the criminal returns of the various States, due allowance must be made for certain factors, such as the relative powers of the higher and lower courts. In the case of lower courts, the actual number of laws in each State whose breach renders a person liable to fine or imprisonment must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws or laws connected with vagrancy or gaming, the views of the magistrates, and instructions issued to the police, may be responsible for considerable variations in the returns. The strength and distribution of the police forces, and the age-constitution and distribution of the population of the States, also influence the results. Due weight should be given also to the prevalence of undetected crime, but information on this point is not available for all States. It may be mentioned that each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia (largely a Court of Appeal intermediate to the Privy Council although it has also original jurisdiction), the Commonwealth Court of Conciliation and Arbitration and the Federal Court of Bankruptcy. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution which appears on page 18 of this issue.

2. **Powers of the Magistrates.**—Preceding issues of the Official Year Book contain a brief statement of the powers of the magistrates in the various States (see No. 22, p. 462), but this information is not repeated in the present volume.

3. **Cases Tried at Magistrates' Courts.**—The total number of arrest and summons cases tried at Magistrates' Courts in each State is given below for 1939 and for the years 1943 to 1946 :—

CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1939.	1943.	1944.	1945.	1946.
New South Wales ..	144,848	135,503	126,501	141,079	173,311
Victoria	82,858	71,093	64,889	60,744	64,487
Queensland(*a*)	32,501	24,397	24,040	27,838	33,096
South Australia	22,776	(*a*)24,058	(*a*)22,646	(*a*)22,837	(*a*)27,067
Western Australia ..	24,111	22,085	21,682	19,716	24,831
Tasmania	9,498	6,508	6,318	6,422	9,390
Northern Territory(*a*) ..	1,494	540	244	349	786
Australian Capital Territory	284	419	409	354	633
Total	318,370	284,603	266,729	279,339	333,601

(*a*) Year ended 30th June following.

Investigation of the returns shows that considerable variations in the figures for single States are occasioned by breaches of new Acts, or the more stringent enforcement of the provisions of existing Acts. Any deductions drawn from the total returns as to the increase or decrease of criminality should, therefore, be based upon a careful analysis of the detailed list of offences.

4. **Convictions at Magistrates' Courts.**—The figures given in the previous table include, of course, a number of people who were charged without sufficient reasons, and, statistically, are not of general importance. A classification of convictions of persons who appeared before the lower courts in each State during 1944 to 1946 is given in the following table :—

CONVICTIONS AT MAGISTRATES' COURTS.

Class of Offence.	N.S.W.	Vic.	Qld.(*a*)	S.A.(*a*)	W.A.	Tas.	N.T.(*a*)	A.C.T.	Aust.

Other Miscellaneous ..	54.748	34.091	9.105	16,577	14,724	5,207	479	72	135,003
Total	157,108	56,628	30,623	24,491	23,042	7,529	738	440	300,599

(*a*) Year ended 30th June following.

The following table shows the number of convictions in 1939 and in each year from 1943 to 1946 :—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1939.	1943.	1944.	1945.	1946.
New South Wales ..	126,353	118,366	111,008	125,982	157,108
Victoria	72,180	62,361	56,939	53,101	56,628
Queensland(*a*)	28,920	21,504	20,926	25,417	30,623
South Australia	20,429	(*a*) 22,079	(*a*) 20,554	(*a*) 20,585	(*a*) 24,491
Western Australia ..	22,539	20,842	20,302	18,263	23,042
Tasmania ..	8,722	5,122	5,229	5,048	7,529
Northern Territory(*a*) ..	1,394	422	194	244	738
Australian Capital Territory	260	408	286	308	440
Total	280,803	251,194	235,438	248,948	300,599

(*a*) Year ended 30th June following.

5. Convictions for Serious Crime at Magistrates' Courts.—(i) *General.* While the figures given in the preceding table refer to the entire body of convictions, the fact must not be overlooked that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliament. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense from some other offences, also help to swell the list. The following table has therefore been prepared for the purpose of showing the convictions at magistrates' courts for what may be regarded as the more serious offences, i.e., against the person and property, either separately or conjointly, and forgery and offences against the currency. Owing to the smallness of the population, the rates for the Northern and the Australian Capital Territories are subject to considerable variation.

(ii) *Number and Rates, Years* 1939, 1943 *to* 1946. The following table shows the number and rates of convictions for serious crime at magistrates' courts for the years 1939, 1943 to 1946 :—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.

State or Territory.	1939.	1943.	1944.	1945.	1946.
			NUMBER.		
New South Wales ..	12,724	15,536	15,038	15,768	14,870
Victoria	5,727	6,471	6,186	5,211	5,196
Queensland(*a*)	2,402	3,353	3,509	3,090	2,473
South Australia	1,224	(*a*) 1,669	(*a*) 1,465	(*a*) 1,435	(*a*) 1,571
Western Australia ..	2,614	3,128	2,841	2,401	2,767
Tasmania	959	795	655	707	982
Northern Territory(*a*) ..	44	95	40	23	87
Australian Capital Territory	59	251	77	115	69
Total	25,753	31,298	29,811	28,750	28,015
			PER 10,000 OF THE POPULATION.		
New South Wales ..	46.26	54.36	52.10	54.04	50.48
Victoria	30.48	32.79	31.08	25.96	25.65
Queensland(*a*)	23.52	31.79	32.84	28.51	22.54
South Australia	20.50	(*a*) 27.08	(*a*) 23.51	(*a*) 22.74	(*a*) 24.53
Western Australia ..	55.63	65.60	58.99	49.23	56.13
Tasmania	40.15	32.73	26.67	28.44	38.94
Northern Territory(*a*) ..	60.58	91.35	38.21	21.84	81.53
Australian Capital Territory	47.18	184.04	54.23	76.61	43.44
Total	36.91	43.19	40.72	38.84	37.45

(*a*) Year ended 30th June following.

(iii) *Rate of Convictions,* 1881 *to* 1946. Statistics of convictions reveal a consistent increase in the rate of serious crime from 1925 to 1931, when 37.1 convictions per 10,000 of the population were recorded. Following this comparatively high figure the rate declined to 32.4 in 1933 but increased considerably to 36.9 in 1939. In 1941 the rate declined to 33.6 but rose in the next two years to 43.2, the highest recorded since 1891, when the average number of convictions was 44.8. The rate declined in 1944 to 40.7, in 1945 to 38.8 and in 1946 to 37.5. The rate of convictions over a series of years is included below; only the more serious offences particularized in the preceding sub-section have been taken into consideration.

RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS: AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1946.
Convictions per 10,000 persons	69.3	44.8	29.1	24.6	29.2	37.1	33.6	37.5

6. **Committals to Superior Courts.**—(i) *General.* In a previous paragraph it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, inasmuch as the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connexion allowances must be made for the want of uniformity in jurisdiction. A classification of the offences for which persons appearing in the lower courts were committed to higher courts in each State and Territory for the years 1944 to 1946 is shown in the following tables:—

COMMITTALS TO SUPERIOR COURTS.

Class of Offence.	N.S.W.	Vic.	Qld.(*a*)	S.A.(*a*)	W.A.	Tas.	N.T.(*a*)	A.C.T.	Aust.

Australian Capital Territory	14.4	..	0.7	4.0	33.4
Total	7.1	7.3	7.0	7.7	8.3

(*a*) Year ended 30th June following.

(ii) *Rate of Committals since* 1881. With occasional variations the rate of committals for serious crime has remained fairly stable during recent years, and, if the comparison be carried back further, the movement in the rate has undergone very little change during the present century. The rate at intervals since 1881 is as follows :—

RATE OF COMMITTALS TO SUPERIOR COURTS : AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1946.
Committals per 10,000 persons	12	11	8	6	7	8	6	8

7. **Drunkenness.**—(i) *Cases and Convictions.* The number of arrest and summons cases of drunkenness and the convictions recorded during the year 1939 and for the years 1943 to 1946 are given in the following table :—

DRUNKENNESS : CASES AND CONVICTIONS.

State or Territory.	1939.		1943.		1944.		1945.		1946.

(*a*) Year ended 30th June following.

Under the heading "drunkenness" are included cases of ordinary drunkenness, drunkenness and disorderliness, and habitual drunkenness.

The number of convictions is, as might naturally be expected, almost identical with the number of cases.

(ii) *Convictions per* 10,000 *of Population.* The convictions for drunkenness per 10,000 of the population during 1939 and each of the years from 1943 to 1946 are given in the following table :—

CONVICTIONS FOR DRUNKENNESS PER 10,000 OF THE POPULATION.

State or Territory.	1939.	1943.	1944.	1945.	1946.
New South Wales ..	117.8	122.1	119.8	149.3	210.9
Victoria	60.8	63.1	62.3	52.0	57.3
Queensland (*a*)	108.9	78.6	69.3	107.2	146.2
South Australia	43.5	(*a*) 74.9	(*a*) 63.9	(*a*) 55.6	(*a*) 67.1
Western Australia ..	56.6	80.1	85.5	82.8	82.2
Tasmania	17.0	15.1	11.9	9.0	17.8
Australian Capital Territory	91.2	27.1	43.7	24.7	85.6
Total	88.0	89.1	85.9	99.4	132.1

(*a*) Year ended 30th June following.

In the twenties the convictions for drunkenness averaged approximately 100 per 10,000 inhabitants, but the rate fell away considerably during the following years and was only 57.1 in 1931. With the improvement in the social condition of the people following that year, the average rose steadily to 84.1 in 1936, declined somewhat during the next two years, and rose to 91.7 in 1942, but decreased to 89.1 in 1943 and to 85.9 in 1944 but rose to 99.4 in 1945 and then sharply to 132.1 in 1946. Figures for the consumption of beer have followed a fairly similar course. From an average of 11.33 gallons per head of the population consumed for some years prior to 1931–32, when the amount declined to 7.32 gallons, the average rose each year to 13.76 gallons in 1941–42, but declined in 1942–43 to 12.59 gallons, rose to 13.00 gallons in 1943–44, declined to 12.90 gallons in 1944–45, rose to 13.45 in 1945–46, and then sharply to 15.94 in 1946–47.

The convictions for drunkenness taken by themselves are not altogether a satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, are by no means identical in all the States. Another factor is the distribution of the population. Arrest or summons for drunkenness obviously is more likely in the regions densely populated than in those sparsely populated. In addition allowance must be made for the attitude of the magistracy, the police and the general public in regard to the offence. Due account also must be taken of the effect of legislation dealing with the limitation of hours during which liquor may be sold in hotels.

(iii) *Consumption of Intoxicants.* The following table shows the consumption of spirits, wine and beer per head of the population in Australia during the years 1938–39 and 1940–41 to 1946–47 :—

CONSUMPTION OF INTOXICANTS IN AUSTRALIA.

Year.	Consumption per Head of Population.		
	Spirits.	Wine.	Beer.
	Imp. Galls.	Imp. Galls.	Imp. Galls.
1938–39	0.22	0.65	12.13
1940–41	0.21	0.91	13.71
1941–42	0.20	0.98	13.76
1942–43	0.22	1.28	12.59
1943–44	0.23	1.17	13.00
1944–45	0.23	1.18	12.90
1945–46	0.32	0.96	13.45
1946–47	0.29	1.07	15.94

(iv) *Treatment of Drunkenness.* (*a*) *General.* Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. During recent years the dangers of moral contamination in this way have been more accurately appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with those convicted of more serious offences.

(*b*) *Remedial.* Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions. The laws in the various States are as follows :—New South Wales, Inebriates Act 1912 ; Victoria, Inebriates Act 1928 ; Queensland, Inebriate Institutions Act 1896 ; South Australia, Inebriates Act 1908–1934, Convicted Inebriates Act 1913–1934 ; Western Australia, Inebriates Act 1912–1919 ; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. In most cases the institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management ; nevertheless, the results of remedial measures have been encouraging.

8. **First Offenders.**—In all the States, statutes dealing with first offenders have been in force for many years. Existing legislation is as follows :—New South Wales, Crimes Act 1900 amended in 1924 and 1929, First Offenders (Women) Act 1919 ; Victoria, Crimes Act 1928 ; Queensland, Criminal Code Acts 1899 to 1945 ; South Australia, Offenders Probation Act 1913–1941 ; Western Australia, Criminal Code Act 1913–1942 ; Tasmania, Probation of Offenders Act 1934. The method of procedure is practically the same in all cases, i.e., with regard to most first offenders convicted of a minor offence the magistrate or judge is empowered to allow the offender to go free on recognizances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those convicted under it having been found to relapse into crime.

9. **Children's Courts.**—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Queensland, Western Australia and Tasmania, while Children's Courts, although not under that title, are provided for by the Maintenance Act 1926–1941 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court.

§ 2. Superior Courts (Judges' Courts).

1. **Convictions at Superior Courts.**—The following is a list of the principal offences for which persons were convicted in superior courts in each State and Territory during 1946 and in Australia as a whole in that year and for the years 1944 and 1945 :—

CONVICTIONS AT SUPERIOR COURTS, 1946.

Offence.	N.S.W. (*a*)	Vic.	Qld. (*a*)	S.A.	W.A.	Tas.	N.T. (*a*)	A.C.T.	Australia.

Northern Territory (*a*)	11	29	25	20	50
Australian Capital Territory	14	..	1	4	7
Total	2,200	2,513	2,387	2,498	2,824
			PER 10,000 OF THE POPULATION.		
New South Wales (*a*)	3.6	3.9	3.6	4.0	4.7
Victoria	3.7	4.2	4.0	3.5	3.5
Queensland (*a*)	2.1	1.9	2.0	2.1	2.4
South Australia	3.0	3.3	2.6	3.2	3.6
Western Australia	1.5	2.0	1.8	2.0	1.9
Tasmania	1.6	1.4	2.3	2.9	2.9
Northern Territory (*a*)	15.2	27.0	23.9	19.0	46.9
Australian Capital Territory	11.2	..	0.7	2.7	4.4
Total	3.2	3.5	3.3	3.4	3.8

(*a*) Year ended 30th June following.

The rate of convictions per 10,000 of population for Australia, which in 1930 stood at 4.0, fell each year thereafter until 1936 when the record low level of 2.3 was reached. It rose during each of the next three years to 3.2 in 1939 and after falling to 2.8 in 1940 rose in each of the next three years reaching 3.5 in 1943. Following a fall to 3.3 in 1944 the rate rose during 1945 and 1946 and stood at 3.8 in the latter year. Owing to the smallness of the population and the particular conditions prevailing there, the rates for the Territories naturally show considerable variation.

3. **Habitual Offenders.**—Some account of the methods adopted in each State in connexion with habitual offenders is given in preceding issues of the Official Year Book (see No. 22, pp. 469–70).

4. **Capital Punishment.**—There were nine executions in Australia during the period 1937 to 1946. Two took place in New South Wales (one in 1938 and one in 1939), three in Victoria (two in 1939 and one in 1942), three in South Australia (one in 1938, one in 1944 and one in 1946) and one in Tasmania in 1946.

Under the Criminal Code Amendment Act 1922 capital punishment was abolished in Queensland.

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' court. With the growth of settlement and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be stated that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loth to convict on this charge, owing to the uncertainty whether sentence of death will be carried out.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; and from 1931 to 1940, 1.

§ 3. Civil Courts.

1. **Lower Courts.**—The total number of plaints entered and the amounts awarded to plaintiffs during the years 1944 to 1946 are given in the following table. Particulars for earlier years appear in preceding issues of the Official Year Book.

The figures represent the returns from the Small Debts Courts in New South Wales, Petty Session Courts in Victoria, Magistrates' Courts in Queensland, Local Courts of South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in Northern Territory and Court of Petty Sessions in the Australian Capital Territory.

(*a*) Year ended 30th June following.

2. **Superior Courts.**—The following table shows the transactions on the civil side in the Superior Courts during the years 1944 to 1946. The particulars given below include the number and amount of judgments entered by default or confession, or agreement, and differ from those in issues of the Official Year Book prior to No. 29, which related in most States only to cases actually tried during the year.

The New South Wales returns refer to judgments in the District Courts only, and exclude 677 judgments in 1944, 607 judgments in 1945 and 803 judgments in 1946 signed in the Supreme Court, for which the amounts entered are not available.

4. **Bankruptcies.**—Particulars relating to bankruptcy in each State up to the end of 1927 were incorporated under this heading in issues of the Official Year Book prior to No. 23. Under the terms of the Bankruptcy Act 1924–1946 jurisdiction in bankruptcy and insolvency was taken over by the Commonwealth from 1st August, 1928. The Act made provision for the declaration of districts, and each State (except Queensland and Northern Territory) has been declared a bankruptcy district The bankruptcy district of New South Wales includes the Australian Capital Territory. Queensland has been divided into three districts corresponding to the three Supreme Court districts in that State. Operations under the Act for the years ended 31st July, 1946 and 1947 are given in the following table. For the purposes of comparison, the annual averages for periods between the years 1920 and 1947 are appended to the table.

FEDERAL BANKRUPTCY ACT, 1946-47.

It is pointed out that the procedure in certain States has been influenced largely by the procedure in force prior to the passing of the Commonwealth Act, and that, therefore, no particular significance attaches to the large number of compositions, etc., in South Australia.

The Bankruptcy Act 1930 created a Federal Court of Bankruptcy and provided for the appointment of a Judge or two Judges thereto. In 1930 a Commonwealth Judge in Bankruptcy was appointed in addition to the State Judges to deal with bankruptcy work in New South Wales and Victoria, as the Courts in these States were unable to cope with the business. All the bankruptcy cases in these States are now heard in the Federal Court which sits in Sydney and Melbourne alternatively.

5. **High Court of Australia.** Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The Commonwealth High Court possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution, and in the Judiciary Act 1903–1940. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals

of the various States as occasion may require. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1945 and 1946.

TRANSACTIONS OF COMMONWEALTH HIGH COURT.

Original Jurisdiction.	1945.	1946.	Appellate Jurisdiction.	1945.	1946.
Number of writs issued	81	84	Number of appeals set down for hearing ..	92	91
Number of causes entered for trial ..	23	12			
Verdicts for plaintiffs	20	9	Number allowed ..	27	24
Verdicts for defendants	7	1	Number dismissed ..	50	46
Otherwise disposed of ..	4	12			
Amount of judgments	£97,094	£28,414	Otherwise disposed of	11	11

During 1945 and 1946 respectively the High Court dealt also with the following: Appeals from Assessments under Taxation Assessment Act, 18, 23; Special cases stated for the opinion of the Full Court, 22, 12; Applications for Prohibitions, etc., 38, 20. The fees collected amounted to £1,163 in 1945 and £1,040 in 1946.

6. **Commonwealth Court of Conciliation and Arbitration.**—A detailed statement regarding the operation of this Court, which was established under the Commonwealth Conciliation and Arbitration Act 1904–1947 will be found in Chapter XII. "Labour, Wages and Prices", and in the *Labour Report.*

§ 4. Police and Prisons.

1. **General.**—Early issues of the Official Year Book (see No. 4, p. 918) contain a *résumé* of the evolution of the police force in Australia up to the passing of the Police Act 1862 (25 Vic. No. 16) in New South Wales.

2. **Duties of the Police.**—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Thus, in New South Wales, it has been estimated that one-fifth of the time of the force was taken up in extraneous duties not connected with the protection of life and property, while the cash value of the services rendered to other Government departments was stated as over £200,000 per annum. The Queensland Commissioner refers to the circumstance that in 1941–42 no less than 54 important subsidiary offices were held by the police. In South Australia, the Commissioner alludes to the large number of subsidiary duties performed by police officers, and mentions that for the year ended June, 1946, many inquiries were made on behalf of other State and Commonwealth departments.

3. **Strength of Police Force.**—(i) *General.* The strength of the police force in each State during 1939 and the years 1943 to 1946 is given in the following table. It may be mentioned that the police forces (with the exception of the small body of Commonwealth police maintained in the Northern Territory and in the Australian Capital Territory) are entirely under State control, but, by arrangement, the Commonwealth Government utilizes their services in various directions, such as acting as aliens registration officers, and policing the liquid fuel regulations, etc.

STRENGTH OF POLICE FORCES.

State or Territory.	Area of State in Sq. Miles.	No. of Police.				
		1939.	1943.	1944.	1945.	1946.
New South Wales ..	309,433	3,907	3,711	3,630	3,710	4,084

South Australia (*a*) ..	380,070	905	866	884	922	920
Western Australia (*a*)	975,920	600	582	571	626	661
Tasmania (*a*) ..	26,215	296	312	286	317	314
Northern Territory(*a*)	523,620	48	43	43	46	40
Aust. Cap. Territory	939	17	18	20	22	29
Total ..	2,974,581	9,566	9,528	9,373	9,515	9,980

(*a*) 30th June of year following.

The figures for New South Wales for 1946 exclude 16 " black trackers " and 5 " cadet trackers " (i.e., natives employed in detection of offenders chiefly in outlying districts) and 4 matrons, while the Victorian returns exclude 1 matron and 1 black tracker. For Queensland the figures exclude 35 black trackers, for South Australia 3 wardresses and 5 black trackers, for Western Australia 31 black trackers and 5 female searchers, and for the Northern Territory 34 black trackers. Women police are employed in all the States, the respective numbers for 1946 included in the table above being :—New South Wales 25, Victoria 15, Queensland 8, South Australia 19, Western Australia 9, and Tasmania 4. Their work is mainly preventive, and the importance and usefulness of their duties have been referred to in very high terms by the Chief Officers of Police. In his Report for 1946 the Commissioner of Police in New South Wales refers to the valuable work performed by the women police in connexion with vice and crime, particularly in relation to females and neglected children. They also carry out escort duties in respect of female prisoners. The experience in other States has been of a similar nature.

(ii) *Proportion to Population.* The average number of persons in the various States to each police officer during 1939 and the years 1943 to 1946 is shown in the following table. In considering these figures allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

POLICE FORCES IN RELATION TO POPULATION.

State or Territory.	Number of Persons per Sq. Mile. 1947 Census.	Persons to each Police Officer.				
		1939.	1943.	1944.	1945.	1946.

Total	2.55	733	765	786	782	756

(*a*) 30th June of year following.

4. **Prison Accommodation and Prisoners, 1945 and 1946.**—The table below shows the number of prisons in each State, the accommodation therein, and the number of prisoners in confinement at the end of 1945 and 1946 :—

PRISON ACCOMMODATION AND PRISONERS.

State or Territory.	Number of Prisons.		Accommodation in—				Prisoners at End of Year.	
			Separate Cells.		Wards.			
	1945.	1946.	1945.	1946.	1945.	1946.	1945.	1946.
New South Wales(*a*) ..	14	16	2,012	2,214	..	..	1,684	1,768
Victoria	8	8	1,200	1,200	256	256	966	952
Queensland	10	9	596	612	182	170	493	356
South Australia ..	15	15	673	672	174	173	213	250
Western Australia(*a*) ..	21	21	431	431	182	182	279	290
Tasmania(*a*)	1	1	142	142	4	4	96	120
Northern Territory ..	2	2	11	12	5	19	4	19
Total	71	72	5,065	5,283	803	804	3,735	3,755

(*a*) Year ended 30th June following.

The figures refer to prisoners under sentence and exclude aborigines. There are no gaols in the Australian Capital Territory, but there is a lock-up consisting of three cells attached to the police station at Canberra and a lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by the Magistrate's Court.

5. **Prisoners in Gaol, 1939, 1943 to 1946.**—The number of prisoners in gaol at 31st December in each of the years 1939 and 1943 to 1946 and the proportion per 10,000 of the population are given in the following table. The figures refer to prisoners under sentence and exclude aborigines.

PRISONERS IN GAOL.

State or Territory.	1939.	1943.	1944.	1945.	1946.
		NUMBER.			
New South Wales (*a*) ..	1,357	1,739	1,856	1,684	1,768
Victoria	1,144	1,089	1,101	966	952
Queensland	261	318	473	493	356
South Australia ..	199	232	224	213	250
Western Australia (*a*) ..	244	259	294	279	290
Tasmania (*a*)	108	80	87	96	120
Northern Territory ..	23	(*a*) 45	22	4	19
Total	3,336	3,762	4,057	3,735	3,755
		PER 10,000 OF THE POPULATION.			
New South Wales (*a*) ..	4.9	6.0	6.4	5.7	5.9
Victoria	6.1	5.5	5.5	4.8	4.7
Queensland	2.6	3.0	4.4	4.5	3.2
South Australia	3.3	3.8	3.6	3.4	3.9
Western Australia (*a*) ..	5.2	5.4	6.0	5.7	5.8
Tasmania (*a*)	4.5	3.3	3.5	3.8	4.7
Total	4.8	5.2	5.5	5.0	5.0

(*a*) 30th June of year following.

After remaining stationary at 6.5 per 10,000 for the four years ended 1932 the proportion of prisoners in gaol to the total population declined each year to 4.5 in 1937. It fluctuated slightly during the next four years but remained under 5.0. The proportion was 4.9 in 1942 and rose slightly above this rate to 5.5 in 1944 and fell to 5.0 in 1945 and 1946. This figure compares most favourably with that obtaining in 1891, when the proportion was as high as 16 per 10,000. Rates for the Northern Territory have not been included on account of the prevailing abnormal conditions.

6. **Improvement in Prison Methods.**—In previous issues of the Official Year Book a fairly detailed account is given of the improvements effected in each State during recent years in regard to methods of prison management (see Official Year Book No. 22, pp. 471–4), but this information is not repeated in the present volume.

§ 5. Cost of Administration of Justice.

1. **Expenditure by the States.**—The table below shows the expenditure from Consolidated Revenue during 1938–39 and 1944–45 and 1945–46 in connexion with the administration of justice in each of the States.

It is difficult to obtain comparable figures of the total costs of the various services under this heading, therefore net costs have been substituted for gross expenditure. It will be noted that in South Australia and Western Australia the receipts for legal fees and registrations exceed the actual expenditure under "Justice".

NET EXPENDITURE ON JUSTICE.

Total ..	416,304	4,368,537	556,723	1 1	11 10	1 6

2. **Commonwealth Expenditure.**—The expenditure shown in the previous table is that incurred by the State Governments only, and does not include expenditure of the Commonwealth Attorney-General's Department, which is given hereunder for the years 1938–39 and 1941–42 to 1945–46 :—

EXPENDITURE OF THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT.

Year.	Gross Expenditure.	Receipts.	Net Expenditure.
	£	£	£
1938–39	281,497	111,036	170,461
1941–42	319,171	90,820	228,351
1942–43	351,452	103,919	247,533
1943–44	386,749	117,128	269,621
1944–45	433,646	140,198	293,448
1945–46	472,604	135,239	337,365

The totals for each year include expenditure in connexion with patents and copyright which amounted in 1945–46 to £67,897. The Commonwealth took over jurisdiction in bankruptcy in August, 1928, and the expenditure thereon in 1945–46 amounted to £39,679, including the salary of the Commonwealth Judge, £2,500. Expenditure in connexion with the Australian Capital Territory police amounted in 1945–46 to £13,279, and £6,413 was expended on miscellaneous items including the Law Court, Titles Office and Industrial Board. Revenue of the Attorney-General's Department amounted for the year 1945–46 to £135,239, comprising £95,122 for patents, copyright, trademarks and designs, £14,526 for bankruptcy and £25,591 miscellaneous, including fees and fines.

In addition to the foregoing a sum of £32,650 was expended in the Northern Territory during 1944–45 and £38,440 in 1945–46 by the Department of the Interior on the administration of justice, including the costs of the police force and prisons.

CHAPTER VIII.

PUBLIC BENEVOLENCE, ETC.

A. INTRODUCTION.

Charity and charitable effort in Australia may be classified under three headings: (*a*) State; (*b*) public; and (*c*) private. To the first belong all institutions wholly provided for by the State, such as the principal mental hospitals in the various States, the Government and leased hospitals in Western Australia, and the Government homes for the infirm in New South Wales. The other classes comprise public institutions of two kinds, namely :—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the former division belong such institutions as the principal metropolitan hospitals. In the latter are included institutions established and endowed by individuals for the benefit of the needy generally. All charitable movements of a private character are included in the third group. A more or less accurate statistical account is possible in classes (*a*) and (*b*), but in regard to (*c*) complete tabulation is, for obvious reasons, impossible. Owing to differences in the dates of collection and tabulation it is impossible to bring statistics of some charitable institutions to a common year.

No poor-rate is levied in Australia. Reference to age and invalid pensions, funeral benefits, maternity allowances, child endowment, widows' pensions, hospital benefits, tuberculosis benefits, and unemployment and sickness benefits which are provided by the Commonwealth Government from the National Welfare Fund under the Social Services Consolidation Act 1947 will be found later in this Chapter.

From time to time relief funds have been organized for famine-stricken countries in various parts of the world, or for places where plagues, flood, fire, or earthquake have shown the need of urgent relief. Special funds were also raised for persons disabled or bereaved through war. Complete statistical information in regard to these forms of charity is not, however, available. It may be mentioned that the daily Press frequently accepts the duty of collectorship in charity appeals. In regard to subscriptions to the various patriotic funds which were instituted in consequence of the 1914–18 War, the total for Australia was estimated to exceed £12,500,000.

B. THE LARGER CHARITIES OF AUSTRALIA.

§ 1. Public Hospitals (other than Mental Hospitals).

1. **General.**—All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for infectious diseases, tubercular patients, women, children, incurables, etc.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals and private hospitals conducted commercially. The particulars for New South Wales in the following tables relate to hospitals operating under the control of the Hospitals Commission.

2. **Principal Hospitals in each State.**—In earlier issues of the Official Year Book (see No. 22, pp. 481–2) particulars respecting staff, accommodation, etc., of each of the principal hospitals were given.

3. **Number, Staff and Accommodation, 1945–46.**—Details regarding the number of hospitals, staffs and accommodation for the year 1945–46 are given in the following table :—

PUBLIC HOSPITALS : NUMBER, STAFF AND ACCOMMODATION, 1945–46.

Average Daily Number Resident	12,495	5,229	5,337	2,160	2,017	1,191	101	28,530

In addition to those admitted to the institutions there are large numbers of out-patients. During 1945–46 there were 678,408 out-patients treated in New South Wales, 281,146 in Victoria, 308,498 in Queensland, 67,453 in South Australia, 52,699 (estimated) in Western Australia, 27,816 (estimated) in Tasmania and 3,862 in the Australian Capital Territory, making a total for Australia of 1,419,882.

5. **Revenue and Expenditure.**—The revenue and expenditure for the year 1945–46 were as follows. The revenue includes the Commonwealth Hospital Benefit Scheme which operated in Victoria, Queensland, Western Australia and Tasmania from 1st January, 1946, in South Australia from 1st February, 1946, and in New South Wales and the Australian Capital Territory from 1st July, 1946 (*see* Part C., § 6 following).

(*a*) Includes State aid for buildings, £137,511. (*b*) Included in "Other". (*c*) Includes legacies and bequests for capital purposes, £35,453. (*d*) Includes loans raised under Section 37 of the Public Hospitals Act, £508. (*e*) Includes such items as Purchases of Land, Cost of New Buildings and Additions to Buildings. (*f*) Not available. (*g*) Incomplete.

6. **Summary, 1938–39 and 1942–43 to 1945–46.**—A summary for the years 1938–39 and 1942–43 to 1945–46 of the number of hospitals in Australia, medical and nursing staffs, beds, admissions, in-patients treated, out-patients, deaths, average daily number resident, revenue, and expenditure is given in the following table. The figures relate to both general and special hospitals.

PUBLIC HOSPITALS: AUSTRALIA.

Particulars.		1938–39.	1942–43.	1943–44.	1944–45.	1945–46.

(*a*) Estimates for South Australia, Western Australia and Tasmania.

§. 2. Benevolent and Destitute Asylums.

1. **General.**—The public provisions for the care of indigent old people has been a feature of the social development of recent years in most countries. Numerous establishments exist in Australia for the housing and protection of persons no longer able to provide for themselves. These institutions are supported by Government and municipal aid, public subscriptions, bequests, etc.; while in many cases relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (see No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1945–46 are given in the following table :—

BENEVOLENT ASYLUMS : REVENUE AND EXPENDITURE, 1945–46.

Particulars.	N.S.W. (*a*)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.

1944–45	224,684	205,406	141,358	27,836	35,169	44,959	679,412

(*a*) These figures relate to the three State Hospitals and Homes only, at 31st December, 1945.
(*b*) Includes £14,597 in Victoria, £4,374 in Queensland, £901 in Western Australia and £500 in Tasmania, covering such items as Purchases of Land, Cost of New Buildings and Additions to Buildings.

§ 3. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded-out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded-out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (see No. 22, p. 486).

3. **Transactions of State Departments.**—The following table summarizes the transactions during 1945–46 of State Departments in connexion with children under their control or supervision. In addition to neglected children, the figures include uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody :—

CHILDREN UNDER GOVERNMENT AUTHORITY : SUMMARY, 1945-46.

Particulars.	N.S.W.	Vic. (*a*)	Q'land.	S. Aust.	W. Aust.	Tas.	Total.

Net cost to State,							
1945–46 ..	397,761	186,298	153,307	65,758	11,438	10,339	824,901
1944–45 ..	386,281	193,234	151,745	63,921	12,207	10,329	817,717

(*a*) Year ended 31st December, 1945. (*b*) Includes inmates of hospitals. (*c*) Include 2,979 children in receipt of Ration Relief.

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

§ 4. Leper Hospitals.

Isolation hospitals for the care and treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Fantome Island, North Queensland); Western Australia (Derby); and the Northern Territory (Channel Island, near Darwin). At the end of 1946 there were 17 cases in residence at Little Bay, 46 at Peel Island, 78 at Fantome Island, 231 at Derby, 71 at Channel Island, and 4 isolated cases in the south of Western Australia. Of the 447 cases, 331 were aboriginals, 46 Asiatics and 70 Europeans.

§ 5. Mental Hospitals.

1. **General.**—The methods of compiling statistics of insanity are fairly uniform throughout the States, but there is an element of uncertainty as to possible differences in diagnosis in the early stages of the disease. The figures for the States cannot be brought to a common year; consequently the following particulars relate to a combination of calendar and financial years. Licensed houses are included in all particulars excepting revenue and expenditure for New South Wales. The figures exclude those of reception houses and observation wards in gaols. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian hospitals.

2. **Hospitals, Staff, etc., 1945–46.**—Particulars regarding the number of institutions, the medical and nursing staffs, and accommodation are given in the following table for the year 1945–46 :—

MENTAL HOSPITALS : NUMBER, STAFFS, ACCOMMODATION, 1945–46.(*a*)

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
Number of Institutions ..	12	9	5	2	4	1	33

Number of patients on books at end of year—							
Males	5,929	3,478	2,050	1,026	898	318	13,699
Females	5,936	3,784	1,826	998	577	338	13,459
Total	11,865	7,262	3,876	2,024	1,475	656	27,158
Average daily number resident—							
Males	5,561	2,976	2,000	1,012	863	323	12,735
Females	5,416	3,304	1,745	961	552	334	12,312
Total	10,977	6,280	3,745	1,973	1,415	657	25,047
Number of patients on books at end of year per 1,000 of population—							
Males	4.03	3.49	3.66	3.26	3.57	2.51	3.68
Females	4.03	3.71	3.45	3.12	2.42	2.70	3.62
Total	4.03	3.60	3.56	3.19	3.01	2.60	3.65
Average number of patients resident in mental hospitals per 1,000 of mean population—							
Males	3.80	3.00	3.59	3.24	3.44	2.57	3.44
Females	3.69	3.25	3.31	3.02	2.33	2.68	3.34
Total	3.74	3.13	3.45	3.13	2.90	2.62	3.38

(*a*) See footnote (*a*) to previous table.

Persons who are well advanced towards recovery are allowed to leave the institutions and reside with their relatives or friends, but they are under supervision and their names are kept in the records.

4. **Revenue and Expenditure, 1945–46.**—The revenue of Government mental hospitals is small in comparison with their cost, and consists chiefly of patients' fees. The proportion of expenditure borne by the State amounts to about 83 per cent. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian hospitals.

MENTAL HOSPITALS : FINANCES, 1945–46.

(*a*) Includes the following amounts for capital expenditure on Purchases of Land, Cost of New Buildings, and Additions to Buildings: New South Wales, £16,554; Victoria, £53,250; South Australia, £190; and Western Australia, £2,001.

5. **Summary for Australia, 1938–39 and 1942–43 to 1945–46.**—The following table gives a summary of mental hospitals in Australia during 1938–39 and for each of the years 1942–43 to 1945–46 :—

MENTAL HOSPITALS : SUMMARY, AUSTRALIA.

Particulars.		1938–39.	1942–43.	1943–44.	1944–45.	1945–46.
Institutions	No.	35	32	33	32	33
Medical Staff	,,	92	92	97	89	95
Nursing Staff	,,	4,922	3,714	3,958	4,104	3,803
Beds	,,	25,654	25,977	26,246	26,177	26,520
Admissions	,,	3,757	3,869	3,858	3,674	3,919
Discharged as recovered, relieved, etc.	,,	1,800	2,052	2,017	1,703	1,792
Deaths	,,	1,632	1,992	1,977	1,834	1,976
Inmates at end of year ..	,,	26,509	26,977	26,841	26,978	27,158
Revenue (excluding Government Grants)	£	262,817	388,213	389,699	427,278	428,951
Expenditure—Total ..	£	1,903,817	2,138,957	2,308,995	2,409,317	2,579,399
,, —Per Average Daily Resident..		£79/2/4	£84/16/9	£92/7/2	£97/10/4	£102/19/8

6. **Number of Mental Patients, 1938–39 and 1942–43 to 1945–46.**—The total number returned as under treatment shows slight fluctuations during the period but the proportion to total population shows a slight decline to 1945–46. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an actual increase in insanity.

MENTAL PATIENTS IN INSTITUTIONS.

State.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.
			NUMBER.		
New South Wales	11,678	11,954	11,789	11,850	11,865
Victoria	7,326	7,256	7,252	7,242	7,262
Queensland	3,650	3,749	3,819	3,840	3,876
South Australia	1,747	1,892	1,889	1,925	2,024
Western Australia	1,477	1,474	1,452	1,465	1,475
Tasmania	631	652	640	656	656
Australia	26,509	26,977	26,841	26,978	27,158
			PER 1,000 OF POPULATION.		
New South Wales	4.25	4.18	4.08	4.06	4.03
Victoria	3.92	3.70	3.66	3.62	3.60
Queensland	3.59	3.58	3.60	3.57	3.56
South Australia	2.93	3.09	3.05	3.07	3.19
Western Australia	3.16	3.09	3.04	3.02	3.01
Tasmania	2.66	2.69	2.61	2.64	2.60
Australia	3.81	3.74	3.68	3.66	3.65

The difference between States in the number of mental patients in institutions per 1,000 of population may be due to some extent to differences in classification.

7. **Causes of Insanity.**—The general information available respecting the causes of the insanity of persons admitted to institutions is too unsatisfactory to enable a classification of patients by cause of insanity to be given.

8. **Length of Residence in Hospital, 1945–46.**—(i) *New South Wales and Victoria.* Particulars are not available regarding the average length of residence in hospitals of persons who died or were discharged during the year.

(ii) *Queensland.* The average residence of those who died during 1945–46 was 10 years 9 days for males, and 6 years 129 days for females; of those discharged, 1 year 44 days for males, and 1 year 72 days for females.

(iii) *South Australia.* The average residence of those who died during 1945–46 was 5 years 6 months 5 days for males, and 5 years 4 months 25 days for females; of those discharged, 2 years 3 months 23 days for males, and 3 years 8 months 1 day for females.

(iv) *Western Australia.* The average residence of those who died in 1945 was 13 years 10 months 10 days for males, and 5 years 6 months 25 days for females; of those discharged, 4 years 6 months 12 days for males, and 4 years 7 months 11 days for females.

(v) *Tasmania.* The average residence of those who died during 1945–46 was 12 years 180 days for males, and 11 years 60 days for females; of those discharged, 314 days for males, and 175 days for females.

§ 6. Protection of Aborigines.

For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, whilst others but rarely come near the stations. The native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1945–46 was as follows; figures in brackets are for year 1944–45 :—New South Wales, £53,046 (£52,894); Victoria, £6,385 (£5,400); Queensland, £115,689 (£97,411); South Australia, £28,986 (£31,466); Western Australia, £69,747 (£61,398); Northern Territory, £35,071 (£24,961); Australian Capital Territory, £664 (£640); total for Australia, £309,588 (£274,170). At a census of aborigines taken at 30th June, 1944 in all States except New South Wales the number of full-blood and half-caste aborigines living in supervised camps was as follows (particulars for New South Wales as at 30th June, 1941 have been added) :—

ABORIGINES IN SUPERVISED CAMPS, 30th JUNE, 1944.

Particulars.	New South Wales. (a)	Victoria.	Queensland.	South Australia.	Western Australia.	Northern Territory.	Total. (b)
	No.	No.	No.	No.	No.	No.	No.
Full-bloods ..	373	18	4,298	726	4,450	8,361	18,227
Half-castes ..	4,114	229	2,271	1,118	1,698	449	9,980

(a) At 30th June, 1941. (b) Includes one full-blood and 101 half-castes in the Australian Capital Territory.

Particulars regarding total number of aborigines in each State will be found in the Chapter XVI. "Population".

§ 7. Royal Life Saving Society.

In each of the State capitals, "centres" of the Royal Life Saving Society have been established, and in some States sub-centres have also been established in the larger provincial districts. In 1934 an Australian Federal Council of this Society was formed with head-quarters at Melbourne, and each State centre, or branch, as it is now called, is controlled by the new organization. Saving of life from drowning and other forms of asphyxiation is the object of the Society, and its immediate aims are (*a*) educative and (*b*) remedial. The encouragement of swimming and life-saving in schools, colleges, clubs, etc., will bring about a more widespread knowledge of these necessary matters, and there is increasing provision of life-belts, reels, lines, warning provisions, and other first-aid appliances on ocean beaches, wharves and other suitable places. Numerous certificates of proficiency in various grades are issued annually after examination throughout Australia, the number for the individual States for 1946–47 being :—New South Wales, 9,586; Victoria, 5,419; Queensland, 1,782; South Australia, 1,100; Western Australia, 1,774; Tasmania, 708; and Fiji, which comes under the control of the Australian Federal Council, 1,032.

§ 8. Royal Humane Society.

The Royal Humane Society of Australasia has for its objects (*a*) to grant awards for skill, promptness and perseverance in life-saving, where the rescuer has risked his or her life; (*b*) to provide assistance in cases of danger and apparent death; (*c*) to restore the apparently drowned; (*d*) to collect and circulate the latest information regarding approved methods and apparatus for life-saving. Awards of medals and certificates are made numbering about 100 annually.

§ 9. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include asylums for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds, etc.

§ 10. Total Expenditure on Charities.

Issues of the Official Year Book prior to No. 24 embodied statistics of expenditure on charities. The returns available, however, included a portion only of direct expenditure by Governments, and, in general, there is lack of harmony in the information available for the different States. Pending the result of further inquiry it has been decided to omit this table from the present chapter.

C. SOCIAL SERVICES BENEFITS.

§ 1. Commonwealth Age and Invalid Pensions.

1. **General.**—The social services benefits are incorporated under the Social Services Consolidation Act 1947 and are financed from the National Welfare Fund. In previous issues of the Official Year Book an account is given of the introduction of the age pension system in Australia, together with a detailed description of the Commonwealth Invalid and Old-age Pensions Act 1908, which became operative on 1st July, 1909. Invalid pensions were first paid from 15th December, 1910. The following statement shows the rates of pension at July, 1909, and the rates as they have been varied since that date :—

RATES OF PENSION PAYABLE.

(*a*) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulation 112A—Statutory Rule 315 of 1943.

From 13th August, 1946, the annual rate at which an age or invalid pension, except for a blind pensioner, is determined was reduced by the amount (if any) by which the income of the pensioner apart from the pension exceeds £52 per annum and by £1 for every complete £10 of property between £50 and £400 and by £2 for every complete £10 between £401 and £650.

In addition to the existing provision for the exemption of the value of a pensioner's home in the assessment of property, exemption applies also in respect of the value of furniture and personal effects, surrender values of life assurance policies up to £200, the capital values of life interests, or annuities and contingent interests in property, the present value of reversionary interests up to £500 and the value of any property to which a person is entitled from an estate but which has not been received by that person.

A single adult invalid pension claimant will be subject to a means test only in respect to his own income and property.

Particulars relating to the provision of an adjustment of the pension rate in accordance with the variations of the Retail Price Index-number are given in the Official Year Book No. 35, p. 580. This provision was repealed by Act No. 16 of 1944 and the rate of pension reverted to £70 4s. per annum (£1 7s. per week).

Subject to the conditions of the Act, every person, who is not receiving an invalid pension, and who has attained the age of sixty-five years (in the case of females, sixty years), is, while in Australia, qualified to receive an age pension.

Asiatics and aboriginal natives of Australia, Africa, the islands of the Pacific or New Zealand generally, are not eligible to receive an age or invalid pension, but the Act was amended in November, 1941 to include those Asiatics who are British subjects, and in May, 1942, to include, under certain conditions, aboriginal natives of Australia and of the Pacific Islands.

Invalid pensions were granted from the 15th December, 1910. Subject to the conditions of the Act, every person above the age of sixteen years who is permanently incapacitated for work, and every permanently blind person above the age of sixteen years, provided that, in each case, an age pension is not being received, is, while in Australia, qualified to receive an invalid pension. A claimant for an invalid pension, or an invalid pensioner, may be required to undertake such training for a vocation or physical rehabilitation as is available. In 1920 special provision was made for a permanently blind person, by which the annual pension was at such a rate (not exceeding that shown in the table above), as would make his income plus that of his wife together with the pension equal to an amount not exceeding £221 per annum. This amount has since been varied from time to time. Under the amending Act of April, 1944, the amount of pension payable to a blind person was reducible by the amount (if any) by which the income of the pensioner and the pensioner's wife (or husband) exceeded £260 per annum (£5 per week). From 13th August, 1946, the permissible income was raised to £279 10s. per annum (£5 7s. 6d. per week) while the limit on property was increased from £400 to £650. Where a husband and wife are both blind and qualified to receive a pension only half the combined income in excess of £279 10s. per annum is deducted from each pension.

An amendment to the Act, assented to on 29th March, 1943, provided for the payment from 8th July, 1943 of an allowance not exceeding £39 per annum—from 3rd July, 1947 this allowance was increased to £52 per annum—to wives of invalid pensioners, provided that they themselves are not age or invalid pensioners. This allowance was subject to the deduction of the amount by which the other income of the wife exceeded £32 10s. per annum (12s. 6d. per week)—this allowance was increased to £52 per annum (£1 per week) from 13th August, 1946—£1 for every complete £10 by which the value of the property of the wife exceeds £50 up to £400 and by £2 for every complete £10 of the remainder of the property. Provision is also made for the payment of an additional allowance of £13 per annum (5s. per week) where there are children under sixteen years of age. From 1st July, 1943, an amount not to exceed £10 was payable towards the funeral costs of age and invalid pensioners.

During 1939–40 all invalid pensions in force were specially reviewed, and at 30th June, 1940 all those pensioners who had become qualified for age pensions by age and residence were transferred to the age pension list. This transference has been continued since that date, though the numbers involved are naturally much smaller. Reciprocity between Australia and New Zealand in respect of age and invalid pensions operated from 1st September, 1943.

2. **Age Pensions.**—(i) *Number in force.* At 30th June, 1946 there were 264,826 age pensions in force. During 1946–47, 47,734 age pensions claims were granted and 1,517 pensioners were transferred from the invalid pension list, while 23,904 pensions expired through cancellations and deaths. The net increase for the year was 25,347 and the total in force at 30th June, 1947, 290,173.

(ii) *Sexes of Pensioners—States.* Of the age pensioners at 30th June, 1947, 103,747 (or 36 per cent.) were males, and 186,426 (or 64 per cent.) were females. Details for each State are as follows :—

AGE PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1947.

State.	Males.	Females.	Total.	Masculinity.(*a*)
New South Wales (*b*)	42,886	76,350	119,236	56.17
Victoria	25,160	49,610	74,770	50.72
Queensland	14,857	23,897	38,754	62.17
South Australia (*c*)	8,858	17,059	25,917	51.93
Western Australia	8,198	12,964	21,162	63.24
Tasmania	3,788	6,546	10,334	57.87
Total—30th June, 1947	103,747	186,426	290,173	55·65
„ 1946	96,569	168,257	264,826	57·39
„ 1945	92,565	160,069	252,634	57·83

(*a*) Number of males to each 100 females. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

(iii) *Ages and Conjugal Conditions of Pensioners.* The recorded ages of the 47,734 persons (17,629 males and 30,105 females) to whom age pensions were granted during the year 1946–47 varied considerably, ranging from 6,571 at age 60 to 1 at age 101, but 36,317 were in the 60–70 group. The conjugal condition of these new pensioners was as follows :—Males—single, 2,358 ; married, 11,902 ; and widowed, 3,369 : Females—single, 3,108 ; married, 13,627 ; and widowed, 13,370.

3. **Invalid Pensions.**—(i) *Number in force.* The number of invalid pensioners increased from 62,868 in 1945–46 to 68,277 in 1946–47, an increase of 5,409. Total pensions granted during the year were 12,842 while 5,916 pensions ceased through cancellations or deaths, and 1,517 were transferred to the age pension list.

(ii) *Sexes of Pensioners.* Of the 68,277 persons in receipt of invalid pensions on 30th June, 1947, 35,089, or 51 per cent. were males, and 33,188, or 49 per cent. were females. Details for the several States are as follows :—

INVALID PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1947.

State.	Males.	Females.	Total.	Masculinity.(*a*)
New South Wales (*b*)	15,978	14,512	30,490	110.12
Victoria	7,277	7,396	14,673	98·39
Queensland	5,872	5,010	10,882	117.19
South Australia (*c*)	2,372	2,879	5,251	82·39
Western Australia	2,101	1,901	4,002	110.52
Tasmania	1,489	1,490	2,979	99·93
Total—30th June, 1947	35,089	33,188	68,277	105·73
„ 1946	31,619	31,249	62,868	101.18
„ 1945	28,552	29,729	58,281	96.04

(*a*) Number of males to each 100 females. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

(iii) *Ages and Conjugal Condition of Pensioners.* The recorded ages of the 12,842 persons (7,874 males and 4,968 females) to whom invalid pensions were granted during 1946–47 varied from 16 to 93, 5,705 or 44 per cent. being in the 45–59 years age-group.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—Males—single, 2,562; married, 4,805; and widowed, 507: Females—single, 2,420; married, 1,885; and widowed, 663.

4. **Cost of Administration.**—The total cost of administering age and invalid pensions, including wives' allowances and funeral benefits, was £256,504 in 1946–47, or 0.87 per cent. of the amount paid to pensioners, benevolent asylums and hospitals, and for wives' allowances. The corresponding cost in 1945–46 was £218,740, or 0.81 per cent. of the total payments.

The actual sum disbursed in age and invalid pensions in the financial year 1946–47 apart from the cost of administration but including the amount paid to asylums and hospitals for the maintenance of pensioners, and allowances to wives of invalid pensioners, was £29,416,673 (78s. 3d. per head of mean population). In 1945–46 it was £26,962,420 (72s. 7d. per head of mean population).

5. **Summary.**—The following table gives details of age and invalid pensions and approximate cost of administration for the five years 1938–39 and 1943–44 to 1946–47:—

AGE AND INVALID PENSIONS: SUMMARY, AUSTRALIA.

Year ended 30th June–	Number of Pensioners.				Amount Paid in Pensions.	Total Payment to Pensioners and Institutions. (*b*)	Cost of Administration (approximate).	Cost of Administration per £100 paid to Pensioners and Institutions (approximate).	Average Fortnightly Pension as at 30th June.
	Age.		Invalid.	Total.					
	No.	Est. No. per 1,000 of persons eligible on age qualification. (*a*)							
			No.	No.	£	£	£	s. d.	s. d.
1939	232,836	376	88,812	321,648	15,798,038	15,991,782	128,000	16 0	38 5
1944	257,186	355	57,942	315,128	21,479,933	21,699,100	201,000	18 6	51 11

1942–43 ..	22,292,835	17,702,594	3,913,130	21,615,724

(*a*) Includes amounts paid to Benevolent Asylums and Hospitals for the maintenance of pensioners, and allowances to wives of invalid pensioners. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

§ 2. Commonwealth Child Endowment.

1. **General.**—The Commonwealth Child Endowment Act came into operation on 1st July, 1941, and provided for payment of 5s. per week (increased to 7s. 6d. per week from 26th June, 1945) for each child in excess of one under 16 years of age maintained in a family, and for children under 16 years of age in approved institutions. During the year 1946–47, 61,406 claims were granted. Cancellations amounted to 35,495 and the number of endowed family claims in force at 30th June, 1947 was 559,730, an increase of 25,911 during the year.

2. **Summary.**—The following table shows particulars of the operations under the Child Endowment Act during the year ended 30th June, 1947 :—

CHILD ENDOWMENT : SUMMARY, 1946–47.

State.	Family Groups.					Total Payments to Endowees and Institutions.
	Claims in force at end of year.	Endowed Children.		Annual Liability at 30th June, 1947.

1942–43 ..	491,121	891,221	1.82	11,585,873	23.59	11,659,626

(*a*) Includes Australian Capital Territory. (*b*) Includes Northern Territory.

In addition to the children endowed in families, child endowment benefits were paid in respect of children in approved institutions during 1942–43 to 1946–47 as follows: 1942–43, 16,938; 1943–44, 18,396; 1944–45, 18,116; 1945–46, 18,989; and in 1946–47, 19,743.

In 1946–47 the cost of administration was £150,884 or 0.76 per cent. of the total payments made compared with £134,130 or 0.74 per cent. in 1945–46.

3. **Number of Children.**—The following table shows the number of claims in force, the number of endowed children and the number of unendowed children in endowed families, classified according to the number of children in the family:—

CHILD ENDOWMENT: NUMBER OF CHILDREN(*a*) AT 30th JUNE, 1947.

Size of Family.	Claims of Endowed Families in force at 30th June, 1947.	Children.		
		Endowed.	Unendowed in Endowed Families.	Total in Endowed Families
Two children ..	311,408	311,408	311,408	622,816
Three ,, ..	144,379	288,758	144,379	433,137

(*a*) Under 16 years of age.

§ 3. Commonwealth Widows' Pensions.

The Widows' Pensions Act which operated from 1st July, 1942 is now incorporated in the Social Services Consolidation Act 1947 and from 8th July, 1947 provision has been made for the following classes of widows (*a*) and the rate payable in each class:—

Class "A" is a widow (not being a widow specified in Class "D") who has the custody, care and control of one or more children under 16 years of age.

Rate £110 per annum.

Class "B" is a widow who is not less than 50 years of age, without dependent children.

Rate £83 4s. per annum.

Class "C" is a widow who at the time of the death of husband or within 26 weeks after is less than 50 years of age, without dependent children, and is in necessitous circumstances.

Rate £1 17s. 6d. per week for not more than 26 weeks.

Class "D" is a widow (*a*) whose husband has been imprisoned for more than 6 months and who has the custody, control and care of one or more children under 16 years, or is not less than 50 years of age.

Rate £83 4s. per annum.

A widow may not receive a widows' pension if she is receiving an age or invalid pension.

(*a*) See par. 3, following page.

The value of property in respect of a Class "A" widow after deductions of charges or encumbrances thereon, but excluding the value of house owned and resided in, together with furniture and personal effects, etc., as shown in § 1 (i) on page 297, shall not exceed £1,000; and in the case of a Class "B" or a Class "D" widow the amount is £650.

The annual rate at which a pension is determined shall be reduced: (*a*) by the amount (if any) by which the widow's income apart from the pension exceeds £52 per annum; (*b*) in the case of a Class "B" or a Class "D" widow by £1 for every complete £10 of property between £50 and £400 and by £1 for every complete £7 between £401 to £650.

The term "widow" includes a dependent female (i.e., a woman, who for not less than three years immediately prior to the death of a man was wholly or mainly maintained by him, though not legally married to him, lived with him as his wife on a permanent and *bona fide* domestic basis); a deserted wife; a woman whose marriage has been dissolved and who has not remarried; a woman whose husband is an inmate of a hospital for the insane; and a woman whose husband is imprisoned for not less than six months.

The first payment under the Act was made on 27th July, 1942. The number of pensions current at 30th June, 1947 was 42,742 and the amount paid during 1946–47 was £3,366,288. The following table shows details of widows' pensions paid in each State in the year 1946–47, and for Australia for the years 1945–46, 1944–45, 1943–44 and 1942–43 :—

(*a*) The Commonwealth Government commenced to pay widows' pensions from 1st July, 1942 (*b*) Excludes thirteen (1946–47), ten (1945–46), nine (1944–45), eight (1943–44) and six (1942–43) pensions in respect of pensioners in Benevolent Asylums. (*c*) Payments were four-weekly up to the 24th June, 1947 pay, but are now fortnightly. (*d*) Based on mean population for the financial year. (*e*) Includes Australian Capital Territory. (*f*) Includes Northern Territory.

§ 4. Commonwealth Maternity Allowances.

1. **General.**—Part V. of the Social Services Consolidation Act 1947 (previously the Maternity Allowance Act 1912–1944) makes provision for the payment of maternity allowances. The most important conditions in the original Act were that the sum of five pounds was payable in the case of each confinement resulting in the birth of a viable child whether such child was born alive or dead. The mother must be a native of Australia or intend to settle permanently therein. No payment is made to aliens. The

Act was amended in May, 1942, to provide for the allowance to be paid to aboriginal natives of Australia, subject to certain conditions. The Financial Emergency Act 1931 reduced the allowance payable to £4 and limited the application of the original Act to those cases where the combined income of husband and wife did not exceed £260 (reduced to £208 by the Financial Emergency Act 1932) in the previous 12 months. There were further subsequent changes and at 30th June, 1943, the income limit was £247, with an additional £13 in respect of each previous living child under 14, the maximum being £338. The amount of the allowance was £4 10s. where there was no previous living child under 14 years of age, £5 where there were one or two previous living children under 14 and £7 10s. where there were three or more such children.

By an amendment to the Act in March, 1943, the income limit provisions were repealed and the allowances payable in respect of births from 1st July, 1943, were :— Where there are no other children under 14 years of age, £5 ; where there are one or two children under 14, £6 ; and where there are three or more children under 14, £7 10s. ; together with the payment of £1 5s. for each of the four weeks before and after the birth of a child. By a further amendment, which operated from 5th April, 1944, the ages of children taken into account has been increased from 14 to 16 years of age, and the payment of £1 5s. per week was increased to £1 17s. 6d. per week when twins are born and to £2 10s. per week when triplets are born at one birth.

From 3rd July, 1947 the allowances payable were as follows :—

(i) Where there are no other children under 16 years, £15 ;
(ii) Where there are one or two other children under 16 years, £16 ;
(iii) Where there are three or more children under 16 years £17 10s. Where more than one child is born at a birth the allowance is increased by £5 in respect of each additional child born at that birth.

The following table gives details of the maternity allowance claims paid and rejected since the inception and for the five years 1938–39 and 1943–44 to 1946–47 :—

§ 5. Commonwealth Unemployment and Sickness Benefits.

1. **General.**—A very important addition was made to Commonwealth social legislation when the Unemployment and Sickness Benefits Act received assent on 5th April, 1944 The Act came into operation on 1st July, 1945, and is financed from the National Welfare Fund. The provisions are now incorporated in the Social Services Consolidation Act 1947. The first payments were made on 19th July, 1945.

Persons eligible include all males between the ages of 16 and 65 years and all females between the ages of 16 and 60 years who have lived in Australia for the twelve months immediately preceding a claim for benefit and who are not qualified to receive a service pension under the Soldiers' Repatriation Act or an age, invalid or widows' pension.

The payment of unemployment benefit is subject to the claimant being capable of undertaking and willing to accept suitable employment. The payment of sickness benefit is subject to the production of a medical certificate or some other satisfactory evidence, except where the applicant lives in remote or inaccessible areas of Australia or where for some good reason it is impossible to produce it.

2. **Maximum Rates of Benefits and Income.**—The maximum weekly rates of benefits for both unemployment and sickness and allowed income are as follows :—

Age and Conjugal Condition.	Maximum Weekly Benefit.								Allowed Weekly Income.	
	Claimant.		Dependent Spouse.		Child.		Total.			
	s.	*d.*	*s.*	*d.*	*s.*	*d.*	*s.*	*d.*	*s.*	*d.*
Unmarried—										
16 years and under 17 years	15	0	..		..		15	0	5	0
17 „ „ „ 18 „	15	0	..		..		15	0	10	0
18 „ „ „ 21 „	20	0	..		..		20	0	15	0
21 years and over	25	0	..		..		25	0	20	0
Married	25	0	20	0	5	0	50	0	20	0

Where an unmarried claimant has the custody, care and control of a child under the age of sixteen years, the total income may be increased by 5s. per week.

3. **Means Test.**—All benefits are subject to a means test which disregards the value of property owned by a claimant. In applying the means test for sickness benefits, any amount up to 20s. per week received by a claimant from a friendly society or other

approved benefit society is disregarded. For the purpose of calculating unemployment benefit, the income of the family group is taken into account, but in the case of sickness benefit the claimant's income only will be considered in determining whether there shall be reduction in benefit because of the possession of other income.

Where a person is entitled to some other payment such as war pension or worker's compensation in respect of the disability for which he claims sickness benefit, payment will be made only to the extent to which such other payment is less than the amount of benefit.

In the case of unemployment the Act provides for payment of benefit for the duration of the unemployment. and in the case of sickness for the duration of temporary incapacity. Where incapacity through sickness becomes permanent, an invalid pension may be granted, subject to the conditions governing the grant of invalid pensions.

4. **Waiting Period.**—There is a waiting period of seven days in respect of which unemployment or sickness benefit is not payable.

5. **Special Benefit.**—A separate class of benefit known as a special benefit is also provided which gives assistance to persons on account of special circumstances or in cases of hardship where a person is not qualified for either sickness or unemployment benefit by reason of his inability to comply with one or other of the statutory requirements, at a rate not exceeding that which might otherwise have been payable.

6. **Administration.**—The Department of Social Services, following a policy of decentralization in order to bring the department into closer touch with the people whom it is intended to serve, has established regional offices in most States to deal with claims for all classes of social service benefits within each region. Pending the opening of additional regional offices, however, and as a matter of administrative convenience, certain Commonwealth Employment Officers will act as Registrars of Social Services, whilst others will act as agents for the regional offices. Payment of unemployment and sickness benefits is made by means of cheques, issued by the Director of Social Services in the metropolitan areas and by Regional Registrars in the country districts.

7. **Statistics, 1945–46 and 1946–47.**—(i) *General.* The following tables give details of the operations for the years 1945–46 and 1946–47. Attention is directed to the differences shown in the tables. In tables in paras. (ii) and (iii) late advices of benefits granted or discontinued have been allocated to their correct year of occurrence, but in tables in (v) and (vi) it has not been practicable to allocate 1945–46 advices received after the completion of the tables for that year, therefore they have been included in the 1946–47 figures.

(ii) *Claims admitted, Exits, Persons on Benefit.* At 30th June, 1946, 13,989 persons were in receipt of benefit, comprising 6,873 unemployment, 6,920 sickness and 196 special benefits. During the year 1946–47, 136,210 claims were admitted (78,578 unemployment, 56,026 sickness and 1,606 special), whilst 134,052 benefits were discontinued (79,243 unemployment, 53,463 sickness and 1,346 special), leaving 16,147 benefits in force at 28th June, 1947 (6,208 unemployment, 9,483 sickness and 456 special).

The total number of benefits granted and discontinued during the year 1946–47 and persons on benefit at the beginning and end of that year, in each class of benefit, is shown in the following table :—

CLAIMS ADMITTED, DISCONTINUANCES AND PERSONS ON BENEFIT, 1946–47 : AUSTRALIA.

Class of Benefit.	On Benefit at 30th June, 1946.		Claims admitted during 1946–47.		Discontinuances during 1946–47.		On Benefit at 28th June, 1947.

§ 6. Hospitals Benefits Act.

Under this Act, which was assented to on 11th October, 1945, the Commonwealth Government has entered into agreements with the States to pay to the States the benefit rate of six shillings per day for each bed occupied by a qualified person in a public ward in a public hospital, provided that the States abolish the means test for admission into public wards and cease charging fees to qualified persons admitted thereto. For dates of operation, and payments made, in the several States, *see* Part B, §1, para. 5, *ante*.

The allowance of six shillings per day provided by the Commonwealth is given with the object of reimbursing the States the amount of money they lose because of the abolition of fees in public wards and for the loss of any charitable donations. The Commonwealth Government has undertaken to increase the amount if it is inadequate to meet these losses.

The agreement provides for the Commonwealth to pay a similar benefit towards the cost of treatment of qualified persons occupying beds in non-public wards in public hospitals, and for the State Government to reduce the hospital fees by the equivalent of the benefit rate, thus relieving qualified persons of fees to this extent.

Private hospitals are entitled to claim six shillings a day for each bed occupied by a qualified patient. These hospitals must be approved by a joint committee of Commonwealth and State health authorities before payment of benefit is made. The hospitals are required to reduce each qualified patient's account by the amount of the benefit received from the Commonwealth.

The Commonwealth and States have agreed to form a National Hospital Council of Commonwealth and State representatives, the functions of which will be to advise the Commonwealth and State Governments on any hospital matters referred to it by the Commonwealth or State Governments.

§ 7. Tuberculosis Act.

This Act was assented to on 11th October, 1945, and an amending Act on 15th August, 1946. The following four principles are embodied :—

(*a*) The earlier the disease is recognized the better the prospect of recovery for the patient and the better from the point of view of the community. Accordingly, the Commonwealth proposal is aimed at encouraging the States to establish additional diagnostic facilities. Section 4 of the Act provides for the Commonwealth to subsidize £ for £ the expenditure of the States in the maintenance of diagnostic facilities, such as clinics, dispensaries, X-ray equipment, etc. The Commonwealth is to provide up to a maximum of £50,000 per year on this basis.

(*b*) The Commonwealth will pay to the States a subsidy of six shillings a day per bed occupied in tuberculosis hospitals. Payment is subject to the condition that free treatment is given and no fees are charged in public wards.

(*c*) Many patients, after a period in a hospital or sanatorium, require further care. To assist the States to extend after-care facilities, the Commonwealth proposes to make available up to £50,000 per annum, on a £ for £ basis, for maintenance expenditure on after-care facilities established after the commencement of the Act.

(*d*) Medical authorities are agreed that an adequate level of nutrition should be maintained as a first line of resistance to tuberculosis. To this end, the Government provides special allowances for sufferers from tuberculosis or their dependants with the objects of :—

(i) encouraging such sufferers to refrain from working and to take treatment ;

(ii) minimizing the spread of tuberculosis ; and

(iii) promoting the better treatment of tuberculosis.

This allowance will be paid only in those cases where the fight against the disease will be positively assisted. It is not an automatic grant to all cases of tuberculosis.

§ 8. Pharmaceutical Benefits Act.

A Pharmaceutical Benefits Act passed all stages of the Commonwealth Parliament in March, 1944 and was amended in September, 1945. This Act was the subject of a High Court action, as a result of which the Government sought by means of a referendum of the people the constitutional power necessary to implement the Act. For further information on legal and constitutional action in this matter, see Chapter III.—General Government, pages 64 and 65. This power having been granted, a further Pharmaceutical Benefits Act, which repealed the Acts of 1944 and 1945, was assented to on 12th June, 1947. This Act embodies a scheme for providing pharmaceutical benefits to all persons ordinarily resident in Australia. The benefits to be provided are contained in a Commonwealth Pharmaceutical Formulary, which is subject to periodic revision by a Formulary Committee comprised of members of the medical and pharmaceutical professions. Benefits are supplied without cost to the person receiving the benefit, payment being made by the Commonwealth to authorized suppliers from the National Welfare Fund. Special arrangements exist for supplying benefits or their equivalent to persons residing in isolated areas. These pharmaceutical benefits were first made available to the public on 1st June, 1948.

CHAPTER IX.

PUBLIC HYGIENE.

§ 1. Public Health Legislation and Administration.

Reference to the various public health authorities, Commonwealth and State, their functions, and the legislation administered, may be found in earlier issues of the Official Year Book (see No. 22, pp. 493–5).

§ 2. The National Health and Medical Research Council.

In 1926 the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between Commonwealth and State Health Authorities". This Council held sessions each year except in 1932. In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions :—

To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research ;

To advise the Commonwealth Government as to the expenditure of money specifically appropriated as money to be spent on the advice of this Council ;

To advise the Commonwealth Government as to the expenditure of money upon medical research and as to projects of medical research generally ;

To advise Commonwealth and State Governments upon the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The Council consists of the Commonwealth Director-General of Health (as Chairman), two officers of his Department, the official head of the Health Department in each State, together with representatives of the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, and (jointly) the four Australian Universities having medical schools. A prominent layman and laywoman, appointed by the Commonwealth Government, also serve on the Council.

The first session of the National Health and Medical Research Council met at Hobart in February, 1937 ; the twentieth session met at Canberra in November, 1945.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to provide assistance :—

(*a*) to Departments of the Commonwealth or of a State engaged in medical research ;

(*b*) to Universities for the purpose of medical research ;

(*c*) to institutions and persons engaged in medical research ;

(*d*) in the training of persons in medical research.

Approved research institutions under this system now number 44. During the year 1945 grants numbered 28 in the following fields :—bacteriology, biochemistry, chemotherapy, dentistry, medical survey, obstetrics, ophthalmology, pathology physiology and pharmacology, and virus diseases. In certain instances, equipment and apparatus have been made available by the Council ; this has greatly facilitated some specialized lines of research.

The work that is being done under these grants is already yielding results : beyond this practical achievement, the original objectives of the Council are being attained in encouraging young graduates to take up research work and in securing a continuity and permanence of medical research in Australia. During recent years, researches very largely were directed to problems associated with the war.

§ 3. The Commonwealth Department of Health.

1. **General.**—An Order-in-Council dated 3rd March, 1921, defined various functions to be performed by the Commonwealth Department of Health in addition to quarantine, which is the only specific public health power of the Commonwealth Parliament under the Commonwealth Constitution. Many essential services have been developed by the Department to meet current needs and to further public health throughout Australia. In earlier issues of the Official Year Book reference has been made to several features of this development, including : The Royal Commission on National Health, 1925 (see No. 22, pp. 509–10), the International Pacific Health Conferences (see No. 22, p. 510 and No. 29, p. 334), Industrial Hygiene (see No. 18, pp. 522–55), Tropical Hygiene (see No. 22, pp. 506–7, No. 25, pp. 415–7, and No. 32, p. 226), and the Commonwealth Advisory Council on Nutrition (see No. 32, pp. 222–3). Reference to quarantine is made below (see § 4, par. 2).

2. **The Commonwealth Serum Laboratories.**—The establishment for the preparation of Jennerian vaccine situated at Royal Park, near Melbourne, formerly known as the "Calf Lymph Depot" was in 1918 greatly enlarged by the Commonwealth. The remodelled institution is designated the "Commonwealth Serum Laboratories" and is administered by the Commonwealth Department of Health. The laboratories are now installed in fully equipped buildings and a large staff is employed. At Broadmeadows a farm of 254 acres has been developed, under veterinary supervision, for the many thousands of animals required for the work of the laboratories.

The list of biological preparations produced by the laboratories has been extended until at the present time almost the whole range of these products is manufactured and Australia is practically independent of other countries in thus producing its own requirements. War needs greatly increased all activities. Penicillin is being produced in quantities sufficient for ordinary commercial purposes. Constant research is being conducted into every relevant aspect of bacteriology and immunology and new sera and prophylactic agents are being tested as the growth of medical knowledge opens up new avenues of treatment, prevention and diagnosis. Other original and applied research relating to all aspects of public health is maintained. The laboratories serve as the national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization Interim Commission). For the past 22 years the production of veterinary biological products has been a feature of the work of the laboratories. In recent years an extensive development has occurred in this direction and the products are being used in greatly increased amounts in all States for the prevention or treatment of diseases in domestic animals and stock.

3. **The Commonwealth Health Laboratories.**—The twelve health laboratories of the Department are situated at strategic points throughout Australia. They are located at Darwin, Cairns, Townsville, Rockhampton, Toowoomba, Lismore, Bendigo, Launceston, Hobart, Port Pirie, Kalgoorlie and Broome. These laboratories were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide medical practitioners of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other hand, is essential to the efficient investigation of disease and the effective operation of control measures.

From this standpoint, the laboratories have already proved their value in the determination of Weil's disease and endemic typhus in North Queensland, in the investigation of special local problems at Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations close co-operation has existed with State and local health and hospital services ; especially is this so in Queensland where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers hitherto unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the Sydney School of Public Health and Tropical Medicine.

A major part of the work performed at the Kalgoorlie laboratory. since its establishment in 1925, has been the medical examination, on behalf of the State Department of Mines, of employees and applicants for employment in the metalliferous mines in Western Australia. These examinations are performed in accordance with the provisions of the State Mines Regulation Act and the Mine Workers' Relief Act, the objects of which are to provide a healthy body of men for the industry and to free the industry of, and protect the future of, those found to be suffering from serious pulmonary disease. The examinations include clinical, laboratory and radiographic investigation. By means of a mobile X-ray unit an annual tour is also made of outlying mining centres.

X-ray facilities are also provided at the Bendigo laboratory, as part of the campaign against tuberculosis, for the examination of miners and other radiographic work in the district.

4. **The School of Public Health and Tropical Medicine.**—The Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney as from 4th March, 1930, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The work of the school comprises both teaching and investigation. Courses are held for the University post-graduate diploma of public health and the diploma of tropical medicine and tropical hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Other classes include students in architectural, social and school hygiene, and lay officers and nurses in the tropical services and missionaries. In addition to this work, throughout the war all the resources of the School were made available for the training of medical and hygiene officers and other ranks from all the Services of the Australian and Allied Forces.

Investigational work covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out not only in Australia but in co-operation with the local administrations in Papua, New Guinea, Norfolk Island and Nauru. Further details may be found in previous issues of the Official Year Book (see No. 29, p. 334).

5. **The Australian Institute of Anatomy.**—Information concerning the Australian Institute of Anatomy at Canberra is given in previous issues of the Official Year Book (see No. 32, p. 919-21). In 1931 the Institute became an integral part of the Commonwealth Department of Health. The work of the Institute on general problems of comparative anatomy has now been concentrated on aspects of structure and function with special reference to the development of the growing child. Biochemical and biological research in this field is being developed in close association with the model kindergarten centres established by the Department in each capital city (see par. 8 below). Work in specialized aspects of nutrition has steadily increased. The Institute now plays an important part in research and the scientific application of nutritional knowledge under Australian conditions. The background of comparative anatomy and the museums of the Institute are maintained as part of the general plan of work, and an expert zoologist is a member of the body of research workers at the Institute. See also Chapter XXVIII. "Miscellaneous".

6. **The Northern Territory Medical Service.**—As from 1st April, 1939, the Commonwealth Department of Health assumed administrative responsibility for the medical and health services of the Northern Territory, absorbing the Northern Territory Medical Service. With the growing importance of Darwin as the northern gateway to Australia and as an administrative and service centre its health services were strengthened, a new hospital at Darwin was built and the hospital at Alice Springs was enlarged.

With civilian evacuation during the Pacific war, military control of the medical services operated in the years 1942 to 1945. Civilian control was resumed by the Department during the period November, 1945 to May, 1946, starting at Alice Springs and gradually extending north to Darwin. The hospitals at Alice Springs, Tennant Creek, Katherine and Darwin, and the Health Laboratory at Darwin were re-established as civilian institutions.

An aerial medical service, operated by the Department, is based on Darwin, and comprises two Dragon aircraft and a pilot. The Flying Doctor Service of Australia has a base at Alice Springs, and the medical officers at the hospital act as the doctors for this service.

7. **National Fitness.**—Health authorities in Australia have closely followed the world-wide movement for the advancement of physical fitness and in several States active work has been proceeding over some years. In 1938, following a recommendation of the National Health and Medical Research Council, the Commonwealth Government agreed to appoint a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and local government authorities in the movement. Meetings of this Council are held at regular intervals, at least annually. Meanwhile active State Councils have been formed in all States. As a result of the recommendations of the central Council, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In July, 1941, a National Fitness Act was passed by the Commonwealth Parliament to ensure greater permanence to the movement, and in June, 1942, the Commonwealth Grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory. In 1946 the total grants were extended for a further period of five years. The movement continues to develop and to gain public interest and support throughout Australia.

8. **The Pre-school Child.**—Sessions of the National Health and Medical Research Council and the reports of the Commonwealth Advisory Council on Nutrition have called attention to the need for greater effort throughout Australia directed towards the care of the growing child, especially during the pre-school period. Movements for the care of the infant and the welfare of the school child are already developed by State authorities as recorded in §§ 7 and 8 below. The Commonwealth Government felt that more could be done for the child of pre-school age, and it was decided to give a lead by making it possible to demonstrate what could be done and the practical methods which could be applied.

The Commonwealth Government therefore decided to establish in each capital city a pre-school demonstration centre, known as the Lady Gowrie Child Centre, and in order to achieve the best results in association with those who have had experience in this field it has secured the co-operation of the Federal Organization of Kindergarten Unions which is operating under the title of "The Australian Association for Pre-school Child Development". A suitable site was secured in each capital city and the necessary school structure was built. Formerly the administration of these centres was under the direction of the local Kindergarten Union and the employment of staff was made with the approval of the Commonwealth Department of Health. Recently the local Lady Gowrie Child Centre Committees were given a greater degree of autonomy, so that while the technical supervision still rests with the Australian Association for Pre-school Child Development, the management of each centre, including staffing, is in the hands of the local Committee. This development is associated with a change in the method of financial control. An annual grant is made to each Committee towards the cost of the centre, the disbursement of these funds being at the discretion of the local Committee, subject to the general supervision of the Australian Association for Pre-school Child Development. This applies in so far as the educational side is concerned, and in this field advantage is being taken of the opportunity to try new methods and to make systematic records of observations with the object of securing reliable knowledge of the educational technique of this pre-school period.

Along with this educational practice there proceeds also the study of physiological requirements of the child and of the interaction between physical and mental health under varying conditions. The children available at these centres provide a considerable mass of human material for control and study, which is of great value in view of the importance of the study of growth and of nutrition of their age-period. Not only are routine measurements made of height, weight and other bodily data, but problems of nutrition are studied in detail. The medical work at each State centre is carried on on a uniform basis, according to a scheme formulated at, and directed from, the Australian Institute of Anatomy, Canberra, where parallel investigations on the laboratory side are being undertaken.

9. **Organization for the Control of Cancer.**—The persistent increase in cancer mortality has led to the development in Australia of a national organization directed towards the control of this disease. The Commonwealth Department of Health has actively participated in this movement. Since 1928 the Australian Cancer Conferences, convened by the Department, have provided an opportunity each year for those actively engaged in the campaign against the disease to meet for the discussion of problems and the determination of lines of action and further development. The tenth conference in this series met in New Zealand in February, 1939, and so marked an association which has been maintained between Australia and the Dominion since the inception of the conferences.

A large amount of radium purchased in 1928 by the Commonwealth Government for use in treatment and research has been distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all requiring it, irrespective of ability to pay. This work is co-ordinated by the Department. Records of treatment and the results obtained are kept by all treatment centres on uniform lines and are collected and analysed. These records, in respect of certain parts of the body, are also collated in accordance with the international inquiry which was carried out under the auspices of the Cancer Commission of the Health Organization of the United Nations in collaboration with the International Radiological Association.

Close co-operation is maintained between research workers, physicists and biochemists and the medical men engaged in the clinical investigation and treatment of the disease, so that problems are mutually investigated and treatment is applied with the highest attainable degree of scientific accuracy.

Realizing the essential importance of accuracy in determining the quality of radiation used in the treatment of cancer and in measuring the dosage of this radiation actually delivered to the tumour, and the need for the investigation of physical problems in connexion with the utilization of X-rays and radium in the treatment of disease, the Commonwealth Department of Health has now extended the work of the Commonwealth Radium Laboratory, which was established in 1929, to include the investigation of the physical problems of radiation therapy generally. This laboratory, which is now known as the Commonwealth X-ray and Radium Laboratory, was established at the University of Melbourne by agreement with the Council of the University, and is maintained, controlled and staffed by the Commonwealth Department of Health. It is accommodated in a separate laboratory building of sixteen rooms specially designed for X-ray and radium work, and is well provided with all necessary equipment for research work, including a high-tension generator capable of supplying 500,000 volts to an X-ray tube. This laboratory is actively at work and its specialist officers co-operate closely with the local physical services which are being developed at the Universities in the other capital cities of Australia. The laboratory also continues its earlier work of production of radon for treatment, the repair of radium apparatus, and research into problems of treatment and protection. During the year 1945 a total quantity of 78,043 millicuries of radon was prepared and issued by this laboratory and the associated centres in Sydney, Adelaide and Brisbane, and in 1946 a total quantity of 83,077 millicuries was issued. Used in the treatment of cancer and for research purposes this production represents a continuing increase over the output of previous years.

10. **Veterinary Hygiene and Plant Quarantine.**—In 1927 Directors were appointed to control divisions of the Commonwealth Department of Health which have been created to deal with veterinary hygiene and plant quarantine.

§ 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts in regard to the compulsory notification of infectious diseases and the precautions to be taken against the spread thereof may be conveniently dealt with under the headings—Quarantine; Notifiable Diseases, including Venereal Diseases; and Vaccination.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) Human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) Animal quarantine which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports, and (iii) Plant quarantine which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In regard to interstate movements of animals and plants, the Act becomes operative only if the Governor-General be of opinion that Federal action is necessary for the protection of any State or States: in general, the administration of interstate movements of animals and plants is left in the hands of the States.

The Commonwealth controls stations in each State for the purposes of quarantine of humans, animals and plants.

3. **Notifiable Diseases.**—(i) *General.* (*a*) *Methods of Prevention and Control.* Provision exists in the Health Acts of all the States for the observance of precautions against the spread and for the compulsory notification of infectious disease. When any such disease occurs, the local authority must at once be notified, and in some States notification must be made also to the Health Department. The duty of making this notification is generally imposed, first, on the head of the house to which the patient belongs, failing whom on the nearest relative present, and, on his default, on the person in charge of or in attendance on the patient, and, on his default, on the occupier of the building. Any medical practitioner visiting the patient is also bound to give notice.

As a rule the local authorities are required to report from time to time to the Central Board of Health in each State as to the health, cleanliness and general sanitary state of their several districts, and must report the appearance of certain diseases. Regulations are prescribed for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing, or other articles which have been exposed to infection. Bacteriological examinations for the detection of plague, diphtheria, tuberculosis, typhoid and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as small-pox and leprosy.

(*b*) *Details by States.* In earlier issues of the Official Year Book (see No. 22, p. 501) information was given concerning the notification, etc., of diseases under State headings.

(*c*) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and the Australian Capital Territory the diseases notifiable in 1945 and 1946 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY† AND NOTIFICATIONS FOR THE YEARS ENDED 31st DECEMBER, 1945 AND 1946.

* Not notifiable. † Northern Territory statistics of civilian notifications are not available.

(*a*) Comprised mainly of relapses in Service cases infected overseas. (*b*) Includes all forms except in New South Wales, where only pulmonary tuberculosis is notifiable. (*c*) Includes Enteric Fever and Para-typhoid Fevers. (*d*) Cases reported are all of the mild type known as Brill's Disease or Endemic Typhus (including Scrub and Urban types). (*e*) Includes Leptospirosis, Weil's and Para-Weil's Disease.

(ii) *Venereal Diseases.* (*a*) *General.* The prevention and control of venereal diseases are undertaken by the States. Each State has a Venereal Diseases Act, or provisions in the Health Act govern the working of the measures taken to combat these diseases. Under these Acts notification has been made compulsory in every State except South Australia, where the Venereal Diseases Act has not yet been proclaimed. Steps have been taken to ensure free treatment by medical practitioners or in subsidized hospitals and clinics. Registered pharmaceutical chemists are allowed to dispense prescriptions only when signed by medical practitioners. Clinics have been established and, in some cases, beds in public hospitals have been set aside for patients suffering from these diseases.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person and the employment of an infected person in the manufacture or distribution of foodstuffs.

For several years the Commonwealth Government granted a subsidy to each of the States to assist in providing hospital treatment and administrative control of venereal diseases, but this subsidy has been discontinued. Yearly subsidies have been paid to the States to assist in coping with the special conditions created by the large numbers of people in the Armed Forces during the Pacific war.

In 1927 a Division of Tuberculosis and Venereal Disease was established in the Commonwealth Department of Health, with a medical officer as Director. This Division ceased to exist in April, 1932.

(*b*) *Details by States.* A statement of the preventive provisions in each State, together with certain statistical data, appeared in earlier issues of the Official Year Book (see No. 22, pp. 503–4).

4. **Vaccination.**—(i) *Demand for Vaccination.* There is statutory provision for compulsory vaccination in all States except New South Wales. Jennerian vaccine for vaccination against small-pox is prepared at the Commonwealth Serum Laboratories in Melbourne. There has been a considerable increase in the demand for vaccination, especially by people about to travel overseas by air, so that they may conform with the quarantine requirements of countries to which they are travelling.

(ii) *Details by States.* In earlier issues of the Official Year Book (see No. 22, pp. 504–5) information was given concerning the provisions regarding vaccination in each State.

§ 5. Inspection and Sale of Food and Drugs.

Legislation in force in all States provides for the inspection of foods and drugs with the object of ensuring that all those goods which are sold shall be wholesome, clean and free from contamination or adulteration; and that all receptacles, places and vehicles used for their manufacture, storage or carriage shall be clean. For further particulars in this connexion, and with respect also to the sale and custody of poisons, reference should be made to Official Year Book, No. 22, pp. 495–7.

§ 6. Supervision of Dairies, Milk Supply, Etc.

1. **General.**—In earlier issues (see No. 22, p. 498), reference is made to the legislation in force in the various States to ensure the purity of the milk supply and of dairy produce generally.

2. **Number of Dairy Premises Registered.**—The following table shows, so far as the particulars are available, the number of dairy premises registered and the number of cows in milk thereon. In some States registration is compulsory within certain proclaimed areas only

DAIRY PREMISES REGISTERED, AND COWS IN MILK THEREON, 1946.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust. (a)	Tasmania.
Premises registered ..	18,196	22,777	23,000	13,455	346	(c)6,161
Cows in milk thereon ..	594,809	579,142	b686,650	136,338	12,890	(d)

(a) Premises within a district extending 25 miles north and 90 miles south of Perth only. (b) Estimated. (c) March, 1947. (d) Not available.

§ 7. Medical Inspection of School Children.

1. **General.**—Medical inspection of school children is carried out in all the States. Medical staffs have been organized, and in some States travelling clinics have been established to deal with dental and ocular defects.

2. **New South Wales.**—A complete system of medical inspection of school children is carried out by the School Medical Service which passed from the control of the Minister for Education to that of the Minister for Health as from 1st July, 1946. Medical inspection was continued as formerly, viz., in the metropolitan area, full medical examination of all children in first and fifth classes, and review of children in other classes who have been found defective in previous years, and, in country districts, the full medical examination of every child two or three times during the usual period of school attendance (6–15 years). Parents are notified of the defects found, and urged to have them treated. In the metropolitan area these notices are reinforced by "follow-up" work of school nurses, who also arrange hospital and clinic treatment in many cases.

The return of officers from active service and new appointments resulted by November, 1946, in a staff of 20 medical officers (including 3 psychiatrists of the Child Guidance Clinics and 1 oculist), 4 psychologists, 14 dental officers, 8 dental assistants, 14 school nurses, 3 social workers, 1 speech therapist, and 9 clerical officers. Seven school medical officers were engaged in country districts, and 9 in the metropolitan area, and of the 13 travelling dental clinics, 8 were engaged in metropolitan schools and 5 in country districts. One of the metropolitan dental officers was also engaged half-time at the clinic attached to the Out-patient's Department of the Royal Alexandra Hospital for Children.

Special attention is paid to the supervision of the health of high school pupils, both girls and boys, and medical inspection is carried out annually in high schools in the metropolitan area. as well as certain country schools.

Every student, before entering a Teachers' College, is medically examined, and any defects found must be remedied before final acceptance. Health supervision is maintained at these Colleges by women medical officers, who give courses of lectures on hygiene and physiology.

The Child Guidance Clinics examine free of charge children referred by school medical officers, teachers, officers of the Child Welfare Department and various outside bodies. Boys coming before the Children's Court were examined at the Clinic at the Metropolitan Boys' Shelter attached to the Court and at Yasmar Hostel for Boys.

Similar examinations are made in the case of girl delinquents.

The medical examination of certain children under the jurisdiction of the Child Welfare Department, Widows' Pensions Branch, is also carried out by medical officers of this service.

The following summary furnishes particulars of children medically examined in schools in 1946 :—

Number fully examined (routine inspection)	63,022
Number reviewed	24,501
Of those examined—percentage notified for defects, medical and/or dental	41.94 per cent.

These figures do not include record of the medical examination and health supervision of children (1) in residence at the Glenfield Special School for backward children, and (2) attending the Department's Nursery Schools.

The School Medical Service carries out regular and/or periodical investigations into problems affecting the health of children, and special investigations into outbreaks of infectious diseases occurring in schools. The sanitary condition of school buildings is also inspected. One medical officer attached to this service was included on the panel of lecturers to parents' groups on sex education of children.

The foregoing statement does not include record of the numerous medical examinations of teachers, and other Departmental work of a medical nature, done by the School Medical Service.

The cost of this service, excluding administration charges, for the year ended 30th June, 1946, was £35,738.

3. **Victoria.**—Medical inspection of school children was established in 1909. One of the objectives of the system is to have each child medically examined once every three years in its school life. In 1925 the Department concentrated on country work, and medical inspection has been undertaken since that date in country and rural districts, reaching the most remote corners of the State. In spite of the comparatively small medical inspection staff, the plan for triennial visits to State schools is being fairly well maintained though owing to unsurmountable difficulties in transport and accommodation medical inspection in country schools has been in temporary abeyance. Only a few of the registered and institutional schools are visited.

At the medical inspection every child is first weighed and measured, tested for vision and hearing, then undressed to the waist and medically examined as for life assurance, but with a fuller investigation of many hygienic factors, which at that age greatly influence the health and growth of the child. Opportunity is also taken to teach the child healthy habits and how to correct faults, and to get its co-operation for the remedying of defects found. In schools with an attendance of 70 or more, the older boys are examined by a medical man and the older girls by a medical woman. School nurses employed by the Department are devoted to "follow-up" work, i.e., visiting the homes and getting treatment for children found defective by the school medical officers. Owing to the smallness of the staff their work is confined to the metropolitan area.

In addition to the medical examination, each child in those schools visited by the school dentist receives dental treatment on entrance to school (if under 8 years of age), and each year thereafter, until it is 12 years of age, when it is left dentally fit. The present staff is arranged so that 3 dentists and 4 dental attendants are always on duty at the Melbourne Dental Centre, where children from the inner metropolitan schools are brought by the teacher for dental treatment. One dentist with dental attendants and equipment travels along the railway line far enough to give one year's work, using practically every town large enough to provide a day's work as a base. The school committees of the outlying schools are notified of the visit, and the parents are invited to bring to the base all children eligible for treatment, i.e., all children under 8 years of age, and all other children treated by the school dentists on previous visits. Two dentists with dental attendants are in charge of two fully equipped dental vans, each of which has an annual itinerary. In the year ended 30th June, 1946, the number of children examined was 14,837, extractions made 27,352, number of fillings 16,911, and other treatments 9,308.

Special attention is given to mentally and physically handicapped children. Retardants attending "special" schools and "opportunity" grades are examined annually. Those with defective eyesight ineligible for admission to the Blind Institute attend a "partially sighted" class and are kept under constant supervision. Others with minor postural defects attend a "remedial" gymnasium where special exercises are given under medical attention.

A Nose and Throat Clinic for the treatment of children with defective tonsils and adenoids was established in June, 1942. This clinic consists of 6 beds and is staffed by 5 full-time hospital nurses, the operations being performed by visiting nose and throat specialists. A nominal fee of 15s. is charged for each operation. To the 30th June, 1946, 5,307 operations had been performed. The clinic was temporarily closed on 6th August, 1945, owing to a mild epidemic of poliomyelitis.

The staff of the medical branch consists of 6 full-time and 1 part-time medical officers, 6 dentists, 10 dental attendants and 12 school nurses.

During the year ended 30th June, 1946, 19,203 children and 1,696 teachers were medically examined, and 14,837 children received dental treatment. In addition 5,567 homes were visited by the school nurses.

4. **Queensland.**—The School Health Services Branch, under the direction of the Chief Medical Officer, consists of three sections known as the Medical, Dental and Nursing Sections.

Medical inspection of schools and school children is carried out by one full-time and one part-time officer under the general direction of the Chief Medical Officer, School Health Services. These officers, as far as possible, examine children for cardiac and pulmonary conditions, and in addition make a thorough examination of all children referred to them by the school nurses.

The nurses now number 23. Each nurse is assigned a group of schools and is instructed to make a list at each school of those children who should be seen by the medical inspector at his next visit. She supervises the sanitation, cleanliness and ventilation of the school and notifies the head teacher of all infectious or verminous children or those suffering from impetigo, scabies, etc., who are then excluded. During 1945–46, school nurses examined 43,427 children. In the metropolitan area the nurses examine the teeth and report all eligible carious cases to the Dental Hospital for treatment.

The Department now has in its employ a staff of 20 dentists, and one part-time dental inspector. These officers are each assigned a district, which is not changed for three years unless for reasons which the Chief Medical Officer, on the recommendation of the Chief Dental Inspector, considers advisable. During 1945–46, 37,161 children were examined ; 22,902 extractions were performed ; and there were 20,839 fillings and 10,185 other treatments.

At the Wilson Ophthalmic School Hostel children suffering from trachoma are treated and educated. They are admitted from time to time on the recommendation of the part-time Ophthalmic Officer. Beneficial results have already been obtained. The Institution is situated at Eildon Hill, Windsor, and is fully equipped to treat all types of eye cases.

The work of Hookworm Control (the dealing with ankylostomiasis duodenale and necator Americanus infestation) throughout the State is under the control of the Director-General of Medical Services and his deputy. This activity has resulted in a marked reduction of the incidence of this dangerous menace on the northern coastal belt. Several sisters of the School Health Services are seconded for hookworm duty. The personnel consists of a microscopist, a health inspector and three trained sisters.

In order to give the same medical and dental facilities to the children of the back country as are obtainable by city dwellers, three Rail Dental Clinics equipped on the most modern lines have been constructed. Another one is in course of construction and will shortly be in commission. A motor car is carried on a railway wagon attached to each clinic for use at each stopping place to visit the surrounding villages served by the rail centre.

This service cost £32,336 in 1945–46.

5. **South Australia.**—The system of medical inspection in force requires the examination of all children attending primary, junior technical, high and technical high schools. Children in the primary schools are examined in grades I., IV. and VII. ; in the junior technical and high schools, children are examined in their second and fourth years. Reports are furnished to the parents of any remediable defects found during these examinations. The medical inspectors meet the parents after the examination of

the children and give an address on the prevention and treatment of the conditions which were found during the inspection. After these lectures the parents are given an opportunity to ask questions regarding their children. When there is an epidemic or a threatened epidemic in a district, similar lectures are given and special visits paid to all the schools in that locality. All students are examined before they enter the Teachers' College and before they begin teaching. Medical and physiological tests on all candidates taking the Diploma of Physical Education are conducted four times during the course (2 years). Courses of lectures in Hygiene and in First Aid are given to all College students.

The medical staff consists of a principal medical officer, 3 full-time and one part-time medical inspectors and 4 trained nurses. A dentist, a dental assistant and a speech therapist are attached to the Medical Branch. The speech therapist examines children with defective speech, ascertains the nature of the defect and teaches the child how to overcome it.

During 1946, 14,284 children were examined by medical inspectors; of these, 707 required notices for defective vision, 99 for defective hearing, and 930 for tonsils and adenoids.

The following table shows the percentages of primary school children who were wearing spectacles in 1946 compared with 1932 :—

Year.	Grade 1.	Grade 2.	Grade 3.	Grade 4.	Grade 5.	Grade 6.	Grade 7
				BOYS.			
1932 ..	1·39	3·0	2·48	2·34	3·32	4·04	2·43
1946 ..	1·31	1·75	2·28	3·41	2·04	2·13	3·32
				GIRLS.			
1932 ..	1·34	2·83	2·45	3·09	2·51	3·14	2·6
1946 ..	1·12	2·45	1·95	2·67	3·02	3·39	4·63

This survey will be continued in 1947 and will include children attending secondary schools.

The Psychology Branch consists of a psychologist, assistant psychologist, vocational guidance officer, aptitude testing officer, employment officer, social worker and advisory teacher of opportunity classes. The work of the Branch may be divided into three sections—clinical, educational and vocational.

Clinical. The clinical work involves examining difficult children of many types, and covers such problems as backwardness, retardation, behaviour, truanting, delinquency, etc. The parents of all children examined are always interviewed and their co-operation is sought.

Educational. In addition to supervising 38 opportunity and special classes for children backward in school work, the Branch advises on questions of placement and types of education for ordinary children in schools.

Vocational. The vocational guidance officer tests and advises all children about to leave school.

The Branch also undertakes lectures to students of the Teachers' College as well as to other interested organizations such as mothers' clubs.

The annual cost of these services is approximately £6,100.

6. **Western Australia.**—Under the Public Health Act 1911–1935 the medical officers appointed by the local authorities became medical officers of schools and of school children. The principle aimed at is—

- (*a*) in the metropolitan area, that each child shall be examined three times during its school life—
  - (i) when it enters school between 5 and 6 years,
  - (ii) in its eighth year, and
  - (iii) between the ages of 12 and 13 years ;
- (*b*) in the country, that the child is examined twice during its school life, or more often if it is possible to arrange such medical examinations.

In the Health Department there are two full-time and one part-time medical officers for schools and four school nurses employed. One of the medical officers is employed full-time in the country, and one full-time officer and one half-time officer are employed in the metropolitan area. One school nurse is employed in the country in special work connected with eye epidemics, etc. The other three nurses are employed in the metropolitan area. During 1946, 21,301 children were examined (metropolitan, 13,602 and country, 7,699, of whom 10,479 were boys and 10,822 girls). There were 198 schools visited, comprising—metropolitan, 79 State schools and 32 convents, and country, 77 State schools and ten convents. The two full-time and one part-time dental officers employed in 1946 visited 18 metropolitan and 12 country schools and gave attention to 2,653 children.

The cost of this service for 1945–46 was £4,727.

7. **Tasmania.**—During the year 1946 the School Medical Service occupied the full-time services of one medical officer. In addition arrangements were made with six private practitioners to carry out medical inspection of school children in the areas in which they practised. This work also formed part of the duties of twelve Government Medical officers, and nine school nurses were engaged full-time on this work in association with the doctors.

Two dental clinics, one each at Hobart and Launceston, attended to the needs of children in those centres, while three mobile dental clinics were in operation in the North-West, North-East and Southern parts of the State.

The number of children examined during 1946 by medical inspectors was 13,039, of whom 5,267 had defects. First visits to dentists numbered 8,357 and repeat visits 9,079.

The cost of medical and dental services for the year ended June, 1946, was £10,232.

8. **Australian Capital Territory.**—By arrangement, education facilities are provided by the Education Department of New South Wales. The Commonwealth Department of Health, however, took over from the State in 1930 the medical inspection of school children and carried out examinations of entrants and those leaving during 1930.

Subsequent to 1931, examinations of entrants and those leaving the primary schools have taken place. During 1937 this examination was supplemented by examinations of all pupils of all rural schools (including Duntroon and Molonglo). No examinations were made in 1942. Since 1943 all primary pupils of Government schools in the Territory have been medically examined annually. During 1946 the examinations showed that 34 per cent. had dental defects, 2.7 per cent. had some pathological condition of the nasopharynx, 7.2 per cent. had eye defects, 3.7 per cent. had ear defects, 11 per cent. showed some evidence of minor chest deformity, and 1·4 per cent. were 10 per cent. or more underweight for their height and age.

§ 8. Supervision and Care of Infant Life.

1. **General.**—The number of infantile deaths and the rate of infantile mortality for the last five years are given in the following table, which shows that during the period 1942 to 1946 no less than 25,391 children died in Australia (excluding Territories) before reaching their first birthday. Further information regarding infantile mortality will be found in Chapter XVII. " Vital Statistics " :—

(*a*) Excludes Territories. (*b*) Number of deaths under one year per 1,000 births registered.

During recent years greater attention has been paid to the fact that the health of the community depends largely on pre-natal as well as after care in the case of mothers and infants. Government and private organizations, therefore, provide instruction and treatment for mothers before and after confinement, while the health and well-being of mother and child are looked after by the institution of baby health centres, baby clinics crèches, visits by qualified midwifery nurses, and special attention to the milk supply, etc.

2. **Government Activities.**—In all the States acts have been passed with the object of supervising and ameliorating the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out to suitable persons of the wards of the State, and wherever possible the child is boarded out to its mother or near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children. (See also in this connexion Chapter VIII. "Public Benevolence," etc.). Under the provisions of the Maternity Allowances Part V. of the Social Services Consolidation Act 1947, from 1st July, 1947 a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born. Where there are one or two other children under 16 the amount payable is £16, and where there are three or more other children under 16 the amount payable is £17 10s. Where more than one child is born at a birth the amount of the allowance is increased by £5 in respect of each additional child born at that birth. Detailed particulars regarding Maternity Allowances are given in Chapter VIII. " Public Benevolence, etc."

3. **Nursing Activities.**—(i) *General.* In several of the States the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (see No. 22, pp 515–6) information may be found concerning the activities of institutions in each State.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations :—

BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1946.

(a) Year ended 30th June, 1946.

The number of attendances at the Baby Health Centres has increased very considerably in recent years. The following are the figures for the years 1939 to 1945 :—1939, 1,869,770 ; 1940, 2,035,299 ; 1941, 2,128,961 ; 1942, 2,240,294; 1943, 2,327,279 ; 1944, 2,677,030 ; and 1945, 2,927,764.

CHAPTER X.

THE TERRITORIES OF AUSTRALIA.

GENERAL.

The Territories under the control of Australia are: The Northern Territory; the Australian Capital Territory; Papua (formerly British New Guinea); Norfolk Island; the Territory of New Guinea (under Trusteeship Agreement with the United Nations Organization); Nauru (under Trusteeship Agreement with the United Nations Organization); the Territory of Ashmore and Cartier Islands; and the Australian Antarctic Territory.

Under the Ashmore and Cartier Islands Acceptance Act 1933 the Commonwealth Government accepted these islands from the British Government. They were administered by Western Australia until July, 1938, when the Act was amended to annex them to the Northern Territory.

The Australian Antarctic Territory, estimated area 2,472,000 square miles of a total area of approximately 5,000,000 square miles for the Antarctic Continent, was established by an Order in Council dated 7th February, 1933, which placed under the control of the Commonwealth of Australia that part of the Territory in the Antarctic Seas which comprises all the islands and territories, other than Adelie Land, situated south of the 60th parallel of south latitude and lying between the 160th and 45th meridians of east longitude. The Territory was accepted by the Commonwealth of Australia on 24th August, 1936, when the Antarctic Territory Acceptance Act 1933 came into force by proclamation issued by the Governor-General.

The results of the census of the Territories at 30th June, 1947, may be found in the separate Census bulletins and parts published by this Bureau.

In the Territories of Papua, Norfolk Island and Nauru, Australian currency is used. In the Territory of New Guinea, however, local coins consisting of silver shillings, cupro-nickel sixpences and threepences, and bronze pennies are used, supplemented by Australian currency.

THE NORTHERN TERRITORY.

§ 1. Return of Civil Activity in Darwin.

During 1945–46, after the cessation of the war in the Pacific, the control of the Northern Territory was transferred from the military back to civilian hands. The Administrator re-occupied Government House at Darwin at the end of July, 1945, and by the end of 1945–46 a considerable part of the civil administration had returned from Alice Springs, and the various services had reverted to civil control. Commercial activity also recommenced. The repeal of the National Security (Emergency Control) Regulations on 28th February, 1946, permitted the re-entry of civilians into Darwin. They had earlier been allowed as far north as Pine Creek. Almost immediately, former residents, compulsorily evacuated in December, 1941 and early in 1942, and also many new arrivals, began to flock to Darwin. On 17th January, 1946, under the Darwin Lands Acquisition Act 1945, the Commonwealth became the owner of all privately owned lands and improvements thereon in Darwin and suburban areas. Shops, garages, restaurants and cafés had been opened in all suitable existing buildings, and soon applications to erect temporary premises on vacant lands were received. At 30th June, 1946, 175 acknowledgments of tenancy, 32 permissive occupancies and 20 special purpose leases had been granted.

§ 2. Area and Population.

1. **Area.**—Upon the extension of New South Wales westward to the 129th meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles, or 335,116,800 acres—about six times as large as Victoria.

2. **Population.**—(i) *Europeans.* At the census taken in 1881 there were only 670 Europeans in the Territory. The number increased slowly, reaching 3,767 persons in 1918. At the census of 1933 the white population had decreased to 3,306. This number, however, was 34.5 per cent. greater than the figure at the census of 1921. At the census of 1947 it had risen to 9,116, an increase of 176 per cent. on the 1933 figures.

(ii) *Non-Europeans.* The number of full-blood non-Europeans, excluding Australian aboriginals, in the Northern Territory on 30th June, 1947 was 388, of whom 250 were Chinese, the remainder being mainly Filipinos (47), Fijians (23), Japanese (21), and Malays (20). There were at one time over 4,000 Chinese in the Territory.

The half-caste population recorded at the census of 1947 numbered 1,364, of whom 1,247 were half-caste Australian aboriginals. Corresponding figures as at the 1933 census were, respectively, 800 and 743.

(iii) *Total Population.* The estimated population at 31st December in each of the years 1939 to 1946, revised in accordance with the preliminary results of the 1947 census, is given in the following table :—

NORTHERN TERRITORY : POPULATION (EXCLUDING ABORIGINALS).

Year.	Males.	Females.	Total.
1939	5,145	2,151	7,296
1940	6,340	2,637	8,977
1941	7,251	2,505	9,756
1942	6,045	2,235	8,280
1943	7,208	3,188	10,396
1944	7,229	3,240	10,469
1945	7,249	3,291	10,540
1946	7,261	3,375	10,636

The population at the Census of 30th June, 1947, was 7,378 males and 3,490 females, total 10,868.

(iv) *The Aboriginals.* A special article contributed by Dr. W. Ramsay-Smith on the subject of the Australian aboriginals was incorporated in Official Year Book No. 3 (p. 158). The Chapter " Population " in Official Year Book No. 17 contained information regarding the number and distribution of aboriginals and the measures taken by the States (in the case of the Northern Territory, by the Commonwealth) to protect them and conserve their interests. Large numbers of the aboriginals in the Territory are still outside the influence of Europeans. The total number of full-blood and half-caste aboriginals at 30th June, 1944, was estimated at 14,153, of whom 3,314 were in regular employment. There are fifteen " aboriginal " reserves, comprising an area of 67,244 square miles. (See also Chapter XVI. " Population ".)

§ 3. Legislation and Administration.

On 1st January, 1911, the Territory was transferred by South Australia to the Commonwealth. The terms are outlined in Official Year Book No. 15, p. 940. By the Northern Australia Act 1926, the Territory was divided into two parts, Central Australia and North Australia, separated by the 20th parallel of south latitude, each administered by a Government Resident. In addition, Advisory Councils and a Development Commission were provided for. The Act of 1926 was repealed by the Northern Territory (Administration) Act 1931. The administration of the Territory was placed in the hands of an Administrator, residing at Darwin, assisted by a Deputy Administrator, residing at Stuart (Alice Springs). The designation of the latter office was later changed to that of District Officer. The Governor-General was empowered to make ordinances having the force of law in and in relation to the Territory, subject to disallowance by either House of the Commonwealth Parliament (repealed by 1947 amendment).

An amendment to the Northern Territory (Administration) Act, assented to in June, 1947, enabled the Northern Territory to set up a Legislative Council. The Council consists of the Administrator, seven official members (nominees of the Administrator) and six members elected from five districts (Darwin district has two). The normal term of office of the elected members is three years. The Council is able to make ordinances for the Territory, but it must submit each one to the Administrator for assent. The Administrator may, or may not, assent, or he may refer the ordinance to the Governor-General. The Governor-General may also disallow any ordinance assented to by the Administrator within six months from the date of assent. Ordinances that (1) grant or dispose of Crown lands, (2) make leases or grants of land or money or gifts to the Administrator, or (3) relate to aboriginals or aboriginal labour, cannot be assented to by the Administrator, unless they contain a clause deferring their operation for the Governor-General's approval. All ordinances must be laid before Parliament after assent. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who may take part in debates, but may not vote, except on a motion for the disallowance of any ordinance of the Northern Territory or on any amendment of any such motion.

§ 4. Physiography.

1. **Tropical Nature of the Country.**—The Territory is within the torrid zone, with the exception of a strip 2½ degrees wide which lies south of the Tropic of Capricorn.

2. **Contour and Physical Characteristics.**—The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

The principal features of the coast-line are enumerated in Official Year Book No. 1, p. 66; the rivers in No. 2, p. 76; the mountains in No. 3, p. 67; the lakes in No. 4, pp. 77, 78; the islands in No. 5, pp. 71, 72; and the mineral springs in No. 6, p. 65.

Inland, the country generally is destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

§ 5. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions—the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Fuller particulars appear in Official Year Book No. 6, p. 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous) and frogs abound. There are many varieties of freshwater fish and littoral mollusca. Butterflies and beetles are strongly represented. The white ant is a pest, anthills in the Territory sometimes attaining great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Native fauna are in some cases protected. Buffalo formerly existed in large herds, but their number has been greatly reduced by indiscriminate shooting.

3. **Flora.**—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriously to the water's edge. On the wide expanses of plain country in the interior there is little vegetation, the principal orders represented being :—*Euphorbiaceae, Compositae, Convulvolaceae, Rubiaceae, Goodenoviaceae, Leguminosae, Utricaceae.*

Fuller particulars regarding fauna and flora are given in Official Year Book No. 6, pp. 1116–7.

§ 6. Production.

1. **Land Tenure.**—At 30th June, 1946 (figures at 30th June, 1945, in parenthesis), there were 248,758 (255,463) square miles held under lease, licence and permit in the Northern Territory, comprising 169,729 (183,668) square miles of pastoral leases, 696 (696) square miles of pastoral permits, 75,581 (68,250) square miles of grazing licences, 118 (117) square miles of agricultural leases and 2,634 (2,732) square miles of miscellaneous leases.

2. **Agriculture.**—Up to the present agriculture has made little progress in the Territory, although it has been proved that rice, tobacco, coco-nuts, mangoes, bananas, cotton, various fodder plants, and peanuts can be successfully grown. Expense of harvesting is, at present, an obstacle to the economic production of rice, and until labour-saving machinery is procured it cannot be produced with profit. There is a large stretch of first-class coco-nut land on the coast, but hitherto planting has not been attempted on a commercial scale. For the encouragement of primary production a Primary Producers' Board was established in 1931. There was little activity in agriculture during 1940–41 and the outlook was not hopeful. No information of recent developments is available as the collection of agricultural statistics was temporarily discontinued after 1940–41 owing to the war. It is hardly practicable to develop agricultural production in the sub-tropical district around Darwin, and the history of efforts in this connexion is one of almost complete failure.

3. **Pastoral Industry.**—The pastoral possibilities of certain parts of the Northern Territory were recognized at an early date, and in 1866 stock was brought into the Macdonnell Range country from South Australia. Six years later cattle were moved from Queensland to the northern parts of the Territory, and in 1879 Giles reached the Katherine River with 2,000 head of cattle and 12,000 sheep from South Australia. For various reasons sheep-raising did not succeed. The cattle industry, however, progressed steadily.

During 1945–46 veterinary and stock administration, held by the Army during the war years, was handed back to civil control. This transition period made the compilation of statistics difficult. Cattle exported during the year numbered 140,109—80,370 to Queensland, 48,864 to South Australia and 10,875 to Western Australia. The value was £1,142,776, an average of £8 per beast. Of those exported to South Australia, 33,346 were fats for immediate slaughter, and averaged £13 per beast. Sheep exported numbered 3,544—all to South Australia. Importations were mainly of bulls and stallions for breeding, sheep for butchering at Alice Springs, and cattle from the Kimberleys moving through the Territory. The numbers were—bulls, 442 ; other cattle, 1,732 ; stallions, 24 ; other horses, 79 ; rams, 67 ; other sheep, 755.

The estimated number of live stock in the Territory at the end of the years 1939 and 1943 to 1946 is given in the table hereunder :—

NORTHERN TERRITORY : LIVE STOCK.

31st December—	Horses.	Cattle.	Sheep.	Pigs.	Goats.	Camels.	Donkeys.	Mules.
1939 ..	32,721	922,581	38,587	483	20,335	331	1,443	366
1943 ..	30,534	978,569	25,575	191	15,149	302	1,460	416
1944 ..	31,803	984,370	29,269	146	11,384	284	1,167	426
1945 ..	31,883	960,039	18,561	407	12,810	298	1,275	471
1946 ..	30,019	972,990	28,005	208	11,914	296	1,621	513

4. **Mining.**—(i) *General.* Alluvial gold-digging in the Northern Territory commenced in 1869, and up to the end of 1880 gold to the value of £79,022 had been produced. In 1881 gold production from alluvial deposits reached its maximum, the value for that year being £111,945. During the following years it fluctuated considerably but as long as the alluvial deposits lasted the output was satisfactory. In the transition period from alluvial to reef mining the industry declined considerably. The production of metals other than gold has suffered on account of the vagaries of prices, and the high cost of transport and of white labour. Owing to the exceptionally high price the search for gold was stimulated and production increased annually from 1931 to 1940, but decreased thereafter owing to lack of manpower occasioned by the war. The Warramunga Goldfield, of which Tennant Creek is the centre, has been the principal producing goldfield and gives every indication of increasing production for a number of years once the difficulty, since the war, in obtaining labour and machinery has been overcome. This field has produced gold to the total value of £1,292,000 to the end of 1946. The necessity for satisfying Australian requirements of mica of strategic quality led to the regional development of the Harts Range mica fields, where roads and water supplies, hitherto unknown in this country, were made and established, and as a result, the mica fields were better exploited in the war years. Development has continued under a scheme of Government assistance. Production of wolfram concentrates fell from £58,166 in 1943 to £31,583 in 1944, rising to £42,937 in 1945, but falling off to £21,696 in 1946 when the war-time price of 110s. per unit dropped to 60s. The demand for tantalite for radar work and non-corrosive surgical equipment resulted in a production valued at £1,043 in 1943, when the Commonwealth Government purchased concentrates for forwarding to the United States of America. The use of ochre for camouflage paints caused an increase in production from the Rumbalara deposits ; but production has fallen off since the end of the war. Tin concentrates were produced from the Finniss River area and the Maranboy tinfield.

(ii) *Mineral Production.* The following table shows the value of mineral production, for the years 1943 to 1946 compared with 1939 :—

NORTHERN TERRITORY : MINERAL PRODUCTION.

Year.	Gold.	Tin Concentrates.	Ochre.	Copper Ore.	Mica.	Wolfram.	Tantalite.	Total Value all Minerals. (a)
	£	£	£	£	£	£	£	£
1939 ..	163,414	4,487	607	2,248	15,539	58,183	..	244,478
1943 ..	40,880	5,594	4,800	2,393	17,919	58,166	1,043	130,795
1944 ..	57,803	2,086	5,090	1,878	26,621	31,583	962	126,025
1945 ..	76,811	5,026	2,078	3,812	44,955	42,937	578	176,197
1946 ..	105,376	3,228	1,983	6,282	27,969	21,696	..	166,543

(a) Includes bismuth—£2 in 1944 and £9 in 1946.

The value of all minerals produced to the end of 1946 was approximately £5,842,500.

In 1934 the Governments of the Commonwealth and the States of Queensland and Western Australia agreed to co-operate in the conduct of a geological and geophysical survey of certain areas in the northern parts of Australia, including the Northern Territory. More detailed reference to the survey, which was completed in 1940, appears in Official Year Book, No. 35, page 744.

5. **Pearl, Bêche-de-Mer, and Other Fisheries.**—In 1884 mother-of-pearl-shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. The production of pearl-shell has declined rapidly since 1937–38. The production for 1939–40 amounted to only 179 tons, valued at £14,350, compared with 804 tons, £67,000, in 1937–38 and 410 tons, £31,500, in 1938–39. Up to the end of 1945–46 pearl shell fishing had not been resumed from Darwin, although the high price offering for shell (up to £600 per ton compared with £190 pre-war) attracted inquiries. In view of the importance of the industry it was included in the terms of reference of the Northern Australia Development Committee. A conference was held in Melbourne in March, 1946, between representatives of the Western Australia pearl-shell industry, the Northern Territory Administration, the Western Australian and Commonwealth Governments, as a pearling sub-committee, which reported and made recommendations to the Northern Australia Development Committee. The sub-committee considered the following matters—labour, boats and equipment, financial assistance, the marketing problem and economic survey, institution of administrative arrangements and biological investigations. The recommendations were placed before the Minister for the Interior by the Northern Australia Development Committee. On the question of labour the Committee recommended that approval be given for the admittance to Australia of indentured men while the possibility of training and employing alternative labour was being investigated, and suggested that the whole position should be reviewed in five years. The depleted condition of the known beds and the depressed market were responsible for fewer Japanese vessels competing with local vessels during 1939–40.

Three fishing licences and two boat licences were issued during 1938–39 in connexion with bêche-de-mer fisheries. Prices were not remunerative, however, and the production was valued at only £252.

Darwin continues to provide a firm and ready local market for fish. The lack of suitable refrigerating plants on the fishing-boats is responsible for the deficiency of regular supplies of fish except in limited quantities obtained from traps close to the town.

§ 7. Land Tenure.

1. **General.**—A description of the system of land tenure in force in the Territory in 1928 was given in Chapter V, "Land Tenure and Settlement", Official Year Book No. 22. This description has been brought up-to-date in the following two paragraphs.

2. **Pastoral, Agricultural, etc., Leases.**—(i) *Pastoral Leases.* A pastoral lease may be granted for such term, not exceeding 42 years, as the Administrator determines. The rental for the first period is fixed by the Administrator, and is subject to re-appraisement on such dates as are specified in the lease or as are prescribed.

(ii) *Agricultural Leases.* Agricultural lands are classified, and the maximum area which may be included in any one lease is as follows :—Division A, Cultivation Farms, Class 1, 1,280 acres, Class 2, 2,560 acres : Division B, Mixed Farming and Grazing, Class 1, 12,800 acres, Class 2, 38,400 acres. Agricultural leases are granted in perpetuity, and the rent for the first period is fixed by the Administrator, and is re-appraised every

21 years. The lessee must—(*a*) in the case of lands for mixed farming and grazing, stock the land to the extent prescribed by the regulations and keep it so stocked; (*b*) establish a home within 2 years and reside on the leased land for 6 months in each year in the case of land for cultivation, and for 4 months in each year in the case of land for mixed farming and grazing; (*c*) cultivate the land to the extent notified by the Administrator; and (*d*) fence the land as prescribed.

(iii) *Leases of Town Lands.* Leases of town lands are granted in perpetuity, the rental being fixed every 14 years. Such leases must, in the first instance, be offered for sale by public auction, and if not so sold, may be allotted by the Administrator to any applicant, at the rental fixed by the Administrator. The lessee must erect, within such time as is notified, buildings to the value specified in the conditions of sale.

(iv) *Miscellaneous Leases.* The Administrator may grant a lease of any portion of Crown lands, or of any dedicated or reserved lands, for any prescribed or approved purpose. Such leases are for a term not exceeding 21 years, and may be offered for sale by public auction, or granted to an applicant at an annual rental fixed by the Administrator.

(v) *Leases of Garden Lands.* Leases of garden lands may be granted over areas within 10 miles of a town, provided the Administrator has declared the area as garden lands.

(vi) *Grazing Licences.* Licences may be granted to graze stock on Crown lands for such period, not exceeding one year, as is prescribed, and at the rent and on the conditions specified.

(vii) *Occupation Licences.* Licences may be granted for any period not exceeding 5 years, and on specified rentals and conditions, for the purpose of drying or curing fish, or for any manufacturing or industrial purpose, or for any prescribed purpose.

(viii) *Miscellaneous Licences.* The Administrator may grant licences for miscellaneous purposes for a period not exceeding 12 months on prescribed terms and conditions.

(ix) *Leases to Aboriginals.* The Governor-General may grant to any aboriginal native, or to the descendant of any aboriginal native, a lease of Crown lands not exceeding 160 acres for any term of years upon such terms and conditions as he thinks fit.

3. **Mining Leases, etc.**—(i) *General.* Mining generally is governed by the Mining Ordinance 1939–1945, and special Ordinances have been promulgated by the Commonwealth respecting mining for mineral oil and coal, encouragement of mining, inspection and regulation of mining and inspection of machinery.

(ii) *Holdings under Miners' Rights.* The fee for a miner's right is 5s. for 12 months from the date of issue, and a holder thereof is entitled to occupy Crown lands for mining purposes, to construct races, to divert water, to reside on his holding, etc.

(iii) *Gold-mining Leases.* The area of a gold-mining lease must not exceed 20 acres, and the term is 21 years, renewable for a further 21 years. The rent is 2s. per acre per annum. A royalty of 3d. in the £ on the gross value of all gold and minerals won must be paid, and leases must be worked constantly by not less than 2 men for the first 12 months and thereafter by not less than 1 man for every 5 acres with a minimum of 2 men, unless exemption is obtained.

(iv) *Mineral Leases.* Mineral leases may be granted in blocks not exceeding 40 acres each. A mineral lease is issued for the same term as a gold-mining lease, with similar right of renewal. The rent is 1s. per acre per annum, and the royalty on minerals is the same as in the case of a gold-mining lease, except that payment was suspended as a war-time measure, and such temporary suspension still obtains.

(v) *Dredging Claims.* These claims may be granted for dredging for gold or minerals at a rental of 2s. per acre per annum. The maximum area of each claim must not exceed 300 acres, and 6 months after registration, the holder must employ continuously on the claim not less than 3 men and fully manned machinery valued at not less than £1,000.

(vi) *Mineral Oil and Coal Licences.* A licence to search for mineral oil or coal, or for both, may be granted over an area not exceeding 1,000 square miles for a period of 5 years on payment of an annual fee of £10. At least 4 white men must be employed for not less than 6 months in each year. A holder of a mineral oil licence who discovers payable mineral oil on the land held under his licence has a preferential right to a mineral oil lease of 160 acres, together with a reward area of 640 acres thereon. A discoverer of coal in payable quantities has a preferential right to an area of 640 acres as a coal lease.

(vii) *Mineral Oil and Coal Leases.* Leases may be granted for a period of 21 years, renewable for a further 21 years, for mining for mineral oil or coal, the maximum areas being (*a*) for mineral oil, 160 acres; and (*b*) for coal, 640 acres. In the case of mineral oil and coal, the annual rent is 1s. per acre, and a royalty of 5 per cent. on the gross value of all crude oil obtained is payable; the lessee must also work the land to the satisfaction of the Minister. In the case of coal, the royalty and conditions are fixed by regulation.

(viii) *Business and Residence Areas.* A business area may be granted at the prescribed fee and authorizes the holder to occupy on a gold-field or mineral field, for the purpose of residence and carrying on his business, an area not exceeding 1 acre, provided that when the area is for residence only it shall not exceed one-quarter of an acre.

(ix) *Garden Areas.* The warden may grant market garden areas upon any gold-field or mineral field for the purpose of growing fruit or other garden produce. The conditions as to rent, etc., are as prescribed, but the area of each garden area must not exceed 5 acres.

§ 8. Commerce, Shipping and Air Services*.

1. **Trade.**—No record is kept of the trade between the States and Territory. The value in Australian currency of the direct oversea imports and exports for 1901 and for the years 1938–39, 1940–41, 1941–42, 1945–46 and 1946–47 is given hereunder :—

NORTHERN TERRITORY: OVERSEA IMPORTS AND EXPORTS.

Items.	1901.	1938–39.	1940–41.	1941–42. (*a*)	1945–46.	1946–47.
	£	£	£	£	£	£
Imports ..	37,539	36,831	106,079	175,211	216,126	98,007
Exports ..	29,191	12,729	24,865	13,341	221,406	17,098

(*a*) July to April.

* Owing to the war the port of Darwin was closed as a Customs station from April, 1942—when Customs officers were withdrawn—till July, 1945, and for this period no details of trade and of shipping movements are available for the port, which remained purely military in character and under the control of the Defence authorities.

2. **Shipping.**—The Territory is dependent for its shipping facilities chiefly on the services of vessels trading between the Eastern States and Singapore. In addition to pearlers and other small craft, larger vessels make occasional visits, while a periodic service between Fremantle and Darwin is carried out by vessels belonging to or under charter to the Western Australian State Shipping Service. The following figures show

the number and net tonnages of oversea and interstate vessels which entered at and cleared from the port of Darwin during the years 1938–39, 1940–41, 1941–42, 1945–46 and 1946–47 :—

NORTHERN TERRITORY : SHIPPING.

Year.	Entered.		Cleared.	
	No. of Vessels.	Net Tonnage.	No. of Vessels.	Net Tonnage.
1938–39	161	181,961	172	179,422
1940–41	93	213,710	89	209,963
1941–42 (a)	81	207,970	82	206,378
1945–46	9	31,164	8	25,347
1946–47	23	50,890	23	48,136

(a) July to April only.

The foregoing figures exclude particulars of coastwise shipping. During 1938–39 fourteen vessels of 285 tons net were entered at Darwin as coastwise and two vessels of 66 tons net during 1940–41. No vessels were entered as coastwise during 1941–42, 1945–46 and 1946–47.

3. **Air Services.**—Prior to the outbreak of war in Europe, Darwin was the first port of arrival in Australia of aircraft from Europe, Singapore and Netherlands East Indies. The air services calling at Darwin were as follows :—Qantas Empire Airways Ltd., under contract to the Commonwealth Government, which operated the Sydney–Darwin–Singapore section of the Empire Flying Boat Service with a twice weekly service in each direction : the MacRobertson-Miller Aviation Co. Ltd., which operated a twice weekly service in each direction between Perth and Darwin, linking up with the Qantas service at the latter point ; Guinea Airways Ltd., which operated a twice weekly service in each direction between Adelaide and Darwin ; and the K.N.I.L.M. (Dutch) Company, which extended their Amsterdam-Batavia air route to Sydney via Darwin in 1938, operating a weekly service in each direction which was increased to a twice weekly frequency from 2nd January, 1942. Oversea air services with Darwin were suspended early in 1942 as a result of war with Japan. On 7th April, 1946, Qantas Empire Airways Ltd. reverted to the pre-war practice of operating to Singapore via Darwin. For further information *see* Chapter V.—Transport and Communication, H. Aviation.

§ 9. Internal Communication.

1. **Railways.**—Under the agreement made between the Commonwealth and the State of South Australia for the transfer of the Northern Territory, which was ratified by the Northern Territory Acceptance Act 1910, the Commonwealth was to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin via Port Augusta).

The Northern line from Adelaide terminates at Alice Springs, about 192 miles north of the southern boundary of the Territory. The Commonwealth Government acquired on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta (478 miles), and on 1st January, 1926, the control thereof was transferred to the Commonwealth Railways Commissioner. The line from Darwin to Katherine River, about 200 miles, has been extended as far as Birdum, 316 miles from Darwin.

The Clapp plan for the standardization of Australian railways recommended, *inter alia*, the construction of a standard gauge (4 ft. 8½ in.) strategic and developmental railway between Dajarra (Queensland) and Birdum, and the conversion to standard gauge of the Birdum–Darwin line (*see* Chapter V.—"Transport and Communication, B. Railways", § 1 General), but not the conversion of the Port Augusta–Alice Springs line nor the construction of a 4 ft. 8½ in. line between Alice Springs and Birdum. Provision for both of the last two projects, however, was included in the Railway Standardization Agreement Act 1946, involving the Commonwealth and the States of New South Wales, Victoria and South Australia. The Birdum–Dajarra project is dependent on the completion of the Queensland section of the general plan.

2. **Roads.**—During the war roads were built connecting Alice Springs with Darwin, and Mount Isa (Queensland) with Tennant Creek. The first of these roads, known as the North–South Road or Stuart Highway, is 950 miles long, and runs via Larrimah and Tennant Creek. The Mount Isa–Tennant Creek Road (Barkly Highway) is 403 miles long. Both were used extensively during the war, the Stuart Highway, in particular, experiencing very heavy and continuous traffic. During 1945–46 civilian carriers made regular trips over it with foodstuffs for Darwin. The Barkly Highway is not used to the same extent, but both roads, with their water bores and communications, are a national asset, and during 1945–46 it was announced that they were to be maintained.

3. **Posts.**—Postal communication is maintained by vessels which maintain a regular service between the Territory and the Eastern States. In addition, the vessels belonging to the State Steamship Service of Western Australia give a periodic service between Fremantle and Darwin. Mail is carried between the capital cities of Australia and Darwin by the airway companies operating in each State. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

4. **Telegraphs.**—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on 22nd August, 1872, at a cost of nearly £500,000. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, via Banjoewangie (Java), Singapore and Madras. Between Darwin and Banjoewangie the submarine cable is duplicated.

Long-distance telephone communication between Darwin and the other capital cities of Australia was established after the outbreak of war in the Pacific.

High-power wireless stations have been constructed by the Commonwealth Government at Wave Hill in the Territory, and at Camooweal, just over the eastern boundary, in Queensland.

10. Educational Facilities.

Darwin Public School re-opened on 21st May, 1946, with over 100 scholars. The schools at Pine Creek and Katherine re-opened on 17th August, 1945.

Prior to 1st January, 1945, teachers were supplied on loan by the South Australian Government for service in the southern parts of Northern Territory (mainly at Alice Springs and Tennant Creek), and the Queensland Government similarly supplied teachers for Darwin and other more northern parts. In 1944 an agreement between the Commonwealth and South Australian Governments transferred the responsibility for the work in the schools in the whole of the Northern Territory to the South Australian Education Department. The Commonwealth Government provides schools and furniture, and the Department provides teachers and determines the curricula.

In spite of the shortages of manpower and materials it has been possible to make additions and improvements to the various school buildings.

Arrangements were in hand during 1945–46 to provide transport, because of the severity of the climate in the Northern Territory, to schools in Alice Springs and Darwin.

§ 11. Finance.

Revenue and expenditure for the Territory for the years 1938–39 and 1942–43 to 1945–46 are given below :—

NORTHERN TERRITORY : REVENUE AND EXPENDITURE.

(a) Not dissected. (b) Territorial tax only, Commonwealth tax not dissected. (c) Salaries, contingencies and miscellaneous. (d) Salaries, contingencies and conveyance of mails.

AUSTRALIAN CAPITAL TERRITORY.

1. **Introductory.**—In Official Year Books Nos. 4 and 5 information was given in Section XXXI. in regard to the events leading to the selection of the Australian Capital Territory and the necessary legislation and the progress of operations in connexion with the establishment of the capital city. The physiography of the Territory was dealt with extensively and topographical and contour maps accompanied the letterpress, as well as reproductions of the award-winning designs for the laying out of the city. On 12th March, 1913, the official ceremony to mark the initiation of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony the selection of " Canberra " as the name of the capital city was announced. The Seat of Government Acceptance Act 1909–1938 provides that the Territory shall be known as the Australian Capital Territory. (A special article contributed by Dr. F. Watson, entitled " Canberra Past and Present ", appears on p. 454 of Official Year Book No. 24).

2. **Transfer of Parliament.**—On 9th May, 1927, Parliament House at Canberra was officially opened by His Royal Highness Albert, Duke of York, our present Monarch His Majesty King George VI., the occasion being the 26th anniversary of the opening of the first Parliament of the Commonwealth at Melbourne by His Royal Highness George, Duke of Cornwall and York—afterwards His Majesty King George V.—on 9th May, 1901. For particulars of the opening ceremony see Official Year Book No. 21, p. 604.)

3. **Administration.**—In Official Year Book No. 18 a summary is given of the development of the administration prior to the taking over of the control of the Territory by the Federal Capital Commission, and in Official Year Book No. 22 a summary is given of the administrative activities of the Federal Capital Commission.

The administration of the Territory by the Federal Capital Commission was continued until 30th April, 1930, when the Seat of Government (Administration) Act 1924–1929 was repealed, and the powers and functions of the Commission reverted to the Government.

Since April, 1932, the general control of the Territory has been exercised by the Minister for the Interior, certain specific services, however, being undertaken by the Department of Health, the Department of Works and Housing, and the Attorney-General's Department.

4. **Progress of Work.**—The general progress of the work of construction up to the time the Territory was taken over by the Commission is outlined in Official Year Book No. 18. Later progress under the Commission is described in Official Year Book No. 22.

Since the reversion of the powers and functions of the Commission to the Government in 1930, there has been great development of works in the Territory, despite the halts in activity caused by the general reduction in Governmental expenditure during the depression years, and the necessity for restricting labour and materials to purely defence purposes during the war years. New sub-divisions of suburbs—principally in Griffith, Deakin, Turner and North Ainslie—have been developed, involving the construction of new roads, pavements, kerbing and guttering, of water, sewerage, drainage and electrical networks, the digging and stocking of plantations and parks, and the planting of hedges. To serve these new areas considerable additions had to be made to the existing water and electric supply systems in the form of new mains, sub-stations, reservoirs, etc. In addition to the development of new residential areas, other works in Canberra during the period 1930–45 were built with a wide variety of purposes—educational, cultural, scientific, recreational, departmental, public utility and defence. Works have not been restricted to the city area alone, and much has been done to improve roads, bridges, culverts, &c., in the surrounding districts. The widening of roads, regrading, provision of deviations and surfacing with bitumen, the building of bridges, and the construction and improvement of roads of access to tourist resorts have proceeded as continuously as the availability of funds, labour and materials has permitted.

The following list of the more important works completed under Governmental authority during the period 1930–45 shows the wide range covered :—The Institute of Comparative Anatomy, with laboratories and accommodation for a museum of Australian fauna ; laboratories of the Division of Economic Entomology and Plant Industry of the

Institute for Scientific and Industrial Research ; a section of the National Library ; the Australian War Memorial ; additions to Government House ; a modern well-equipped high school ; primary schools ; a new Community Hospital ; a swimming pool with a modern filtration chlorination plant ; the W. J. Farrer Memorial at "Lambrigg", Tharwa ; a National Rose Garden ; a fire and ambulance station ; a regional broadcasting station ; the Patent Office building ; the Barton Hostel ; reservoirs at Black Mountain, Mount Ainslie and Red Hill ; an abattoirs ; a civil aerodrome ; a civil aviation wireless station ; naval wireless stations ; a R.A.A.F. aerodrome ; a new Royal Military College at Duntroon ; a military training school at Duntroon ; an Empire Air Training Depot (technical) ; a drill hall.

During the same period about 1,400 houses were built by the Government.

Private enterprise also played its part in building activity, and private buildings constructed included houses, several blocks of flats, two churches, a new private school, and extensive additions to existing private schools, a private hospital, a soldiers' club, a picture theatre, a broadcasting station and studio, etc.

During the war years, building and construction in Canberra practically ceased. However, about June, 1944, a quota of 25 to 30 houses per quarter was allotted under the War Housing Programmes This programme commenced early in 1945. Of these houses, 59 were completed in the year 1945–46, including the erection of a residence for the Minister for Chile at Deakin and a house at Dickson Experimental Station. During the year 1945–46, the block known as Melbourne Buildings at Civic Centre was completed, providing additional office space and also accommodation for the Canberra University College. Other architectural works completed during 1945–46 included extensions to West Block ; provision of broadcasting control rooms in the Senate and House of Representatives at Parliament House ; alterations and renovations to Hotel Acton completing the re-conversion from office to hotel accommodation ; and the erection of a new building to accommodate the Prices Branch.

The following engineering works were completed :—One million gallon reinforced concrete reservoir to provide additional storage for the township of Queanbeyan ; construction of King's Avenue and Weir ; and the construction of Billabong Bridge. Sub-divisional street construction and the provision of water and sewerage mains were undertaken for additional sections in the suburbs of Griffith, Narrabundah, Turner and Ainslie

Electrical works carried out comprise the following :—A new high tension feeder to Ainslie and Duntroon areas to improve services and meet increased demands ; first stage of a 22 kv. supply to Cotter pumping station enabling the simultaneous use of large pumping units to meet increased summer consumption ; a new sub-station and underground supply for Melbourne Buildings ; the Parliamentary debate broadcasting system and speech amplification in the House of Representatives, Parliament House ; an internal radio communication system in the Canberra Community Hospital ; modern lighting and electrical heating installation in offices in Melbourne Building extensions ; installation of fluorescent lighting in the Government Printing Office ; extensive installation of fluorescent lighting andel ectrical equipment in the Governor-General's residence at Yarralumla ; and the provision of modern lighting, and a paging and sound amplifying system in the tuberculosis ward of the Canberra Community Hospital.

Mechanical engineering services include a heating and ventilation system in West Block and ventilation of the telephone exchange, East Block.

The following projects were amongst those still under construction at 30th June, 1946 :—The erection of 177 residence in various suburbs ; extensions to runways at Fairbairn Aerodrome ; provision of a heating system in the new Prices Building ; road construction and water supply, sewerage and stormwater drainage for additional sections in various suburbs ; and extension of high tension and low tension mains to new substations.

5. **Forestry.**—A considerable amount of reafforestation work has been undertaken and plantations have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have also been established in the Brindabella mountains.

The total area of plantations to 30th June, 1946, was 14,500 acres. Forestry operations were begun on Mount Stromlo in 1915, and up to 1925 approximately 700 acres had been planted with pine and other trees. The plantings up to this time were chiefly on aesthetic lines, but since the initiation of a wider programme, arrangements have been made for pruning and thinning, and sawmill timber is now being obtained from the logs resulting from thinning operations. The yearly output of sawmill logs from thinnings is gradually improving and has increased from 30,000 super. feet in 1930–31 to 2,000,000 super. feet in 1945–46.

In 1926 a comprehensive review was undertaken of the Territory's potentialities in regard to forest development. A system of forestry management was instituted in the existing forest areas, and a considerable amount of survey and assessment work has been completed. *Pinus radiata* has been most extensively planted, and also, as a result of experimental work, pinus areas of better quality pines on a longer rotation, such as *Pinus ponderosa* and *laricio*, have been planted during recent years, but *Pinus radiata* remains the principal species.

6. **Lands.**—(i) *General.* Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Australian Capital Territory and to the area of alienated and leased land.

As considerable portions of the Territory lands are not required in connexion with the establishment of the city, large areas have been leased under special improvement conditions in regard to the extermination of noxious weeds and the destruction of rabbits and other pests. The lands are classified into three grades of agricultural and three grades of grazing land. Leases may be granted for grazing, fruitgrowing, horticulture, agriculture, residential, business, or other purposes for a period not exceeding 25 years. The annual rental is 4 per cent. of the assessed value of the land, including improvements which are the property of the Crown, plus the amount of rates payable. No person may hold under lease land of a greater value than £10,000, exclusive of the value of buildings and fences thereon. About 292,510 acres comprising 466 leases and 12 grazing licences were held under lease and licence at 31st March, 1946, for periods varying from quarterly tenure to 25 years.

Under the Seat of Government (Administration) Act 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act. Leases of land in the City Area are granted under the City Area Leases Ordinance 1936–38, and leases of other lands under the Leases Ordinance 1918–37. Land is also leased for various purposes in the City Area under the Church Lands Leases Ordinance 1924–32, and the Leases (Special Purposes) Ordinance 1925–43.

(ii) *City Leases.* The Government may grant leases in the city area of any Crown land for business or residential purposes. Such leases may be issued for a period not exceeding 99 years at a rental equal to 5 per cent. of the unimproved value of the land, which value is subject to re-appraisement at the expiration of 20 years, and thereafter every 20 years. A suitable building must be commenced within 6 months and completed within 12 months unless an extension of time is allowed.

Auction sales of city leaseholds are described in Official Year Book No. 22, p. 599.

Six leases under the Church Lands Leases Ordinance 1924–1932, which require the lessees to submit a definite building programme within a specified period, and one lease under the Church of England Lands Ordinance 1926 have been granted for church purposes. A further eight leases under the Leases (Special Purposes) Ordinance 1925–1943, one lease under the City Area Leases Ordinance 1936–1938, and two leases under the Leases Ordinance 1918–1937 have been granted for church and scholastic purposes.

The total number of leases granted under the City Area Leases Ordinance, excluding surrendered leases, at the end of the financial year 1946–47 was 741 representing a capital value of £285,167. During the year 68 new leases were granted. The number of business and residential blocks surrendered to or determined by the Commonwealth to the end of the year was 329.

Under the terms of the City Area Leases Ordinance 1936–1938 each block is leased for a period of 99 years at a rental of £5 per cent. per annum of the unimproved capital value as assessed by the Commonwealth or bid at auction. At present such rentals are subject to a 20 per cent. rebate.

(iii) *In the Jervis Bay Territory.* The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital. The Royal Australian Naval College was established in this area on a site known as Captain's Point, but was removed in 1930 to Flinders Naval Base, Victoria. Leases have been granted over an area of 11,788 acres in the Jervis Bay Territory.

7. **Railways, etc.**—Canberra is connected at Queanbeyan with the railway system of New South Wales by a line 4¾ miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. The railway terminus is situated in the area known as Kingston.

A direct passenger service is in operation connecting Canberra with Sydney and Melbourne, and trains leave both cities for Canberra daily.

There are two companies operating air services each several times daily on the Melbourne–Canberra–Sydney route.

Regular motor-coach services link Canberra with New South Wales, Victoria and South Australia.

8. **Population.**—The census return of population on 30th June, 1938, was 11,290 in the Australian Capital Territory and 272 in the Jervis Bay Territory, or a total of 11,562 persons. The population at the census of 30th June, 1947, was 16,905 persons—15,156 in the city area, 1,389 in the rural districts and 360 in the Jervis Bay area.

9. **Production.**—During 1945–46 the production of the more important items of the agricultural and pastoral industry was—Wheat, 38,631 bushels; wool, 1,960,000 lb.; butter, 3 tons; meat (bone-in-weight fresh), 1,132 tons. The numbers of live stock depastured at 31st March, 1946, were—Horses, 1,048; cattle, 7,867; sheep, 224,680; and pigs 619.

10. **Educational Facilities.**—Arrangements exist with the New South Wales Education Department for the administration of education up to and including the secondary stage in the Territory, the expenditure involved being refunded annually to the State. There are nine schools in the Australian Capital Territory and two in the Jervis Bay Territory. The largest school is situated at Telopea Park, Barton, with accommodation for 800 scholars. Secondary education is provided at the Canberra High School, Acton, and the Telopea Park Central School has a secondary department. The High School has accommodation for 550 scholars, and its curriculum provides a standard of education comparable in range of subjects with that provided at the Government High Schools in New South Wales. The School also provides for commercial and junior technical classes, and there is an Evening Youth College attached, with commercial, matriculation and other classes.

The Canberra Technical College at Kingston is provided with modern equipment for supplementary courses for apprentices, journeymen desirous of improving their trade qualifications, and for others who desire to take any special courses. Provision is also made for the training of ex-service personnel under the Commonwealth Reconstruction Scheme.

The Canberra Nursery School, Acton, established in 1944, provides for the training of children between the ages of 3 and 5 years.

A pre-school centre at Reid provides modified nursery school facilities for children between the ages of 3 and 5 years from that suburb. Additional centres of this type are to be established in other areas.

There are at present four private schools in the Territory. The Canberra Grammar School, the Canberra Church of England Girls' Grammar School, and St. Christopher's Convent School provide for sub-primary, primary and secondary education, and St. Patrick's School provides sub-primary and primary education.

Reference to the establishment of the Canberra University College will be found in Chapter VI. "Education".

11. **Finance.**—(i) *Financial Year* 1945–46. Receipts and expenditure for the financial year 1945–46 are given in the following table :—

AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE, 1945–46.

Receipts.		Expenditure.

Aggregate Receipts	1,032,727	Aggregate Expenditure ..	349,103	235,814	1,232,680	1,817,597

The aggregate receipts for 1944–45 were £860,732 and expenditure was £1,426,998. Details will be found on p. 28 of *Finance Bulletin* No. 36, 1944–45.

(ii) *From* 1901–2 *to* 30*th June*, 1946.—The total receipts and expenditure from 1901–2 to 30th June, 1946, were as follows :—

AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE TO 30th JUNE, 1946.

Receipts.	£	Expenditure.	£
Commonwealth Treasury—		Lands	912,308
Parliamentary Appropriations—		Engineering works	5,411,964
Revenue	8,804,181	Architectural works	4,176,026
Loan	5,776,023	Other capital expenditure, sundry debtors' etc.	1,582,182
			12,082,480
		Seat of Government Establishment Account, being maintenance and administration less revenue : expenditure of a capital nature for which assets not longer exist ; profit and loss accounts of trading activities, etc.	*2,497,724
Total Receipts	14,580,204	Net Expenditure	14,580,204

* Excludes interest £4,559,699 net.

The foregoing table was prepared by the Department of the Interior and excludes part cost of national buildings (Parliament House, the secretariats, etc.), federal highways within the Territory, the Queanbeyan–Canberra Railway, the housing loan, etc., and loans for housing—£2,262,366.

NORFOLK ISLAND.

1. **Area, Location, etc.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° 3′ 45″ South, longitude 167° 56′ 29″ East. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney it is distant 930 miles, and from Auckland, 630 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side, inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 49° and 85° F. with a mean of 68° F. The average annual rainfall is 52 inches. It has been said that the salubrious climate, coupled with the beauty of its landscapes and seascapes, should render Norfolk Island "the Madeira of the Pacific". Before the war the island was visited annually by a number of tourists. With the return of improved shipping facilities and the inauguration of direct air services from Australia and New Zealand, this traffic is again rapidly increasing.

2. **Settlement.**—The first colonization, in 1788, was by Lieutenant King, who in H.M.S. *Supply* established a small penal station as a branch settlement of that at Port Jackson. The settlement was abandoned in 1813, and for 13 years thereafter its chief use was as a whaling station and place of call for British warships.

From 1826 to 1855 it was again made a penal station. In 1844 it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed thence to Norfolk Island in 1856. The new community numbering 94 males and 100 females were the descendants of British sailors and Tahitian women. The last of those transferred died at Norfolk Island on 1st March, 1943.

3. **Administration.**—In 1856 the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896 it was made a dependency under the Governor of that Colony, and finally by the passage of the Norfolk Island Act 1913 it was accepted by the Federal Parliament as a territory of Australia. From July, 1914 until 1st January, 1929, Norfolk Island was administered by the Department of Home and Territories, and then, until 25th June, 1941, by the Territories Branch of the Prime Minister's Department, but is now administered by the Department of External Territories through an Administrator. An amending measure, the Norfolk Island Act 1935, provided for the establishment of an Advisory Council of eight elected members to advise the Administrator.

4. **Population.**—The population as disclosed by the Census at 30th June, 1947, was 938 consisting of 505 males and 433 females. During 1946–47, 14 births, 14 deaths, and 9 marriages were recorded. The average age of the persons who died was 58 years. Arrivals to the island exceeded departures by 117, the respective figures being arrivals 829, departures 712.

5. **Live Stock.**—The latest returns of live stock show that at 30th June, 1947, there were on the island 1,464 cattle, 527 horses, 327 sheep and 25 pigs. In addition, there were 5,369 head of poultry.

6. **Production, Trade, etc.**—The soil throughout is good and is specially suitable for the cultivation of bananas, citrus and other fruits. The Hawkesbury Wonder bean seed is one of the staple crops of the island. Since the promulgation of the Ordinance regulating the export of seed the area planted with bean seed has increased. Of the 1946–47 crop, 1,087 bushels were exported, the net return to growers being £3,022.

Apart from the bean, agriculture generally has been depressed. A modern pulping factory was erected on the island during 1938 but whilst 82 tons of passion fruit pulp were produced during 1939–40, the quantity of pulp produced during 1946–47 amounted only to about 5½ tons. The pulping of cherry guavas for jelly has also been experimented with and investigations carried out with a view to cultivating flax and ramie.

The citrus trees in full bearing on the island are capable of producing over 3,000 cases of fruit, but owing to a lack of marketing facilities, production has been retarded. Lemon and orange juice sold readily, the combined value of these two items of export during 1946–47 amounted to £460. Lemon seed exported during the year was valued at £86.

Large numbers of whales pass the island throughout the season. However, whaling had not been conducted for a number of years until 1939, when the industry was revived by the formation of a whaling company. The preserved fish industry which was established some years ago has met with a number of setbacks but several consignments of frozen fish valued at £325 were exported to Australia during 1946-47.

On 30th June, 1947, the total area of land held under freehold and Crown leasehold amounted to 6,325 acres, consisting of 4,169 acres freehold and 2,156 leasehold.

Imports and exports for the six years 1938–39 and 1942–43 to 1946–47 are given hereunder ; the values are expressed in Australian currency :—

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are (*a*) the produce or manufacture of Norfolk Island ; (*b*) shipped direct to Australia ; and (*c*) not goods which if manufactured or produced in Australia would be subject to excise duty.

7. **Communication.**—The "all-red" cable from Great Britain via Vancouver, Fanning Island and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane.

A shipping service to the Territory is maintained by vessels of Burns Philp & Co. Ltd. Sydney, under the terms of the contract with the Commonwealth Government for the maintenance of shipping services to the Pacific Islands. The journey from Sydney to Norfolk Island occupies four days.

The construction of an aerodrome on the island was completed during 1943. A fortnightly passenger and air freight service between Sydney and Norfolk Island is maintained by Qantas Empire Airways Ltd., and regular air services are also in operation from New Zealand.

Until 10th June, 1947, the post office at Norfolk Island was part of the Commonwealth postal system, but as from that date Norfolk Island was established as a separate postal administration with its own issue of stamps.

8. **Social Condition.**—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry and hat making. The headmaster and assistant teachers are lent by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30th June, 1947, was 125.

The Court of Norfolk Island presided over by a Chief Magistrate is a court of record with dual jurisdiction. Sitting in its Limited Jurisdiction the Court has power to hear and determine actions of claims not exceeding £30 and to punish summarily all crimes and offences involving a pecuniary penalty or a sentence of imprisonment not exceeding six months. In its Full Jurisdiction the Court can hear and determine all actions, punish all crimes and offences, grant probate and letters of administration, hear and determine appeals from any conviction of the Court sittings in its Limited Jurisdiction, and has authority in all other matters. An appeal lies to the High Court of Australia from any judgment, order, decree or sentence of the Court sitting in its Full Jurisdiction.

9. **Finances.**—The whole of the Territorial revenue together with an annual grant from the Commonwealth Government in aid of the administrative expenses is paid to the credit of the Norfolk Island Trust Fund Account, and all administrative and developmental expenses are paid from that account. The operations for 1946–47 were as follows :—

PAPUA AND NEW GUINEA.

Provisional Administration.

Following the outbreak of the Pacific War civil administration in Papua and New Guinea was suspended on 11th February, 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied Forces when the Japanese surrendered in August, 1945. During the period of military control matters relating to the former civil administration were dealt with by the Department of External Territories Canberra. The Minister for External Territories was empowered by National Security Regulations to exercise the powers and functions of the Administrator, officers, and authorities of the territories, and jurisdiction of the Supreme Courts of Papua and New Guinea was vested in the Supreme Court of the Australian Capital Territory.

Pursuant to the provisions of the Papua–New Guinea Provisional Administration Act 1945, a single Provisional Administration Service was formed to take over from the military authorities in the Territories of Papua and New Guinea. Colonel J. K. Murray was appointed Administrator of the combined Territories on 11th October, 1945, and the transfer from military to civil control in Papua and the portion of the Territory of New Guinea south of the Markham River was effected on 30th October, 1945. Jurisdiction of the Supreme Courts of Papua and New Guinea was then vested in the Supreme Court of the Territory of Papua-New Guinea. As circumstances permitted, civil control was extended to other areas until the whole of the Territory of New Guinea came under control of the Provisional Administration of Papua-New Guinea on 24th June, 1946

PAPUA.

§ 1. General Description.

1. **Early Administration.**—Particulars of the early administration of Papua are given in Official Year Book No. 19, p. 576.

2. **Administration by Commonwealth of Australia.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the

Commonwealth by the Papua Act 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is now under the control of the Commonwealth, but not included within it, and is divided into magisterial districts.

Prior to an amendment made in 1940, the Papua Act provided for the appointment of a Lieutenant-Governor to administer the Territory. The office of Lieutenant-Governor was held by Sir Hubert Murray, K.C.M.G., from 1909 until his death in February, 1940. The amendment referred to provided for the control of the Territory by an Administrator.

3. **Area, etc.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude ; its southernmost portion, comprising Sudest and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 800 miles ; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,540 square miles, of which 87,786 are on the mainland, and 2,754 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (see No. 18, p. 633).

§ 2. Population.

The white population of Papua at the Census of 30th June, 1947, was 2,542, made up of 1,700 males and 842 females. The numbers recorded in earlier years were :—1937, 1,323 ; 1938, 1,488 ; 1939, 1,608 ; 1940, 1,822 ; and 1941, 3,070.

It is not possible to give exact data regarding the number of natives, because a large area of the interior has not as yet been under complete Government control. The official estimate is 300,000. Such censuses of the native population as have been taken during recent years point to a slight increase. The coloured population, other than Papuans, on 30th June, 1947, was 194. On the same date, half-castes, with one of the parents a European, were 503. An Immigration Restriction Ordinance prohibits the immigration of persons who fail to pass the dictation test, or who are of bad character, or likely to become a charge upon the public. Exemptions may, however, be granted by the Administrator to persons of special skill required for employment as overseers or foremen.

§ 3. Native Labour, Taxation, Health, etc.

1. **Native Labour.**—Information regarding the conditions connected with the employment of native labour in 1928 will be found in Official Year Book No. 22, p. 607.

The existing laws relating to native labour are uniform in Papua and New Guinea, and are contained in the Native Labour Ordinance 1946 of the Territory of Papua-New Guinea and in the regulations made thereunder. Employers may recruit personally or by associations of employers or by salaried persons in the regular employment of those employers or associations. The administration determines the numbers that may leave a village for employment and the number that may be employed by each employer. Service on the part of the native is voluntary and he must be justly treated, properly housed and fed and given adequate medical attention when necessary. Natives under 16 years may not be employed and a minimum monthly wage (15s.) and working week (44 hours) are prescribed. Employment under contract is limited to a maximum of 12 months and re-engagement is not permitted until the native has been returned to his village for a period of three months. Employers must repatriate native employees on termination of their contracts. Provision also exists for compensation for injury or death arising out of employment.

The number of natives engaged under contract of service on 31st March, 1947, was 7,575. In addition there were 2,246 non-indentured employees.

2. **Native Taxes.**—Under the Native Taxes Ordinance, 1917–1936, a tax not exceeding £1 per annum may be imposed on natives, except native constables, mission teachers and mission students, natives unfit for work, and those who have four living children. The proceeds of the tax must be expended on native education, or devoted to purposes directly benefiting the natives.

The taxes collected in 1940–41 amounted to £16,761, of which £5,904 was transferred to the Native Education Fund, and £8,474 to the Native Benefits Fund. The Native Education Fund during 1940–41 disbursed to primary and technical education £4,036, and to agricultural education £1,262, leaving a credit balance of £26,200. From the Benefits Fund the expenditure included :—Anthropology, £838 ; health, £6,309 ; village improvements, £94 ; family bonus, £1,720 ; games in villages, £12 ; and clerical expenses, £25.

3. **Care of Half-caste Children.**—An Ordinance was passed in 1922 to provide for the care and maintenance of neglected half-caste children. The Ordinance provides that a sum of £26 per annum shall be paid to the Commissioner for Native Affairs by the adjudged father of the child until the child, if a boy, shall reach the age of 16 years, or, if a girl, 18 years.

4. **Health.**—The two principal native hospitals are in Port Moresby and Samarai ; but minor hospitals are attached to the out-stations. Hospitals are also conducted by the various mission societies and plantation companies. The mission societies employ a number of doctors and trained nurses. European medical assistants are employed by the Government. A training school has been established for the purpose of training natives in first-aid, elementary physics, chemistry, anatomy, physiology and pathology in preparation for their employment as native medical assistants. Arrangements have also been made for students to attend the Native Medical Practitioners' School at Fiji The chief complaints treated are malaria, yaws, ulcers, lung affections, hookworm, venereal and skin diseases. The death rate amongst native labourers was 2.7 per cent. in 1940–41.

§ 4. Land Tenure.

1. **Method of Obtaining Land.**—The broad principles upon which the land laws of Papua are based are (*a*) no land can be alienated in fee simple ; (*b*) the rental of the land leased is assessed on the unimproved value of the land, and is subject to re-appraisement at fixed periods. The terms upon which land may be leased are very liberal. Leaseholds of the best class of agricultural land may be obtained for 99 years. No rent is payable during the first ten years of the lease on areas less than 1,000 acres. During the following ten years the rent is charged at the rate of 5 per cent. on the unimproved value of the land. The unimproved value of the land is appraised every twenty years and the rent determined accordingly. If on any appraisement the rent is raised by more than one-third the lessee may disclaim the lease and shall be entitled to receive compensation for his improvements. The unimproved value of agricultural land has been fixed at 5s. per acre. Rent is immediately payable on areas exceeding 1,000 acres, and survey fees on areas exceeding 100 acres.

2. **Crown Lands.**—Private sales of native-owned land in the Territory have now ceased. The Government buys from the natives, and then leases to planters, who are forbidden to have direct dealings in land with Papuans. The amount of Crown Land purchased from the natives in 1940–41 was 12,177 acres, and the total to 30th June, 1941, 1,787,783 acres. The tenures under which surveyed areas were held at 30th June, 1941, were leasehold 200,303 acres, and freehold 23,490 acres. The area of leases granted during 1940–41 for agricultural purposes was 9,834 acres most of which was intended for rubber plantations. The low price of copra and the more favorable prospects of rubber had diverted attention to the latter culture. At 31st December, 1941, more than 80,000 acres were held under leases for the cultivation of rubber. Crown rents on leaseholds for 1941 amounted to £7,317.

§ 5. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, timber, fishing, mining and manufacturing industries. Gold is the principal mineral mined, and rubber and copra are the most important amongst plantation products. Portions of the Territory appear well suited for cotton cultivation, and there is a possibility of obtaining petroleum in marketable quantities. Bounties are paid by the Commonwealth Government on cocoa beans and shells, hemp and coir, sago, vanilla beans, bamboos and rattans, spices and kapok, produced in the Territory and exported direct to Australia for home consumption.

2. **Agriculture.**—(i) *Soil and Rainfall.* Rich soils at varying elevations and heavy and evenly distributed rainfall favour the cultivation of a variety of tropical products including sugar-cane, coco-nuts, sago palm, bread fruit, dyewoods, spices, ginger, nutmegs, bananas and other fruits. There are large areas of rich alluvial and volcanic soils along the coast, and fertile land is found at elevations up to 6,000 feet. Heavy rainfalls occur, except over a belt of country which runs back from the coast to the hills, and which has its dry season from May to November. This "dry" area is admirably suited for the production of tobacco, fibres, cotton, etc.

(ii) *Plantations.* Agricultural settlement has been mostly in the Central and Eastern Divisions with coco-nuts and rubber as the principal crops. The natives are compelled by an Ordinance to plant coco-nuts for food supply. In addition to the coco-nuts in these plantations, many more are planted over small and widely scattered areas by the older natives in accordance with custom. The Native Plantations Ordinance provides for the establishment of plantations in which half of the proceeds is paid to the natives entitled thereto, and the remaining half paid into the Native Education Fund. The following table shows the areas under the different crops during the five years 1936 to 1940:—

AREA UNDER CULTIVATION.

Crop.	1936.	1937.	1938.	1939.	1940.
	Acres.	Acres.	Acres.	Acres.	Acres.
Coco-nuts	48,188	45,207	44,719	44,527	44,583
Rubber	10,270	10,956	12,809	14,494	18,262
Sisal hemp	150	150	700	700	..
Kapok	168	119	84	92	85
Coffee	368	271	248	190	84
Other	801	933	664	554	595
Total	59,945	57,636	59,224	60,557	63,609

At 30th June, 1940, the London market price for hot-air dried copra was £13 5s. per ton as compared with £11 7s. 6d. at 30th June, 1939. Rubber at the later date was 13½d. per lb. compared with 8d. per lb. on 30th June, 1939.

(iii) *Government Plantations.* There are five Government plantations, the Orangerie Bay and Kikori coco-nut plantations and the Gobaregere, Cupola and Kokoda rubber plantations.

3. **Forestry.**—The principal softwood timber is known as "ilimo," while among satisfactory timbers of the lowlands are "nara," "medobi," and "melila." There are a large number of woods, varying from the softest to the hardest, including beautiful cabinet woods, but research is necessary to determine their usefulness. The development of a coniferous belt at the higher altitudes offers great possibilities. It is believed that teak and sandalwood are well suited for cultivation.

4. **Live Stock.**—At 31st December, 1940, the live stock in the Territory consisted of 587 horses, 5,994 head of cattle, 87 mules, 1,244 goats, 665 pigs, 30 sheep and 6,320 fowls. The introduction of rabbits, foxes, hares and monkeys is prohibited.

5. **Fisheries.**—Pearl-shell fishing occupies an important place in the industries of Papua. In 1941 considerable numbers of luggers were licensed, but the returns were mostly credited to Queensland, whose boundary approaches to within a few miles of the Papuan coast. The species of tortoise which supplies the commercial tortoise-shell is also a native of Papua. Bêche-de-mer and trochus are found along the shores and reefs and form valuable articles of export.

6. **Mining.**—(i) *Variety of Minerals.* Minerals have been found over a wide range of country. Those discovered so far are gold, copper, tin, lead, zinc, cinnabar, iron, osmiridium, gypsum, manganese, sulphur, graphite, chromite, lignite, platinum and petroleum.

The existence of petroleum has been traced at scattered intervals over a large area. Three companies hold permits under the provisions of the Petroleum (Prospecting and Mining) Ordinance 1938–1939 and oil prospecting has been carried on in the Western, Delta, Gulf and Central Divisions.

Of precious stones, only the topaz and beryl have been obtained. Large beds of apparently good coal also exist.

(ii) *Gold.* Gold was discovered in 1888 and the search gradually spread over every division, finds being reported wherever the explorers went. The estimated quantity in fine ounces and the value of the gold yield for the five years 1936–37 to 1940–41 are given below :

PAPUA : GOLD YIELD.(a)

1936–37.		1937–38.		1938–39.		1939–40.		1940–41.(b)	
Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£
21,605	187,975	25,835	223,160	35,808	325,116	30,422	316,203	10,348	110,501

(a) Valued at average price realized for fine gold in Australia. (b) Nine months ended March 1941.

Most of the rivers, except those flowing into the Gulf of Papua, have been declared open to gold dredging, and good yields have been obtained. The total value of gold won to 31st March, 1941, was £3,269,021.

(iii) *Copper.* Copper matte to the value of £5,999 was exported during 1940–41. The principal value of this item is its gold content.

(iv) *Other Minerals.* Some good samples of galena (sulphide of lead) have been obtained, while cinnabar (sulphide of mercury), graphite (or plumbago), zinc-blende, native sulphur, and other minerals are known to exist. In 1924 a deposit of lignite was discovered on Smoky Creek, a tributary of the Era River.

A mineral laboratory and museum have been fitted up, and are available to prospectors and others interested.

7. **Water Power.**—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10,000,000 h.p. available for this purpose.

§ 6. Trade and Shipping.

1. **Customs Tariff.**—In the Schedule to the Customs Tariff of Papua 136 items are mentioned, of which approximately one-third is on the free list, consisting of a number of foodstuffs and certain manufactures for use in the development of the Territory or its industries. Where duties are imposed they are generally on a 10 per cent. ad valorem basis, with the exception of ale, spirits, beverages and tobacco on which high revenue rates are imposed. Preference is given to Australian wines. On 16th July, 1931, a primage duty of 4 per cent. ad valorem was imposed on all goods, whether dutiable or not, in addition to the ordinary customs dues ; the rate was subsequently reduced to 2½ per cent. and the duty ceased to operate on 1st July, 1937. From 12th July, 1940,

the duty has been re-imposed, but certain specified articles have been exempted. The value of imports into Papua during 1940–41 was £539,152 and the duty collected, £63,116. The duty collected in 1939–40 was £64,611.

In 1940–41, £4,255 was received in export duties which are levied on pearl-shell gold and copra, in the latter case only on the excess above £20 per ton of a certain declared value deemed to be the London market price.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced and imported direct from Papua (see Chapter XI. "Trade"), and a proclamation of 25th September, 1935, exempted from primage duty goods produced or manufactured in the Territory.

2. **Imports and Exports.**—Tables of imports and exports during the years 1936–37 to 1940–41 are given below. The values of exports are expressed in Australian currency but it is not possible to determine accurately the currency of the £ in the table of imports.

PAPUA : IMPORTS AND EXPORTS.

Particulars.	1936–37.	1937–38.	1938–39.	1939–40.	1940–41.
	IMPORTS.				
	£	£	£	£	£
Ale, spirits and beverages ..	11,362	14,453	14,818	19,544	24,922
Tobacco and manufactures ..	25,637	24,213	27,466	31,669	31,874

Total	524,001	435,593	490,158	510,672	492,775

The trade of the Territory reached its maximum in 1939–40, exceeding by £180,414 the previous highest figure which was established in 1925–26 when imports were valued at £470,774 and exports at £685.896. Prices for both copra and rubber were high about 1925–26 and the copper-mines were producing freely.

3. **Direction of Trade.**—Particulars of the countries of origin of the imports into Papua and of destination of the goods shipped therefrom are shown below for the three years ended 1940–41.

PAPUA : DIRECTION OF TRADE.

Country.	Imports.			Exports.		
	1938–39.	1939–40.	1940–41.	1938–39.	1939–40.	1940–41.
	£	£	£	£	£	£
Australia	239,105	319,431	298,848	409,408	456,120	453,504

Total ..	514,808	826,412	539,152	490,158	510,672	492,775

4. **Shipping.**—The following table shows the number and tonnage of oversea vessels entered and cleared at ports during the five years ended 1940–41. Of the vessels recorded in 1940–41, 166 were of British nationality.

PAPUA : OVERSEA SHIPPING.

Year.	Vessels.	Tonnage.
1936–37	181	356,476
1937–38	243	482,981
1938–39	215	461,199
1939–40	227	489,970
1940–41	217	489,469

NOTE.—The figures above exclude ships of war and Government vessels.

§ 7. Finance.

The revenue and expenditure of Papua for the five years 1936–37 to 1940–41 were as follows :—

PAPUA : REVENUE AND EXPENDITURE.

Particulars.	1936–37.	1937–38.	1938–39.	1939–40.	1940–41.
Revenue—	£	£	£	£	£
Customs	57,443	58,539	54,606	64,874	77,359
Commonwealth Grant ..	42,500	42,500	42,500	42,500	42,500
Lands	6,530	6,709	6,013	7,112	7,700
Fees, fines, etc. ..	6,148	7,065	9,501	9,554	10,050
Other	(*a*) 59,170	67,995	53,203	53,878	51,909
Total	171,791	182,808	165,823	177,918	189,518
Expenditure—					
Medical	16,718	20,884	22,075	20,785	24,718
Ordinary Votes ..	(*b*) 127,926	122,536	116,275	127,455	132,633
Public Works	23,503	35,828	25,458	26,966	29,886
Native Affairs	2,773	3,854	2,522	2,726	1,763
Total	170,920	183,102	166,330	177,932	189,000

(*a*) Includes Commonwealth grant to rubber growers of £6,871. (*b*) Includes expenditure of Commonwealth special grant.

The table above and that on page 365 give separate particulars of the respective territories. Following the institution of the new provisional administration particulars of finance relate to both territories. In order to provide a comparison with 1945–46, combined particulars are also shown below for the years 1937–38 to 1940–41. The figures include the transactions of the following accounts :—Trust Territory of New Guinea—Consolidated Revenue Account ; Papua—Public Revenue Account, Native Tax Account, Native Education Fund and Native Benefits Fund. Figures for 1945–46 relate to Civil Administration only. The last three funds are not included in the table above.

TERRITORIES OF PAPUA AND NEW GUINEA : REVENUE AND EXPENDITURE.

TRUST TERRITORY OF NEW GUINEA.

§ 1. General Description.

The land area of the Territory of New Guinea is about 93,000 square miles and the area including the sea within the lines drawn through its extreme outer points is more than 1,000,000 square miles. As the coast of the Territory has not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands together with the small islands adjacent thereto are as follows :—

AREA OF TERRITORY OF NEW GUINEA.

Particulars.		Approximate Area.
		Sq. miles.
North-East New Guinea (also called " The Mainland ") ..		69,700
Bismarck Archipelago—		
New Britain	14,600	
New Ireland	3,340	
Lavongai	460	
Admiralty Islands	800	19,200
Solomon Islands—		
Bougainville	3,880	
Buka	220	4,100
Total		93,000

Information regarding physiography and climate will be found in Official Year Book No. 22, p. 613, and in the *Official Handbook of the Territory.*

§ 2. Government.

1. **The Military Occupation (1914–18 War).**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government in May, 1921.

2. **1939–45 War.**—For the events following the outbreak of the Pacific War and the formation of the Papua-New Guinea Provisional Administration in 1945, see p. 345 *ante*.

3. **Mandate (1920).**—In 1919 it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted under Mandate from the League of Nations to the Government of the Commonwealth. The issuing of the Mandate was, however, delayed, and it was not until 17th December, 1920, that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (see p. 264).

4. **Trusteeship (1946).**—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are as follows :—

> *Preamble* : The Territory of New Guinea has been administered in accordance with Article 22 of the Covenant of the League of Nations and in pursuance of a Mandate conferred upon His Britannic Majesty and exercised on his behalf by the Government of the Commonwealth of Australia.
>
> The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.
>
> The Government of Australia now undertakes to place the Territory of New Guinea under the trusteeship system, on the terms set forth in the present Trusteeship Agreement.
>
> Therefore, the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of trusteeship for the Territory of New Guinea in substitution for the terms of the Mandate under which the Territory has been administered :—
>
> *Article* 1. The Territory to which this trusteeship agreement applies (hereinafter called the Territory) consists of that portion of the island of New Guinea and the groups of islands administered therewith under the Mandate dated 17th December, 1920, conferred upon His Britannic Majesty and exercised by the Government of Australia.
>
> *Article* 2. The Government of Australia (hereinafter called the Administering Authority) is hereby designated as the sole authority which will exercise the administration of the Territory.
>
> *Article* 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.
>
> *Article* 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory and for this purpose will have the same powers of legislation, administration and jurisdiction in and over the Territory as if it were an integral part of Australia, and will be entitled to apply to the Territory, subject to such modifications as its deems desirable, such laws of the Commonwealth of Australia as it deems appropriate to the needs and conditions of the Territory.

Article 5. It is agreed that the Administering Authority, in the exercise of its powers under Article 4, will be at liberty to bring the Territory into a customs, fiscal or administrative union or federation with other dependent territories under its jurisdiction or control, and to establish common services between the Territory and any or all of these territories, if (in its opinion) it would be in the interests of the Territory and not inconsistent with the basic objectives of the trusteeship system to do so.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. The Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

Article 8. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter.
2. It will, in accordance with its established policy—
    - (*a*) take into consideration the customs and usages of the inhabitants of New Guinea and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory and, in particular, ensure that no rights over native land in favour of any person not an indigenous inhabitant of New Guinea may be created or transferred except with the consent of the competent public authority ;
    - (*b*) promote, as may be appropriate to the circumstances of the Territory, the educational and cultural advancement of the inhabitants ;
    - (*c*) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory ;
    - (*d*) guarantee to the inhabitants of the Territory, subject only to the requirements of public order, freedom of speech, of the press, of assembly, of petition, freedom of conscience and worship and freedom of religious teaching.

5. **Administration.**—For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua-New Guinea Provisional Administration see Official Year Book No. 36 and earlier issues.

For administrative purposes the Territory is divided into the eight following districts :—New Britain, comprising New Britain and adjacent islands ; Morobe, Madang, Central Highlands, and Sepik on the mainland ; New Ireland, comprising New Ireland, Lavongai and adjacent islands ; Manus, comprising the Admiralty Group ; and Kieta, the former German portion of the Solomon Islands. Each district is under a District Officer, assisted by a small staff.

6. **Reports to the League of Nations.**—Twenty reports to the League of Nations, in compliance with Article 6 of the Mandate, were published, the last being for the year ended 30th June, 1940.

§ 3. Population.

1. **White Population.**—The number of the white population for various years since 1885 is shown in the following table. At 30th June, 1947, the white population was 3,412, of whom 2,604 were males and 808 females.

TERRITORY OF NEW GUINEA : WHITE POPULATION.

Year.	Number.	Year.	Number.
1885	64	1939	4,608
1933	3,191	1940	4,399
1937	4,286	1941	4,101
1938	4,445	1947	3,412

2. **Asiatic Population.**—Malays seem to have been the first Asiatics brought by the Germans to German New Guinea ; 37 of them were recorded on the mainland in 1885. About 1889 the New Guinea Company began to bring Chinese, Malays and Javanese in growing numbers from Singapore and Java to work on the plantations ; in the year 1892 there were about 1,800 Asiatics on the mainland. By 1898 the number had decreased to 300 or 400, but it had risen to 1,830 at the time of the 1933 Census and at 30th June, 1941, numbered 2,228, of whom 2,199 were Chinese and 29 Japanese. The Japanese at the 1933 Census numbered 73. The Chinese provide the skilled artisans of the Territory, and many of them are small traders. At the census of 30th June, 1947, non-Europeans numbered 2,215, of whom Chinese (1,769) and Filipinos (276) constituted the major proportion. Half-castes at the same date numbered 573.

3. **Native Population.**—As a large portion of the Territory is not under Government nfluence it is not possible to obtain reliable figures in regard to the number of the natives.

The following tables shows those enumerated as at 30th June, 1941 :

TERRITORY OF NEW GUINEA : NATIVE POPULATION AT 30th JUNE, 1941.

(Including Indentured Labourers.)

District.	Children.			Adults.			Total.		
	Males.	Females	Persons.	Males.	Females	Persons.	Males.	Females	Persons.
Kieta ..	11,307	9,912	21,219	15,618	15,218	30,836	26,925	25,130	52,055
Madang ..	37,406	30,897	68,303	58,786	54,901	113,687	96,192	85,798	181,990
Manus ..	3,259	2,749	6,008	4,235	3.891	8,126	7,404	6.640	14,134
Morobe ..	29,334	26,348	55,682	42,541	39,076	81,617	71,875	65,424	137,299
New Britain ..	21,737	19,349	41,086	34,563	25,938	60,501	56,300	45.287	101,587
New Ireland ..	7,619	6,422	14,041	15.791	11,723	27,514	23.410	18,145	41,555
Sepik ..	32,223	27,772	59,995	44,049	45,060	89,109	76,272	72,832	149,104
Total ..	142,885	123,449	266,334	215.583	195,807	411,390	358.468	319,256	a684,284

(a) Includes 6,560 Mission scholars, constabulary, etc., not distributed.

The number of natives indentured as labourers on 31st March, 1947, was 7,209. In addition, there were 6,889 non-indentured employees.

§ 4. The Natives.

1. **General.**—The natives are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Odd tribes of Negritoes exist in the mountains of New Guinea. There is a strain of Papuan, and, possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (See Official Year Book, No. 16, p. 670, and *Official Handbook of the Territory*. Pt. V.)

2. **Land Tenure.**—Native customs in regard to the ownership and use of land may be briefly outlined as follows. The ownership and use of the land are generally individual, although, in some rare cases, particularly in North Bougainville, the communal system

exists. In districts where a great many coco-nut palms are growing on native lands it is often found that the land is the property of a chief or of one of the old men of the tribe, and that the coco-nut palms growing thereon are divided into small groves, and are the property of several members of the tribe. Customs with regard to the use of unoccupied forest lands vary. Right of inheritance to land is almost invariably through the maternal branch. (See Official Year Book No. 17, p. 634, and *Official Handbook of the Territory*.)

3. **Research Work.**—During the German occupation of the Territory a certain amount of research work was carried out, partly by scientific expeditions, and partly by missionaries and by a local resident. For many years an anthropologist was engaged consolidating the work already done, and extending it throughout the Territory. The results of his work appear in special reports.

4. **Education.**—Provision for the education of natives is made in the Ordinance of 1922–1938 under which the Administrator is authorized to establish schools, grant money therefor, prescribe instruction, and arrange for the training of teachers and other matters. The expenditure on native education in 1940–41 was £6,827. Though the natives are liable to pay education tax, none has been collected since 1922–23. The European teachers have been seconded from the Education Department of Queensland. During the year ended 30th June, 1941, the following schools were maintained by the Administration :—Native elementary schools and native day schools, Malaguna, Tavui, Nodup and Pila Pila, near Rabaul, and Kavieng, and a native elementary school at Chimbu (Morobe) ; a native technical school, Malaguna ; a native agricultural school, Keravat. In addition there are schools for Europeans at Rabaul, Kavieng and Wau. A new day school for European children was erected at Bulolo in the Morobe District during the year.

A considerable amount of educational work is carried out by the missions, the schools maintained being of three classes : (*a*) elementary schools in villages ; (*b*) intermediate boarding schools at head-quarters ; and (*c*) high schools and technical schools. At 30th June, 1941, the various missions maintained 31 training centres, 51 high and technical schools, 144 elementary schools, and 2,397 village schools. The pupils numbered 65,598 at 30th June, 1940.

The missions also conduct schools for Chinese children in Rabaul and Kavieng.

The granting of assistance to mission schools is provided for by the Education Ordinance, but no grants have hitherto been made.

5. **Health of Natives.**—In a report dealing with the health of the natives in New Britain submitted before the 1914–18 War, it was stated that "the natives in the districts examined are not degenerate ; but they are sick ". The same qualification undoubtedly applies to the native population throughout the Territory.

The diseases taking the greatest toll of native life directly or through lowering vitality are—Malaria, respiratory diseases, dysentery, frambœsia, yaws, tropical ulcer, hookworm, filariasis and beriberi.

The Health Department of the Administration consists of (i) a staff of medical officers, medical assistants and orderlies ; (ii) native hospitals at Government stations and sub-stations (its staff also supervises hospitals on plantations) ; (iii) a laboratory ; (iv) training system for natives as medical orderlies ; (v) scheme of distribution of medical necessaries ; and (vi) leprosaria. It also undertakes the general oversight of sanitary conditions.

6. **Missions.**—Several mission societies have operated in the Territory. The Society of the Sacred Heart of Jesus worked in the Bismarck Archipelago, the Society of the Holy Ghost, the Franciscan Order and the Society of the Divine Word along the coast of North-East New Guinea from Sek to the Dutch border, and the Marists in Buka and Bougainville. These are Roman Catholic Missions. The Protestant Missions are the Australian Methodist Mission in New Britain and New Ireland, the New Zealand Methodist Mission in Bougainville, the Liebenzell Mission in the Admiralty Group, the Lutheran Mission (supported and staffed by the Lutheran Churches in Australia and America) which worked along the coast of North-East New Guinea from Sek to the

Papuan border, the Melanesian Mission (Anglican) in New Britain, and the Seventh Day Adventist Mission in Bougainville and New Britain. All these societies include teaching and planting with their missionary work.

§ 5. Land Policy.

1. **Acquisition of Land.**—A short account of the modes of acquiring land appears in Official Year Book No. 19, p. 590, but considerations of space preclude its repetition.

2. **Land Policy of the Present Administration.**—The Land Ordinance 1922–1941 provides for sale as well as leasing of land belonging to the Administration. The divergence from the policy usually adopted by the British in the Pacific (including Papua), which provides for leasehold only, was made with a view to disposal by sale of the freehold properties taken over from Germans, and which until 1927 were controlled by the Expropriation Board. The general land policy is based on the leasehold principle. All grants or leases contain a reservation to the Administration of all minerals, including mineral oil. Leases are for a term of 99 years except where a shorter period is provided. Lands, except in towns, are classified by a Land Board into land suitable for agriculture (Class A) and land not so suitable (Class B), and the unimproved value of the land is assessed. In the case of agricultural leases for more than 30 years the rent is 5 per cent. of the unimproved value, with power to remit during the first ten years, and subject to reappraisement every 20 years. Pastoral leases of lands of Class B may be granted for terms not exceeding 30 years, at a rental of 2½ per cent. of the unimproved value, subject to reappraisement every 10 years. Agricultural leases are subject to improvement conditions and pastoral leases to stocking conditions. Leases of town allotments may be granted for terms not exceeding 99 years, at a rent to be fixed at such percentage of the unimproved value as is prescribed.

The following table shows the leases in force on 30th June, 1941 :—

TERRITORY OF NEW GUINEA : LEASES IN FORCE, 30th JUNE, 1941.

Tenure.	No. of Leases.	Area.
		Acres.
Agricultural leases	442	141,628
Pastoral leases	3	9,496
Residence and business leases	320	334
Special leases	56	707
Mission leases	441	1,542
Chinatown leases	213	58
Long period leases from German regime ..	115	5,189

The area of the Territory is estimated at 59,517,593 acres, of which 906,763 acres had been purchased from the natives by the Administration to 30th June, 1941. This alienated land comprised 521,057 acres of freehold, 158,952 acres of leasehold, 200,144 acres held by the Administration, and 26,610 acres vested in the Director of District Services and Native Affairs as a trustee for natives. The area alienated in 1940–41 was 3,360 acres.

3. **Registration of Titles.**—Under German law there was a system of registration of titles in a "Ground Book," but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in an Ordinance entitled the Lands Registration Ordinance 1924–1939.

§ 6. Production.

1. **General.**—The natives have been described as a people of peasant proprietors, practising a crude form of agriculture. Their gardens and groves furnish but a small amount of produce for oversea trade, and the exports of the Territory grew only as European plantations were made, and natives were employed to work them.

Scientific methods of cultivation have been adopted, and production has been greatly increased thereby. Bounties are paid by the Commonwealth Government on cocoa beans and shells, hemp and coir, sago, vanilla beans, bamboos and rattans, spices and kapok, produced in the Territory and exported direct to Australia for home consumption.

2. **Agriculture.**—(i) *General.* Under the supervision of the Director of Agriculture soil analysis has been undertaken in different parts of the Territory and an agricultural chemist was appointed in 1939 to carry out this specialized work. A demonstration plantation has been established at Keravat where natives are being trained in tropical agriculture. A laboratory and a herbarium have been established, an entomologist and economic botanist engaged, and travelling inspectors appointed for the purpose of combating plant pests. Experiments are being carried out with a variety of crops. The foregoing measures, in conjunction with the Papua and New Guinea Bounties Act 1937 and the preference given by the Commonwealth Tariff to certain produce grown in the Territories, have greatly stimulated tropical agriculture.

(*a*) *Coco-nuts.* Coco-nut growing was, prior to the outbreak of war in September, 1939, by far the most important industry in the Territory, but low prices followed by the collapse of the world copra market checked expansion, the exports in 1940–41 being valued at only £266,970 compared with £504,627 in the previous year and with £1,231,309 (76,409 tons) in the peak year 1936–37.

(*b*) *Tobacco.* In 1940–41 many planters were cultivating tobacco to cater for the local market. Two companies manufactured tobacco suitable for issue to the natives or for trade. In some instances planters issued the dry leaf to the native labourers who make their own cigars and cigarettes.

(*c*) *Cotton.* In 1924–25 the Government obtained 1,615 lb. of cotton seed, and cultivation was tried at the experimental stations as well as by private planters, including a few natives, but little progress has been made.

(*d*) *Kapok.* During 1940–41 the cultivation of kapok continued on a small scale, the local demand being more than sufficient to absorb the available crop.

(*e*) *Cocoa.* Greater interest is being displayed in the cultivation of cocoa. The quality of the beans produced is good, and 292 tons were exported during 1940–41.

(*f*) *Desiccated Coco-nut.* Three desiccated coco-nut factories have been established in the Territory. The quantity exported during 1940–41 was 1,877 tons, an increase of 96 tons over the previous year's figure.

(*g*) *Coffee.* In 1940–41 two plantations of coffee were in satisfactory condition and were commencing to yield. Seventy-four tons of coffee of good quality, valued at £5,525 were exported during that year and were well received on the Australian market.

(*h*) *Rubber.* The tapping of rubber trees was increased during 1940–41 mainly because of the satisfactory price of rubber.

(*i*) *Other Crops.* The climate and soil of New Guinea are suitable for the cultivation of rice, Manilla hemp, cinchona, nutmeg, vanilla, peanuts and maize, but hitherto their cultivation has either not advanced beyond the experimental stage or has been attempted on a small scale only. Sugar-cane of many varieties flourishes, and the natives cultivate extensive areas for their own use; other indigenous food-producing plants include the sago palm and the cassava.

(*j*) *Plants Yielding Power Alcohol.* It seems probable that alcohol for power purposes will be produced economically. The sago palm and nipa palm yield as much as 60 gallons per ton, and in places are abundant.

(ii) *Plantations.* During 1934–35 the Administration disposed of the several plantations maintained by it with the exception of the demonstration plantation at Keravat. The principal crops grown on plantations are shown in the table hereunder for the year ended 30th June, 1940. The figures are not complete, but they give an indication of the progress of agriculture in the Territory to that date.

TERRITORY OF NEW GUINEA : PLANTATIONS, 1939–40.

(Excluding Native Reserves.)

Crop.	Area Planted.(*a*)	Area Bearing.	Yield.
	Acres.	Acres.	Tons.
Coco-nuts	261,676	210,954	(*b*)71,583
Cocoa	5,827	2,301	570
Coffee	2,792	1,935	56
Rubber	2,481	1,591	95
Kapok	556	321	15
Native Food (*c*)	3,289	1,453	2,099
Other	912	106	..
Total	277,533	218,661	..

(*a*) Includes inter-planted crops. (*b*) Copra ; desiccated coco-nut, 696 tons, also produced. (*c*) Native food of all kinds is mostly grown between young coco-nut palms not yet in bearing.

The area of plantations for various years from 1885 to 1940 is shown hereunder. As in the case of the previous table, the figures exclude native plantations :—

TERRITORY OF NEW GUINEA : PLANTATIONS.

Year ended June—	Total Area.	Area Planted.	Area under Coco-nuts (including Area not in Bearing).
	Acres.	Acres.	Acres.
1885	148	(*a*)	(*a*)
1895	2,152	(*a*)	(*a*)
1911	58,837	(*a*)	51,510
1914	84,488	(*a*)	76,847
1924	411,275	(*a*)	172,373
1932	460,942	216,730	211,882
1937	487,375	244,066	234,189
1938	496,118	262,547	239,976
1939	504,000	264,877	253,235
1940	525,965	277,533	261,676

(*a*) Not available.

3. **Live Stock.**—The coco-nut plantations are now of a sufficient area to maintain numerous live stock, the stock being depastured on the indigenous grasses growing between the rows of palms. In 1939–40 there were 1,323 horses, 20,494 cattle, 1,184 sheep, 9,327 goats, and 6,160 pigs (excluding the large number of pigs kept by the natives).

4. **Timber.**—An investigation of the timber resources was made by the Commonwealth Inspector-General of Forests, and a report in connexion therewith was published in 1926. According to this report, while offering no prospects of immediate gain to large sawmilling interests, the Territory possesses forest potentialities of a high order. Surveys of the timber resources of the Morobe District indicate that there are approximately 500 million super. feet of timber in the pine forests of the Bulolo Valley. This is supporting three sawmills cutting for local use. It is proposed to harvest this forest over a period of years and progressively re-afforest the area. Sawmills controlled by the Administration are established at Lae, Madang and Keravat, and are supplying local requirements. The log export trade has not yet recovered, but in 1947 a first shipment of some 400,000 super. feet of timber was made. When shipping is again available it is expected that the export trade will rapidly overtake the pre-war figure of 6¼ million super. feet.

The Forestry Ordinance 1936–1937 provides for the issue of permits and licences to cut timber, but at present the policy is to call tenders for timber areas as they can be made available. Timber growing on native lands cannot be acquired by private purchasers directly from the natives, but must be obtained through the Administration. A royalty is payable on all forest produce taken under a permit or licence. Some 26 permits, which were in force when the war intervened, have been extended to cover the five-year period of suspension, and cover approximately 200,000 acres.

5. **Fisheries.**—The wealth of the waters of the Territory has been little exploited. Fish is caught at many places along the coast to supply the small local demand of the natives and of the few resident Europeans. Pearl-shell is exported in fair quantities, while bêche-de-mer, trochus-shell and tortoise-shell also figure amongst the exports. The value of marine products exported in 1940–41 was £9,255, compared with £11,956 in the previous year.

6. **Mining.**—Except for gold there has been little mining in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold was discovered in the Morobe District in 1926; the field is situated about 60 miles (35 by air) inland from Salamaua, the nearest coastal port. Communication was established with the coast by a regular aeroplane service. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kebenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron occurs as magnesite and hæmatite in the Baining District, apparently in large quantities. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland.

Mining is regulated by the Mining Ordinance 1928–1940. Copies of the Ordinance and Regulations made thereunder may be obtained from the Secretary, Department of External Territories, Canberra.

The following table shows the production of gold during the five years 1936–37 to 1940–41:—

TERRITORY OF NEW GUINEA: GOLD PRODUCTION.

Year.	Quantity.	Value.(a)
	Fine oz.	£
1936–37	223,120	1,938,694
1937–38	223,929	1,935,954
1938–39	237,705	2,153,018
1939–40	278,922	2,917,526
1940–41	263,097	2,808,835

(a) Valued at average price realized for fine gold in Australia.

Since the high market price of gold has been maintained, the search for profitable areas in various parts of the Territory has not diminished and systematic testing by drilling and other means has been undertaken on alluvial areas previously considered unworthy of attention. Although there were no new discoveries of alluvial or reef gold during 1941, work proceeded steadily on the known gold-bearing areas.

A search for petroleum has been actively conducted on the mainland. The Petroleum Ordinance 1936 has been superseded by the Petroleum (Prospecting and Mining) Ordinance 1938–1939, which has facilitated the carrying out of geological surveys and prospecting activities generally. On 30th June, 1941, two permits to search for petroleum were in force.

§ 7. Trade.

1. **Customs Tariff.**—With the exception of high revenue rates on ale, spirits, beverages and tobacco and a duty of 3d. per gallon on petrol, kerosene and lubricating oil, the tariff of the Territory of New Guinea is generally on a 10 per cent., ad valorem

basis. Only 72 items are mentioned in the import schedule, of which approximately 60 are on the free list consisting of articles for use by the Administrator, the Trade Commissioners and the Missions, and medical supplies, live stock, meat, fish, fresh fruit, vegetables and certain essential manufactures for use in the Territory. The rate of duty for the remaining items as well as for all other goods not mentioned in the schedule is 10 per cent. ad valorem. No preferential tariff rates are provided in the schedule.

Export duties are levied on copra, trepang, shell, feathers and sulphur. When the price, or the assessed value of copra is less than £5 15s. per ton no tariff is imposed, but when the price exceeds this figure but is not more than £11 per ton 2s. 6d. per ton is charged; thereafter the charge increases on a sliding scale to 11s. 6d. per ton as the price rises to £18, with an additional 2s. per ton for every further increase of £1 in the price of copra. Imports in 1940–41 amounted to £962,129 on which £147,452 was received in import duties, while £590 was paid in export duties and royalties.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced and imported direct from the Territory of New Guinea (see Chapter XI. "Trade"), and a proclamation of 25th September, 1935, exempted from primage duty goods produced or manufactured in the Territory.

2. **Imports and Exports.**—Values of the principal items of imports and exports for the years 1936–37 to 1940–41 are shown below. The values of exports are expressed in Australian currency, but it is not possible to determine accurately the currency of the £ in the table of imports.

TERRITORY OF NEW GUINEA : IMPORTS AND EXPORTS.

The bulk of the imports into the Territory of foodstuffs, beer, coal, paints, boats, launches and soap comes from Australia, which also supplies large quantities of machinery and metal manufactures, drugs, explosives. tobacco, cigarettes, apparel, boots, leather manufactures, timber, stationery and polishes.

§ 8. Shipping and Communication.

1. **General.**—Prior to the Japanese invasion a subsidized mail service between New Guinea and Australia was maintained by Burns, Philp and Coy. Ltd., which also operated a two-monthly non-subsidized service between Australia, New Guinea, Hong Kong and Saigon. The Dutch Royal Packet Navigation Company's vessel called at Rabaul every five weeks *en route* from Singapore to Australia. Shipping within the Territory is regulated by the Shipping Ordinances 1936 and the Coastal Shipping, Ports and Harbours Regulations.

2. **Oversea Tonnage in 1940–41.**—The number and net tonnage of oversea vessels which entered and cleared the Territory during 1940–41 are shown hereunder.

TERRITORY OF NEW GUINEA : SHIPPING, 1940–41.

Nationality.	Vessels Entered.		Vessels Cleared.		Total.	
	Number.	Net Tonnage.	Number.	Net Tonnage.	Number.	Net Tonnage.
American	4	6,132	4	6,132	8	12,264
British	67	171,669	68	174,684	135	346,353
Dutch	5	12,090	5	12,090	10	24,180
Greek	1	3,209	1	3,209	2	6,418
Japanese	14	15,452	14	15,452	28	30,904
Norwegian	1	1,482	1	1,482	2	2,964
Panamanian	1	1,321	1	1,321	2	2,642
Thai	1	1,995	1	1,995	2	3,990
Total	94	213,350	95	216,365	189	429,715

3. **Local Shipping.**—Inter-island shipping services were maintained by the steamers and motor vessels of Burns, Philp and Coy. Ltd., and W. R. Carpenter and Coy. Ltd. A number of smaller motor vessels were also engaged in this trade.

4. **Land Communication.**—Means of communication on land are scanty. There are no railways. Roads lead from Rabaul to places within 30 or 40 miles, and there is a road 200 miles long in New Ireland and also a road from Lae to Wau in the Morobe District. Elsewhere there are few roads outside plantations and the District Officers' station. The large rivers of the mainland are as yet but little used.

There is a high-power wireless station at Rabaul, and low-power installations at some out-stations.

5. **Communication by Air.**—The discovery of gold in New Guinea resulted in great aviation activity in the vicinity of the gold-fields. On account of the mountainous country and dense undergrowth between the coast and the gold-fields the task of transporting food and stores to the fields and of bringing the gold to the seaboard by land is an irksome and costly process. The fields are situated about 60 miles (35 by air) inland from Salamaua, and whereas aircraft cover the distance in less than an hour, the nature of the country is such that a journey by other means occupies more than a week. During 1931–32 an air service was established between Port Moresby and the gold-fields, reducing the time occupied by the journey from Australia by about seven days. At 30th June, 1941, 41 aeroplanes were operating in New Guinea.

A weekly subsidized air service between Sydney and Rabaul came into operation on 30th May, 1938, and ceased in January, 1942. Passengers and mails were carried and the route followed was Sydney, Brisbane, Rockhampton, Townsville, Cairns, Cooktown, Port Moresby, Salamaua and Rabaul. Qantas now operates a tri-weekly air service between Australia and Port Moresby, in Papua, and Lae, in New Guinea, with weekly extension to Rabaul.

Further reference to New Guinea air activities is contained in Chapter V. "Transport and Communication" (see p. 196).

§ 9. Revenue and Expenditure.

Details of the revenue collected from various sources and the expenditure during each of the years 1936–37 to 1940–41 are given hereunder :—

(a) Includes harbour dues, wharfage and storage fees. (b) Includes £40,011, expenditure due to the volcanic eruption.

For information for 1945–46 see Papua, § 7, p. 352.

NAURU (Trusteeship).

1. **General.**—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in longitude 167° E., and is 26 miles south of the Equator. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system

of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners and the Missions, the whole of the island is owned by individual natives. The average shade temperature ranges between 72° and 95° F., and the average humidity between 70 and 80 per cent. The average rainfall is 85 inches, but droughts occasionally occur, and in 1916 and 1917 only 40 inches were received for the two years. Similarly in 1938 only 20.94 inches were recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on the 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919. and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the Nauru Island Agreement Act 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, communications with Nauru ceased, and the island was occupied by Japanese forces. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947 the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement are as follows:—

> *Preamble:* In pursuance of a Mandate conferred upon His Britannic Majesty, the Territory of Nauru has been administered in accordance with Article 22 of the Covenant of the League of Nations by the Government of Australia on the joint behalf of the Governments of Australia, New Zealand and the United Kingdom of Great Britain and Northern Ireland.
>
> The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.
>
> His Majesty desires to place the Territory of Nauru under the trusteeship system and the Governments of Australia, New Zealand and the United Kingdom undertake to administer it on the terms set forth in the present Trusteeship Agreement.
>
> Therefore the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of the trusteeship for the Territory of Nauru in substitution for the terms of the Mandate under which the Territory has been administered:—
>
> *Article* 1. The Territory to which the Trusteeship Agreement applies (hereinafter called the Territory) consists of the island of Nauru (Pleasant Island) situated approximately 167° longitude East and approximately 0° 25′ latitude South, being the Territory administered under the Mandate above referred to.

Article 2. The Governments of Australia, New Zealand and the United Kingdom (hereinafter called the Administering Authority) are hereby designated as the joint authority which will exercise the administration of the Territory.

Article 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.

Article 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory, and for this purpose, in pursuance of an agreement made by the Governments of Australia, New Zealand and the United Kingdom, the Government of Australia will on behalf of the Administering Authority and except and until otherwise agreed by the Governments of Australia, New Zealand and the United Kingdom continue to exercise full powers of legislation, administration and jurisdiction in and over the Territory.

Article 5. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter;
2. It will, in accordance with its established policy—
    - (*a*) take into consideration the customs and usages of the inhabitants of Nauru and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory; and in particular ensure that no rights over native land in favour of any person not an indigenous inhabitant of Nauru may be created or transferred except with the consent of the competent public authority;
    - (*b*) promote, as may be appropriate to the circumstances of the Territory, the economic, social, educational and cultural advancement of the inhabitants;
    - (*c*) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory and take all appropriate measures with a view to the political advancement of the inhabitants in accordance with Article 76 (*b*) of the Charter;
    - (*d*) guarantee to the inhabitants of the Territory, subject only to the requirements of the public order, freedom of speech, of the press, of assembly and of petition, freedom of conscience and worship and freedom of religious teaching.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. In order to discharge its duties under Article 84 of the Charter and Article 4 of the present agreement, the Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

4. **Administration.**—The administration of the island is vested in the Administrator, who is obliged to conform to instructions issued by the Government which appointed him, and all ordinances made by him are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue. Native

industries such as canoe-building, fishing, mat-making, etc., are encouraged by the provision of prizes at annual competitions. An agency of the Commonwealth Savings Bank has been established. There is a co-operative store managed to a large extent by the natives. The store books, however, are audited by Government officers. Natives are not allowed to carry or be in possession of firearms, and the use by them of intoxicating liquors and deleterious drugs is prohibited.

5. **Population.**—The population figures on 1st April, 1939 and on 31st December, 1940, 1941, 1946 and 1947 are given hereunder :—

NAURU : POPULATION.

Race.	1939.	1940.	1941.	1946.	1947.
Europeans	171	192	68	159	219
Chinese	1,512	1,350	584	787	1,161
Nauruans (*a*)	1,765	1,761	1,827	1,369	1,413
Other	44	49	193	33	80
Total	3,492	3,352	2,672	2,348	2,873

(*a*) The natives of Nauru are Micronesians.

Births in 1947 numbered 87. There were 18 marriages (three between Europeans) and 23 deaths.

6. **Health.**—Cases of the usual diseases known in the Pacific occur. Venereal disease is rare, but elephantiasis is occasionally met with. An area has been set apart for the segregation of lepers, and the latest methods of treatment are applied. The total number of persons receiving treatment at 1st May, 1947, was 59, of whom 28 were in the Leper Segregation Hospital. Two hospitals are maintained on the island, one by the Administration for Nauruans, and one by the British Phosphate Commission for its employees. In common with other natives, the Nauruans are very susceptible to tuberculosis and influenza, and in 1921 an influenza epidemic caused the deaths of 230 islanders. Dysentery, both amœbic and bacillary, is endemic. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo a medical examination once a month. Baby clinics have been established to give help and advice to Nauruan mothers in regard to infant nurture.

7. **Education.**—Formerly the education of Nauruan and other native children was undertaken by the Missions subsidized by the Administration, but on 1st October, 1923, the Administration assumed responsibility for education. There are 5 primary schools for native, and one for European children. A total of 378 native children and 24 European children were enrolled at December, 1947. The European school is in charge of a teacher on loan from the Victorian Education Department, who also supervises education matters generally.

The curriculum is similar to that of corresponding schools in Australia, and the teaching is, as far as possible, wholly in English. Education is compulsory between the ages of six and sixteen for Nauruan and other native children.

8. **Judiciary.**—The judicial power is vested in the Administrator in a Central Court and a District Court. The right of appeal is provided.

9. **Religion.**—The London Missionary Society (Protestant) and the Sacred Heart of Jesus Mission (Roman Catholic) operate in Nauru.

10. **Phosphate Deposits.**—(i) *General.* From 1906 to 1919 the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island

(about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office) The quantity on Nauru has been estimated at not less than 50,000,000 tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments in 1919 for £3,500,000, the purchase money being contributed in the proportions of 42, 42, and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by the British Phosphate Commission of three members, one appointed by each Government; and the three countries are to receive the output in the same proportions of 42, 42, and 16 per cent.

(ii) *Royalty on Phosphate.* Under a revised agreement between the British Phosphate Commissioners and the Nauruan land-owners, an increased royalty of 1s. 1d. per ton of phosphate exported has been payable from 1st July, 1947, as follows :—

(*a*) 6d. per ton to be paid to the Nauruan landowner concerned;
(*b*) 3d. per ton to the Administrator for the benefit of the Nauruan people;
(*c*) 2d. per ton to the Administrator to be held in trust for the Nauruan landowner concerned and invested at compound interest for a period of 20 years. The capital will then remain invested and the interest thereon will be paid to the landowner.
(*d*) 2d. per ton to the Administrator to be held in trust for the Nauruan community and invested until the year 2000 at compound interest.

From 1st July, 1947 the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £45 per acre, with a minimum payment of £7 10s. for areas less than an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* The following table gives particulars regarding exports of phosphate during the years 1937–38 to 1941–42 (when shipments ceased) :—

NAURU AND OCEAN ISLAND : EXPORTS OF PHOSPHATE.

Year.	Total.	To Australia.	To New Zealand.
	Tons.	Per cent.	Per cent.
1937–38	1,169,361	66.17	24.81
1938–39	1,228,590	67.06	23.63
1939–40	1,243,428	54.49	32.14
1940–41	626,149	50.14	38.76
1941–42	144,454	53.79	46.21

From Nauru alone during the calendar year 1941 the export was 99 150 tons. Shipments were re-commenced in July, 1946, and 473,114 tons were exported from Nauru and Ocean Island to Australia and New Zealand to December, 1947.

(iv) *Accounts of Commission.* A statement of Nauru and Ocean Island activities for the period from July, 1939 to June, 1947 is given hereunder :—

NAURU AND OCEAN ISLAND : SALES OF PHOSPHATE.

Heading.	1939–40.	1940–41.	1941–42.	1942 to 1946.(*a*)	1946–47.
	£	£	£	£	£
Receipts from sales, etc. ..	1,041,418	749,354	387,464	..	551,537
F.o.b. cost, including interest on capital, sinking fund, etc.	1,037,208	745,233	327,607	..	508,224

(*a*) Period of, and immediately following, Japanese occupation.

During the period of the Japanese occupation from August, 1942 to September, 1945, while waiting to resume activities at Nauru and Ocean Island, the Commission was engaged in meeting the phosphate requirements of Australia and New Zealand from other available sources. Reconstruction of equipment destroyed during the Japanese occupation has progressed steadily and drying of phosphate was recommenced at Nauru in early December 1947.

The amount due by the British Phosphate Commission to the partner Governments for purchase-money and other capital sums was £3,666,457 on 30th June, 1921, and at 30th June, 1942, this had been reduced to £3,024,373. The partner Governments agreed to a suspension of interest and sinking fund payments from 1st July. 1942, while operations at Nauru and Ocean Island were curtailed. Modified payments were resumed in 1946–47, pending a review of the position in 1950, when it is anticipated that reconstruction will be completed. The redemption fund now totals £507,127.

(v) *Employees.* Apart from a limited number of Europeans and a few Pacific Islanders, the employees are Chinese engaged under a two years' contract. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

11. **Trade.**—The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider, and perry, and cylinder blocks for motor cycle engines. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt.

The Tariff rates apply to all countries alike. Information regarding imports and exports for the years 1937 to 1941 is shown in the following table.

NAURU : IMPORTS AND EXPORTS.

Heading.		Year ended 31st December—				
		1937.	1938.	1939.	1940.	1941.
Imports ..	£	144,454	272,256	170,624	192,749	106,978
Exports—						
Phosphate ..	tons	688,900	841,050	932,100	808,400	99,150
	£	513,989	546,683	605,974	541,168	69,375

Of the total imports Australia supplied £72,348 or 68 per cent. during 1941 ; the balance came mainly from the United Kingdom, China, Dutch East Indies, New Zealand and Canada in that order.

In 1941 56,850 tons of phosphates were exported to Australia, and 42,300 tons to New Zealand.

12. **Revenue and Expenditure.**—The revenue and expenditure of the Administration during the years 1939 to 1947 were as follows :—

NAURU : REVENUE AND EXPENDITURE.

Heading.	Year ended 31st December—				
	1939.	1940.	1941.	1942 to 1945.(*a*)	1947.(*b*)
	£	£	£	£	£
Revenue	33,084	27,104	12,023	..	21,123
Expenditure	29,391	26,223	23,951	..	84,641

(*a*) Period of Japanese occupation. (*b*) Period September, 1945 to June, 1947.

Of the revenue in the period September, 1945 to June, 1947, royalty on phosphate amounted to £1,692, post office receipts, £5,228, customs, £2,283, radio, £2,927, licences and internal revenue, £3,705, and interest on investments, £458. At the close of 1941 the accumulated funds of the Administration amounted to £46,297, but these have since been used to finance the initial reconstruction and rehabilitation measures. Arrangements have been made with the British Phosphate Commissioners for additional funds, also, for these purposes.

CHAPTER XI.

TRADE.

§ 1. Introductory.

Constitutional Powers of the Commonwealth in regard to Commerce.—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution with respect to oversea trade and commerce will be found in Sub-section 51 (i) and Sections 86 to 95 thereof (see pp. 15 and 21–22 *ante*).

§ 2. Commonwealth Legislation affecting Oversea Trade.

1. **General.**—In previous issues of the Official Year Book brief particulars of the various Commonwealth Acts and amendments thereof affecting oversea trade are given in chronological order. The Customs Acts represent the administrative or machinery Acts under which the Department of Trade and Customs operates, while the Customs Tariff provides the statutory authority for imposing the actual rates of duties operative from time to time.

The Acts at present in force are: The Customs Act 1901–1936; Customs Tariff, 1933–1939; Customs Tariff (Canadian Preference) 1934–1939; Customs Tariff (Exchange Adjustment) Act, 1933–1939; Customs Tariff (Industries Preservation) Act, 1921–1936; Customs Tariff (Newfoundland Preference) 1939; Customs Tariff (New Zealand Preference) 1933–1934; Customs Tariff (Papua and New Guinea Preference) 1936; Customs Tariff (Southern Rhodesian Preference) 1941; Customs Tariff (Primage Duties), 1934; Trading with Enemy Act 1939–1940.

2. **Customs Tariffs.**—The Customs Tariff 1921–1930 provided a British Preferential Tariff, an Intermediate Tariff and a General Tariff. The Intermediate Tariff was omitted from the Customs Tariff 1933 but was restored by the Customs Tariff 1936.

"British Preferential Tariff" rates of duty apply to goods the produce or manufacture of the United Kingdom provided such goods comply with the laws and statutory regulations for the time being in force affecting the grant of British preference, and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. The benefits of the British Preferential Tariff may be extended wholly or in part to any British non-self-governing colony, British protectorate or to certain territories governed under British mandate. The benefits of the British Preferential Tariff have been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and to certain goods the produce of Newfoundland and of British non-self-governing colonies.

In submitting tariff schedules to Parliament on 20th March, 1936, the Minister for Trade and Customs said: "Another new feature of the schedules is the Intermediate Tariff. It has been re-introduced to provide a convenient avenue for expressing the level of duties which the Government propose should form the basis for trade treaties. The rates proposed under the protective items of the Intermediate Tariff express, in every case, a protective level for Australian industry as well as preserving the margins required under the Ottawa Agreement." The Customs Tariff 1933–1939 provides that the Governor-General may from time to time by proclamation declare that the Intermediate Tariff shall apply from a date and time specified to goods specified in the proclamation which are the produce or manufacture of the British or foreign country specified in the proclamation. The Intermediate Tariff was brought into operation on 1st January, 1937, by Customs Proclamations Nos. 338, 342, 343 and 360, which granted intermediate rates of duty to specified goods the produce of "Proclaimed Countries." The countries proclaimed include the United Kingdom, the Dominions and Colonies in respect of goods which do not comply with the conditions prescribed for the application of a lower tariff and most foreign countries under the terms entitling them to most-favoured-nation treatment. The United States of America was an important exception until 17th February, 1943, when Customs Proclamation No. 571 included it in the list of "Proclaimed Countries".

The "General Tariff" applies to all importations excepting :—

(*a*) Goods the produce or manufacture of the United Kingdom, shipped in the United Kingdom ;

(*b*) Goods the produce or manufacture of the following countries when admissible under the British Preferential Tariff or at a special rate of duty : Canada, New Zealand, Norfolk Island, Papua and New Guinea, Newfoundland, Southern Rhodesia, and British non-self-governing Colonies, British Protectorates and certain Territories governed under British mandate.

(*c*) Goods admitted under the provisions of the Intermediate Tariff.

The Customs Tariff 1933–1939 provides for duties on certain goods to be deferred. Where a deferred duty on any goods is provided in the Schedule, the Minister shall refer to the Tariff Board for inquiry and report on the question whether the deferred duty should or should not operate on and after the date to which it has been deferred. The Board shall report whether the goods in respect of which the deferred duty is provided are being made or produced in Australia or will be so made or produced on, or immediately after, the date to which the duty has been deferred—(*a*) in reasonable quantities ; (*b*) of satisfactory quality ; and (*c*) at a reasonable price having regard, among other things, to the probable economic effect of the imposition of the deferred duty upon other industries concerned, and upon the community in general. Upon receipt of a report from the Tariff Board, the Minister may defer the duty further by notice published in the *Commonwealth Government Gazette.*

3. **Preferential Tariff.**—(i) *British Preference.* The Commonwealth Tariff 1908 provided Preferential Tariff rates in favour of specified goods produced or manufactured in the United Kingdom. Subsequent legislation has extended the list of articles to which these rates apply. For the purpose of preferential treatment the following goods are deemed by Section 151A of the Customs Act 1901–1936 to be the produce or manufacture of the United Kingdom provided the final process of their production or manufacture was performed in that country.

(*a*) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes—
  (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia ;
  (ii) Imported unmanufactured raw materials ;
  (iii) Imported manufactured raw materials as determined by the Minister.

(*b*) Goods of the factory or works cost of which not less than seventy-five per cent. is represented—
  (i) by labour or material of the United Kingdom ; or
  (ii) by labour or material of the United Kingdom and labour or material of Australia.

(*c*) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works cost of which not less than twenty-five per cent. or fifty per cent. if the Minister so determines is represented—
  (i) by labour or material of the United Kingdom ; or
  (ii) by labour or material of the United Kingdom and labour or material of Australia.

The benefits of the British Preferential Tariff have also been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and of Newfoundland, and by separate Tariff legislation to the Territories of Papua and New Guinea.

At the Imperial Economic Conference held at Ottawa, Canada, during July and August, 1932, a trade agreement providing for special preferential trade conditions was made between the Governments of the United Kingdom and the Commonwealth of

Australia. A summary of the provisions of this agreement appeared in Official Year Book No. 26, pp. 868–873 and further references were made in subsequent issues of the Year Book

The five years' currency of the agreement terminated on 19th August, 1937, but, in view of the negotiations then in progress between the Governments of the United Kingdom and the United States of America for a trade agreement, a review of the terms of the Ottawa Agreement became a matter of urgency. The United Kingdom Government at the time sought the concurrence of the Dominions in the modification of certain preferences granted under the Ottawa Agreement in order to facilitate the satisfactory conclusion of an agreement with the United States of America. As a consequence, a conference of United Kingdom and Australian Ministers was held in London early in 1938 and a joint statement setting out the result of the conference was issued by the two Governments in the form of a Memorandum of Conclusions which was published by the United Kingdom Government on 20th July, 1938. Details of the Memorandum have been published in previous issues of the Official Year Book. The full text appears on pages 479–482 of Official Year Book No. 32.

The future of the agreement and of Empire preferences generally has been discussed in connexion with the proposals for the establishment of an International Trade Organization which are referred to in paragraph 7.

On the basis of the imports during 1913 the preferential provisions of the Tariff of 1908–1911 covered 65 per cent. of the imports of merchandise of United Kingdom origin, the margin of preference being equal to 5 per cent. of the value of the goods. On the basis of the imports during 1939–40 the Customs Tariff 1933–1939 extended the application of the Preferential Tariff rates to 86 per cent. of the imports from the United Kingdom, and at the same time increased the average margin of preference to 19 per cent. ad valorem. These percentages relate to all imports on which preference was granted, whether dutiable or free under the preferential provisions. With regard to imports on which preference was granted and which were dutiable under both the Preferential and General Tariffs, the average equivalent ad valorem rate of duty paid in 1939–40 under the Customs Tariff 1933–1939 on goods of United Kingdom origin was about 15.3 per cent., whereas the same goods under the General Tariff rates would have been called upon to pay an average rate of about 39.5 per cent.

* An application of the Customs Tariff 1933–1939 to the total imports of £A56,858,624 (including outside packages) from the United Kingdom entered for home consumption during 1939–40 shows that the value of the goods of United Kingdom origin which participated in the preferential provisions of the Tariff was £A47,668,186, upon which duty to the amount of £A4,217,357 was collected. Under the General Tariff the same goods would have paid £A13,406,659 duty or £A9,189,302 more than was paid at preferential rates, representing an additional duty of 19.3 per cent. on the value of the goods. It would be improper, however, to speak of this sum as the "value" of preference to the United Kingdom as some of the preferential goods would have come from the United Kingdom without preference. The principal classes which benefited under the Preferential Tariff and the additional duty that would have been collected under the General Tariff during 1939–40 were textiles, £3,510,802 ; metals and metal manufactures, £2,178,069 ; machines and machinery, £1,125,781 ; spirituous and alcoholic liquors, £109,091 ; drugs, chemicals, etc., £430,736 ; earthenware, glass, etc., £345,085 ; apparel, £208,058 ; paper, £241,044 ; manufactured fibres, £228,006 ; stationery and paper manufactures, £101,547 ; jewellery and fancy goods, £88,161 ; and optical, surgical and scientific instruments, £124,234.

The margin of preference granted by the preferential tariff has been increased to some extent by the operation of the Customs Tariff (Exchange Adjustment) Act 1933–1939. The total amount deducted cannot be stated, owing to the fact that, since the end of 1934, "net" rates of duty (after making allowance for exchange adjustment) recommended by the Tariff Board have been applicable.

---

* In this, and succeeding, paragraphs, where values of imports into Australia are shown in Australian currency, the value represents the f.o.b. value at port of shipment plus the statutory 10 per centum imposed for value for duty purposes expressed in Australian currency.

The value of goods from countries other than the United Kingdom which were adversely affected by the preferential provisions of the Tariff amounted to £A23,091,366 and the duty collected thereon was £A6,427,163 or £A3,925,027 more than would have been paid under the British Preferential Tariff Rates.

The following table shows the effect of the Preferential provisions of the Customs Tariff on imports of goods affected favorably or adversely by the British Preferential Tariff during the years 1937–38 to 1939–40 :—

EFFECT OF THE PREFERENTIAL PROVISIONS OF THE CUSTOMS TARIFF.

IMPORTS OF GOODS AFFECTED FAVORABLY OR ADVERSELY BY THE BRITISH PREFERENTIAL TARIFF.

(*a*) Goods cleared under " General Tariff. " (*b*) In computing this amount, account has been taken of the effect of the Exchange Adjustment Act on the margin of British Preference.

(ii) *Intermediate Tariff Preference.* The Intermediate Tariff came into operation on 1st January, 1937, and during the year ended 30th June, 1940, was applicable wholly or in part to about 140 tariff items. In the period mentioned goods from " Proclaimed Countries " (i.e., foreign countries entitled to most-favoured-nation treatment) cleared at intermediate rates of duty were valued at £A7,349,895 on which £A2,128,775 duty was collected. Under the General Tariff the same goods would have paid £A3,806,054 duty or £A1,677,279 more than was paid at intermediate rates, representing an additional duty of 22.8 per cent. on the value of the goods. At British preferential rates of duty the same goods would have paid £A831,807 or £A1,296.968 less than was paid at intermediate rates, a reduction equivalent to an ad valorem duty of 17.7 per cent.

(iii) *Exchange Adjustment.* The Customs Tariff (Exchange Adjustment) Act 1933-1939 provides for adjustments in Duties of Customs consequent upon depreciation in the value of Australian currency relative to sterling. This Act came into operation on 5th October, 1933, but subsequent amendments have extended the list of items affected. The application of Section 5 of the Act is explained hereunder :—

The deduction to be made from duty in respect of protected goods (covered by items) specified in the schedule to the Act and admissible under the British Preferential Tariff on account of the depreciation of Australian currency in relation to the currency of the British country exporting the protected goods to Australia will depend on :—

(*a*) Whether the extent of depreciation is not less than 16⅔ per cent. ; or
(*b*) Whether the extent of depreciation is not less than $11^{1}/_{9}$ per cent., and less than 16⅔ per cent.

If (*a*) applies, the deduction from the amount of duty will be—(i) one-fourth of the amount of duty ; or (ii) 12½ per cent. (⅛) of the value for duty, whichever is the less :

If (*b*) applies, the deduction will be (i) one-eighth of the amount of duty ; or (ii) 6¼ per cent. of the value for duty, whichever is the less. The telegraphic transfer (buying) rate shall determine the extent of depreciation of Australian currency.

Prior to 1933–34 the Tariff Board had recommended rates of duty as though exchange was at par, but early in the year mentioned, the Board decided to change the basis of its recommendations and has since shown its findings under the following headings :—

(*a*) The rates which would prove reasonable and adequate under existing conditions of exchange.
(*b*) An estimate as closely as can be made of the rates which would be reasonable and adequate if exchange suddenly reverted to par.
(*c*) The scale of adjustment necessary to meet conditions of exchange between parity and the present adverse rate of 25 per cent.

In tariff proposals introduced on 6th December, 1934, and later, the new basis has been adopted in fixing rates of duty on certain items in accordance with the Board's recommendations as set out in (*a*) with provision for the adjustment of rates of duty as set out in (*c*). With respect to such items the deductions under the provisions of the Exchange Adjustment Act will cease to apply. The Exchange Adjustment Act 1933–39 ceased to operate on and after 15th November, 1947 as a result of the Customs Tariff (Exchange Adjustment) Proposals No. 1.

(iv) *Papua and New Guinea Preference.* The Customs Tariff (Papua and New Guinea Preference) Act 1936 which repealed the Act of 1934 provides for Customs Preference on goods the produce of Papua and on goods the produce of the Territory of New Guinea. Imports into Australia direct from the Territory of Papua or the Territory of New Guinea, of such of the goods specified in the schedule to the Act as were produced in the Territory from which they were imported, shall, notwithstanding anything contained in the Customs Tariff 1933–1939 be free of duty. The goods specified in the schedule to the Customs Tariff (Papua and New Guinea Preference) 1936 are coffee, dried lychee fruit, various native fresh fruits, edible fungi, green and dry ginger, coco-nuts, Rangoon beans, kapok and sesame seeds, areca nuts, cocoa beans, massoi oil, nuts (edible), sago, tapioca, spices, vanilla beans and gums. Total imports from Papua during 1939–40 amounted to £A577,442 (including gold, £A109,551), imports of goods entitled to preference to £A73,086, and duties remitted to £A50,134. Total imports from the Territory of New Guinea during 1939–40 amounted to £A3,088,699 (including gold £A2,848,582), imports of goods entitled to preference to £A105,206, and the duties remitted to £A54,770.

4. **Primage Duty.**—From 10th July, 1930 a primage duty of 2½ per cent. ad valorem was imposed on all goods whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff 1921–1930, excepting bullion, specie, radium and certain special governmental and other imports. The rate of primage duty was subsequently increased to 4 per cent. as from 6th November, 1930.

A proclamation of 14th May, 1931, exempted certain aids to primary production, and on 11th July, 1931 a further amendment, in addition to extending the list of these goods and also exempting some minor imports from primage duty, provided for a rate of 4 per cent. ad valorem on a few other items, mainly aids to production, and increased the ad valorem rate of primage duty to 10 per cent. on all other articles imported. Amendments promulgated since 11th July, 1931 have greatly increased the list of goods exempt from primage duty.

The Customs Tariff (Primage Duties) Act 1934 imposed primage duty at rates of 4, 5, and 10 per cent. and provided for preferential treatment of certain goods admitted under the British Preferential Tariff. A proclamation of 12th December, 1934, exempted from primage duty goods the produce or manufacture of Fiji and a proclamation of 25th September, 1935, exempted from primage duty goods the produce or manufacture of the Territories of New Guinea and Papua. Under the Customs Tariff (New Zealand Preference) Act goods the produce or manufacture of New Zealand are exempt from primage duty. Similarly under the Norfolk Island Act 1913 goods the produce or manufacture of Norfolk Island are exempt from primage duty.

Customs proclamations, which came into force on 1st January, 1937, and later dates, provide in respect of specified tariff items exemptions from, and reduced rates of 4 and 5 per cent., primage duty on imports the produce or manufacture of " Proclaimed Countries ". All countries whose goods are admissible to Australia under the intermediate customs tariff rank as proclaimed countries and include the United Kingdom, the Dominions and Colonies, the United States of America (from 18th February, 1943), and most foreign countries. Customs proclamations operative from 19th November, 1947 provided for exemption of additional tariff items from primage duty.

In 1939–40 the value of goods from the United Kingdom admitted under British Preferential Tariff rates was, in Australian currency, £A47,668,186 and the primage duty paid, £A1,267,431. This amount is £A1,358,275 less than the amount which would have been paid if certain goods had not been subject to preferential rates of primage duty.

5. **Reciprocal Tariffs.**—(i) *United Kingdom.* A reciprocal trade agreement between the United Kingdom and Australia came into force on 14th October, 1932, and is referred to briefly in paragraph 3 above. Broadly speaking Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities and in return Australia incurred obligations to the United Kingdom in respect of Tariff rates and the grant of preferences to United Kingdom goods.

(ii) *Dominion of Canada.* A reciprocal trade agreement between Canada and Australia which came into force on 1st October, 1925, was superseded by a new agreement operating from 3rd August, 1931. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

Australian commodities to which the British Preferential Tariff does not apply on their importation into Canada are: Butter, brandy, champagne, cheese, currants, eggs, eucalyptus oil, fresh apricots, pears, quinces, nectarines, grapes, oranges and passion fruit, dried prunes, apricots, nectarines, pears and peaches, fruit pulp, fruits in cans, gelatine, hops, rice (uncleaned), meat (fresh and canned), peanuts, raisins, sugar, tallow, veneers and wine.

Canadian commodities to which the British Preferential Tariff does not apply on their importation into Australia are: Carbide of calcium, cash registers, corsets, fish, gloves, goloshes and rubber sand boots, etc., piece goods, iron and steel tubes or pipes, printing machinery, barbed wire, paper (printing, typewriting and writing), timber, typewriters, vacuum cleaners and vehicles—motor chassis (unassembled and assembled)—and vehicle parts but not including bodies, gears, rubber tyres and tubes, storage batteries, shock absorbers, bumper bars, sparking plugs and springs.

Certain administrative provisions, including a special concession to Canada in respect of the inland freight charges to be included in the dutiable value of Canadian goods on importation into Australia, were incorporated in the agreement.

The Customs Tariff (Canadian Preference) Acts 1931 and 1934–1939 give effect to the agreement so far as Australia is concerned.

During 1939–40 the imports from Canada amounted in Australian currency to £A11,393,568 and imports of Canadian origin entitled to preference were valued at £A9,984,914, the principal items being printing paper. £A1,946,849; motor chassis and parts, £A1,878,301; timber, £A986,221; fish, £A531,590; and piece goods, £A429,786. The duty on the total imports of Canadian origin entitled to preference would have been £A3,197,086 under the General Tariff, but by the preferential provisions this was reduced by £A1,913,696, or by 19.2 per cent. on the value of the imports concerned.

Australian exports to Canada subject to preference amounted to approximately £A1,067,411, the items being fruits, dried, £A571,259; sugar, £A1,229,687; fruits, preserved, £A104,980; and tallow, £A61,485.

(iii) *Dominion of New Zealand.* A reciprocal trade agreement between New Zealand and Australia came into force on 1st December, 1933, superseding an earlier agreement of 1922. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

The Customs Tariff (New Zealand Preference) Act 1933 giving effect to the agreement, repealed earlier acts and provides that duties on all goods specified in the schedule to the Act shall be at the rates indicated therein, and that all goods other than those provided for in the schedule shall be subject to the rates in force under the British Preferential Tariff. An amendment to this Act in 1934 provides that, where the rate of duty upon any class of goods under the New Zealand British Preferential Tariff is less than that operating in Australia under the British Preferential rate, upon request by the New Zealand Government such goods may, after proclamation, be admitted at the lower rate. The rates of duty on goods re-exported from New Zealand (not being goods the produce or manufacture of New Zealand) and which are imported into Australia, and which if they had been imported into Australia direct from the country of origin would have been subject to the rates of duty under the British Preferential Tariff, shall be the rates of duty in force under that tariff.

The Act provides also that films produced in New Zealand by or for the Government of New Zealand for publicity purposes shall be admitted free of duty, also that cocoa beans the produce of Western Samoa shall not be subject to any higher duties than those paid on cocoa beans the produce of any British non-self-governing Colony or Protectorate or any Territory under British mandate. The provisions of the Act do not, however, apply to goods the produce of Cook Islands.

Goods the produce or manufacture of the Dominion of New Zealand are exempt from primage duty.

The conditions of preference in the Act provide that goods shall be deemed to be the produce or manufacture of New Zealand if they conform to the laws and regulations in force in Australia which apply to such goods when imported under the British Preferential Tariff (*vide* section 151A of Customs Act 1901–1936) except that goods not wholly produced or manufactured in New Zealand need not contain more than 50 per cent. of New Zealand labour and/or material in their factory or works cost, instead of 75 per cent. under the conditions of the United Kingdom preference.

Of the total imports of £A1,823,336 from New Zealand during 1939–40 it is estimated that goods otherwise dutiable amounting in value to £A465,450 were admitted free under the provisions of the Preferential Tariff and the duty thus remitted was £A169,368. In addition, goods valued at £A49,217 were admitted under the preferential rates of duty, the duty remitted on such goods being £A10,291. The total of the duties remitted on the import of New Zealand goods was thus £A179,659, representing a margin of preference of 34.9 per cent. on the value of the goods entitled to preference. The principal items which benefited under the preferential provisions were fish, valued at £A115,482, and undressed timber, £A170,463, the amounts of duty remitted being £A22,782 and £A117,601 respectively.

(iv) *Newfoundland.* An agreement between Newfoundland and Australia which came into operation on 12th December, 1939, provides for imports of news printing paper the produce or manufacture of Newfoundland to be accorded the benefits of the British Preferential Tariff, and in return the Government of Newfoundland accords exclusive Tariff preference to Australian butter and canned fruits imported into that country.

The agreement was approved by the Trade Agreement (Newfoundland) Act 1939, and effect was given to its provisions so far as Australia is concerned by the Customs Tariff (Newfoundland) Preference Act 1939.

(v) *Southern Rhodesia.* An agreement between Southern Rhodesia and Australia came into operation on 9th April, 1941.

Under the agreement the principal undertakings by the Commonwealth Government were—(*a*) to accord a preferential rate of ninepence per lb. lower than the British Preferential Tariff on unmanufactured tobacco from Southern Rhodesia ; and (*b*) to admit raw asbestos and chrome at rates of duty not higher than those applicable to these products from other countries, and to admit them free of primage duty.

The Southern Rhodesian Government on its part agreed—(*a*) to admit free of duty a schedule of Australian goods comprising 33 items ; (*b*) to accord specified preferential rebates ranging from 10 per cent. to 50 per cent. from the duties applicable to United Kingdom goods on a schedule of Australian goods comprising 19 items ; (*c*) to accord British Preferential Tariff rates to a schedule of Australian goods comprising 14 items and (*d*) to accord similar tariff treatment to Australian wheat and wheat flour, in the event of permits being issued for importation from any other country at rates of duty lower than those accorded to Australia under the agreement.

The Trade Agreement (Southern Rhodesia) Act 1941 approved the agreement, which was given effect to so far as Australia is concerned by the Customs Tariff (Southern Rhodesia Preference) Act 1941.

(vi) *Union of South Africa.* A trade agreement between Australia and the Union of South Africa came into force as from 1st July, 1935.

This agreement provides that the products of the Union of South Africa or of the mandated territory of South-West Africa entering Australia and the products of Australia entering the Union of South Africa or the mandated territory of South West Africa shall be subject to customs duties not higher than those imposed by the importing country on like products from the most favoured foreign nation. A reciprocal tariff arrangement under which products of Mozambique are admitted duty free to the Union of South Africa is exempt from the agreement.

The Trade Agreement (South Africa) Act 1936 approves the terms of this agreement.

6. **Trade Agreements.**—Trade agreements between the Commonwealth Government and the Governments of Belgium, Czechoslovakia and France were in operation prior to the outbreak of war in September, 1939, but were inoperative during the war, owing to the provisions of the Trading with the Enemy Act 1939–1940. These agreements are again in full force.

Since 1st July, 1935 a trade agreement has been in force between Australia and the Union of South Africa.

The trade agreement concluded in 1938 between Australia and Switzerland continued in limited operation during the war period.

Between December, 1939 and April, 1944 the Commonwealth Government also entered into trade agreements with the following countries :—Newfoundland, Brazil, Greece and Southern Rhodesia.

Summaries of the texts of these agreements appeared in previous issues of the Official Year Book.

7. **International Trade Discussions and Tariff Negotiations 1946–1948.**—The deliberations of the International Conference on Trade and Employment have an important bearing on Australia's future trade relations with other countries.

The origin of these discussions is found in the principles enunciated in Article VII. of the Mutual Aid Agreement between the Government of the United Kingdom and the United States of America, which reads as follows :—

> " In the final determination of the benefits to be provided to the United States of America by the Government of the United Kingdom in return for aid furnished under the Act of Congress of the 11th March, 1941, the terms and conditions thereof shall be such as not to burden commerce between the two countries, but to promote mutually advantageous economic relations between them and the betterment of world wide economic relations. To that end they shall include provision for agreed action by the United States of America and the United Kingdom, open to participation by all other countries of like mind, directed to the expansion, by appropriate international and domestic measures, of production,

> employment, and the exchange and consumption of goods, which are the material foundations of the liberty and welfare of all peoples; to the elimination of all forms of discriminatory treatment in international commerce, and to the reduction of tariffs and other trade barriers; and, in general, to the attainment of all the economic objectives set forth in the joint declaration made on the 12th August, 1941, by the President of the United States of America and the Prime Minister of the United Kingdom."
>
> "At an early convenient date, conversations shall be begun between the two Governments with a view to determining, in the light of governing economic conditions, the best means of attaining the above-stated objectives by their own agreed action and of seeking the agreed action of other like-minded Governments."

This Article is linked with the terms of the Atlantic Charter and has particular reference to Clauses 4 and 5, which state the common principles in the national policies of the United Kingdom and the United States of America in relation to trade and international economic relations. The paragraphs referred to read as follows:—

> "(4) They will endeavour, with due respect to their existing obligations, to further the enjoyment by all States, great or small, victor or vanquished, of access on equal terms to trade and raw materials of the world which are needed for their economic prosperity.
>
> (5) They desire to bring about a full collaboration between all nations in the economic field, with the object of securing for all improved labour standards, economic advancement and social security."

The Commonwealth Government subscribed to these principles in an Exchange of Notes made on 3rd September, 1942, between the Australian Minister at Washington and the United States Secretary of State, which formed also the basis of the Australian Reciprocal Aid Agreement with the United States of America.

The first step towards the implementation of these principles in the field of international trade was taken in December, 1945, when the Government of the United States of America issued an invitation to a number of the leading trading nations of the world (including Australia) to participate in two sets of preliminary negotiations. One was designed to discuss a draft Charter prepared by the Government of the United States of America and entitled "Proposals for Expansion of World Trade and Employment." The other proposed negotiations were for the purpose of giving practical effect to the policy of expanding international trade by bringing about a series of mutually advantageous trade agreements.

The conference did not eventuate at the time fixed, but after the establishment of the United Nations Organization the first subject of negotiation (viz. the Charter) was brought under the auspices of the United Nations by the acceptance of a resolution proposed by the United States of America at the First Meeting of the Economic and Social Council in February, 1946. The Council established a Preparatory Committee to elaborate an annotated draft agenda for consideration by a World Conference on Trade and Employment. The Committee comprised the United Kingdom, United States of America, France, Belgium, Netherlands, Luxembourg, Norway, Czechoslovakia, Lebanon, Canada, India, South Africa, New Zealand, Australia, China, Cuba, Brazil and Chile. The U.S.S.R. had been invited but did not participate.

The first meeting of the Preparatory Committee was convened for October, 1946, in London and, in July, 1946, the United States Government issued an amendment of its previous proposals in the form of a "Suggested Draft Charter for an International Trade Organization of the United Nations."

Broadly speaking, the proposals embodied in the draft aimed at implementing the principles enunciated in Article VII. of the various Mutual Aid Agreements and in the Atlantic Charter and contemplated—

(1) The establishment of an International Trade Organization;
(2) the modification of restrictive trade barriers; and
(3) the development of agreed rules of conduct in regard to matters affecting international trade.

The object was to raise living standards in all the countries of the world by the promotion of a high level of employment and the expansion of world trade.

At its first meeting in London in October, 1946, the Preparatory Committee discussed generally the Articles of the Draft Charter. Various amendments were proposed and, as a result, it was necessary for the Preparatory Committee to appoint a Drafting Committee, which met in New York in January and February, 1947, and incorporated in the Draft Charter the alterations suggested at the London discussions.

The text of the Drafting Committee's revised Charter became the basis for discussion by the Preparatory Committee in its Second and Final Preparatory Session held in Geneva during May-October, 1947. The Charter as further revised during that session was laid before the World Conference on Trade and Employment, which commenced in Havana in November, 1947.

The Draft Charter considered at Havana covers a very extensive range of subjects connected with the rules and conduct of international trade. It is divided into nine chapters covering the purposes and objectives of the proposed International Trade Organization, employment and economic activity, economic development, commercial policy, restrictive business practices, intergovernmental commodity arrangements, treatment of non-members and the administrative arrangements for the organization itself.

Other features of the draft Charter from the view-point of Australia are (1) that provision is made for the preservation of the existing British Preferential Tariff System and (2) present Australian stabilization schemes for the marketing of primary produce are permitted to continue. In addition, the proposed International Trade Organization will provide a forum for the consideration of common problems in a conciliatory spirit ; the principles of multilateral trade are in contrast to the trading *blocs* of the " thirties " and in conjunction with tariff reductions the balance of trade with the dollar area will tend to be restored by weakening restrictions on imports into the United States of America.

The Final Act of the United Nations Conference on Trade and Employment was signed in Havana by the representatives of fifty-three nations on 24th March, 1948. The Charter will be submitted to the Governments represented at the Conference, and must be approved by a majority of these before it comes into operation.

Towards the end of 1946 the Governments of a number of countries comprising the Preparatory Committee felt that the other discussions proposed by the United States of America in December, 1945 (viz. those directed at the policy of expanding international trade by bringing about a series of mutually advantageous trade agreements) were an interdependent part of the Charter negotiations. In consequence they were also brought under the auspices of the United Nations on the recommendation of the First Session of the Preparatory Committee.

As a result thereof on 10th April, 1947 (about a month prior to the resumption of the Charter discussions) the member nations of the Preparatory Committee engaged in negotiations with the object of arriving at a satisfactory basis on which the reduction of tariff barriers could be effected.

The Tariff negotiations were kept quite distinct from the Charter discussions as the aim was to bring the results into effect without necessarily awaiting the establishment of the International Trade Organization.

The results of the negotiations were incorporated in a draft General Agreement on Tariffs and Trade which was tabled in the House of Representatives on the 18th November, 1947, together with the tariff schedules implementing the tariff reductions which Australia had undertaken to afford.

A Protocol of Provisional Application provided that upon signature by Australia, Belgium, Canada, France, Luxembourg, the Netherlands, the United Kingdom and the United States of America not later than 15th November, 1947, those countries undertook to apply provisionally on and after the 1st January, 1948—

(1) Parts I. and III. of the Agreement,

(2) Part II. of the Agreement to the fullest extent not inconsistent with existing legislation in their respective countries.

These conditions were satisfied and the Agreement is provisionally in force. Tariff reductions undertaken by Australia operated from the 19th November, 1947.

Subject to the qualification in the following paragraph the agreement does not come definitively into force until 30 days after instruments of acceptance have been lodged by countries accounting for 85 per cent. of the total external trade of the countries signatory to the Final Act. The percentage is to be calculated in accordance with a table set out in Annexe H to the Agreement.

Notwithstanding the foregoing the Agreement was not in any event to become fully operative until 60 days after the conclusion of the Havana discussions. Since many of the provisions of the Agreement are almost identical with corresponding provisions in the Charter an Article provides that the Agreement shall not enter into full force and effect until the provisions of the Charter have been definitely settled and agreement has been reached as to whether the provisions of the Agreement or the corresponding provisions of the Charter shall prevail. Subject to the foregoing the Agreement provides that Article I. and Part II. of it shall be superseded when corresponding portions of the Charter come into operation.

If finally ratified, the Agreement will run until 1st January, 1951, but will continue thereafter unless it is specifically terminated.

The Agreement, which is in three parts, contains, briefly—

Part I. Schedules of negotiated tariff reductions and an undertaking to extend most-favoured-nation treatment to other participating countries except where existing preferences are deemed valid.

Part II. Undertakings regarding commercial policy to prevent tariff concessions being offset by other protective measures.

Rights are preserved, however, to—

(1) Impose new duties for protective purposes except in respect of commodities where rates of duty have been bound under the general agreement;

(2) impose import restrictions to protect the balance of payments;

(3) take emergency action where any industry is endangered by any negotiated tariff or preference reduction.

Part III. Mainly machinery provisions.

Under the tariff negotiations associated with the Agreement concessions were offered to Australia on almost all the principal products of which Australia is an actual or potential exporter to the individual countries concerned. Generally the offers were made directly to Australia, but in some cases benefits will arise indirectly from concessions granted to third countries which are more important suppliers of the particular product. These latter benefits occur through the operation of the most-favoured-nation principle.

8. **Customs (Import Licensing) Regulations.**—The Customs (Import Licensing) Regulations, which were promulgated on 1st December, 1939, were originally applied only to imports from countries outside the sterling area. The primary object was to eliminate non-essential items from Australia's import trade with non-sterling countries in order to conserve foreign exchange.

Some items were placed on the totally prohibited list while others were limited to a percentage of either the value or quantity of imports in the pre-war year 1938–39. Certain classes of goods, such as machinery, which could not be conveniently rationed on a quota basis, were placed " under administrative control ", each application being dealt with on its merits without reference to past importations.

The restrictions applied to the importation of non-essential goods were progressively tightened after the regulations were first introduced and many more classes of goods were added to the list of items subject to " total prohibition " and " administrative control.'

Since December, 1941, and consequent upon changes in the general war situation and the intensification of the Australian war effort, an increasing range of goods imported from the United Kingdom and other sterling countries was brought within the scope of the licensing regulations. The extension of the restrictions to sterling goods was a necessary corollary to the measures adopted in Australia and throughout the British Commonwealth to divert man-power, machinery and raw materials to war production. Conservation of shipping space was also an important consideration.

Since the conclusion of hostilities, in accordance with the Government policy of relaxing restrictions where possible, a number of import restrictions, particularly on goods of sterling origin, has been removed or modified. The extensive housing programme, in particular, calls for the importation of a number of items such as furnishings, carpets and various earthenware products not available locally in sufficient quantities. These are among the items on which import restrictions have been modified but the full effects will not be felt until the supply situation in overseas countries becomes easier and the shipping situation improves.

9. **Export Control.**—(i) *General.* Powers for the normal measures of control or supervision over exports are conferred by section 112 (1) of the Customs Act and they provide for the prohibition of the exportation of arms, explosives and military and naval stores, and of any goods—

(*a*) the exportation of which would be harmful to the Commonwealth ;
(*b*) the prohibition of the exportation of which is necessary for the preservation of the flora or fauna of Australia ;
(*c*) in order to preserve the standard and quality of Australian goods for export ;
(*d*) the prohibition of the exportation of which is necessary for the protection of the revenue or the prevention of fraud or deception.

Action has been taken under these powers to prohibit the exportation of a large range of goods and these prohibitions apply at all times. They may be general, or restricted and absolute, or conditional.

In addition to these normal measures, restrictions were imposed on the exportation of goods during the war years and many have been continued in the post-war period. These restrictions provided for both monetary and commodity controls and are explained hereunder.

(ii) *Monetary Control.* As an integral part of the framework of exchange control, a control over goods exported from Australia was introduced in 1939 by the promulgation of the Customs (Overseas Exchange) Regulations which were subsequently superseded by Part IIA. of the National Security (Exchange Control) Regulations in December, 1943. The objectives were to ensure that—

(*a*) The overseas funds accruing from the exportation of goods were made available to the Australian banking system ; and
(*b*) payment for goods exported was made in the currency and the manner prescribed by the Commonwealth Bank of Australia.

On the conclusion of the war it was decided to continue exchange control measures and provision was made in the Banking Act 1945, to enable the introduction of the necessary regulations. On 19th December, 1946, the Banking (Foreign Exchange) Regulations were promulgated and Part III. of these regulations now authorizes the control previously exercised under Part IIA. of the National Security (Exchange Control) Regulations.

Under Regulation 16 of the Banking (Foreign Exchange) Regulations the exportation of any goods is prohibited unless a licence to export has been granted under the regulations or the goods are excepted from the application of the regulations. Provision is made for the granting of export licences subject to such terms and conditions as may be imposed. On the receipt in Australia by the Commonwealth Bank, or by a Bank acting as its agent, of advice that foreign currency has been paid to the Commonwealth Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank or agent of the Bank pays the licensee, or such other person as may be entitled to receive it, an amount in Australian currency equivalent to the foreign currency received.

In addition to commercial transactions, exports by private individuals are rigidly controlled and in the case of persons leaving Australia for overseas a restriction applies to the value of specified articles of jewellery and other effects of high intrinsic value which they are permitted to take with them. Their baggage is subject to the regulations and must be covered by export licences and, in the case of restricted goods, by export permits also.

(iii) *Commodity Control.* For various reasons, the principal of which were—

(*a*) To conserve supplies of essential commodities for Australia's requirements ;

(*b*) to implement price determinations ;

(*c*) to control exports of goods which are the subject of Empire Marketing Agreements ; and

(*d*) to strengthen the control of the exportation of capital in the form of goods, instituted by Part III. of the Banking (Foreign Exchange) Regulations,

a large range of commodities was prohibited from exportation (unless the consent of the Minister for Trade and Customs was first obtained) by proclamation promulgated under section 112 (1A.) of the Customs Act.

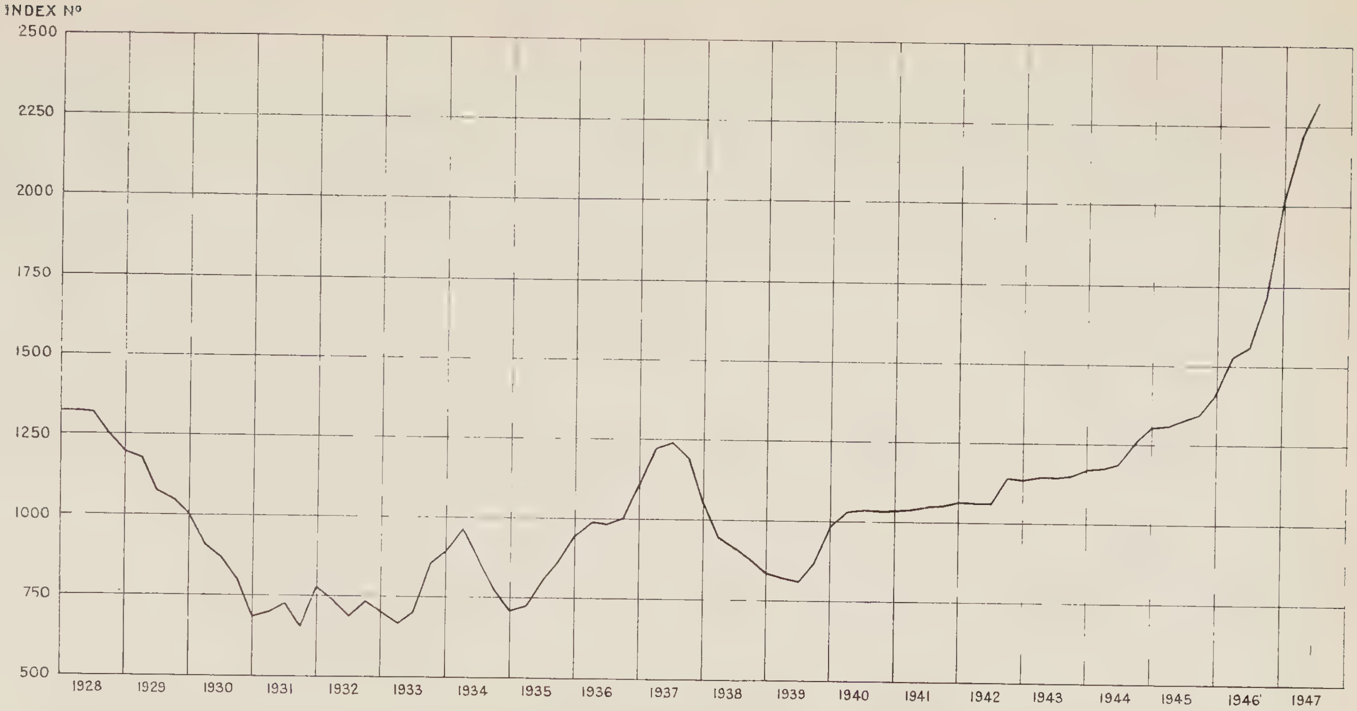
In cases where consent to exportation was given an export permit known as a restricted goods permit was issued. Consent was freely given for the exportation to British and Allied countries and to other approved destinations of goods under commodity control if they were available for export. In the case of exports to neutral countries, special precautions, apart from any other control measures, were taken to ensure that the goods did not become contraband by re-exportation to enemy territory, and to prevent any possible trading with the enemy. These special precautions included consignee control and guarantees against re-export.

Some 1,000 kinds or classes of goods were proclaimed as prohibited exports under section 112 (1A.) of the Customs Act after the outbreak of war in 1939, but, as the supply position improved in respect of any of the goods prohibited from export with the object of conserving supplies, the prohibition was removed or relaxed. The continuance of price control and a world shortage in the supplies of many essential commodities have necessitated continued export control of many goods in the early post-war period. The position is, however, under constant review so as to ensure that restrictions are being removed or modified as rapidly as conditions permit.

10. **Industries Preservation.**—The Customs Tariff (Industries Preservation) Act 1921-1936 provides that, after inquiry and report by the Tariff Board, special duties shall be collected in the following cases when the importation of the goods referred to might be detrimental to an Australian industry :—In the case of goods sold for export to Australia at a price less than the fair market price for home consumption or at a price which is less than a reasonable price, a special dumping duty shall be collected equal to the difference between the price at which the goods were sold and a fair market price. Similar provision is made for goods consigned to Australia for sale. With regard to goods exported to Australia at rates of freight less than the normal rate of freight the dumping freight duty shall be—on goods carried free—the amount payable as freight at the normal rate : and in the case of any other goods—an amount equal to the difference between the freight paid and the freight which would have been payable at the normal rate. Special duties are also imposed in the case of goods imported from countries whose currency is depreciated. Provision is also made for the protection of the trade of the United Kingdom in the Australian market from depreciated foreign currency.

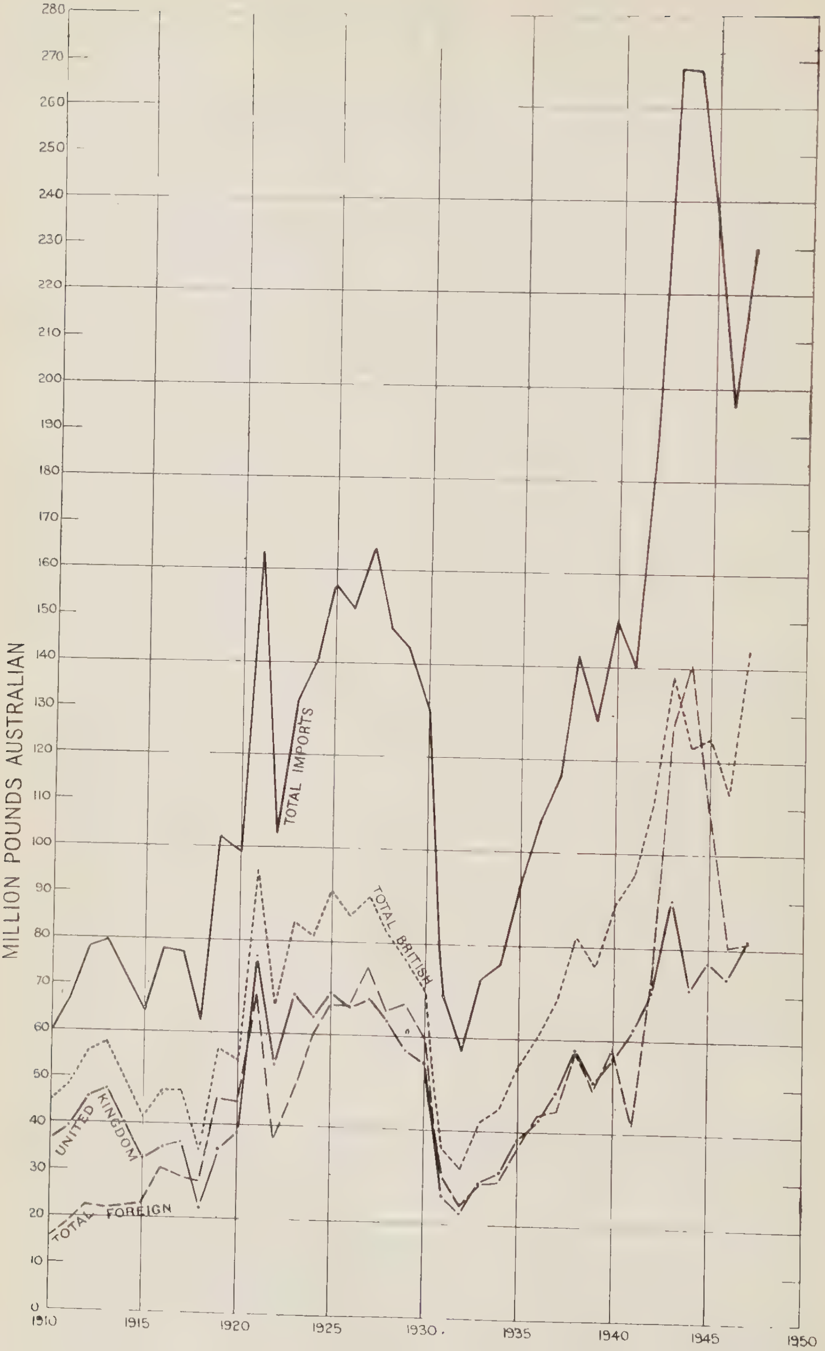
The Act provides that the Minister for Trade and Customs, after inquiry and report by the Tariff Board, may publish a notice in the *Commonwealth Government Gazette* specifying the goods upon which special rates of duty under this Act shall be charged and collected. Several amendments of the Act were recommended by the Tariff Board and put into effect by the Customs Tariff (Industries Preservation) Act 1922. The Customs Tariff (Industries Preservation) Act 1933 repeals section 8 of Act 1921–1922 and provides new clauses relating to Exchange Special Duty.

EXPORT PRICES INDEX-NUMBERS—AUSTRALIA, 1928 TO 1947.

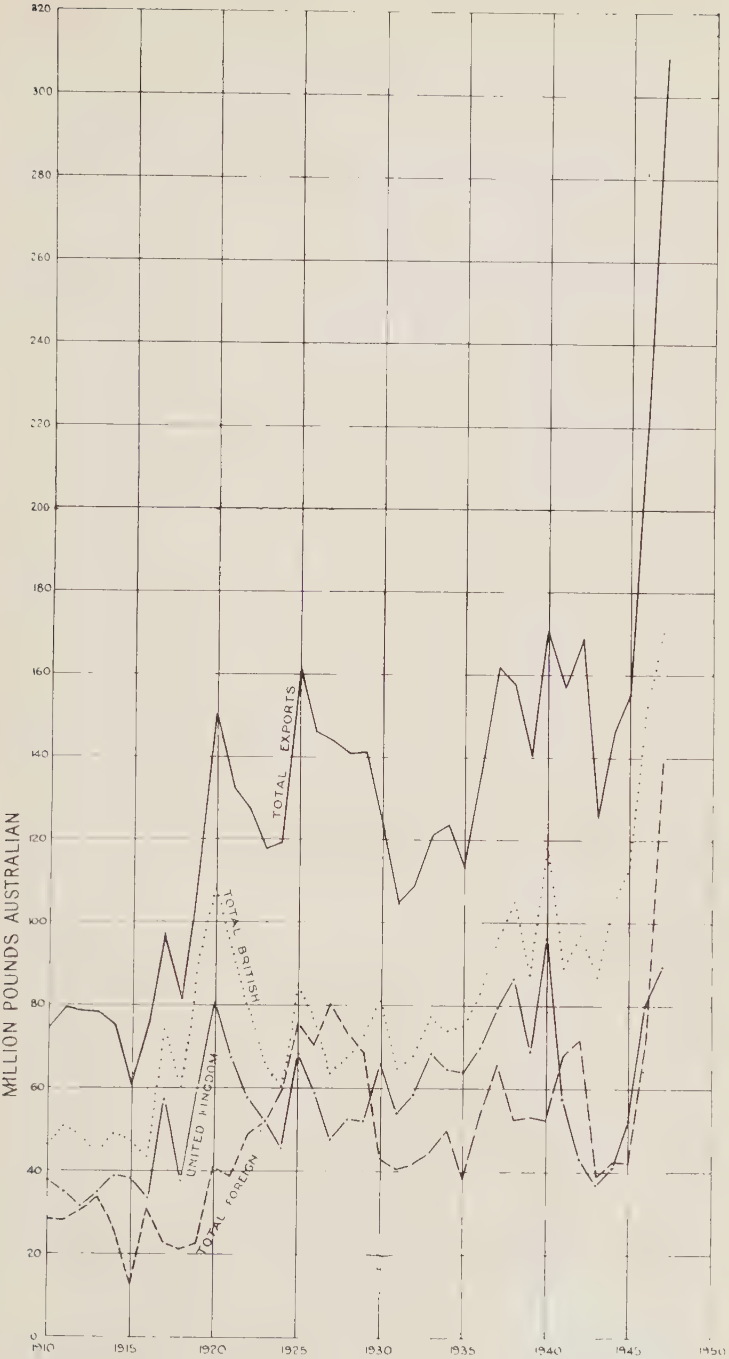


EXPLANATION.—This graph represents the Fixed Base series of Export Price Index-Numbers computed quarterly with the average for the three years ended June, 1939 as base (=1,000). Since it was drawn the index-numbers for the years 1945 to 1947 have been amended. The amended index-numbers are shown on page 426.

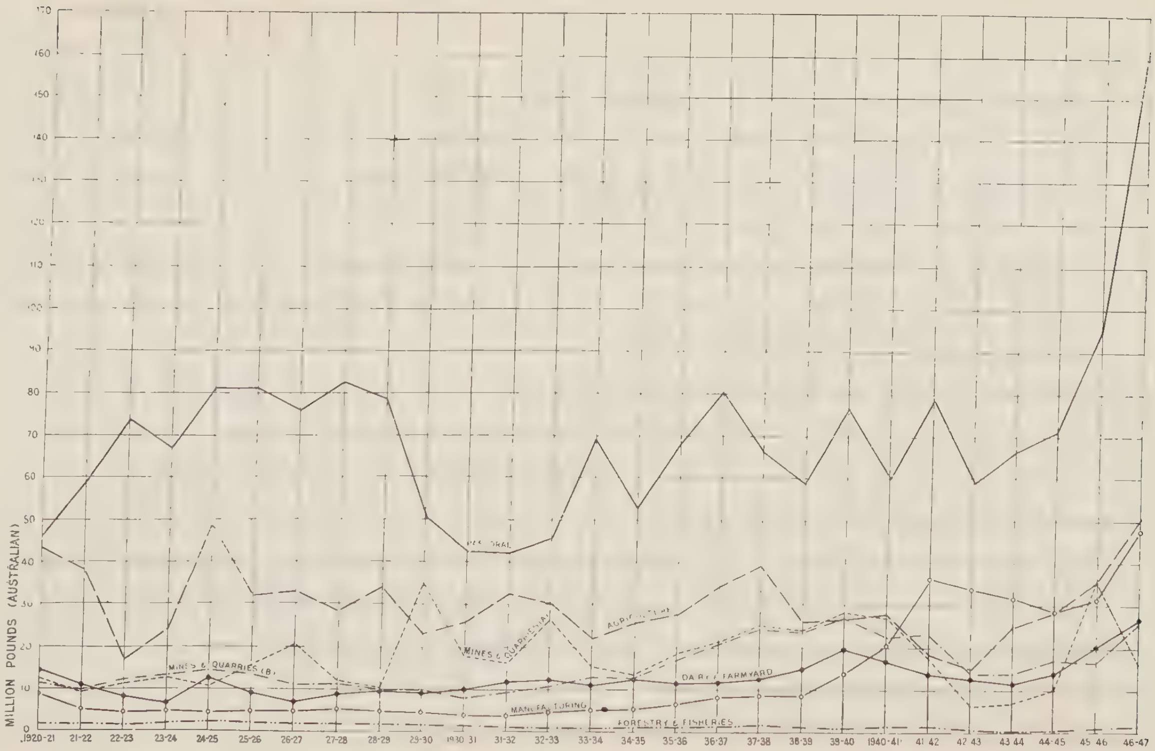
IMPORTS INTO AUSTRALIA, 1910 TO 1947.



EXPORTS FROM AUSTRALIA, 1910 TO 1947.



EXPORTS OF AUSTRALIAN PRODUCTS ACCORDING TO INDUSTRIES, 1920-21 TO 1946-47.



EXPLANATION.—Mines and Quarries (A) represents the total exports of the produce of this industry, including bullion and specie. Mines and Quarries (B) represents the export of products other than gold, to which is added the value of gold produced in the respective years.

11. **Preferential Tariff of the United Kingdom**—(i) *General.* The Tariff of the United Kingdom provides Preferential Customs rates on certain goods where it is shown to the satisfaction of the Commissioners of Customs and Excise that such goods have been consigned from and grown, produced, or manufactured in the British Empire. Manufactured articles generally are not entitled to the preferential rates unless a specified percentage of their value is the result of labour within the British Empire. In the Budget submitted to the House of Commons during June, 1925, clauses dealing with increased Imperial preference on Empire-grown tobacco, preserved and dried fruits, jams and jellies, spirits, wine, sugar and hops were proposed and adopted The new rates of duty took effect on 1st July, 1925, excepting that relating to hops, which came into operation on 16th August, 1925.

(ii) *Australian Preference.* The principal items of interest to Australia which are accorded preferential treatment under the Preferential Tariff of the United Kingdom are—Fruits, dried and preserved ; jam ; fruit pulp ; preserved milk ; wine and brandy. Conditions of preference to goods of Australian origin imported into the United Kingdom were revised in the trade agreement signed at the Ottawa Imperial Economic Conference. Increased preference was granted and the list of commodities entitled to preference was extended. This agreement provides for the continuance of the free entry of eggs, poultry, butter, cheese and other milk products the produce of Australia. Article 2 of the agreement provides for the imposition by the British Government of the following duties (specified in Schedule B) on foreign goods :—Wheat in grain, 2s. per quarter (this duty was abolished as a result of the United Kingdom–United States of America trade agreement of 17th November, 1938 ; *see* sub-par. (iii) below) ; butter, 15s. per cwt. ; cheese, 15 per cent. ad valorem ; apples, raw, 4s. 6d. per cwt. ; pears, raw, 4s. 6d. per cwt. ; apples, canned, 3s. 6d. per cwt., in addition to duty in respect of sugar content ; other canned fruits, 15 per cent. ad valorem, in addition to duty in respect of sugar content ; dried fruits, previously dutiable at 7s., 10s. 6d. per cwt. ; eggs in shell, (*a*) not exceeding 14 lb. per 120, 1s. per 120, (*b*) over 14 lb. but not exceeding 17 lb., 1s. 6d. per 120, (*c*) over 17 lb., 1s. 9d. per 120 ; condensed milk, whole, sweetened, 5s. per cwt., in addition to duty in respect of sugar content ; condensed milk, whole, not sweetened, 6s. per cwt. ; milk powder and other preserved milk, not sweetened, 6s. per cwt. ; honey, 5s. per cwt. ; copper, unwrought, whether refined or not, in ingots, bars, etc., 2d. per lb. ; oranges, raw, 3s. 6d. per cwt. from 1st April to 30th November ; grape fruit, raw, 5s. per cwt., from 1st April to 30th November, and grapes (other than hothouse) 1½d. per lb. from 1st February to 30th June. Schedule C provides that the margin of preference on wine not exceeding 27 degrees of proof spirit shall be 2s. per gallon.

The British Government undertakes that the general ad valorem duty of 10 per cent. imposed by section 1 of the Import Duties Act 1932 on the following foreign goods shall not be reduced except with the consent of the Commonwealth Government :—Leather, tallow, canned meat, zinc, lead, barley, wheaten flour, macaroni, dried peas, dressed poultry, casein, eucalyptus oil, meat extracts and essences, copra, sugar of milk, sausage casings, wattle bark, asbestos and dried fruits other than currants.

The duties provided on foreign wheat in grain, copper, lead and zinc are conditional on Empire producers continuing to offer these commodities on first sale in the United Kingdom at prices not exceeding the world price.

During the calendar year 1939 merchandise of Australian origin imported into United Kingdom amounted to £61,984,000. Of this total approximately £32,031,426 represented goods which received preferential tariff treatment over similar goods from foreign countries. If these goods had been subject to the duties imposed on foreign goods it is estimated that they would have paid approximately £5,503,227 more in duty. This represents a rebate of approximately 17.2 per cent. on the value of imports receiving preferential treatment. The main items receiving preference and the amount of the rebates were—Beef, frozen, £3,190,164 (rebate, £573,032) ; other meats, £1,569,246 (rebate, £172,120) ; sugar, £4,449,788 (rebate, £1,327,862) ; wine, £605,562 (rebate, £538,012) ; rice, £200,036 (rebate, £69,809) ; butter, £11,090,254 (rebate, £1,480,090) ; cheese, £958,333 (rebate, £63,889) ; apples, £1,645,285 (rebate, £300,105) ; raisins, £736,129 (rebate, £108,517) ; fruits, tinned, or bottled, £1,184,455 (rebate, £296,114) ;

lead, unwrought, £2,741,429 (rebate, £65,027); leather, £426,894 (rebate, £128,068). The foregoing figures for imports, valued in sterling, have been obtained from the *Annual Statement of the Trade of the United Kingdom* 1939, and the rebate granted has been estimated from rates of duty shown in the Import Duties Act 1932, Ottawa Agreements Act 1932 and the other enactments mentioned above.

The arrangements with the United Kingdom provide for importations of Australian meat to be regulated in accordance with the absorptive capacity of the United Kingdom market. Australian meat importations, excluding canned meats, into the United Kingdom during 1935 to 1947 as compared with the Ottawa agreement year (1931–32) have been as follows :—

Year.	Chilled Beef.	Frozen Beef and Veal.	Frozen Mutton and Lamb.	Pork.
	Cwt. '000.	Cwt. '000.	Cwt. '000.	Cwt. '000.

1945	..	319	1,110	263
1946	..	934	1,025	287
1947	..	2,136	1,045	41

From 1st October, 1939, the United Kingdom Government agreed to purchase a specified quantity of beef, mutton, lamb, veal, pork, and offals from Australia, and to use its best endeavours to lift additional quantities available for export. Reference to these contracts appears in Chapter XIX.—" Pastoral Production ".

(iii) *United Kingdom Trade Agreements.* Trade agreements operative between the United Kingdom and Argentine from 20th November, 1936, and the United Kingdom and the United States of America from 17th November, 1938, were of much interest to Australia as a country dependent on reasonable access to oversea markets for the disposal of its large surplus of agricultural products.

The details of these agreements are shown in earlier Official Year Books (see No. 36, pp. 326–7).

12. **Tariff Board.**—The Tariff Board Act 1921–1934 provides for the appointment of a Tariff Board consisting of four members, one of whom shall be an administrative officer of the Department of Trade and Customs. This member may be appointed Chairman of the Board. Members of the Board are appointed for a term of not less than one year nor more than three years, and two members may be appointed as a Committee for making special inquiries. The purpose of the Tariff Board is to assist the Minister in the administration of matters relating to trade and customs. The more important matters which the Minister shall refer to the Board for inquiry and report include disputes arising out of the interpretation of any Customs or Excise Tariff ; the necessity for new, increased or reduced duties ; the necessity for granting bonuses ; any proposal for the application of the British Preferential Tariff to any part of the British Dominions or any foreign country ; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff by charging unnecessarily high prices for his goods or acting in restraint of trade. The Minister may refer to the Board for inquiry and report the following matters :—the classification of goods under

items of the Tariff that provide for admission under By-laws ; the determination of the value of goods for duty ; the general effect of the working of the Customs Tariff and the Excise Tariff ; the fiscal and industrial effects of the Customs laws of the Commonwealth ; the incidence between the rates of duty on raw materials and on finished or partly finished products ; and any other matter affecting the encouragement of primary and secondary industries in relation to the Tariff.

Inquiries conducted by the Board relating to any revision of the Tariff, any proposal for a bounty, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff shall be held in public, and evidence in such inquiries shall be taken in public on oath, unless any witness objects to giving any evidence in public which the Board is satisfied is of a confidential nature, when the Board may take such evidence in private. Evidence taken by the Board in connexion with any inquiry under the Customs Tariff (Industries Preservation) Act 1921–1936 shall be taken in public on oath.

The Minister for Trade and Customs, by reference dated 19th May, 1942, called for investigation, report and recommendations from the Board on all aspects of the general problem of the re-establishment of secondary industries as part of the Commonwealth post-war reconstruction plan. In particular it was desired that the Board investigate and make interim and final reports and recommendations on—

(*a*) The extent to which it would be technically possible to adapt for civilian industry plant, equipment, materials and man-power (male and female employees) employed in defence production, and to what extent (so far as could be foreseen) such adaption was likely to be economically desirable.
(*b*) The disposition of surplus plant, equipment and stores of materials from the defence and other industries after the war.
(*c*) Any measures which might be required to facilitate the re-establishment after the war of industries or concerns contracted or closed down during the war.
(*d*) The degree to which any proposals made would solve the problem of the absorption into civilian avocations of members of the Forces.
(*e*) Changes in the organization and structure of Australian secondary industries since 1939 tending to increase industrial concentration, and any action arising therefrom that might be desirable in the interest of consumers.
(*f*) The possible effects of developments in Australia and oversea on the Australian system of encouragement and protection to industry by Tariff and Bounty.
(*g*) Other matters relating to the establishment, diversification, development and location of Australian secondary industries after the war.

Since the reference was made the position was changed by the creation of the Ministry of Post-war Reconstruction and the setting up of the Secondary Industries Commission and the Secondary Industries Division. These instrumentalities are now engaged in surveys of a general character, and action by the Tariff Board under the reference is therefore limited to investigations into specific industries or sections of industries.

The annual report of the Tariff Board for 1945–46 stated that during the year public inquiries were held on the following subjects :—

> Gloves, plastics, timber, die-heads, the publishing industry, pressed metal panels, tyres and tubes and batteries, refrigeration units, magnetic winding wire, felt polishing bobs or wheels, the optical industry, and parts of motor vehicles, tractors and cycles.

During the year 1945-46 fifteen reports were furnished to the Minister for Trade and Customs. Twelve reports were the result of public inquiry, two related to the question of the operation of deferred rates of duty and one on efficiency and costs of production in Australian industries.

Nine references from the Minister for Trade and Customs were on hand on 1st July, 1946, of which five related to Tariff Revisions and three to the question of the present position and future prospects of the Australian plastics industry. No action in relation to one reference was taken owing to changed circumstances.

The 1946–47 annual report of the Tariff Board stated that public inquiries were held on the following subjects :—

> Vacuum cleaners, Wine Export Bounty Act 1930–1944, the optical industry, hog casings, internal combustion engines, questions relating to cancelling of existing by-laws, mercury contact tubes, aluminium and aluminium alloys, metal-working chucks, tariff revision on fasteners and vacuum cleaners, and continuance of bounty on production of tractors and the nature and amount of assistance on plastics and materials therefor.

Sixteen reports were furnished to the Minister for Trade and Customs during the year 1946–47. Twelve reports related to matters of public inquiry, two upon the question of bringing deferred rates of duty into operation, one on the question of granting financial assistance to an Australian manufacturer and one upon the proposed expansion of an industry in Australia.

The work on hand on 1st July, 1947 consisted of fourteen references by the Minister of Trade and Customs but action upon one of these was deferred pending further advice from the Minister.

13. **Trade Descriptions.**—The Commerce (Trade Descriptions) Act 1905 as amended by the Acts of 1926, 1930 and 1933 gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth. The goods to which a trade description must be applied are :—(*a*) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man ; (*b*) medicines or medicinal preparations for internal or external use ; (*c*) manures ; (*d*) apparel (including boots and shoes), and the materials from which apparel is manufactured ; (*e*) jewellery ; (*f*) seeds and plants ; and (*g*) brushware.

14. **Acts Passed in 1945 and 1946.**—The following Commonwealth Acts relating to Australian production and trade were assented to during the years 1945 and 1946 :—

ACTS PASSED IN 1945.

Drought Relief Act, No. 17 of 1945. An Act to amend the States Grants (Drought Relief) Act 1944, and for other purposes.

Wine Overseas Marketing Act, No. 23 of 1945. An Act to amend the Wine Overseas Marketing Act 1929–1936.

Wool (Contributory Charge) Act, No. 51 of 1945. An Act to impose a Contributory Charge upon certain Wool produced in Australia.

Wool (Contributory Charge) Assessment Act, No. 50 of 1945. An Act relating to the Imposition, Assessment and Collection of a Contributory Charge upon certain Wool produced in Australia, and for other purposes.

Wool Realization Act, No. 49 of 1945. An Act to approve an Agreement between the United Kingdom, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa in relation to the disposal of Wool and to provide for the carrying out of the Agreement on the part of the Commonwealth of Australia, and for other purposes.

Wool Tax Act, No. 2 of 1945. An Act to amend the Wool Tax Act, 1936.

Wool Use Promotion Act, No. 3 of 1945. An Act to make provision for Improving the Production and Increasing the Use of Wool.

ACTS PASSED IN 1946.

Sugar Agreement Act, No. 11 of 1946. An Act to approve an Agreement made between His Majesty's Government of the Commonwealth of Australia and His Majesty's Government of the State of Queensland, and for other purposes.

Wheat Industry Stabilization Act, No. 24 of 1946. An Act relating to the Stabilization of the Wheat Industry.

Wheat Export Charge Act, No. 25 of 1946. An Act to impose a Charge upon the Export of Wheat and Wheat Production.

Meat Export Control Act, No. 36 of 1946. An Act to amend the Meat Export Control Act 1935–1938, and for other purposes.

Customs Tariff Validation Act, No. 47 of 1946. An Act to provide for the Validation of Collections of Duties of Customs under Customs Tariff Proposals.

Excise Tariff Validation Act, No. 48 of 1946. An Act to provide for the Validation of Collections of Duties of Excise under Excise Tariff Proposals.

Raw Cotton Bounty Act, No. 51 of 1946. An Act to amend section nine of the Raw Cotton Bounty Act 1940–1941.

Wool Industry Fund Act, No. 52 of 1946. An Act for the application of certain Funds vested in the Australian Wool Realization Commission.

Customs Tariff (Special War Duty) Validation Act, No. 68 of 1946. An Act to amend the Customs Tariff (Special War Duty) Validation Act (No. 2) 1943.

Excise Tariff Validation (No. 2) Act, No. 69 of 1946. An Act to amend the Excise Tariff Validation Act (No. 2) 1943.

Wheat Industry Assistance Act, No. 71 of 1946. An Act to amend the Wheat Industry Assistance Act 1938.

Wheat Tax Act, No. 78 of 1946. An Act to impose a Tax in respect of certain Wheat.

Wheat Export Charge (No. 2) Act, No. 79 of 1946. An Act to amend the Wheat Export Charge Act 1946.

Wheat Industry Stabilization (No. 2) Act, No. 80 of 1946. An Act to amend the Wheat Industry Stabilization Act 1946.

§ 3. Lend-Lease and Mutual Aid between Australia and the United States.

1. **Lend-Lease.**—Particulars of Lend-Lease and Mutual Aid between Australia and the United States of America are given in detail in Official Year Book, No. 36, pp. 331–6.

2. **Lend-Lease Settlement.**—An Agreement between Australia and the United States of America on settlement of Lend-Lease, Reciprocal Aid, Surplus War Property and Claims was signed on 7th June, 1946. The main provisions of the Settlement Agreement were as follows :—

(a) *Lend-Lease and Reciprocal Lend-Lease Supplied up to V.J. Day* (*2nd September*, 1945). In recognition of the mutual war-time benefits received from the interchange of Lend-Lease and Reciprocal Aid the Agreement provided that neither Government would make any payment to the other for Lend-Lease and Reciprocal Aid goods and services used in the achievement of the common victory.

(b) *Lend Lease* " *Pipe-Line* ". The United States Government agreed to complete the transfer to Australia of the goods selected by the Commonwealth Government from those which were in course of Lend-Lease procurement on V.J. Day.

(c) *Reciprocal Aid* " *Pipe-Line* ". The Commonwealth Government agreed to make no charge for any goods transferred to the American Armed Forces between 2nd September, 1945 and 31st December, 1945, which were in the categories previously transferred under Reciprocal Aid.

(*d*) *Overall Payment of* 27,000,000 *Dollars.* The Commonwealth Government agreed to pay to the United States Government the sum of 27,000,000 dollars (approximately £A8,400,000) in consideration of :—

(i) the post-war value of Lend-Lease machine tools ;

(ii) the post-war value of other Lend-Lease capital equipment including specified non-combat aircraft held by the R.A.A.F. ; and

(iii) the transfer of United States Government surplus property to a total value of 6,500,000 dollars (approximately £A2,000,000) in accordance with the terms of the Settlement.

An amount of 20,000,000 dollars (approximately £A6,200,000) has already been paid to the United States Government. The remaining 7,000,000 dollars (approximately £A2,200,000) is to be paid by delivery to the United States Government of title to real property and improvement to real property in Australia to a total value of not more than 2,000,000 dollars (approximately £A620,000) and by establishment of a fund in Australian pounds for expenditure by the United States Government, under agreements to be reached between the two Governments, for carrying out educational and cultural programmes of mutual benefit.

(*e*) *Claims against the United States Government.* The Commonwealth Government agreed to assume responsibility for the settlement of all claims against the United States Government or members of the American Armed Forces arising from acts or omissions occurring before 30th June, 1946, in the course of military duties of members of the American Armed Forces in Australia.

(*f*) *Other Claims.* It was agreed that the settlement should be complete and final and that no further benefits would be sought by either Government in consideration for Lend-Lease, Reciprocal Aid and surplus war property, or for the settlement of claims or other obligations arising out of the war except as specifically provided in the Settlement Agreement.

In the course of a financial statement delivered in the House of Representatives on 12th July, 1946, the Treasurer disclosed that the total value of Lend-Lease received by Australia was about 1,500,000,000 dollars (approximately £A466,000,000) while total Reciprocal Lend-Lease from Australia to the United States was approximately £A285,000,000.

§ 4. Mutual Aid between Canada and Australia.

1. **Canadian Mutual Aid.**—Particulars of the arrangements whereby assistance was given by Canada to Australia during the war years, under the terms of the Canadian Mutual Aid Act, are given in detail in Official Year Book No. 36, pp. 336–8.

2. **Termination of Canadian Mutual Aid.**—The transfer of supplies to Australia under the Canadian Mutual Aid Act ceased on V.J. Day (2nd September, 1945).

In general, title to goods delivered to Australia under Canadian Mutual Aid up to V.J. Day passed to the Commonwealth Government and no financial settlement has been required for them. However, the Canadian Mutual Aid Act did not permit the transfer of title to ships made available under Mutual Aid and in consequence a coastal ship received by Australia from Canada under Mutual Aid provisions was formally returned to the Canadian Government which subsequently declared it surplus and sold it to an Australian Shipping Company.

The final report of the Canadian Mutual Aid Board which administered the provisions of the Canadian Mutual Aid Act gives the following particulars of the goods and services supplied by Canada to Australia during the currency of the Mutual Aid arrangements :—

CANADIAN MUTUAL AID DISBURSEMENTS FOR AUSTRALIA,
NOVEMBER, 1943–1ST SEPTEMBER, 1945.

	Total $ Millions.
Aircraft and parts	12.547
Automotive equipment and mechanical transport	18.237
Armoured vehicles	.428
Chemicals and explosives	.250
Guns and small arms	.442
Shells and ammunition	.006
Merchant vessels, construction and repairs	2.162
Naval vessel equipment	.173
Cloths, clothing and fabrics	.638
Electrical, radio and telephone equipment	3.945
Lumber and other construction material	5.037
Machine tools, stores and miscellaneous	2.152
Aluminium and base metals	.587
Fish and products	.654
Oats	.967
Asbestos	.974
Paper and products	3.535
Fertilizers and chemicals	.964
Farm machinery	.739
Miscellaneous	1.264
Freight—inland and ocean	7.649
British Commonwealth Air Training Plan	27.975
Total	91.325

This total in Australian currency was approximately £A25,700,000.

§ 5. Trade Commissioner Service.

Empire and foreign countries have deemed it necessary in their trade interests to establish generous overseas representation and have for many years maintained extensive overseas trade services.

Prior to 1929, Australian representation abroad was limited to the High Commissioner's Office, in London, with a subsidiary agent in Paris, and the Office of the Commissioner-General for Australia in New York. Apart from the facilities afforded by those offices, the only form of overseas trade representation available to Australia was that of the British Overseas Trade Service, a service whose activities are naturally more particularly devoted to the development of United Kingdom rather than Dominion trade.

The growing importance of Australia's trade with Canada led to the appointment in 1929 of an Australian Trade Commissioner in that country. The part played by that official in the subsequent negotiation of the Trade Agreement with Canada, in the cultivation of close and cordial relations with the Canadian authorities, and in general in focussing interest on Australia and Australian products, amply demonstrated the value of such appointments both to the Commonwealth Government and the Australian trading community.

The general advantages to be derived from the appointment of Trade Commissioners may be briefly stated as follows :—(*a*) fostering of goodwill, (*b*) correction and avoidance of misunderstandings, and (*c*) dissemination of knowledge concerning the respective countries. Particular facilities which they are able to afford to the trading community are (*a*) information as to present and prospective demand for goods, (*b*) information as to foreign and local competition, (*c*) advice as to best selling methods, (*d*) reports as to the standing of foreign buyers, (*e*) specification of articles in demand, (*f*) dealing with trade inquiries, (*g*) advice and assistance to commercial visitors regarding trade matters, (*h*) settlement of difficulties between exporters in Australia and buyers abroad, and (*i*) furnishing of information as to foreign import requirements, customs duties, trade regulations, etc.

In addition to the foregoing particular trading functions, it is the duty of a Trade Commissioner to watch and advise the Government regarding any developments in his Territory affecting not only trade and commerce, but any other matters of concern to his home Government.

Trade Commissioners are drawn either from the commercial world or from the ranks of the Public Service as circumstances dictate. With each Trade Commissioner, however, it is customary to provide an Assistant Trade Commissioner, who is selected to undergo training in the service and qualify at a later stage for appointment as a Trade Commissioner. The staffing arrangements are in this way designed to enable the Government to avail itself of the best procurable executives of either the Public Service or the commercial world and at the same time to build up a first class personnel to carry out a vigorous policy of expansion in connexion with Australia's overseas trade.

The overseas trade representation is shown in Chapter XXVIII.—" Miscellaneous ".

§ 6. Method of Recording Imports and Exports.

1. **Value of Imports.**—The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged ad valorem. The value of goods has been taken to be 10 per cent. in advance of their fair market value in the principal markets of the country whence the goods were exported. Acting upon a recommendation of the Tariff Board the section of the Customs Act relating to the valuation of imports was amended, section 154 (1) of the Customs Act 1901–1936 providing that " when any duty was imposed according to value, the value for duty should be the sum of the following :—

- (*a*) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or
  - (ii) the current domestic value of the goods, whichever is the higher ;
- (*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export ; and
- (*c*) ten per centum of the amounts specified under paragraphs (*a*) and (*b*) of this sub-section.

" Current domestic value " is defined as " the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country ".

Until 15th November, 1947, imports were recorded in British currency values, and Section 157 of the Customs Act provided that when the invoice value of imported goods was shown in any currency other than British currency, the equivalent value in British currency should be ascertained according to a fair rate of exchange to be declared in case of doubt by the Minister. Under this section it was the practice of the Department of Trade and Customs, until 8th December, 1920, to convert on the basis of the mint par of exchange. From that date until 15th November, 1947, in consequence of a ruling of the High Court, all conversions were based on the commercial rates of exchange.

The value for duty under the Customs Act 1901–1936 was amended on the 15th November, 1947 by the deletion of Section (*c*) mentioned above and the valuation of imports under Section 157 of the Customs Act was amended by substituting "Australian" for "British" currency.

As a result of this amendment to the Customs Act all import tables shown in the sections following have been expressed in the Australian equivalent of the recorded sterling values.

2. **Value of Exports.**—Prior to 1st July, 1929, the recorded value of all goods exported was taken as representing the value in the principal markets of Australia in the ordinary commercial acceptation of the term. Owing to the inflated values arbitrarily allotted in recent years to commodities which are subject to governmental control or subsidy, some change in the practice of valuation of exports of such commodities became desirable. Accordingly a new basis was adopted, as from 1st July, 1929, for the statistical valuation of exports of sugar, butter and goods on which bounty or rebate was paid, which would show for (*a*) *Sugar*—the value f.o.b. at which sold to oversea buyers, or a f.o.b. value equal to the London market price if shipped on consignment; (*b*) *Goods on which bounty or rebate was paid on export*—the value in the principal markets of Australia in the ordinary commercial acceptation of the term, less the value of any bounty or rebate. Until 31st March, 1934, the basis adopted for the value of exports of *butter* was the current market value, less the amount paid as export bonus. From 31st March, 1934 to 30th June, 1937, the basis was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the butter was sold and (*b*) shipped on consignment—the f.o.b. equivalent of the ruling price overseas.

From 1st July, 1930 to 30th June, 1937, the basis adopted for the value of *wool* exported was (*a*) sold in Australia for export—the actual price paid plus the cost of services incurred in placing the wool on board ship, and (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932 to 30th June, 1937, the basis adopted for the value of *wheat* exported was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the wheat was sold, and (*b*) shipped on consignment—the f.o.b. equivalent of the current selling price overseas.

From 1st July, 1934 to 30th June, 1937, the basis adopted for the value of *flour* exported was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the flour was sold, and (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally :—

(1) Goods sold to oversea buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g. as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).

(2) Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

All values to be shown in terms of Australian currency, and to include cost of containers.

3. **Customs Area.**—The Customs Area, to which all oversea trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade

transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

4. **Statistical Classification of Imports and Exports.**—Statistics of oversea imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to a classification which came into operation on 1st July, 1945. The new classification provides for over 2,600 separate import items and 1,100 export items.

5. **The Trade Year.**—From 1st July, 1914, the statistics relating to Oversea Trade have been shown according to the financial year (July to June). Prior to that date the figures related to the calendar year. A table is given in § 18 showing the total value of imports and exports in the calendar years 1939 and 1944 to 1947 inclusive.

6. **Records of Past Years.**—In the years preceding Federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports and exports were not on uniform lines. The figures in the following tables for years prior to Federation have been carefully compiled and may be taken as representative of the oversea trade of Australia as a whole. On the introduction of the Customs Act 1901, the methods of recording values were made uniform throughout the States, but it was not until September, 1903 that a fundamental defect in the system of recording transhipped goods was remedied. Prior to 1905 the value of ships imported or exported was not included in the returns of trade.

7. **Oversea Trade During the 1939–45 War.**—Available records of imports and exports during the 1939–45 War are incomplete. Export entries were not made for a substantial volume of war material and supplies exported to Australian and Allied forces serving abroad, particularly in Papua, the Territory of New Guinea and other parts of the Pacific theatre of war. In addition, no export entries were passed for about £stg.23,000,000 of war material exported to other Governments. In general, however, the export of foodstuffs was recorded without serious deficiency. Imports as recorded do not include supplies imported for their own use by Allied forces serving in Australia—some part of which may subsequently have found its way into the hands of the Australian Government or people—also some imports of war material by the Commonwealth Government Departments and some items imported for civil consumption under United States of America Lend-Lease and Canadian Mutual Aid. There were substantial delays in recording imports of war material by the Commonwealth Government Departments and some items imported for civil consumption under United States of America Lend-Lease and Canadian Mutual Aid. These delayed entries have been recorded in the month in which the entry was passed and not in the month of arrival of the goods into this country.

It should be noted, moreover, that the recorded trade figures during the war period do not necessarily reflect the amount payable for imports or receivable for exports. Export to Australian forces and to allied forces under Reciprocal Lend-Lease and imports under Lend-Lease and Mutual Aid required no payment. On the other hand payment was received for wool and some minor items which were purchased by Great Britain under contract but not actually shipped, and for some unrecorded exports of war material. In addition, payment was made by Australia for some imports of war material in years prior to those in which import entries were recorded.

8. **Ships' Stores.**—Prior to 1906 goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and omitted from the return of exports. A table showing the value of these stores shipped each year since 1937–38 is given in § 12, page 419.

§ 7. Oversea Trade.

1. **Total Oversea Trade.**—(i) *Including Gold.* The following table shows the total trade (including gold) of Australia with oversea countries from the earliest date for which records are available. To save space, the period 1826 to 1939–40 has been divided into five-yearly periods, and the figures shown represent the annual averages for the periods specified. Figures for individual years were published in earlier issues of the Official Year Book but it should be borne in mind, however, that the figures therein for imports are in British currency. (*See* note to following table.)

In this issue the values in all tables in this chapter are shown in Australian currency. The value of imports represents the f.o.b. value at port of shipment plus the statutory 10 per centum imposed for value for duty purposes expressed in Australian currency.

TOTAL OVERSEA TRADE : AUSTRALIA.

(INCLUDING GOLD.)

Period.(*a*)	Value.			Value per Inhabitant.									Percentage of Exports on Imports.

(*a*) The figures given for the years 1826 to 1939–40 represent the annual averages for the periods shown. The trade of the individual years will be found in Official Year Book No. 35 and earlier issues but it should be noted that imports are shown in British currency. From 1914–15 onwards the particulars relate to financial years. (*b*) Prior to 1906, ships' stores were included in the general exports. For value of such goods shipped on oversea vessels each year since 1937–38 see later table, § 12.

In issues of the Official Year Book prior to No. 23 fluctuations in the value of the overseas trade of Australia for earlier years have been treated in some detail. The enhanced prices ruling for commodities and the peculiar conditions affecting Australian trade were responsible for the high value of imports in the years following the 1914–18 War and these factors should be taken into consideration in making comparisons with earlier years.

In 1924–25 the total value of oversea trade exceeded £300 million for the first time. Of the total value of trade, amounting to £318,454,000, imports represented £157,143,000 and exports £161,311,000. Imports in 1924–25, however, included an exceptionally large quantity of bullion and specie valued at £10,543,000. In the three years ended 1928–29 imports fell but exports were well maintained and in 1929–30 both imports and exports declined substantially. The full effects of the economic depression are reflected in the greatly diminished trade figures for 1930–31 and some years thereafter. The lowest level was recorded in 1931–32 when the total trade amounted to £141,977,000. Following a gradual improvement in 1933–34 and 1934–35, recovery was more rapid in the three years ended 1937–38 owing generally to higher prices for exports of primary products and the rising flow of imports. In 1937–38, however, export prices fell sharply and declined still further in 1938–39. In 1939–40 the value of trade rose substantially as a result of increases in the value of both imports and exports, but declined again in 1940–41, mainly due to import restrictions and scarcity of shipping.

The outbreak of war in the Pacific in 1941 resulted in an enormous increase in the value of imports during 1941–42 and subsequent years. Fluctuating yearly increases in the value of exports were recorded during the same period. During 1946–47 the value of total trade reached the record total of £539,028,000 due largely to substantial increases in import and export prices. The total value of trade during 1945–46 amounted to £419,656,000 and the only other year in which a total trade in excess of £400 million was recorded was in 1943–44 (£414,998,000).

The value of exports in 1946–47 at £309,004,000 was also a record and the next highest value (£223,288,000) was recorded in 1945–46; in that year, however, gold amounting to £26,411,000 was exported whereas in 1946–47 gold exports were negligible.

Imports in 1946–47 amounted to £230,024,000 compared with the war-time record total of £268,589,000 in 1942–43.

(ii) *Excluding Gold.* The fluctuations in merchandise trade (including silver as merchandise) are shown more clearly in the following table, from which *all* gold movements have been excluded :—

OVERSEA TRADE : AUSTRALIA.

(EXCLUDING GOLD BULLION AND SPECIE.)

Year.	Imports excluding Gold.	Exports excluding Gold.	Total Trade excluding Gold.	Value per Inhabitant.			Percentage of Exports on Imports.
				Imports.	Exports.	Total Trade.	
	£'000.	£'000.	£'000.	£ s. d.	£ s. d.	£ s. d.	%
1938–39	124,478	122,544	247,022	17 19 0	17 13 6	35 12 6	98.4
1943–44	266,707	146,678	413,385	36 13 7	20 3 5	56 17 0	55.0

1945–46	195,214	196,877	392,091	25 5 6	26 9 11	52 15 5	100.9
1946–47	228,924	309,003	537,927	30 8 10	41 1 10	71 10 8	135.0

2. **Balance of Trade.**—The table on page 399 shows the percentage of exports on imports (including gold) for five-yearly periods from 1826 to 1939–40 and for each year from 1940–41 to 1946–47, while the table above shows the percentage of exports on imports (excluding gold) for each year 1943–44 to 1946–47 compared with 1938–39. Reference to the first-mentioned table shows that prior to the five-yearly period 1891–95 the balance of trade, with two exceptions due to temporary dislocations, had been on the side of imports, while from that period to 1920–21 the position was reversed. During

the subsequent five-yearly period ended 1925–26, there was an excess of imports, as was the case in each of the years 1926–27 to 1929–30. From 1930–31 to 1938–39 exports greatly exceeded imports. In 1939–40 and 1940–41 exports exceeded imports but for the years 1941–42 to 1944–45 imports greatly exceeded exports. The position, however, was reversed during 1945–46 and 1946–47 when exports were greatly in excess of imports.

In recent years imports and exports of gold for monetary purposes have made the interpretation of the foregoing tables more difficult. In the following table the balance of commodity trade, including the value of gold currently produced in Australia, has been separated from the monetary movement of gold :—

COMMODITY BALANCE OF TRADE AND MONETARY MOVEMENT OF GOLD.

Year.	A. Total Imports other than Gold. (Specie, Bullion and in Matte.)	B. Total Exports, other than Gold. (Specie, Bullion and in Matte.)	C. Gold produced in Australia.	D. 1946–47 ..	228.9	309.0	9.8	318.8	89.9	−10.8	79.1

(*a*) First six months only.

NOTE.—From 1939–40 onward under contracts with the British Government, Australia received payment for some exportable commodities (e.g., wool, etc.) irrespective of when the goods were shipped. Payments for exportable goods were somewhat larger than the recorded value of exports, and payments relating to the balance of trade were more favorable than is indicated by the figures above which relate only to goods actually shipped.

3. **Balance of Payments.**—The balance of visible trade, including the net movement of precious metals, does not present a complete picture of Australia's international transactions during each year. Allowance must also be made for unrecorded imports

and exports, for services rendered and received, and for international capital and interest transactions. The values of some of these items are known, and some of those remaining can be estimated with a sufficient measure of accuracy, but for many items it is difficult to make even a rough guess. A continuous investigation is being made into the values of these "invisible" items in the balance of payments.

§ 8. Direction of Oversea Trade.

1. **Imports according to Country of Origin.**—The following table shows the value of the imports into Australia during the years 1943–44 to 1946–47 compared with the year 1938–39 of commodities stated to be the produce or manufacture of the undermentioned countries.

AUSTRALIAN IMPORTS: COUNTRIES OF ORIGIN.

2. **Percentage of Imports from Various Countries.**—In view of the fluctuations in the total values of imports, it is somewhat difficult to ascertain from the preceding table the relative importance of the various countries in the import trade of Australia. A better idea of the proportions of imports supplied by the various countries may be obtained from the following table of percentages.

AUSTRALIAN IMPORTS : PERCENTAGES FROM COUNTRIES OF ORIGIN.

(EXCLUDING GOLD BULLION, SPECIE AND IN MATTE.)

Country of Origin.	1938–39.	1943–44.	1944–45.	1945–46.	1946–47.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.

Total, Foreign Countries ..	41.09	54.06	47.42	42.61	36.33
Total	100	100	100	100	100

The table covers a period of the war and for that reason the figures are abnormal. They show a considerable increase in the proportion of imports from the United States of America—the average percentage for which in the five years ended 1938–39 was 15.74—and a decrease for the United Kingdom—the average percentage for which in the five years ended 1938–39 was 42.53.

3. **Direction of Exports.**—The following table shows the value of commodity exports to the principal countries during the years 1938–39 and 1943–44 to 1946–47.

EXPORTS FROM AUSTRALIA TO VARIOUS COUNTRIES.

4. **Percentage of Exports to Various Countries.**—In consequence of the fluctuations in the total values of exports, the relative importance during the war years of various countries as markets for Australian produce is shown more clearly by the following table of percentages.

There was a very marked increase in the proportion of exports to the United States of America and a decrease in the proportion to the United Kingdom, the respective percentages for which in the five years ended 1938–39 were 3.97 and 52.25.

EXPORTS FROM AUSTRALIA : PERCENTAGES TO VARIOUS COUNTRIES.

United States of America ..	18,345	43,717	3,603	47,584	− 14,742	3,867
Other Foreign Countries ..	8,443	28,737	5,699	24,785	− 2,744	− 3,952
Total, Foreign Countries	49,961	81,505	37,345	138,907	− 12,616	57,402

(a) Excludes outside packages.

The balance of trade with single countries is of little significance, since in the first place there is still a fair proportion of Australian produce distributed through the United Kingdom either immediately, by transhipment or re-sale, or ultimately, by incorporation in manufactures. Further, in very many cases international balances are equated directly by services or indirectly by exchange of goods between several countries.

6. **Principal Imports and Exports, Countries.**—The total value of imports from and exports to each of the more important British and foreign countries during 1938–39, together with brief particulars of the principal commodities interchanged with such countries, will be found in the Official Year Book, No. 33, pp. 776–781.

§ 9. Classified Summary of Australian Oversea Trade with the United Kingdom.

1. **Imports.**—The following table shows, according to statistical classes, the value of imports into Australia of United Kingdom origin during the years 1943–44 to 1946–47 compared with the year 1938–39.

IMPORTS INTO AUSTRALIA OF UNITED KINGDOM ORIGIN : CLASSES.

Class.	1938–39.	1943–44.	1944–45.	1945–46.	1946–47.
	£	£	£	£	£
I. Animal foodstuffs, etc. ..	376,104	6,519	1,091	210,784	422,492

§ 10. Trade with Eastern Countries.

1. **Principal Articles Exported.**—The following table shows the value of exports of Australian and other produce from Australia to Eastern countries for the years 1938–39 and 1943–44 to 1946–47. The countries concerned in this trade were Borneo (British), Burma, Ceylon, China, Formosa, French Indo-China, Hong Kong, India, Japan, Korea, Kwantung Peninsula, Malaya (British), Manchuria, Netherlands East Indies, Philippine Islands, Siam (Thailand), Timor (Portuguese), and French and Portuguese Possessions in India. The outbreak of war with Japan in December, 1941 resulted in the cessation of trade with Eastern countries, except Ceylon and India. The export trade with Eastern countries rose substantially during 1934–35 and 1935–36 as a result of increased shipments of wool, flour, wheat and minerals. The exports in 1935–36 were valued at £25,532,518, the highest figure then recorded since 1928–29. In 1936–37 the value of exports to Eastern countries decreased by more than £8 million largely as the result of the heavy reduction in the purchases of wool by Japan ; wheat shipments to Japan and China also declined in value by nearly £2 million during the year. The value of exports decreased still further in 1937–38 and again a decline in the purchase of wool by Japan coupled with the recession in wool values was the principal contributing factor. Mainly owing to heavier shipments of wheat, the exports increased by more than £1 million in 1938–39. The outbreak of war in Europe with the further possibility of war with Japan resulted in substantial increases in the value of exports to Eastern countries during 1939–40 and 1940–41, particularly to Ceylon, Burma, India, Hong Kong, Malaya (British), China and Netherlands East Indies. The supply of foodstuffs, clothing, etc., to the garrison forces stationed in the countries mentioned above was largely responsible for the increase of approximately £6½ million in the value of exports during the year 1940–41 as compared with the year 1938–39. Following the termination of hostilities there were large shipments of merchandise of every description to Eastern Countries, resulting in an increase in the value of exports of approximately £20 million in each of the years 1945–46 and 1946–47 as compared with the previous year.

IX. Drugs and Chemicals	5,054,308	5,234,809	5,109,610	4,854,239	7,511,448
X. Wood, Wicker, and Cane	2,648,686	767,139	1,526,089	1,459,866	3,715,894
XI. Jewellery and Fancy Goods	2,562,549	1,481,903	1,612,559	2,040,267	4,163,146
XII. Hides, Leather, and Rubber ..	2,348,657	3,582,326	2,297,071	3,013,626	6,065,855
XIII. Paper and Stationery	8,107,752	6,640,357	8,306,735	6,229,380	12,956,166
XIV. Vehicles	11,602,286	75,727,470	45,347,038	3,310,359	16,892.822
XV. Musical Instruments	357,762	6,675	12,120	39,290	160,950
XVI. Miscellaneous ..	13,026,023	28,532,817	23,726,582	92,175,518 (*a*)	50,487,398 (*a*)
— Free Goods not specially mentioned in Tariff	4,649,698	3,994,686	3,950,304	3,940,290	8,237,609
Total Merchandise ..	124,389,720	263,061,224	233,020,746	194,572,131	228,902,500
Specie and Bullion ..	3,561,111	5,255,004	3,054,330	1,795,840	1,121,322
Grand Total ..	127,950,831	268,316,228	236,075,076	196,367,971	230,023,822

(*a*) Includes Goods Free for Commonwealth Government, which in previous years are distributed according to Tariff Divisions.

8. **Imports and Net Customs Revenue.**—The percentage of net Customs revenue collected on the total value of all merchandise imported in each year was as follows :—1938–39, 21.9 per cent. ; 1943–44, 6.6 per cent. ; 1944–45, 8.0 per cent. ; 1945–46, 12.7 per cent. ; and 1946–47, 17.1 per cent. Primage duty was in force during these years and adding this to net Customs revenue, the percentages were as follows :—1938–39, 25.0 per cent. ; 1943–44, 7.5 per cent. ; 1944–45, 8.9 per cent. ; 1945–46, 14.3 per cent. ; and 1946–47, 19.8 per cent. The percentages of net Customs revenue, omitting primage, on the total value of dutiable goods only were—1938–39, 37.1 per cent. ; 1943–44, 37.6 per cent. ; 1944–45, 41.1 per cent. ; 1945–46, 38.4 per cent. ; and 1946–47, 32.3 per cent. The calculations are based on uniform currency values and on the assumption that the value of clearances approximated to the value of imports during the same period.

9. **Protective and Revenue Customs Duties.**—In the following table the value of goods cleared for home consumption classified under protective and revenue duties and the gross duty collected are shown for the United Kingdom and other countries for each of the years 1937–38 to 1939–40. Information for a later year is not yet available :—

(*a*) Excludes goods admitted free for Commonwealth, Consuls, etc., and free reimported not distributed according to United Kingdom and other origin. (*b*) Excludes primage duty.

§ 12. Ships' Stores.

Prior to 1906, goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and have been omitted from the export figures. The value of these stores shipped each year during the period 1937–38 to 1946–47, showing fuel oils separately, is given in the following table :—

VALUE OF STORES SHIPPED ON OVERSEA VESSELS : AUSTRALIA.

Period.	Fuel Oils.	All Stores (including Fuel Oils).	Period.	Fuel Oils.	All Stores (including Fuel Oils).
	£	£		£	£
1937–38	610,080	2,091,249	1942–43 ..	3,833,414	6,016,334
1938–39	606,515	2,105,619	1943–44 ..	6,078,800	8,478,714
1939–40	921,144	2,539,848	1944–45 ..	8,229,307	11,373,252
1940–41	1,674,133	3,528,555	1945–46 ..	2,849,156	6,331,657
1941–42	3,395,337	5,791,983	1946–47 ..	1,684,502	4,506,599

In addition to fuel oils, the principal items of ships' stores supplied to oversea vessels in 1946–47 were—Bunker coal, £655,207 ; meats, £536,331 ; tobacco and cigarettes, £105,609 ; vegetables £120,961 ; ale, beer and porter, £96,128 ; butter, £61,585 ; fish, £80,038 and oils other than fuel, £132,735.

The net Customs duty collected on ships' stores carried to Australia on overseas vessels and consumed in Australian waters amounted in 1946–47 to £22,748.

§ 13. Movement of Specie and Bullion.

1. **Imports and Exports.**—The following tables show the values of gold and silver specie and bullion, and of bronze specie imported into and exported from Australia during the years 1938–39 and 1942–43 to 1946–47.

IMPORTS AND EXPORTS, SPECIE AND BULLION : AUSTRALIA.

§ 14. Exports according to Industries.

1. **Classification.**—The following table gives an analysis of the exports of Australian produce according to the main classes of industry in which the goods were produced for the years 1945–46 and 1946–47 in comparison with those for the years 1913 and 1938–39. The index-number based on the year 1913 shows the variations in the total recorded value only of exports in each industrial group, and has not been adjusted either for price-changes or in accordance with the variation of the Australian £ in relation to sterling.

A graph is published on page 388 of this chapter which shows the value of exports of Australian produce according to industrial groups from 1920–21 onward.

(*a*) Base year. (*b*) Australian production of gold substituted for exports of gold each year.

2. **Relative Importance of Industrial Groups.**—In the previous table the value of commodities in each industrial group of exports of Australian produce is that recorded at date of shipment from Australia, with the exception that the value of the production of gold in Australia in each year has been substituted in the Mines and Quarries group for actual shipments of gold in each year. This has been done to eliminate the exports of gold for monetary purposes. In order of importance the pastoral group occupied the highest place, representing in 1913 51.1 per cent. of the total exports, as compared with 43.7 per cent. in 1938–39, 47.5 per cent. in 1945–46, and 51.8 per cent. in 1946–47.

Exports of agricultural produce rank next in importance. From 13.0 per cent. of the total exports in 1913, agricultural produce increased to 19.5 per cent. in 1938–39, but declined to 17.8 per cent. in 1945–46 and to 16.2 per cent. in 1946–47.

According to value, exports of dairy and farmyard produce increased from 4.7 per cent. in 1913 to 11.6 per cent. in 1938–39 but declined to 10.3 per cent. in 1945–46 and to 7.8 per cent. in 1946–47. Though the products of mines and quarries declined seriously subsequently to the year 1913, a recovery was made in later years, the figures for 1938–39 representing 17.7 per cent. but in 1945–46 and 1946–47 the percentages were only 8.4 and 8.3 respectively. The manufacturing groups of exports which represented 2.8 per cent. in 1913, had increased to 6.4 per cent. in 1938–39 and to 15.3 per cent. in 1946–47.

3. **Australian Production and Exports according to Industry.**—The following table shows the total values of Australian production and Australian exports during the period of ten years 1936–37 to 1945–46, classified according to industries; the proportion of each industrial group to total production and to total exports; and in the last column the percentage exported of the production of each industrial group :—

VALUE OF AUSTRALIAN PRODUCTION AND EXPORTS, ACCORDING TO INDUSTRY : 1936–37 TO 1945–46.

Industrial Group.	Value of Production during Ten Years.	Percentage on Total Production.	Value of Exports during Ten Years.	Percentage on Total Exports.	Percentage Exported of the Production in each Industrial Group.
	£'000.	%	£'000.	%	%
Agriculture	996,541	16.50	278,629	17.72	27.96
Pastoral	1,137,364	18.83	714,550	45.45	62.83
Dairy and Farmyard ..	671,411	11.12	148,107	9.42	22.06
Mining	348,534	5.77	204,134	12.99	58.57

Total, Primary Produce ..	3,330,718	55.15	1,355,910	86.25	40.71
Manufacturing	2,708,183	44.85	216,113	13.75	(a) 7.98
Total	6,038,901	100.00	1,572,023	100.00	26.03

(a) See letterpress in the concluding paragraph of this section.

The figures relating to value of production and value of exports are subject to the qualifications mentioned previously. A period of ten years is embraced, and the values of production and of exports therein give a very fair index of the relative importance of the several industrial groups.

The total exports of gold bullion and specie are not included in the value of exports of the mining industry, the actual production of gold during the period being taken.

On account of the inherent difficulties of classifying production and exports by industries, the figures given for the manufacturing industry should not be interpreted too literally. In the first place, the value of manufacturing "production" stated is not the total value of output, but only the "value added" by manufacturing processes, while the value of manufactured exports represents the total value of the goods, including raw materials, etc. Secondly, some of the exported goods classified as primary produce have been increased in value by manufacturing processes, but have not been changed in form sufficiently to warrant their inclusion as manufactured products, e.g., flour, butter and sugar.

§ 15. Australian Index of Export Prices.

1. **The Old Annual Series.**—With the exception of a few years after 1929–30 an annual index of export prices has been published by this Bureau since its inception. An index was at first obtained by valuing the exports (other than gold) of each successive year at the prices of 1901, and dividing the values so obtained into the export values actually recorded. These computations were carried back to 1901. In 1918 the procedure was changed and brought into harmony with the methods adopted by the Bureau for constructing other price indexes. The average quantities of the principal exports (other than gold) for the nineteen and a half years from 1st January, 1897 to 30th June, 1916 were taken, and valued at the prices of each successive year. Comparisons of the resulting totals for different years were assumed to give the required comparisons of export price-levels for those years. The two methods would, however, give the same results only if the proportion of different exports for each year in question was the same as the average for the nineteen and a half years. The proportion was, in fact, varying appreciably from year to year with the seasons. The old index, therefore, was based on a different system of weighting in each year, so that the results were not comparable for different years. The new method gave comparable and satisfactory results so long as the proportion of different exports was not widely different from the average of 1897 to 1916. After the 1914–18 War, however, the relative importance of different exports changed considerably. By about 1930 it began to appear that the change was great enough to throw some doubt on the accuracy of the index. It was published with increasing reluctance until 1929–30, after which it was withdrawn from publication.

Following that year endeavours were made to design and compile new series of index-numbers which would reflect more accurately the short- and intermediate-period fluctuations in export prices.

2. **The New Monthly Series.**—An attempt was made to overcome some of the difficulties occasioned by variations in the proportions of the different exports by compiling two separate series of monthly index-numbers. The first series was compiled in very much the same way as the old annual index-numbers, although certain important changes have been made in the data utilized. These are described below. For the present it may be noted that the purpose of this index is to provide comparisons, over a limited number of years, of the level of prices of those commodities normally exported from Australia, making no allowance for any benefit or disadvantage accruing from variations during the period in the relative proportions of the different kinds of exports. It is thus an index purely of price changes. The second series was designed for shorter-period comparisons—from one or more months of the current year to the corresponding months of the previous year. The latter is compiled in such a way as to take closer account

of the actual quantities of each article exported at current prices ; and hence to indicate with rather greater accuracy the extent to which price-movements have affected the actual value of our current exports. It will be clear, therefore, that the two series are designed to measure different things, any differences between the results being explicable on wider grounds than mere differences in formulae.

Reference has already been made to the fact that the data on which the new series are based differ from those utilized in the old series of annual index-numbers. These changes apply to both of the new series.

The most important change was the use of actual (or calculated) export parities, based on actual price quotations, in place of the " unit-values " declared at the Customs. Declared unit values are not satisfactory even in an annual index-number, partly because the returns are not always sufficiently accurate, and partly because there is a constant variation in the proportions of different grades and qualities included in the actual exports of any given period. An obvious example of the latter type of inaccuracy is furnished by the case of wool, the poorer grades of which are shipped during certain months of the off-season. In a monthly series of index-numbers, declared unit-values are even less satisfactory, as the difficulties are greatly magnified over short periods, during which the inaccuracies have little chance of averaging out.

Moreover, the export parities have in all cases been based on prices f.o.b. Australian ports. Where freight and selling charges form an appreciable percentage of the selling price, the use of unadjusted oversea quotations results in some distortion of the amplitude of the percentage fluctuations in prices.

The old index took no account of gold exports. The omission is natural and reasonable for countries which produce little or no gold. For gold-producing countries, although some exports of gold would be irrelevant (e.g., the Australian shipments of gold reserves during the depression), the exports of newly-produced gold should be taken into account. In the new series, therefore, gold is included, but the weight given to it is not the quantity exported but the quantity produced.

Each series of index-numbers takes account of 20 items, which constitute about 85 per cent. of the total value of exports of merchandise and silver, and gold production.

3. **Monthly Index (Fixed Weights).**—The original " quantity multipliers " used for the first series of index-numbers were, in round figures, the average annual exports (or production, in the case of gold) during the five years 1928–29 to 1932–33. This period was chosen some time ago as being fairly representative of the mutual relationship of the different export commodities over the period from 1928 to 1933 and, so far as it was possible to judge at the time, over the ensuing few years. As from July, 1936, the " multipliers " were revised to bring them into accord with observed changes in the composition of Australian exports, and are now based on the average annual exports (production in the case of gold) during the three years 1933–34 to 1935–36. The break of continuity has been bridged by the usual method of splicing.

The twenty items, together with the units of quantity and the " quantity multipliers ", are given in the following table. It should be noted that (i) the " multiplier " allotted to wheat has been increased to take into account the " wheat equivalent " of flour exported ; (ii) that allotted to greasy wool has been increased to take into account the " greasy equivalent " of scoured wool, tops and wool on skins ; and (iii) those allotted to metals have been increased to take into account the metallic contents of ores and concentrates exported. This is the only satisfactory method of dealing with these commodities, for which it is not possible to secure satisfactory export price quotations in their own right.

EXPORT PRICE INDEX : COMMODITIES AND WEIGHTING SYSTEM.

			100.00	100.00	100.00	100.00

(*a*) Includes " wheat equivalent " of flour.

The percentage distributions of the " Aggregative Values " shown in Columns 4 to 7 of the above table are of importance, firstly, as showing their variations from time to time as the result of differential price movements as between the various commodities, and secondly, as regards the effect on the indexes as a whole of the percentage price variations in each commodity. The percentage distribution of the base period of the index (1936–37 to 1938–39) only concerns this second aspect, that is, those of Columns 4 and 5, since they indicate the percentage proportions contributed by each commodity to the total percentage movement of the indexes as a whole. Thus, if the price of wool increased by 5 per cent., its contribution would be 5 x .4905, or 2.45 per cent. to the index as a whole (excluding gold), and 5 x .4563, or 2.28 per cent. to the total index (including gold)—and similarly for any other commodity or group of commodities. The percentage distributions of Columns 6 and 7, on the other hand, would only become of significance from this aspect if the year 1946–47 were chosen at any time as a new base period for the index.

The following table gives export price index numbers for Australia for individual commodities, groups of commodities, and all groups combined for the financial years 1936–37 to 1946–47 and monthly for the years 1945–46 and 1946–47. For convenience of reference, the percentage distributions of the " Aggregative Values " of the base period referred to above are repeated at the head of this table. The prices used are those at which current sales are being effected as distinct from the prices realized for goods being currently shipped. Normally there is a lapse of some weeks or months between date of sale and date of export and considerable fluctuations occur in prices between the two dates. In respect of *wheat*, however, it has become impossible to determine " prices at which current sales are being effected " because a very large proportion of exportable wheat is sold forward on long term contracts ranging up to five years in duration and between wide price limits. Accordingly, a new series of wheat prices has been substituted for the Australian Wheat Board's current " basic export price " formerly used. This new series is based on average actual realizations for current shipments. In respect of *wool*, " prices at which current sales are being effected " can be determined during the selling season, but complexity of the market due to great diversity of types renders it difficult to attain precision, and recent prices are subject to possible revision.

EXPORT PRICE INDEXES: AUSTRALIA.

(*a*) Non-Ferrous—silver, copper, tin, spelter, lead. (*b*) Beef, lamb, mutton, pork. (*c*) Sultanas, lexias, currants. (*d*) Cattle hides calf skins. (*e*) Percentage distribution of base aggregate for " All Groups (including Gold) "—applicable from 1936–37. (*f*) Percentage distribution of base aggregate for " All Groups (excluding Gold) "—applicable from 1936–37.

4. **Monthly Index (Changing Weights).**—The second series of the new index-numbers is designed merely for comparisons with the corresponding month, or period of months, of the previous year. The same price quotations are used, but the " multipliers " are much more closely in accord with the actual experience of the periods in question.

For any given month, the procedure is to multiply the price of each commodity in that month, and its price in the corresponding month of the previous year, by the quantity exported during the given month. A comparison of the resulting aggregates gives one possible measure of the change in prices over the period; i.e., the change assuming that the proportions of the different kinds of exports whose prices are to be measured were the same as their proportions in the given month. Another possible measure is given by assuming that the proportions of the different kinds of exports in the given month had been the same as their proportions in the corresponding month of the previous year. Accordingly the first step in the procedure is repeated, substituting the quantities exported during the corresponding month of the previous year.

The index-numbers so obtained have been proved over a period of years to lie very close together. As it is convenient for practical reasons to have one single figure rather than two close alternatives the two index-numbers are multiplied together and the square root of the product extracted.* This is taken to be the index-number for the month, the prices of the corresponding month of the previous year being taken as base.

The index-numbers for two or more months of one year, as compared with the corresponding period of the previous year, are computed in very much the same way. The process merely involves the cumulative addition of the aggregates computed for the individual months, and extraction of the index-numbers as explained above.

Index numbers computed on this basis are shown in the following table for the years 1945–46 and 1946–47 :—

MONTHLY EXPORT PRICE INDEX (CHANGING WEIGHTS) : AUSTRALIA.

Monthly export price index-numbers are issued in regular press notices, in the *Monthly Review of Business Statistics* and in the *Quarterly Summary of Australian Statistics*.

§ 16. External Trade of Australia and other Countries.

1. **Essentials of Comparisons.**—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in the one may be declared by merchants, whereas in the other they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of imports would rise from the different methods of converting

---

* Up to 1941–42, Professor Irving Fisher's "Ideal" Formula, No. 353 was used, but from 1942–43 the "Edgeworth-Marshall", No. 2153 was substituted, which on Fisher's own assertion gives practically identical results and satisfies all the requirements of his "Ideal" Index.

the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total trade.

2. **"Special Trade" of Various Countries.**—Special trade may be defined according to the interpretation of the British Board of Trade, as (*a*) imports entered for consumption in the country (as distinguished from imports for transhipment or re-export), and (*b*) exports of domestic products.

In the following table the figures, which represent Australian currency values, relate as nearly as possible to imports entered for consumption in the various countries specified, and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The latest figures relating to foreign countries have been extracted from the publications of the United Nations and converted to Australian currency.

§ 17. Trade of the United Kingdom with Australia compared with that of Competing Countries.

Proportion of Trade from United Kingdom and Competing Countries.—Since 1908 permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of Customs Duties on certain goods the produce or manufacture of the United Kingdom with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this Chapter.

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufacturered in the United Kingdom. The imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom could not supply. These items, in addition to others not available from that country, have, therefore, been omitted from the computation following.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, Germany, Japan, and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for the years 1913, 1938–39, 1945–46 and 1946–47 are shown in the following table. The effect of the war is reflected in the proportions of the trade with Germany and Japan during 1945–46 and 1946–47.

	1946–47	35.80	0.80	0.07	0.33	19.10	100

The total value of the commodities included in the competitive classes increased from £55,082,613 during 1913 to £122,631,560 during 1926–27, but declined during the economic depression to £37,681,869 in 1931–32. Subsequently the total value rose to £97,754,992 in 1937–38 only to fall away again in 1938–39 to £85,321,088. In 1946–47 it had increased to £152,370,775. The principal classes of competitive imports are (*a*) metals, metal manufactures and machinery (value £57,804,026 in 1946–47) and (*b*) apparel, textiles and manufactured fibres (value £53,748,778 in 1946–47). The value of goods included in these two groups represented 73.2 per cent. of the total value of competitive commodities during 1946–47.

In 1938–39 the United Kingdom supplied 52.70 per cent. of the total value of competitive goods. In 1913 the corresponding figure was 58.38 per cent. and in 1946–47 49.25 per cent.

The share of Japan in the competitive trade increased in proportion to other countries from 1.24 per cent. in 1913 to 5.02 per cent. in 1938–39. In 1946–47 owing to the effects of war it was reduced to 0.06 per cent.

The position of the United States of America in the competitive trade improved from 10.86 per cent. in 1913 to 13.42 per cent. in 1938–39 and to 18.98 per cent. in 1946–47.

The position of France declined from 3.61 per cent. in 1913 to 1.21 per cent. in 1938–39 and to 1.17 in 1946–47.

The proportion of the competitive imports supplied by Germany was 10.68 per cent. in 1913, and 4.66 per cent. in 1938–39. In consequence of the war, the proportion of imports from Germany during 1946–47 was 0.09 per cent.

§ 18. Oversea Trade in Calendar Years.

For the purpose of comparison with countries which record oversea trade in calendar years the following table has been compiled to show Australian imports and exports for each quarter of the calendar years 1939 and 1944 to 1947 :—

OVERSEA TRADE IN CALENDAR YEARS : AUSTRALIA.

Year.	Merchandise.		Bullion and Specie.		Total.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
QUARTER ENDED MARCH.						
1939	31,434	30,905	1,016	4,361	32,450	35,266
1944	65,228	36,349	550	1	65,778	36,350
1945	58,685	35,243	610	1	59,295	35,244
1946	44,866	51,098	344	23,102	45,210	74,200

1944	229,847	147,749	3,571	8	233,418	147,757
1945	222,845	158,849	2,174	3,758	225,019	162,607
1946	192,044	267,297	1,175	23,201	193,219	290,498

(a) Excludes estimated unrecorded exports, £'000, 1943–44, 10,000 and 1944–45, 2,000.

§ 19. Excise.

Although excise goods have no immediate bearing on oversea trade the rates of excise duty are in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Trade and Customs it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise Revenue are shown in Chapter XV. " Public Finance ". The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1943–44 to 1946–47 as compared with the year 1938–39.

QUANTITIES OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID : AUSTRALIA.

§ 20. Interstate Trade.

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (Section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the latest published statements were for the year 1909. Later the Governments of Western Australia and Tasmania revived the records, and statistics of the subject are available again for those States.

At the Conference of Statisticians held in January, 1928 it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

The Government Statist for South Australia publishes some figures for that State made up from the records of Western Australia and Tasmania, and from various other sources. Since February, 1940, statistics in some detail have been collected by the Government Statistician of Queensland. The statistics of interstate trade for New South Wales and Victoria are very meagre. The Melbourne Harbour Trust publishes, in its annual report, the quantities of various commodities of interstate trade loaded and discharged in the Port of Melbourne. The trade with individual States is not disclosed.

CHAPTER XII.—LABOUR, WAGES AND PRICES.

A.—RETAIL PRICES AND PRICE INDEXES.

§ 1. Collection of Information as to Retail Prices.

The retail prices of the extensive range of commodities and services in common demand (commonly referred to as the "regimen") used in compiling the All Items ("C" Series) Retail Price Index have been ascertained at frequent and regular intervals since 1923 for each of the six capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year 1914 to 1922 for each of the six capital cities. The complete list of items covered by the retail price regimen is published in the annual *Labour Report*, and a summary of the main groups and sections of the regimen is given in § 6 hereof.

The retail prices of food and groceries in approximately 200 towns throughout Australia were collected as at November of each year from 1913 to 1942, when collection was temporarily suspended as a war-time economy.

Retail prices of food and groceries and average rentals of houses for earlier years extending back to 1901 were collected by this Bureau, and in some cases have been recorded by the Statisticians of various States as far back as 1864.

The methods by which prices used in the "C" Series Retail Price Index are ascertained and the measures adopted to ensure their accuracy and comparability are briefly as follows :—

(i) Representative and reputable retailers are selected for each city and town covered by the Index and each is required to furnish a return of prices monthly in respect of food and groceries and quarterly in respect of other items. Prices for each item are obtained where practicable from about ten retailers in each of the capital cities, and from about five retailers in each of the provincial towns.

(ii) These returns are collected under authority of the *Census and Statistics Act* 1905–1946, which requires that returns be supplied accurately and promptly and ensures that particulars supplied by individual retailers will not be divulged to competitors or to any other person or Government authority. Penalties are provided against failure to supply returns, against supplying false information and against failure to answer truthfully any question asked by an authorized officer in respect of the contents of the return.

(iii) The actual collection of returns is carried out by qualified Field Officers of the Commonwealth Bureau of Census and Statistics working under the supervision of the Statisticians of the respective States. These Field Officers have very wide powers of investigation, including entry of premises and inspection of goods, records, etc.

(iv) The Field Officers not only receive and check returns but visit the retail shops concerned, whenever necessary, to verify returns. In respect of articles of clothing and the like, where variation of quality may be considerable, Field Officers are equipped with samples of the goods used for price comparisons. In such cases the Field Officers visit every retail informant at each quarterly collection and personally inspect the relevant goods and prices thereof.

(v) Before each quarterly collection Supervising Field Officers review the standards of the whole of the items for which prices are collected after making extensive inquiries among manufacturers, wholesalers and retailers. These Supervising Field Officers periodically accompany Field Officers at their price collections and check their work. This not only ensures accuracy and assiduity but also that all Field Officers work on uniform lines and that, as far as care and effort can make it possible, prices for identical goods and quality will be recorded at all times and for all places.

(vi) The list of items in the regimen and the standards thereof are revised from time to time to keep them in harmony with changing conditions. Where such changes become necessary suitable adjustment is made in computing the retail price index to ensure that it reflects changes in price with due precision and that it is not vitiated by the influence of other changes. (See also § 8 hereof.)

(vii) Returns of rents for unfurnished houses of four and five rooms are made at the middle of each quarter by a representative number (ranging up to 30) of house agents in each city and town covered by the Index, for brick and wooden houses respectively, classified according to number of rooms. These returns show the weekly rental of a substantial number of individual houses, each of which is selected by the Field Officer as suitable for inclusion in a sample designed to measure the quarterly ratio of change in weekly rentals. The aim is to measure variations which may be equivalent to change in price for a constant standard. The ratio of change is used to vary basic average rentals derived from the Census of 1933 and other records. Although expressed in money terms, the average rentals as published are essentially indexes. As such they do not necessarily indicate the average amount of rental actually paid for all rented houses, and still less do they indicate the rental at which vacant or new houses can be rented.

§ 2. Retail Price Indexes.

1. **General.**—The basic principle of a retail price index is relatively simple. It is to select commodities representative of the field to be covered and to combine their prices at regular intervals in accordance with their relative importance in that field. The aim is to measure the degree of change in prices for the selected field taken as a whole.

In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

A full explanation of the methods adopted and an analysis of problems involved is contained in the Appendix to *Labour Report* No. 9.

For convenience the group of selected items is called a "regimen", and the quantities consumed per annum of each item used in the index are called "mass units" or "weights". These terms are used herein. In compiling the index the price of each item is multiplied by its quantity "weight", and then by its appropriate population or household "weight". The sum of these products for all items at any given date represents an "aggregate expenditure". The "aggregate expenditures" for successive periods are converted into an index by denoting the aggregate of a selected or "base" period as 1,000, and calculating all index-numbers to such base by the proportions which their aggregates bear to that of the base period. (See also § 6 (2) hereof.)

2. **Essential Features.**—Apart from clear thinking, common sense and sound arithmetic, the prime essentials in compiling a retail price index are—

(*a*) that prices be accurately ascertained at regular intervals for goods of constant grade and quality;
(*b*) that the regimen be as representative as possible of the field to be covered;
(*c*) that the weights be in approximate proportion to quantities actually used in the selected field.

3. **The Regimen.**—The regimen must be a selected regimen because it is impossible in practice to ascertain at regular intervals prices of every item of goods and services entering into household expenditure. Even in normal times there is considerable difficulty in ensuring that the selected items are always a true sample. Some items which it would be desirable to include must be excluded because comparative prices cannot be accurately ascertained for them at different times and different places. It is deemed better to limit the regimen of the index to items for which price variations can be ascertained with reasonable accuracy than to distend the regimen by including items for which price comparisons are necessarily inaccurate. Similarly, many items of small aggregate or individual importance are excluded. The regimen of the index therefore is not (as is sometimes erroneously supposed) a basic wage regimen nor yet is it a full list of component items in a standard of living. It does not imply that any particular goods or any selected grades or quantities of these goods should enter into determination of a basic or living wage. In fact the regimen used for the "C" Series Retail Price Index is simply a selected list of items combined in certain proportions for purpose of measuring price variations. The items are representative of the fields covered, and the proportions approximate to those in average consumption so far as can be ascertained.

The regimen and "weights" used in the "C" Series Retail Price Index are published in full in the annual *Labour Report.* The regimen at the moment comprises 160 commodities and services, consisting of 20 items of Groceries; 6 of Dairy Produce; 15 of Meat; 1 of Rent; 77 of Clothing and Footwear; and 41 of Miscellaneous Household Expenditure comprising Household Drapery (9), Household Utensils (20), Fuel and Light (4), Union and Lodge Dues, Medicine, Newspapers, Recreation, Smoking, Fares and School Requisites (8).

4. **Purpose of Retail Price Indexes.**—The retail price indexes are designed to measure the extent of changes in price levels only. While they may be used as indicating proportionate variations in cost of a *constant* standard of living, they do not measure the absolute cost of any standard of living, nor the cost of changes in the standard of living. In other words, they measure, as nearly as may be, the proportionate change in aggregate cost of specified quantities and qualities of the selected regimen of items included in the index. The regimen is representative of a high proportion of the expenditure of wage-earner households.

5. **Effects of War Conditions on Indexes.**—Under war-time conditions scarcity of certain types of goods, erratic supply and changes of grade due to standardization have created unusual difficulty in obtaining the data necessary for measuring variations in prices. In some instances, this has rendered it necessary to substitute new grades,

qualities or types of articles for those formerly used as indicators of changes in price. This has been the case more particularly in the clothing, household drapery and household utensils sections of the regimen. Substitutions of similar kind were necessary at times under normal conditions in order to meet changes of fashion and usage. In themselves, such substitutions are not injurious to the index provided the transitional difficulties can be solved as they arise. No change in principle is involved. The index continues to measure as accurately as may be, price variations, and price variations only. Just as in the pre-war period, application of multipliers (called "grafting factors") serves to neutralize those differences in prices which are solely due to substitution of a new item for one which has ceased to be available or in common use. The net effect of this process is that the price of the old item is taken as typical of price variation in its class up to the time of substitution, and the prices of the new item as typical of such changes in price thereafter.

In normal times, popular usage of items in general consumption changes slowly, and the weight of items and groups in the regimen is changed only at long intervals. In war-time, scarcity of supplies of some goods, rationing and kindred factors actually produce substantial changes in usage both long term and short term. The weights applicable to the items in the regimen, however, have not been changed and continue as in pre-war years. (See § 8 (3) hereof.)

The "C" Series Index, as published, measures the aggregate variation in prices of the regimen of items adopted in peace times in peace-time proportion. This ensures comparability of the index on that specific basis. Its practical significance under war conditions is limited because a single index cannot take into account all changes that occur.

If it were practicable, it would be desirable to compile an additional index to measure variations over the war period, having regard to the fact that the relative consumptions of some items of the regimen have been altered by war conditions, and that the prices of some items not included in the regimen have moved differently from the variations recorded by the "C" Series Index. This would provide an alternative method of comparison presenting another aspect of price movement in war-time.

§ 3. Various Series of Retail Price Index-Numbers.

Two main series of retail price index-numbers are compiled and shown in some detail in the following pages, viz. :—

(i) the "B" Series Index relating only to food, groceries and housing, continuously available since 1907;
(ii) the "C" Series Index relating to food, groceries, housing, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure, continuously available from 1914.

The "B" Series Index comprises only the food, groceries and housing sections of the "C" Series Index.

The "C" Series Index in total, subject to consideration of special war-time influences, provides a reliable measure of aggregate variations in retail prices (as well as of group indexes for component sections) of a high percentage of goods and services used in wage-earner households. This index is compiled for—

(*a*) the capital city of each of the six States,
(*b*) four other principal towns in each of the six States,
(*c*) the weighted average of five towns (including capital city) in each of the six States,
(*d*) the weighted average for the six capital cities combined,
(*e*) the weighted average for the thirty towns (including capital cities),
(*f*) separate indexes for Warwick, Port Augusta, Whyalla (commenced September quarter, 1946) and Canberra.

The "C" Series Index forms the basis of the "Court" Series Index used by the Commonwealth Court of Conciliation and Arbitration for the "cost of living" adjustments of wages prescribed by awards made by the Court. (See § 9 of this Chapter.)

§ 4. Retail Price Levels ("C" Series Index) 1914-1946.

The aggregate indexes for 1914, 1921, 1929, 1939 and 1941 to 1946 for the Thirty Towns are published in summary form on page 449 hereof, while the following table furnishes the relevant index-numbers for the Six Capital Cities as a whole for certain significant dates since November, 1914—the earliest date for which this index is available.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX-NUMBERS.

WEIGHTED AVERAGE OF SIX CAPITAL CITIES.

(*Base :* 1923–27 = 1,000.)

1914, November	687	(Beginning of War I.)
1918, November	905	(End of War I.)
1920, November	1,166	(Post-War peak)
1922, November	975	(Post-War trough)
1929, Year	1,033	(Pre-Depression peak)
1933, Year	804	(Depression trough)
1939, September Quarter	916	(Pre-War II.)
1943, March Quarter	1,123	(Pre-Price Stabilization)
1943, June Quarter	1,143	(War II. peak)
1945, September Quarter	1,126	(End of War II.)
1945, December Quarter	1,129	
1946, December Quarter	1,156	

The index reveals a rise of approximately 32 per cent. during the first world war, followed by a further rise of 29 per cent. in the two post-war years (November, 1918, to November, 1920). From November, 1920 to November, 1922, there was a fall of 16 per cent. and the index remained relatively stable until the onset of the depression in 1929. During the four years of the depression 1929 to 1933 the index fell by 22 per cent., rising thereafter steadily until 1939 when it was nearly 14 per cent. above the level of 1933, and approximately at the level it had occupied at the date of the Armistice of 1918. Between the outbreak of war (September, 1939) and March, 1943, the index rose by approximately 23 per cent. to a level slightly below that reached at the height of the post-war boom in 1920; while at December quarter, 1946, the level was almost identical with that of the 1920 peak period.

Immediately after the outbreak of the war price control was established by the Government under Regulations dated 28th September, 1939, and a national policy of price stabilization was applied as from 12th April, 1943, backed by more stringent price control and price subsidies. The retail price level, as measured by the index, remained relatively steady throughout 1944 and 1945 at the level of March, 1943. This stabilized level was approximately 23 per cent. above that of 1939 and 63 per cent. above the level prevailing at the beginning of the first world war in 1914.

An account of price control measures and of price stabilization in Australia is published on pp. 458–463.

The movement in the various groups of the index and in the index as a whole for each year for which it has been compiled is shown in the following table :—

THE ALL ITEMS (" C " SERIES) RETAIL PRICE INDEX AND ITS " GROUP " INDEX-NUMBERS(*a*) FOR THE SIX CAPITAL CITIES COMBINED, 1914 TO 1946.

(*Base of Each Group : Weighted Average of Six Capital Cities,* 1923–27 = 1,000)

§ 5. Increases in Retail Prices since Outbreak of War in 1939.

1. **Australia.**—The following statement shows for the Six Capitals separately, and as a whole, the percentage increases which have taken place in retail prices of items included in the "C" Series Index from the September quarter, 1939 to the December quarter, 1946, inclusive. The proportionate increase in the total index for each capital city is shown in the line marked "Total". The column headed "C" Series Index dissects the total percentage rise to show what part of it was due to the rise in prices in each of the four main groups of items. Thus, of the 26.2 per cent. increase for Sydney 4.5 was due to food and groceries, 0.1 to house rent, 16.9 to clothing and 4.7 to miscellaneous items. The column headed "Group Index" shows the percentage increase in prices of items in each group considered as a group. Thus for Sydney, prices in the food and groceries group increased by 12.6 per cent., house rents by 0.4 per cent., prices of clothing by 84.9 per cent. and prices of miscellaneous items by 25.1 per cent. These when weighted and combined in the proportions of the "C" Series Index showed a rise of 26.2 per cent. For the Six Capital Cities as a whole the increase over the war period shown was 26.2 per cent.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX.

Total ..	24.9	24.9	25.7	25.7	27.6	27.6	26.2	26.2

(*a*) Weighted average.

The foregoing comparisons refer to two points of time (i.e., the months immediately preceding the war and the closing months of 1946, at each of which special temporary factors may have influenced relative price levels. For instance, prices of certain foods (e.g., meat) fluctuate with seasonal conditions. The percentage increases shown do not, therefore, necessarily indicate the degree of increase due solely to causes peculiar to the war and immediate post-war period.

2. **International Comparisons.**—The following table shows the increase during this period in Australia and certain other countries. The increases during the first world war have also been included.

(*a*) Food, Rent and Miscellaneous Expenditure. (*b*) Old Index as varied by new War-time Index (Base December Quarter, 1942 = 100).

At various stages during the first world war most of these countries introduced some measures of price control. But at an early stage in the second world war these countries introduced price control measures which became more stringent as the war progressed, culminating in a policy of price stabilization.

Immediately after the outbreak of war in September, 1939, the Government took steps to control prices, and, by proclamations issued from day to day, pegged prices of various commodities at those ruling on 31st August, 1939. The National Security (Prices) Regulations, proclaimed on 28th September, 1939, under the authority of the National Security Act, established the basic principles of war-time price control, and provided for the appointment of a Commonwealth Prices Commissioner, and conferred upon him extensive powers to control the price of goods declared for that purpose by the Minister for Trade and Customs. A brief summary of the development of this control is published on pages 458–463.

§ 6. Construction of All Items ("C" Series) Retail Price Index.

1. **The Regimen.**—The regimen from which the "C" Series Index is compiled consists of a list of commodities and services which commonly enter into the consumption of the average household, and for which comparative prices can be ascertained with due precision from time to time and from place to place. (*See* § 2 (3 and 4) hereof.) The regimen is divided into the following Groups and Sections :—

Group.	Section.
I. Food and Groceries	A.—Groceries.
	B.—Dairy Produce.
	C.—Meat.
II. Housing	D.—House Rent.
III. Clothing	E.—Clothing—Man.
	F.—Clothing—Woman.
	G.—Clothing—Boy (10½ years).
	H.—Clothing—Girl (7 years).
	J. —Clothing—Boy (3½ years).
IV. Miscellaneous	K.—Household Drapery.
	L.—Household Utensils.
	M.—Fuel and Light.
	N.—Other Miscellaneous.

The "C" Series Index includes the whole of the foregoing Groups, but for many purposes indexes are required for individual Groups or Sections. For this reason the following indexes are regularly compiled at the intervals shown, and published in various publications issued by the Bureau :—

Group.(*a*)	Content.	Frequency.
I.	Food and Groceries	Monthly
II.	Housing (4 and 5 rooms) (*b*)	Quarterly
I. and II.	Food, Groceries and Housing (4 and 5 rooms) ("B" Series)	Quarterly
III.	Clothing	Quarterly
IV.	Miscellaneous Household Requirements ..	Quarterly
I., II., III. and IV.	Food, Groceries, Housing (4 and 5 rooms), Clothing and Miscellaneous ("C" Series) ..	Quarterly
I.	Food and Groceries ("200 Towns" series) (*c*) ..	Yearly

(*a*) "Group" or "Sectional" index-numbers in the various tables throughout this publication cannot be compared with each other in order to show the *relative cost* of Food and Groceries, Housing, Clothing or Miscellaneous requirements, since each "Group" or "Section" (or combination thereof) has its own Base = 1,000, viz., the weighted average cost for the Six Capital Cities as a whole during the five-yearly period 1923–1927 for that "Group" or "Section". (*b*) *Rent.*—The rent index-numbers shown in the tables in this publication measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. They are "price" indexes in the strict sense, i.e., they are designed to measure only the "price" element in rent fluctuations. Similarly, "average rents" where shown are indexes of "price" changes in rentals expressed in terms of pence. They are not the average of rents actually paid by all tenants of 4 and 5-roomed houses. It would be inappropriate to include the average of rents actually paid in an index designed to measure price changes only. The average of rents actually paid is ascertained periodically by Census methods—*see also* page 2 of *Labour Report*, No. 35. (*c*) Compilation suspended as a war-time economy after November, 1942.

For convenience of reference several of the indexes mentioned above have been given the "series" designation shown against them. These indexes are dealt with in turn in the following pages.

2. **The Mass Units (or "Weights").**—The "mass units" (or "weights") are multipliers representing the approximate average annual consumption *per head or per household* under normal conditions. The index-numbers are computed on a "total annual aggregative expenditure" basis, i.e., the total annual expenditure from time to time by a *standard population* in respect of the selected regimen of commodities and services commonly entering into household consumption, and of a constant *standard quality*. As a first step, therefore, it is necessary to multiply the price of each item by its "weight" per head or per household as the case may be. Thus, the "weight" of bread is 100 2-lb. loaves per head; of sugar 100 lb. per head; of towels 3 per household; and of housing 52 rent-weeks per household. The result of this initial calculation is designated the "P.MU" aggregate (i.e., Prices x Mass Units).

The sum of these "P.MU" results for each Section or Group is then multiplied by its appropriate population or household "weight" to produce their respective annual aggregate expenditures. Thus, Sections A to C (Food and Groceries) would be multiplied by the total population; Section D (Housing) by the total number of households; Sections E to J (Clothing) by the proportion of the total population applicable to each; and Sections K to N (Miscellaneous) by the total number of households.

The combination of the aggregates from the last paragraph gives the "total annual aggregate expenditure" for the whole regimen, from which the "C" Series index-number is derived by applying to 1,000 the ratio which the aggregate for any period bears to the aggregate selected as the base period of the Index. In the process of tabulation all prices are converted to pence for these final aggregates.

For tabulating purposes some of these "mass units" are varied when necessary to make up a deficiency or cancel out an excess in the aggregate resulting from a *change in the standard* of any item upon which prices are collected, to ensure that such changes shall not be wrongly recorded by the index as *variations* in prices. The published "mass units", however, still continue to show the correct *relative* consumption "weights" actually applicable to the commodities and services in the regimen for the *constant standards* used in the index. *See* also § 2 (3) and 6 (3) of this Chapter.

In the case of Food and Groceries (Group I.) the "mass units" adopted are approximately the annual average consumption per head for household purposes of the various articles during the years 1927 to 1929. The "weights" allotted to articles of clothing and miscellaneous household requirements (Groups III. and IV.) are based largely on the results of the inquiries of the Royal Commission on the Basic Wage, which reported in 1920 and 1921. After exhaustive inquiries the Commission published a "regimen" for an average working family of five persons, and set out the constituent items in its "Indicator List". This list, so far as it related to the articles in question was followed substantially in the original compilation of the "C" Series Index, and has been adjusted by subsequent investigations of the Bureau to accord with changes in popular usage. The "weights" allotted to the items have not been adjusted to take account of war-time shortages or rationing, and the index therefore measures war-time price changes in relation to a normal (or pre-war) apportionment of household expenditure. (*See* § 2 (5) and § 8 (3) hereof.)

3. **Relative "Aggregate Expenditure" of Items and Groups.**—In the *base period* of the index (average of the years 1923 to 1927) the relative importance of each of the four main groups expressed as a percentage of the weighted average "aggregate expenditure" in the Six Capital Cities (from which all relative index-numbers are derived) was—Food and Groceries, 38.66 per cent.; House Rent, 21.26 per cent.; Clothing, 23.04 per cent., and Miscellaneous, 17.04 per cent., as shown in the third column of the following table. Although the "weights" of each item in the regimen are kept virtually constant, the relative "aggregate expenditure" of the various items and groups will, of course, vary from time to time as relative prices change and, in

addition, the distribution of relative expenditure as between the groups and sections is varied from time to time for "relative weighting" purposes on the basis of the changing relativities of population and households as disclosed by successive Censuses. This, however, does not affect the level of the Index at the point of change, but alters the degree of variation registered by the various groups or sections of the Index.

The percentage distribution for Melbourne in the *base period* was practically identical with that of the Six Capital Cities as a whole, and has continued to be representative of the relative movement of prices in the capital cities up to the present time. For this and other reasons, therefore, the percentage distribution of the Melbourne "aggregate expenditure" for successive December quarters has been published in previous issues of this publication, and the figures for the December quarter, 1946 are shown in the second column of the table for comparison with those of the *base period* of 1923–1927 :—

Group.	Section.	Percentage of Aggregate Expenditure.			
		1923–27 (Base). Six Capital Cities.		Dec. Qtr., 1946. Melbourne.	
I. Food and Groceries	A Groceries	17.44	38.66	11.38	32.49
	B Dairy Produce ..	10.28		9.12	
	C Meat	10.94		11.99	
II. Housing	D House Rent— (4 and 5 rooms) ..	21.26	21.26	19.44	19.44
III. Clothing ..	E Man	8.69	23.04	10.41	29.43
	F Woman	9.12		14.40	
	G Boy, 10½ years ..	2.89		2.10	
	H Girl, 7 years ..	1.36		1.67	
	J Boy, 3½ years ..	0.98		0.85	
IV. Miscellaneous ..	K Household Drapery	1.09	17.04	1.97	18.64
	L Household Utensils	0.49		0.66	
	M Fuel and Light ..	4.92		4.28	
	N Other Miscellaneous	10.54		11.73	
			100.00		100.00

It should be noted, however, that percentage price variations are measured from the "aggregate expenditures" of the *base period* of the index, and the percentages shown in the foregoing table for the *base period* 1923–1927, therefore, are the proportionate "weights" applicable to the various groups and sections in measuring such variations in the index as a whole calculated to *this base period*, and *not* the percentage "weights" of any other period. For example, those shown for the December quarter, 1946 would only become of significance in the measurement of variations if the latter quarter were adopted as a *new base* for the index.

4. **Base Periods of the Indexes.**—The base period originally adopted by the Bureau for its retail price indexes was the year 1911. When the collection of the prices of clothing and miscellaneous items was undertaken for the purposes of the "C" Series Index, the month of November, 1914, was adopted as the base period for this series. The

desirability of computing retail price indexes to a post-war base was considered by a Conference of Statisticians in 1929, and it was resolved that from 1st January, 1930, the five years 1923–27 should be adopted as the base period, and since this date the retail price indexes have been published on this base. The aggregate to which all index-numbers are related is the weighted aggregate cost of the regimen in the six capital cities during the period taken as base, expressed as an index-number of 1,000.

§ 7. Tabular Statements of Retail Price Index-Numbers.

1. **General.**—The results of inquiries into price movements are available in the following publications :—

(i) *Monthly.*—A mimeographed statement is published each month giving index-numbers for Food and Groceries. The *Monthly Review of Business Statistics* contains annual, quarterly and monthly index-numbers to the latest available date.

(ii) *Quarterly.*—A mimeographed statement is issued about three weeks after the end of each quarter giving the " C " Series index-numbers for that quarter and immediately preceding quarters in respect of each of the 30 cities and towns originally adopted and for certain other towns, e.g., Canberra, for which the " C " Series Index is now compiled. The *Quarterly Summary of Australian Statistics* contains annual, quarterly and monthly index-numbers to the latest available date. This publication also contains the average prices of the items comprising the Food and Groceries regimen, for each month of the last available quarter, in the 30 towns covered by the investigation. Comparative average rents of four and five-roomed houses in these towns are also shown therein.

(iii) *Annual.*—The *Labour Report* contains index-numbers over the past four years, and the monthly and quarterly results for the last two years. The average prices for the last two years of the items of food and groceries, and average house rents for the last five are also published in this report. This publication contains information similar to, but in less detail than, that published in the Labour Report.

2. **All Items (" C " Series) Retail Price Index.**—On page 440 is published a table of weighted averages for the six capital cities combined of " C " Series index-numbers, together with index-numbers for each of the four main groups of items in the " C " Series Index for each year 1914 to 1946 and quarterly for the years 1939 and 1942 to 1946.

In the pages immediately following are published :—

(i) the " C " Series index-number for the last quarter of each year 1939 and 1941 to 1946 (page 447) and for the month of November, 1914–20 (page 448), for each capital city and for the six capital cities combined, showing separate indexes for each of the four main groups of items ; and

(ii) the " C " Series index-numbers for the years 1914, 1921, 1929, 1939 and 1941 to 1946 (page 449) for each of the 30 towns with the weighted averages for each State, the six capital cities and 30 towns, together with index-numbers for the same periods for three additional towns for which this index is tabulated.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX-NUMBERS(a): CAPITAL CITIES.

(Base of each Group: Weighted average of Six Capital Cities, 1923–27 = 1,000.)

3. **"B" Series Retail Price Index: Food, Groceries and Rent.**—This index measures the prices of food and groceries and the rent of 4 and 5-roomed houses. It was first compiled for the year 1925, and retrospectively for several earlier years. It was designed to replace the "A" Series Index (food, groceries and rent of all houses), which was the original index compiled in 1912. The first of the two tables following is split up into the various sections of the regimen, and covers only the six capital cities,

while the second represents the whole regimen and covers the 30 Towns included in the tabulation of the "B" Series Index, with the weighted averages for the 5 towns in each State, the Six Capital Cities and the 30 Towns.

RETAIL PRICE INDEX-NUMBERS(a): CAPITAL CITIES—"B" SERIES.

(Base of each Section: Weighted Average of Six Capital Cities, 1923–27 = 1,000.)

§ 8. Changes in the Regimen.

1. **General.**—Since the original compilation of retail prices by the Bureau, the regimens of the several groups and sections have undergone some modifications. These are fully described in the annual *Labour Report* No. 35 for 1945 and 1946, pp. 31–34. These changes are made from time to time with a view to improving the index-numbers as measures of price variations. They comprise chiefly the elimination or replacement of articles no longer in demand, or which experience had shown to be unsuitable media for the measurement of price variations; the alteration of units of quantity in certain cases to conform with those most in general use; the adjustment of the mass unit allotted

to certain articles to bring them into accord with present-day consumption habits ; the re-adjustment of the population and household weights applicable to the several groups and sections of the regimen in accordance with general Census results ; and improved methods of collecting and weighting average house rentals.

2. **Method of Effecting Changes.**—Changes of the nature mentioned are commonly made in price indexes without seriously impairing their continuity. In accordance with established principles of procedure in effecting such changes (see *Labour Report* No. 9, Appendix I., Part II., paragraphs 14 and 18), the general level of the index is taken as determined by the old regimen for the quarter in which the change is made, and the new regimen is used to measure variations in the price-level after that date. The linking up of the index-numbers on the old and the new basis is effected by the usual method of equating the respective weighted aggregate costs of the old and the new regimens in the six capital cities.

There are two methods of effecting this according to the nature of the change to be made, as follows :—Up to the June quarter, 1942, all such changes were made by equating the new aggregate of the section embodying the changes to the former aggregate. This course was adopted when items were added to or omitted from the regimen, and when a change was made in the standard of any item. From the September quarter, 1942, however, all changes of standard were effected mainly by an appropriate adjustment of the " mass unit " or " weight " so as to preserve the percentage weight which the item carried in the aggregate from time to time and, wherever possible, the "weight" of any item dropped from the regimen was transferred to an article of a similar nature which would serve as a more appropriate medium for the measurement of the variations in the price of the article dropped than the remaining items of the section. The " mass units " of the remaining items under the former procedure were in effect proportionately increased to carry the aggregate of the item dropped, or reduced to admit a new item added. *See* also par. 3 on pages 444 and 445.

While the foregoing involves no break of continuity in the index-numbers for the six capital cities as a whole, upon the basis of which all such changes are effected, slight alterations of the relative positions of individual towns are inevitable on account of the alteration of former standards. The effect, however, is more noticeable in the group index-numbers than in those covering a combination of groups, wherein the losses and gains tend to balance out.

3. **The Regimen under War Conditions.**—Although the effects of the war produced some variations from normal consumption in 1940 and 1941, it was not until 1942 that fundamental changes (as explained in § 2 (5) of this Chapter) began to occur. The years 1942, 1943 and 1944 produced temporary changes of a far-reaching character which, if permanent and stable, must have necessitated fundamental re-adjustments in the regimen and mass units of the index. But the resultant changes in the index would have been so extensive as virtually to create a new index which would not have been continuously comparable with the " C " Series Index either as compiled pre-war or as it may be compiled in post-war years. Consideration of the matter led to the conclusions—

(i) that it was desirable to continue the " C " Series Index substantially on its pre-war regimen in order to ensure continuity of comparison of price movements on a clearly defined basis ;

(ii) that it was impossible to reconstruct the " C " Series Index to take account of recurrent temporary departures from normal consumption.

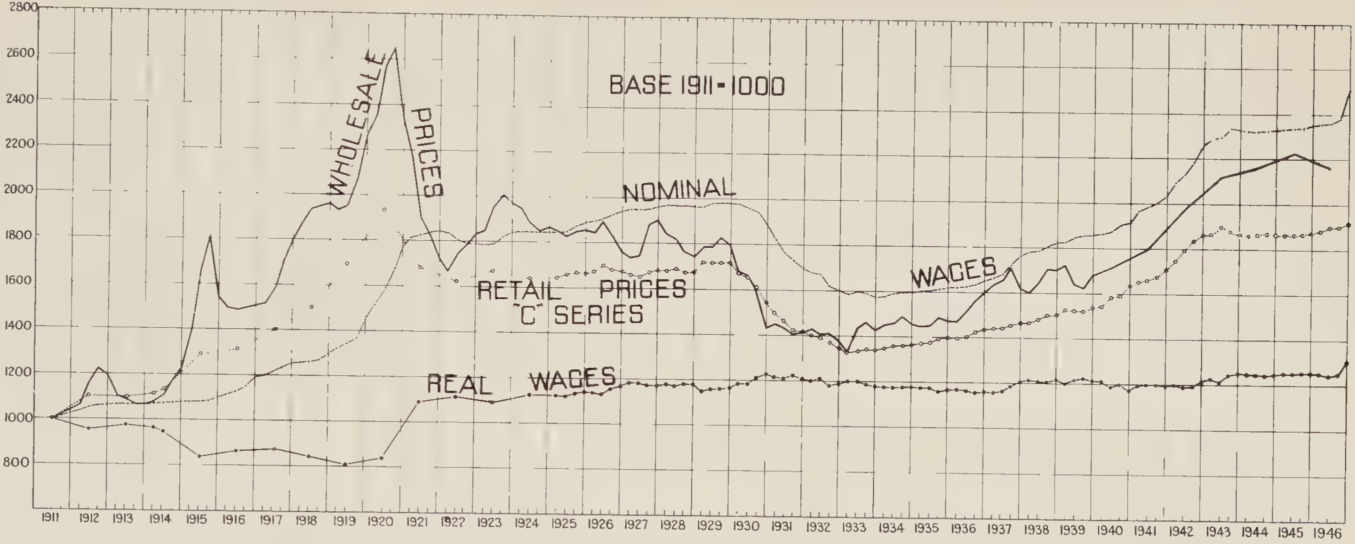
§ 9. Retail Price Indexes and Wage Variations.

Two distinct procedures are adopted by the Commonwealth Court of Conciliation and Arbitration in fixing and varying basic or living wages and are as follows :—

(i) The Court periodically *fixes* the amount of wage in the light of evidence submitted by parties appearing before it. Such evidence usually covers a wide range of facts as to economic conditions.

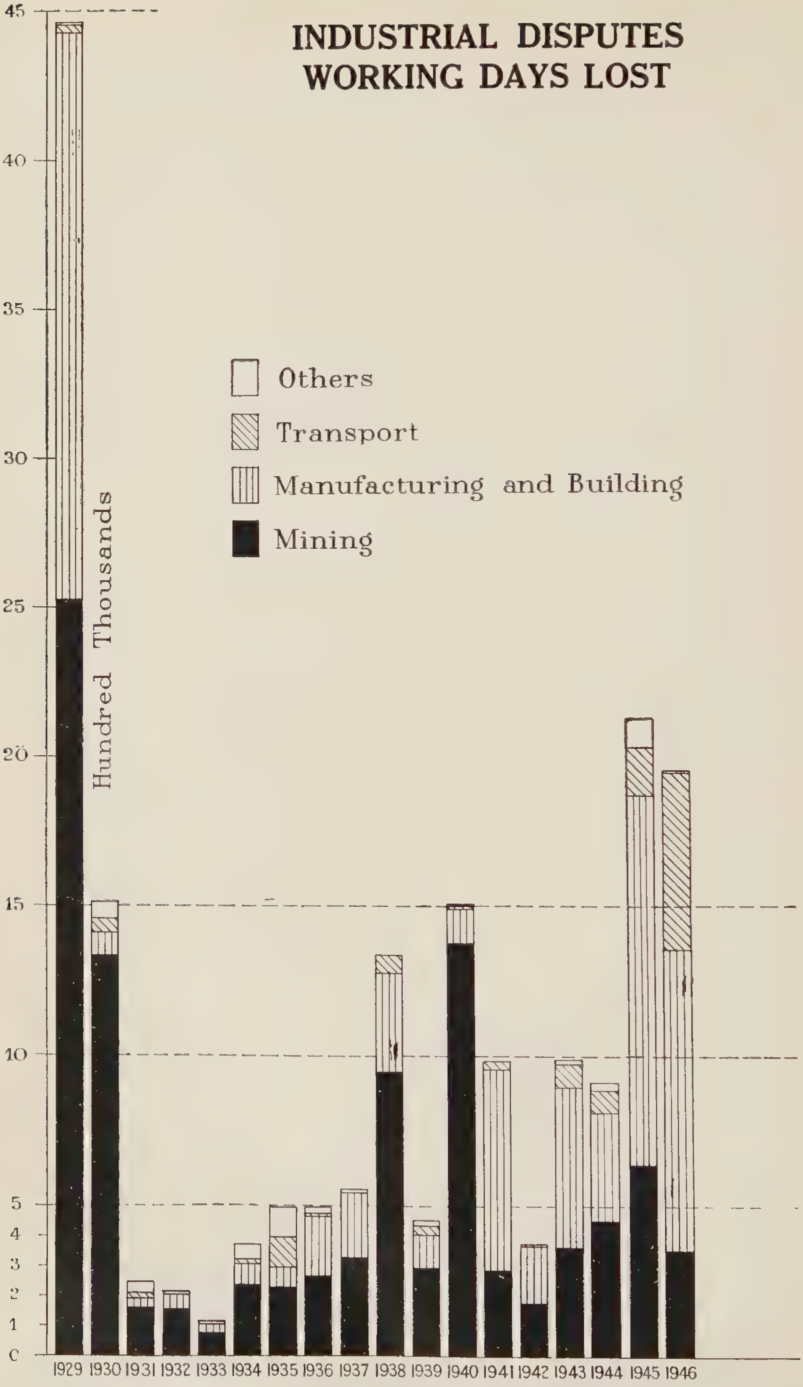
(ii) Having determined the amount of basic wage the Court further determines whether or not it shall be subject to automatic adjustment for changes in price level and, if so, by what method such *variation* shall be made. This again is decided in the light of evidence and of representations by the parties concerned.

WHOLESALE AND RETAIL PRICES, NOMINAL AND EFFECTIVE OR REAL WAGE INDEX-NUMBERS.—AUSTRALIA, 1911 TO 1946.



EXPLANATION.—The index-numbers in the graph above are for the Six Capital Cities as a whole, with the exception of those for Wholesale Prices, which are for Melbourne. They are all calculated to the common base 1911 = 1,000, the scale for which appears on the left of the graph. They are shown *quarterly* from 1912 to 1939, and thereafter the annual average in the case of the Wholesale Prices (Melbourne). The "C" Series Retail Prices (food, groceries, rent of 4 and 5 rooms, clothing and miscellaneous household expenditure) are shown *quarterly* from 1925. For the period 1911-1914 the "C" Series are taken back from the true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of All Houses). Nominal Wages are shown *quarterly* from 1914, and Real Wages *quarterly* from 1925. Real Wages are computed on the basis of the "C" Series.

INDUSTRIAL DISPUTES WORKING DAYS LOST



Explanation.—The scale refers to working days lost in hundred thousands. Thus, taking the year 1929, and comparing the sections with the scale, it will be seen that about 2,528,000 working days were lost in Mining, 1,901,000 in Manufacturing and Building, 30,000 in Transport, and about 3,000 in other industries. Total, 4,462,000 days.

The "C" Series Index is used by the Court to derive the "Court" series of retail price index-numbers upon which the basic or "needs" portion of the wages prescribed in awards is varied automatically for changes in price levels quarterly, half-yearly or yearly. These are commonly referred to as "cost of living adjustments" although in fact they relate only to that part of the *change in cost of living* which is due to variations in prices. The Court itself determines from time to time at public sittings the amount of the basic wage, having regard to evidence submitted in relation to other aspects of "cost of living" and other relevant considerations. In fixing the amount of the basic wage the Court does not have regard to either the regimen used in compiling the retail price index or the cost of such regimen. The regimen of the index would not be suited to such a purpose.

The considerations upon which the basic wage is fixed are set out in successive judgments of the Court and briefly summarized in Chapter III. (§ 3) of the *Labour Report*. On this matter, reference should be made to the Basic Wage Judgments of the Court, particularly those of 1934, 1937 and 1941, and to the general statement of principles set out in the judgment on the "Munition Workers' Case" of 1943. Certain State industrial tribunals use the index-numbers directly for automatic or quasi-automatic adjustments of the rates of wages determined by them as tribunals, while some State tribunals have regard to the index-numbers and other factors in considering what "cost of living" variations they should make in rates of wages.

The use of indexes by industrial authorities for purposes of adjusting rates of wages for changes in price level is a practice of long standing, dating in the case of the Commonwealth Court of Conciliation and Arbitration, for example, back to the year 1913. The tribunals form their own judgment as to relevance of the indexes to their purposes, and periodically hear the representatives of employers and employees on the issues involved, including questions as to whether the index is satisfactory for the purposes to which it is applied by the tribunal. In such proceedings the Statistician or his officers are called at times as witnesses on questions of fact and technical matters relating to the indexes.

The automatic adjustments in wages prescribed in awards of the Court on the basis of retail price index-numbers are sometimes referred to as "cost of living" adjustments and the index is popularly referred to as a "cost of living index". This at times creates misconceptions as to the nature of the retail price index since the term "cost of living" connotes not only change in cost of living due to changes in prices, but also changes in cost of living due to changes in standard of living. Beyond that, use of the term "cost of living" index sometimes creates the erroneous impression that the retail price index purports to embrace all that should be included in a desirable standard of living. As pointed out in the opening sections of this chapter, the "C" Series Index is a retail price index of specific meaning.

Reference should be made to *Labour Report* No. 36 for the actual Automatic Adjustment Scale used for the adjustment of the "needs" portion of the Commonwealth basic wage.

B.—WHOLESALE PRICES AND PRICE INDEXES.

§ 1. Melbourne Wholesale Price Index.

1. **General.**—The data on which this section is based relate almost entirely to wholesale prices in Melbourne.

The index of Melbourne wholesale prices was first computed in 1912, and has been continued on the same lines since that year. The items included comprise chiefly basic materials which in the form of raw material or food, or as a source of power enter into production for home consumption. The purpose of the index, therefore, is to measure the changes in the prices of these particular materials rather than the changes in prices generally. As Australia does not, to any extent, manufacture from imported raw materials commodities for export, the local consumption appears to give the most appropriate weighting.

2. **Index-Numbers.**—Index-numbers for each group of commodities as well as for all groups combined are shown in the following table :—

INDEX-NUMBERS : MELBOURNE WHOLESALE PRICES, 1861 TO 1946.

(*Base of each Group : Year* 1911 = 1,000.)

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

§ 2. Basic Materials and Foodstuffs.

1. **General.**—As mentioned above, the Melbourne Wholesale Price Index was first computed in 1912. Neither the component items nor the weighting have been varied. Consequently the index is a measure of changes in wholesale price levels based on usages which have altered substantially since the period on which the weighting was determined. As such it is useful as an indication of long-term trends over the past eighty-five years which it covers, on the assumption that the relative importance of component items remained constant. But it no longer serves as a measure of price variations from month to month or from year to year of commodities weighted in accordance with present day

consumption. Reference to a description of the index published in the annual *Labour Report* will indicate that animal fodders preponderate in the "Agricultural Produce" group, while "Building Materials" include little besides imported timber. In other groups, some principal items have increased in consumption while others have decreased. It was resolved, therefore, at the Conference of Statisticians at Brisbane in 1930 that the time had come to revise and extend the items included in order to bring the index into line with changed conditions. An investigation to that end was commenced, and in the course of the past few years, many new price-series have been collected on a monthly basis back to January, 1928. Some of these have been incorporated in a new index of the prices of basic materials and foodstuffs, index-numbers of which are regularly published in the *Monthly Review of Business Statistics* and other publications of the Bureau. The price quotations have in the main been obtained directly from manufacturers and merchants and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928–29 to 1934–35 inclusive. The original index is being continued for the present on the old lines, as set out in § 1 on page 455.

2. **Index-Numbers.**—Index-numbers for each group of commodities and for all groups combined for this new index of wholesale prices of basic materials and foodstuffs are given in the following table.

WHOLESALE PRICE INDEX-NUMBERS: BASIC MATERIALS AND FOODSTUFFS, 1928–29 TO 1946–47.

(*Base of each Group:* Average 3 years ended June, 1939 = 1,000).

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

C. CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR.

1. **General.**—Immediately after the outbreak of war the Commonwealth Government undertook control of prices and issued proclamations fixing as maximum prices of certain specified goods those prevailing on 31st August, 1939. These initial proclamations were issued from day to day by the Minister for Trade and Customs to peg prices of commodities which had risen or seemed likely to rise. These were emergency measures to hold prices in check pending establishment of machinery for price control.

At a Premiers' Conference held in Canberra on 9th September, 1939, agreement was reached as to the basis for co-operation between the Commonwealth and State Governments in administering price control, and on 28th September the National Security

(Prices) Regulations were proclaimed by the Commonwealth Government under the authority of the National Security Act. The Regulations established the basic principles of price control and provided for the appointment of a Commonwealth Prices Commissioner, conferring upon him extensive powers to control the prices of goods declared for that purpose by the Minister for Trade and Customs.

The National Security Act expired on 31st December, 1946, but control over prices was continued under the Defence (Transitional Provisions) Act 1946 which provided for the continuation of the Prices Regulations for a further twelve months from 1st January, 1947. In order to permit of continuation of the Prices Regulations in 1948, a further Transitional Provisions Act was passed in December, 1947. The Commonwealth Government decided to hold a referendum seeking authority for permanent powers over rents and prices (including charges) on behalf of the Commonwealth Parliament. The vote which was taken on 29th May, 1948 resulted in the rejection of the Government's proposals and in consequence arrangements were made with the State Governments to take over from the Commonwealth control of prices and land sales on 20th September, 1948 and rents on 16th August, 1948.

2. **State and Commonwealth Administration.**—At the present time (July, 1948) price control is administered jointly by the Commonwealth and the States. The central office is located in Canberra and is a Commonwealth administration, being a branch of the Department of Trade and Customs. In September, 1939, a Deputy Prices Commissioner was appointed in each State by the Commonwealth on the nomination of the State Government. Deputy Commissioners administer the Regulations under the supervision of the Commonwealth Prices Commissioner who makes prices orders under the Regulations. Close co-operation is maintained with State instrumentalities which dealt with prices before the war, and with State Government Departments, such as Agriculture and Forestry, in relation to primary products.

3. **Initial Phase of Control : Automatic Adjustment of Prices to Increases in Costs.**—In order to avoid delays in the distribution of goods, general principles were adopted late in September, 1939, providing for the automatic adjustment of prices to increases in costs.

These principles were set out in Prices Regulation Order No. 2, which was amended from time to time, and finally consolidated in Prices Regulation Order No. 100. Selling prices were to be calculated by traders themselves on principles laid down in the Order, subject to official check. The basis of such prices was the cost of the goods being sold, plus a gross profit margin. This cost was defined in the Order as the actual into-store cost of goods being sold or, in certain circumstances, as the average cost of all goods held in stock at a given date. Replacement costs were never allowed as a basis for prices. Traders were in general allowed to add the percentage margin of profit which they had added to costs on 31st August, 1939. The Prices Commissioner could increase margins where they were shown to be inadequate, or reduce them where they were deemed to be too high.

Many commodities were excluded from the operation of the general Orders, and for these specific prices were fixed. Generally, such prices were calculated on the same principles as set out in Orders No. 2 and 100, but in special cases formulae were prescribed for the absorption into prices of increases in specified costs.

4. **Change in Methods of Price Control : Pegging Profit Margins.**—An important change in the methods of price control was introduced in April, 1942, by the issue of Prices Regulation Order No. 666 which limited the trader's profit margin to the actual money margin obtaining on 15th April, 1942. From that date onwards the trader was allowed to increase his prices only by the actual amount of increased cost. Increases in money margins of profit were permitted only with special approval. This new principle was adopted because of the inflationary effects of increasing costs, increasing turnover and percentage profit margins on pre-war basis.

At this time also Australia was entering on a period of total war demanding all-round sacrifices, and the new measure of price control was introduced shortly after the pegging of interest, rent and wages. Following the entry of Japan into the war in December, 1941, costs of many goods imported into Australia rose substantially as did costs of certain locally produced goods because of the transfer of a very large proportion of efficient labour from productive industry to war services. The retail price index-number rose by 9.5 per cent. in the first twelve months of the Pacific war (i.e. during 1942) compared with 5.4 per cent. in the previous year and 4.6 per cent. in the first twelve months of war.

5. **Comments on Early Phases of Price Control.**—The method of adjusting prices automatically to cover increasing costs gave flexibility and speed to the administration of price control when these qualities were highly important under the rapidly changing conditions of an economy transferring to a war footing under great strain. But it had weaknesses.

Firstly, rising costs and prices were disturbing to a community settling down to a total war effort. The continued rise of prices and uncertainty as to their future course created a feeling that profiteering was occurring and fear that inflation would occur. This was damaging to morale. Moreover, since costs could usually be covered by rises in price, there was no direct incentive for business men to increase efficiency to offset increasing costs. The level of wages had to be continually adjusted to the changing level of prices and public finances were continually disturbed by the changing levels of costs and prices.

6. **Price Stabilization.**—The next phase of price control was designed to secure price stability and was based partly on the Canadian Plan for an over-all ceiling on prices of goods and services. On 12th April, 1943, Prices Regulation Order No. 1,015 fixed, as ceiling prices, the prices actually being charged by individual traders on that date. There were certain exceptions, mainly in respect of perishable primary products. Special ceiling prices, to cover seasonal fluctuations, had already been arranged for most of these commodities.

The ceiling applied not only to retail prices but to all prices, at every stage of production, manufacture and distribution. Every trader's selling prices were fixed as at those prevailing on the ceiling date, and consequently the prices he had to pay for his materials. Rents and interest rates were fixed and, in general, wage rates were pegged (except for "cost of living" adjustments) in February, 1942.

7. **Rising Costs.**—The price ceiling could not, however, eliminate all rising costs. A substantial proportion of materials is imported and prices paid overseas for imports cannot be controlled. Materials produced in Australia may have to be produced from less accessible or more restricted sources so that their real cost of production rises. Again, in some cases, war-time stresses made it imperative to correct anomalies in the income structure with the result that various sections of primary producers and wage-earners received increased incomes which represented increased costs. These cost increases had to be met in some way which would not involve piercing the price ceiling.

8. **Price Changes within the Price Stabilization Policy.**—The price ceiling was not, as the expression implies, an indication of the Government's determination to peg rigidly every individual price at its level on a certain date. It was rather evidence of the Government's intention not to allow the general price level, which is one of the most important indications of the community's welfare, to be subject to extreme variations of costs during war-time. Over the major part of the economic field the cost structure itself had been stabilized but where it had not been so stabilized special measures were taken. Generally the price level was divorced from the cost structure. Government policy provided that, in future, necessary relief from increased costs could be met either by price adjustment or payment of price stabilization subsidy.

In some cases increases in prices were permitted. Sales to Government Departments were normally at a price high enough to cover costs of production. Where a manufacturer or trader, later in the chain of production and distribution, could absorb higher costs, the prices charged by the suppliers of his materials were increased in some cases. Where one trader, producing in competition with others, had a ceiling price lower than that of his competitors, he was permitted, provided circumstances justified such a course, to raise his price towards the general level, and thus cover some of the increased costs. Such adjustments were arranged as a rule in such a way as to avoid a breach of the price stabilization policy, and to leave the general price level, as it affected consumers, practically unchanged.

Moreover, within the price ceiling, each trader was required to reduce his prices in accordance with Prices Regulations Orders 666 and 667 whenever a downward movement in his costs occurred.

9. **Treatment of Costs and Subsidies.**—Although the Price Stabilization Plan provided for certain increases in prices, price rises up to the end of 1946 were the exception rather than the rule. When increased costs could not be absorbed within the process of production or distribution, they were met generally at the source by payment of subsidies and thus were prevented from disturbing the whole price structure.

Any trader who was in need of relief by reason of increased costs would submit his case to the Prices Branch. If, on investigation, production was regarded as essential, and relief necessary to avoid piercing the ceiling, the case would be referred to the Price Stabilization Committee. This Committee was composed of the Prices Commissioner, the Secretary, Department of the Treasury, and the Director-General, Department of War Organization of Industry (later Department of Post-war Reconstruction). The Committee's primary concern was to determine whether all or part of the increased costs could be offset by increased economies in production or absorbed by the trader. When the Committee was satisfied that relief was required and that a price increase would be inconsistent with the Government's policy of price stabilization, it recommended to the Minister for Trade and Customs that a subsidy should be paid. This recommendation, if approved by the Minister, was subject to final confirmation by the Treasurer.

The payment of subsidies in respect of imports was an important feature of the plan. Importers received full protection against increasing oversea prices over which the Prices Commissioner had no control. Importers could ascertain before placing orders abroad whether their proposed imports would be regarded as essential. Subsidies were paid in full immediately on production of documents showing that the goods had arrived and that the landed costs were higher than the costs which were the basis of existing ceilings.

The Commonwealth Prices Commissioner had ample powers to correct any abuses that might arise under the subsidy scheme, and this was an indispensable part of the price ceiling plan.

10. **Maximum Prices.**—So long as the ceiling consisted of prices determined for each trader by the price charged on 12th April, 1943, ample room existed for uncertainty among purchasers as to what was the legal ceiling price, and even for evasion.

To meet this difficulty the Prices Branch extended its policy of fixing specific maximum prices which no trader could exceed, whatever may have been his price on 12th April, 1943. Under these Orders the consumer knew the highest price he could be charged and the Administration was in a stronger position to police its Prices Regulations Orders. Some important Orders in this category were made. Specific maximum prices were fixed for hundreds of grocery lines, for many fruits and vegetables throughout Australia, for woollen piece-goods, for cotton yarns, for woollen goods, for standard cloths and for meat.

A further development in this direction was the widening of the group of commodities in respect of which traders were required either to display a list of maximum prices or to mark the goods themselves with actual selling prices. Groceries, some fruit and vegetables, liquor and furniture were included in this group.

11. **Governmental Action to Adjust Increases in the Cost of Living.**—At the time the price ceiling was introduced the most recent measurement of retail prices was for March quarter, 1943 and represented prices about the middle of February or in the

case of food and groceries the average of the months January to March inclusive. Between these dates and 12th April, 1943, when the ceiling was imposed there was a lapse of time, and, as was expected, the retail price index for June quarter was appreciably higher than that for March quarter. This was due to various causes. Seasonal rises had taken place in the prices of potatoes, meat and eggs. The new supply of winter clothing came on to the retail market in June quarter and many important lines had shown substantial increases in price. There were also some adjustments that had to be made to retail prices to absorb increases in wholesale costs that were still outstanding when the ceiling was introduced. Through the operation of the automatic " cost of living " adjustment clauses of the industrial awards, this rise in the retail price index for June quarter necessitated an increase in the basic wage involving increased costs for all employing labour.

The Government was aware at the time it introduced the price stabilization policy that this situation would probably arise, and as soon as it was advised of the nature and extent of the rise it took the necessary steps to absorb the rise in costs, firstly by undertaking to refund to employers amounts paid as basic wage increases and secondly by reducing prices in such a way as to offset the price increases that had occurred.

These measures were announced on 21st July, 1943. The price of tea was reduced by 1s. 2d. per lb. to its pre-war level and the standard retail maximum price for potatoes was fixed at 5 lb. for 6d. (capital city basis). In the former case importers, and in the latter case growers, received a subsidy. At the same time, also, sales tax on clothing and textiles was reduced from 12½ to 7½ per cent. to take effect as existing stocks were cleared.

The range of commodities chosen for price reduction was small but all were universally consumed so that it was certain that the benefit of the reduction would be spread throughout the community. Prices of tea had risen by 50 per cent. and of clothing by an average of 75 per cent. since the outbreak of the war and seasonal fluctuations in potato prices had seriously disturbed the retail price level.

By December quarter 1943, the retail price index-number was again close to the pre-ceiling level of March quarter 1943.

12. **Recent Developments.**—Experience has shown that the further the ceiling date (12th April, 1943) receded the more difficult became the task of ascertaining prices on that particular date. The change-over from war-time controls to a peace-time economy raised many complex problems in respect of pricing and these new problems demanded a new approach. The rigidity of price ceilings had to give way to a more elastic control to permit of the expeditious pricing of the thousands of new or restored lines, and in certain instances the Commissioner extended to manufacturers the privilege of automatically fixing their own prices having regard to a previously determined basis.

The lifting of many economic war-time controls such as the Manpower Regulations, and those regulations governing the production of commodities and the modification of others, such as Wage-pegging Regulations, were major shocks to the economic structure.

Late in 1946, important steps were taken by the Commonwealth Government to modify the operation of the Price Stabilization Plan. The Government desired to keep expenditure on price stabilization subsidies within reasonable limits and adopted the policy of critically examining proposed new payments and tapering off existing commitments. Where necessary, relief from increased costs would be extended by price increase more frequently rather than by payment of subsidy.

General increases in the " real " basic wage resulting from the " Interim Basic Wage " judgment of the Commonwealth Arbitration Court of 13th December, 1946 (operating from the first pay-day in December, 1946) were partly offset by reductions or elimination of Sales Tax, and traders were required to absorb, in part, or wholly, the increased costs. In other cases, price increases were granted.

In February, 1947, the wages subsidies payable in respect of the Clothing Trades' Award and the National Security (Female Minimum Rates) Regulations were removed. In addition, payment of subsidy to cover basic wage adjustments was cancelled and steps were taken either to adjust prices or to require traders to absorb the increased costs.

On 30th May, 1947, a drastic change took place in connexion with import subsidies. The fundamental concept of *essentiality* gave way to that of *eligibility* for subsidy. The Government adopted an exclusive list of some 20 items which would be eligible for payment of import subsidies. The list of eligible items was practically restricted to textiles and clothing and several smaller items. Subsequently the list was gradually reduced until import subsidy on the last remaining item (viz. imported textiles and yarns) was discontinued as from 31st July, 1948.

The following additional adjustments have been made recently in regard to certain important commodities :—

Potatoes.—Retail prices were increased from 5 lb. to 4 lb. for 6d. from July, 1947.

Tea.—Wholesale prices were increased by 6d. per lb. from 1st March, 1947, but the saving in subsidy on this account was more than offset by the increased price of tea in India and Ceylon consequent upon the termination of the British Government contract and the resumption of auction sales. The increase in retail price, however, was also limited to 6d. per lb.

Clothing and Household Drapery.—Sales tax on clothing and household drapery was completely removed from 14th November, 1946.

The Prices Commissioner has constantly watched the supply position of commodities and services in relation to the demand. When the danger of "black marketing" in any commodity or service was eliminated by supply overtaking demand and the interests of the consuming public were adequately safe-guarded, steps were taken to remove these items from price control. In accordance with this policy, control was removed from such commodities as hay, chaff, straw and oats and growers' prices of fruit and vegetables.

13. **Expenditure on Price Stabilization Subsidies.**—The following is a comparison of the expenditure on Price Stabilization Subsidies for the years 1943-44 to 1946-47 inclusive. In addition to this expenditure, the Government paid subsidies to the dairy industry and on superphosphates and these payments also had a stabilizing influence on prices.

D.—WAGES.

§ 1. Operations under Wages Board and Industrial Arbitration Acts.

1. **General.**—Particulars regarding operations under the Commonwealth and State Acts for the regulation of wages, hours and conditions of labour were first compiled for the year 1913, and reviews to the end of each annual period appear in the *Labour Reports* and in the *Quarterly Summaries of Australian Statistics.*

2. **Awards, Determinations and Industrial Agreements.**—The following table gives a summary for each of the years 1939 and 1943 to 1946 :—

AWARDS AND DETERMINATIONS MADE AND INDUSTRIAL AGREEMENTS FILED.

State, etc.	1939.		1943.		1944.		1945.		1946.

3. **Boards Authorized, Awards, etc., in Force.**—Owing to difficulties encountered in the collection of these statistics the tables shown in issues prior to No. 35 under this heading have been discontinued.

4. **Control of Wages During and Since the War.**—Reference might be made to *Labour Report* No. 35, page 55 for a summary of the steps taken during and since the war under the authority of the National Security (Economic Organization) Regulations to " peg " all rates of remuneration throughout all industry (both public and private) at those being paid on 10th February, 1942 and of the steps taken gradually to " unpeg " such wages by various amendments of the regulations mentioned.

§ 2. Rates of Wages and Hours of Labour.

1. **General.**—The collection of information respecting the current rates of wage payable in different callings and in occupations in various industries was first undertaken by this Bureau in the early part of 1913. The particulars are obtained primarily from awards, determinations and agreements under Commonwealth and State Industrial Acts, and therefore are the minimum rates prescribed. They refer generally to the capital city in each State, but in industries which are not carried on in the capital cities, e.g., mining, agriculture, etc., the rates in the more important centres are taken. In cases where no award, determination, or agreement is in force, particulars are taken of the ruling union or predominant rate. During recent years the number of predominant rates of wage included in the tabulations has been reduced considerably, as most of the industries and occupations are now covered by awards, determinations, or industrial agreements.

The index-numbers for male adult workers are computed with the weighted average wage in 1911 as base (= 1,000). In the case of females, however, it has not been possible to secure information for the years prior to 1914, and the index-numbers are therefore computed with the weighted average rate of wage payable to adult female workers in Australia at 30th April, 1914 as base (= 1,000).

An extensive tabular presentation of the minimum rates of wage for adult male and female workers in the main occupations in the capital city of each State is given each year in the Appendix to the *Labour Report.*

2. **Weekly Rates of Wage, 1938 to 1946.**—(i) *General.* The average rate of wage for each industrial group is computed by taking the arithmetical average of the rates of wage payable for all classified occupations within that group. These averages are weighted in accordance with census results to give the average of all occupations for the States and for Australia.

(ii) *Adult Males—States.* The following table gives the weighted average nominal weekly rates of wage payable to adult male workers at the dates specified :—

Except in South Australia in 1933, wages declined in all States during the four years 1930 to 1933, the average rates at 31st December of the latter year being approximately 17 per cent. less than those ruling at the end of 1930. Increases were granted in each of the States during the next six years, the weighted average nominal rate for Australia at 31st December, 1938 being 16 per cent. higher than at the end of 1933. During the war years nominal weekly wages advanced annually in each State, the greatest increase occurring in 1942 (11 per cent. for Australia), followed by an increase of 3 per cent. in the following year, after which they remained comparatively stable until the fourth quarter of 1946 when they advanced 5.4 per cent. due mainly to the increase in the " needs " wage granted by the Commonwealth Court of Conciliation and Arbitration in its judgment of 13th December, 1946. Male wages at 31st December, 1946 were 37.5 per cent. higher than in December, 1938 and 6.8 per cent. higher than in December, 1945.

At the close of 1946 rates were highest in New South Wales, followed in the order named by Victoria, Queensland, Western Australia, Tasmania and South Australia. The highest weighted average rate for Australia was recorded at 31st December, 1946, namely, 128s. 6d. per week.

(iii) *Adult Males—Industrial Groups.* The following table shows for Australia the average weekly rates of wage and index-numbers in each industrial group, and for all groups at the dates specified.

WAGE RATES OF ADULT MALES.

WEIGHTED AVERAGE NOMINAL WEEKLY RATES FOR A FULL WEEK'S WORK AND INDEX-NUMBERS OF WAGE RATES IN EACH INDUSTRIAL GROUP.

NOTE.—Index-numbers for each industrial group and for all industrial groups are based on the average wage for all groups in 1911 (51s. 3d.) = 1,000. The index-numbers in this table are comparable throughout :—

(*a*) Includes the value of victualling and accommodation where supplied. (*b*) Includes the value of board and lodging where supplied.

The foregoing table shows that the highest average weekly wage at 31st December, 1946 was recorded in Group V. (Books, Printing, etc.), 148s. 2d. per week, followed by Groups VII. (Building), 141s. 10d., VIII. (Mining, etc.), 134s. 6d., XI. (Shipping, etc.), 131s. 6d., IX. (Railways, etc.), 130s. 10d., I. (Wood, Furniture, etc.), 129s. 2d. and II. (Engineering, etc.), 129s. 1d. The lowest average rate was recorded in Group XIII., (Domestic, etc.), 117s. 4d. Compared with those prevailing at 31st December, 1945, rates of wage increased in all industrial groups during 1946.

(iv) *Adult Females—States.* The following table shows the weighted average nominal weekly rates of wage payable to adult female workers for a full week's work in each State and Australia at the dates specified.

WAGE RATES OF ADULT FEMALES.

31st December, 1946 ..	2,799	2,889	2,923	2,679	2,472	2,673	2,824

It should be noted that the base of these index-numbers is 1914 and not 1911 as in the foregoing tables for adult males. This is because there is no tabulation for adult female rates prior to 1914.

Female rates followed the same downward course as male rates from 1930 to 1933. The weekly average nominal wage for Australia fell from 54s. 1d. at 31st December, 1929, to 43s. 5d. at the same date in 1933, a decline of 10s. 8d., or 20 per cent. As with the rates for males, increases were recorded in all States during the next eleven years. There was practically no movement in 1945 and little in 1946 until the last quarter, when a rise of 5.2 per cent. occurred. The weighted average rate for Australia at 31st December, 1946 had advanced by 33s. 4d. per week over that ruling on 31st December, 1933, and was 49.7 per cent. above the average at 31st December, 1938. The weighted average rate for Australia at 31st December, 1946, namely, 76s. 9d. per week, was the highest recorded to that date.

(v) *Adult Females—Industrial Groups.* The following table shows the weighted average weekly rates of wage payable in Australia to adult female workers in the industrial groups in which they are mainly employed, and in all groups combined.

(a) Includes the value of board and lodging, where supplied.

During 1946 the rate of wage for female employees in each industrial group increased as follows :—III. (Food, etc.), 5s. 9d. per week ; I., II., V. and VI. (All other manufacturing), 5s. 6d. per week ; XIII. (Domestic, etc.), 5s. 4d. per week ; XIV. (Miscellaneous), 4s. 8d. ; and IV. (Clothing, etc.), 4s. 5d. per week. The weighted average for all groups increased by 4s. 9d. per week.

3. **Relative Hours of Labour and Hourly Rates of Wage, 1938 to 1946.**—(i) *General.* The rates of wage referred to in preceding paragraphs are the minima payable for a full week's work. The number of hours constituting a full week's work differs, however, in many instances between various trades and occupations in each State, and between the same trades and occupations in the several States. To secure what may be for some purposes a better comparison, the results in the preceding paragraphs are reduced to a common basis, namely, the rate of wage per hour. Particulars as at the end of the years 1943 to 1946 compared with 1938 are given in the following table, for males and females separately in each State. These particulars relate to (a) the weighted average

nominal weekly wage; (*b*) the weighted average number of working hours constituting a full week's work; and (*c*) the weighted average hourly wage. The weighted average weekly wage relates to all industrial groups combined and includes the value of board and lodging where supplied in land occupations, and the value of victualling and accommodation where supplied in marine occupations, whereas the number of working hours and the hourly wage relate to all industrial groups other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Many of the occupations included in these groups are of a casual or seasonal nature, and the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or otherwise, hence the necessary definite particulars for the computation of the average number of working hours are not available.

The general effect of reducing the rates of wages to a common basis (i.e., per hour) is to eliminate any difference between the several States which may be due to unequal working time.

(ii) *Adult Males and Females.* Particulars of the weekly and hourly wages and hours of labour for adult males and females at the close of the years 1943 to 1946, compared with 1938 are given in the table hereunder :—

WEEKLY AND HOURLY WAGES AND HOURS OF LABOUR OF ADULT WORKERS.

	Working Hours ..	43.88	44.19	44.00	43.99	44.00	44.00	44.03
	Hourly Wage ..	1/7½	1/8	1/8½	1/6	1/6	1/6¾	1/7½
1946	Weekly Wage ..	76/0	78/6	79/5	72/10	67/2	72/7	76/9
	Working Hours ..	43.88	44.19	44.00	43.99	44.00	44.00	44.03
	Hourly Wage ..	1/8¾	1/9¼	1/9¾	1/7¾	1/6¼	1/7¾	1/9

(*a*) Weighted average weekly rate in all industrial groups combined. (*b*) Weighted average working hours per week, and computed hourly rates of wage for all industrial groups excepting Groups XI. (Shipping, etc.), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for occupations classified in industrial groups XI. and XII.

(iii) *Index-numbers.* The downward tendency in hours of labour for Australia commenced in the December quarter of 1924, when the weighted averages were 46.66 for males and 46.02 for females, and, excepting for slight increases in 1929 and 1930, the reduction has continued. During 1945 hours for males were reduced slightly in South Australia and Tasmania, and in 1946 in Victoria. The weighted averages for Australia at 31st December, 1946, were 43 57 hours for males and 44.03 hours for females. The effect of changes in hours of labour on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers for all classes combined given in the following table. It should be noted that these comparative index-numbers for males and females are on the 1914 base as against the 1911 base of the earlier tables for adult males. This is because there is no tabulation for adult female rates prior to 1914 :—

(a) Weighted average working hours per week for all industrial groups excepting Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for occupations classified in Industrial Groups XI. and XII.

5. **Nominal and Effective Wages.**—(i) *General.* Wages are said to be *nominal* when they represent the actual amounts of moneys received in return for labour, and are described as *effective* or *real* when expressed in terms of their equivalent purchasing power, that is, their purchasing power over some definite composite unit or regimen the cost of which can be ascertained at different times. The relation between *nominal* and *effective* or *real* wages was discussed at some length in *Labour Report* No. 6, and was also referred to in *Labour Report* No. 11.

Since it is possible to measure purchasing power over more than one composite unit or regimen it is equally possible to convert any given nominal wage series into more than one series of effective or real wages. Prior to 1936 it was the practice of this Bureau to compute effective wage index-numbers by dividing the nominal wage index-numbers by the corresponding retail price index-numbers for food, groceries and rent of all houses (" A " series). While wage rates were generally varied on the basis of the " A " series index-numbers there was a good deal to be said for this procedure. When the Commonwealth Court abandoned the " A " series, the merits of the " C " series for deflating nominal wage rates were strengthened. The " C " series covers food, groceries, rent for four and five-roomed houses, clothing and miscellaneous household requirements. As the computation of the " A " series was discontinued after the June quarter of 1938, real wages to the end of 1937 are measured in terms of their purchasing power over both the " A " series regimen and the " C " series regimen in the following tables, and over the " C " series only for the subsequent years.

(ii) *Nominal Weekly Wage Index-numbers, Adult Males,* 1901 *to* 1946—*States.* The following table shows for the period 1901 to 1946 the weighted average nominal weekly rates of wage payable for adult males in each State, the weighted average rate for Australia in 1911 being taken as the base (= 1,000). These results are based generally upon rates of wage prevailing in the capital city of each State, but in certain industries, such as mining, rates are necessarily taken for places other than the capital cities. The index-numbers for 1901 and 1911 are based on rates current at the end of December, annual averages not being available. For 1914 and subsequent years, however, the index-numbers are based on the average rates current at the end of the four quarters of each year :—

(iii) *Effective or Real Wage Index-numbers, Adult Males*, 1901 *to* 1946—*States*. In obtaining the effective wage index-numbers in the following tables, the nominal wage index-numbers shown above have been divided by the corresponding retail price index-numbers for the capital city and multiplied by 1,000.

The index-numbers for 1901 and 1911 which are based on nominal rates of wage current at the end of December may be taken as substantially accurate, since the movement in wages during the course of any one year prior to 1914 was comparatively slight.

Since the " C " series index-numbers were not compiled for periods prior to November, 1914, it has been assumed for the purpose of the following table that fluctuations between 1911, the base of the table, and 1914 in the " C " series would have been similar to the fluctuations observed in the " A " series.

In the tables above, the effective wage index-numbers are computed to the one base, that of Australia for 1911. As the index-numbers are comparable in all respects, comparisons may be made as to the increase or decrease in the effective wage index-number for any State over any period of years.

(iv) *Effective or Real Wage Index-numbers,* 1901 *to* 1946—*Australia.* In the following table similar index-numbers are given for Australia as a whole under both the " A " and " C " series. These are obtained by dividing the nominal wage index-numbers for Australia for the year concerned by the corresponding retail price index-numbers for the Six Capital Cities and multiplying by 1,000.

(*a*) Not available.

NOTE.—For years prior to 1914 the nominal wage index-numbers relate to the end of the year only, but from 1914 onwards these figures, in addition to those for retail prices, are averages for the whole year.

§ 3. Basic Wages in Australia.

1. **General.**—Basic wages in Australia are fixed by various industrial tribunals operating under Commonwealth and State Arbitration Acts, and are varied from time to time according to changes in cost of living, constitution of the family unit, etc. In the industrial legislation of New South Wales, Queensland, South Australia and Western Australia, provision is made for the tribunals appointed under the Acts to determine the basic rates of wage to be paid to adult unskilled workers. In Tasmania provision for the declaration of a basic rate of wage is not included in the industrial Acts in force. The Wages Board system operates in this State, and each Wages Board determines the rate of wage to be paid to the unskilled worker when the determination for an industry or calling is under review. In Victoria, however, the same Wages Board system exists, but by amendments of the Factories Act, operative from 17th October, 1934, Wages Boards are obliged to adopt Commonwealth Award rates and conditions " which such Boards are under the Factories and Shops Acts empowered to include in their determinations." As the power of the Commonwealth Arbitration Court is limited by the Constitution to the settlement, by conciliation and arbitration, of industrial disputes extending beyond the limits of any one State, no similar provision respecting the determination of a basic wage is to be found in the Commonwealth Conciliation and Arbitration Act. In practice, the Court does declare a Commonwealth basic wage and uses the wage so declared as a basis for all awards made by it in the exercise of its jurisdiction. That is, upon a new basic wage being declared, the awards made in the settlement of all interstate industrial disputes are re-opened and amended accordingly. In addition to the " basic " wage, these tribunals also determine what is known as the " secondary " wage—" the extra payment to be made for trained skill or other exceptional qualities necessary for an employee exercising the functions required."* The term " minimum " wage, on the other hand, is used to express the lowest rate payable in a particular industry, and is either equal to, or greater than, the " basic " wage.

2. **The Commonwealth Basic Wage.**—(i) *General.* The doctrine of a basic wage was propounded as far back as 1890 by Sir Samuel Griffith, Premier of Queensland, and the same principle was enunciated in the New South Wales Arbitration Court in somewhat similar terms by Mr. Justice Heydon in 1905. In spite, however, of these pronouncements and the fact that wage-fixing tribunals had been in operation as early as 1896 (in the State of Victoria), it was not until 1907 that the first basic wage, as such, was declared by a Court in Australia. This was made by Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, and it was defined as the lowest wage which can be paid to an unskilled labourer on the basis of " the normal needs of an average employee regarded as a human being living in a civilized community."† This declaration was made by way of an order in terms of Section 2 (*d*) of the Excise Tariff 1906 in the matter of an application by H. V. McKay, of the Sunshine Harvester Works, Victoria, from which was derived the title of the " Harvester Wage " by which it is popularly known. The rate of wage declared in this case was 7s. per day or £2 2s. per week for Melbourne, the amount considered reasonable for " a family of about five."‡ The constituent parts of this amount were £1 5s. 5d. for food, 7s. for rent, and 9s. 7d. for all other expenditure.

The " Harvester " basic rate was adopted by the Commonwealth Arbitration Court for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of the retail price index-numbers, covering food and groceries and rent of all houses (" A " series), for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. These index-numbers had been taken back to 1901, with the year 1911 as base, and disclosed not only considerable percentage increases since 1907, but also large disparities in the relative purchasing power of money in the various towns. The basic rates for towns were thereafter fixed largely on their respective index-numbers, taking the index-number 875 for Melbourne for the year 1907 as being equivalent to the

---

* Mr. Justice Higgins—*A New Province of Law and Order.*
† Ibid.
‡ *See* page 478 for Court's interpretation in 1940 Basic Wage Inquiry of the " family unit ".

"Harvester" rate of 42s. per week, or the base of the table 1,000 as being equivalent to 48s. per week. Exceptions were made in the case of many country towns, where certain "loadings" were applied to counterbalance their lower index-numbers due to cheaper rentals.*

In 1922 an amount known as the "Powers' 3s."† was added as a general "loading" to the weekly wage for the purpose of securing to the worker during a period of rising prices the full equivalent of the "Harvester" standard. In the same year the system was instituted of making regular quarterly adjustments of the basic wage to accord with variations in purchasing power as disclosed by the "A" Series retail price index-numbers, and of basing the adjustments on the index-number for the quarter in place of that for the previous calendar year or the year ended the preceding quarter.

The Commonwealth Conciliation and Arbitration Act provides that the "basic" wage, or any alteration therof including the principles on which it is computed, together with any variation or interpretation of any award involving any such alteration, shall be considered by a Court constituted by the Chief Judge and not less than two other Judges, and must be approved by a majority of the members of that Court. By a judgment of the High Court on 21st April, 1933, the "basic" wage is taken to mean for the foregoing purpose not only the "Harvester" wage but any "loadings" forming part of the primary wage of an unskilled labourer. A "loading" is defined as an addition to the "basic" wage as compensation for some peculiar condition of labour or environment, and not by way of "margin for skill". The wage payable for skilled labour is assessed on the basis of the "basic" wage, including "loadings."

The adequacy or otherwise of the "Harvester" standard has been the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. The abnormal conditions during and for some time after the 1914–18 War hindered such a review which was regarded as less urgent by reason of the fact that wages throughout Australia were being automatically adjusted to changes in retail prices. A Royal Commission (referred to later) was appointed in 1920 to assess a basic wage, but its recommendations were not carried out.

No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression which began to be felt severely during 1930. Applications were then made to the Court by employers for some greater measure of reduction of wages than that afforded by the automatic adjustments to falling retail prices. An account of the proceedings which resulted in the Court reducing all wages under its jurisdiction by 10 per cent. from 1st February, 1931, is given in *Labour Report* No. 23, page 74. Reference is also made to the Court's refusal in June, 1932, and May, 1933, to remove this special reduction.

(ii) *Basic Wage Inquiry*, 1934. The "Harvester" standard, adjusted to retail price variations, continued as the theoretical basis of the wage of the Commonwealth Court until 30th April, 1934, when it was superseded by a judgment delivered on 17th April, 1934, full particulars of which appear in Official Year Book No. 29, 1936, page 545. The basic wage declared on this occasion (subsequently referred to as the "Needs" Basic Wage 1934) was as follows for the six capital cities :—

	s.	*d.*		*s.*	*d.*
Sydney	67	0	Adelaide	64	0
Melbourne	64	0	Perth	66	0
Brisbane	61	0	Hobart	67	0

Six Capital Cities, 65s. 0d.

---

* As these indexes covered only about 60 per cent. of household expenditure, a low index due to low rentals would wrongly presume low costs in the remaining uninvestigated 40 per cent. of household expenditure and *vice versa*.

† Awarded by Mr. Justice Powers in the Gas Workers' case.

The following is a comparison for the capital cities of the basic rates granted by the judgment and those ruling under previous practices of the Court :—

COMPARISON OF BASIC RATES AWARDED FOR CAPITAL CITIES.

City.	New Rates Awarded 1st May, 1934, "C" Series.	Rates being paid prior to 1st May, 1934.		Increase (+) or Decrease (−) in New Rates as compared with—			
		Under "D" Series less 10 per cent. "Cut."(a)	Under "A" Series (Full).(b)	"D" Series.		"A" Series.	
				Full.	Less 10 per cent. "Cut."	Full.	Less 10 per cent. "Cut."
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Sydney	67 0	66 11	72 0	−7 4	0 1	−5 0	+2 2
Melbourne ..	64 0	63 4	67 6	−6 4	0 8	−3 6	+3 3
Brisbane ..	61 0	59 4	62 0	−4 11	1 8	−1 0	+5 2
Adelaide ..	64 0	60 2	63 0	−2 10	3 10	+1 0	+7 4
Perth	66 0	59 3	64 0	+0 2	6 9	+2 0	+8 5
Hobart	67 0	64 10	70 0	−5 0	2 2	−3 0	+4 0
Six Capitals ..	65 0	63 9	68 0	−5 10	1 3	−3 0	+3 10

(a) Calculated to nearest 1d., and including the equivalent of the "Powers' 3s.". (b) Calculated to the nearest 6d., and including "Powers' 3s." (in full).

The 10 per cent. special reduction in wages referred to above ceased to operate upon the introduction of the new rates, and the basis of the periodical adjustments to retail price variations was transferred from the "A" and the "D" Series to the "C" Series of Index-numbers which covers Food and Groceries, Rent of 4-roomed and 5-roomed Houses, Clothing, Fuel, Light, Household Utensils, Household Drapery, Fares, and other Miscellaneous household requirements. The base of the table (1,000) was taken by the Court as equal to 81s. per week. This gave the rates in Column 2 for the capital cities on the basis of their respective index-numbers. In effect, the new rate for the Six Capital Cities was the same as that previously paid under the "A" Series, without the "Powers' 3s." and without the 10 per cent. reduction. Certain towns gained and others lost in comparison with rates under the "A" Series, owing to the different relationship of towns under the "A" and the "C" Series.

In view, however, of the fact that the vast majority of workers were being paid the rates shown in Column 3 under the "D" Series Retail Price Index (which rates allowed for the 10 per cent. "cut" in wages), the differences compared with the full basic wage standard established by the Court from 1st May, 1933 by means of this Series were as shown in Column 5. The full rates under this Series may be obtained by adding one-ninth to those rates in Column 3.

(iii) *Basic Wage Inquiry*, 1937. In May, 1937, the Commonwealth Court heard an application by the combined unions for an increase in the basic wage. The unions asked that the equivalent of the base (1,000) of the "C" Series Index be increased from 81s. to 93s. which on current index-numbers would have represented an average increase of about 10s. per week. The hearing extended from 10th May to 4th June, 1937, and the Court delivered judgment on 23rd June. The chief features of the judgment were :—

(a) Various amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" on the rates payable under the "shilling table" as determined by the 1934 judgment. The latter was referred to in the judgment as the "needs" portion of the total resultant basic wages. The "loadings" and resultant "total basic wages" for the six capital cities were as follows :—

City.	"Needs" Basic Wage.	"Loading."	Total Basic Wage.
	s. d.	*s. d.*	*s. d.*
Sydney	72 0	6 0	78 0
Melbourne	69 0	6 0	75 0
Brisbane	68 0	6 0	74 0
Adelaide	68 0(*a*)	4 0	72 0
Perth	70 0(*a*)	4 0	74 0
Hobart	70 0(*b*)	4 0	74 0
Six Capitals	70 0	5 0	75 0

(*a*) An additional 1s. was actually being paid under the "2s. minimum adjustment" provision.
(*b*) One shilling less was being paid under the "2s. minimum adjustment" provision.

(*b*) Female and junior rates were left for adjustment by individual Judges when dealing with specific awards.

The main parts of the judgment are reprinted in Official Year Book No. 30, and in *Labour Report* No. 28, p. 77.

(iv) "*Lag*" *in Adjustments.* The Commonwealth Court on 19th December, 1939 heard an application by the unions that the date of adjustment of the basic wage in accordance with the variations in the "Court" Series of index-numbers be brought nearer to the period upon which the variation was based. In a judgment delivered on the same day the Court directed that such adjustments be made one month earlier. The effect, therefore, was to make future adjustments operative from the beginning of the first pay-period to commence in a February, a May, an August or a November.

(v) *Basic Wage Inquiry,* 1940. On 5th August, 1940 the Full Court commenced the hearing of an application by the combined unions for an increase in the existing basic wage by raising the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series are based) from 81s. to 100s. per week, and the abolition of the present "Prosperity" loadings, which would be regarded as incorporated in the new rate mentioned. Judgment was delivered on 7th February, 1941, the Court unanimously refusing to grant any increase, and deciding that the application should not be dismissed but stood over for further consideration after 30th June, 1941. The application was refused mainly owing to the uncertainty of the economic outlook under existing war conditions (*see* (vi) following).

In regard to the popular idea that the basic wage of the Commonwealth Court of Conciliation and Arbitration was identified with a specific family unit, the Chief Judge made the following statements to clarify the position : "The Court has always conceded the 'needs' of an average family should be kept in mind in fixing a basic wage. But it has never as the result of its own inquiry specifically declared what is an average family or what is the cost of a regimen of food, clothing, shelter and miscellaneous items necessary to maintain it in frugal comfort, or that a basic wage should give effect to any such finding. In the end economic possibilities have always been the determining factor . . . . . . What should be sought is the independent ascertainment and prescription of the highest basic wage that can be sustained by the total of industry in all its primary, secondary and ancillary forms. That, no doubt, is the object, but the adoption of something like the real average family as the unit to be provided for is not without its use in the attainment of that object. There is no clear means of measuring the general wage-paying capacity of the total industry of a country. All that can be done is to approximate and one of the methods of approximation is to find out the actual wage upon which well-situated labourers are at the time maintaining the average family unit.

We may be pardoned for saying that Mr. Justice Higgins very wisely used this criterion in the 'Harvester' case. Moreover, if the average-sized families of such well-situated labourers have become accustomed to enjoy, and do actually enjoy, a certain standard of living in our community, it may reasonably be assumed that such a standard for all labourers is probably not beyond the capacity of industry in general to provide. Therefore in determining the amount of a living or basic wage there is sound economic warranty for the ascertainment of the real average family unit and of the cost of providing something like the standard which such families of well-employed labourers have already reached. But obviously, if the real average family unit is departed from, or a standard is sought for the likely maintenance of which experience gives no reason to hope, then an unrealizable wage-level may be ordained . . . . It may be that in the light of past experience the Court should conduct a specific inquiry as to the cost of living of an average family, but under war conditions, such an inquiry would be futile. More than ever before wage fixation is controlled by the economic outlook ".

The Chief Judge further stated : " I was impressed by the new evidence and argument as to the inadequacy of the earnings of the lower-paid wage earners with families. On our accepted standards of living, looking at it from the needs point of view only, I regard the present basic wage as adequate for a family unit of three persons, but think it offers only a meagre existence for a family unit of four. When the unit gets beyond four hardship is often experienced." He suggested that the more logical system would be to grade the basic wage according to family responsibilities and that, notwithstanding the increase in aggregate wages, the benefits resulting from a re-apportionment of national income to increase the wages of those with more than one dependent child would more than offset the inflationary tendency of provision for a comprehensive scheme of child endowment, and that if a scheme of this nature were established, as recently announced by the Commonwealth Government,* future fixations of the basic wage would be greatly simplified. The other two Judges (O'Mara, J., and Piper, J.), in separate judgments, agreed with that of the Chief Judge, particularly in regard to the need for a child endowment scheme as a solution of the main problem.

(vi) " *Interim* " *Basic Wage*, 1946. As the result of (*a*) an application made on 30th October, 1946 (during the course of the Standard Hours Case) by the Attorney-General for the Commonwealth for the restoration to the Full Court List of certain adjourned 1940 basic wage applications (see (v) *supra*), (*b*) a number of fresh cases which had come to the Court since 1941, and (*c*) an application by the Australasian Council of Trade Unions on behalf of the unions for an " interim " basic wage declaration, the Court, on 25th November, 1946, commenced the hearing of this case. The case ended on 10th December, 1946 and judgment was delivered on 13th December, 1946 whereby an increase of 7s. per week was granted in the " needs " portion of the basic wage then current and based on the weighted average " Court " index-number for the Six Capital Cities (as a whole) for the September quarter, 1946. This had the effect of raising the base (1923–27) index-number of the " Court " Series Index from 81.0 to 87.0, the corresponding " needs " basic wage from 81s. to 87s. per week, and the current rate for the Six Capital Cities as a whole from 93s. to 100s. per week. All " loadings " on the basic wage were retained at their existing amounts until otherwise ordered by the Court.

The immediate monetary effect was to increase by 7s. per week the basic wage in each of the capital cities (with the exception of Hobart, where the increase was 6s.), and in most of the other towns or combinations of towns—the position of the index-number for a town in the new Automatic Adjustment Scale (on the new base rate of 87s.) determining whether the increase was 7s. or 6s. The date of operation for the majority of workers affected was the beginning of the first pay-period commencing in the month of December, 1946, in certain industries as from 1st December, 1946 and for certain other groups of workers from dates fixed by Judges dealing with individual applications for the increase.

Further details of this judgment may be obtained from *Labour Report* No. 35 (1945 and 1946), page 85.

---

* Legislation covering a scheme to become operative on 1st July, 1941, was actually passed by the Commonwealth Parliament on 3rd April, 1941—*see* page 486 for details.

(vii) *Current Commonwealth Basic Wage Rates.* The basic wage rates of the Commonwealth Court for adult males, including the "loadings" granted in 1937, operative at 1st August, 1948, are as follows :—

	s.	d.		s.	d.
New South Wales—			South Australia—		
Sydney	120	0	Adelaide	114	0
Newcastle	*a*120	0	Five Towns (*d*)	113	0
Broken Hill	125	0			
Five Towns (*d*)	119	0	Western Australia—		
			Perth	112	0
Victoria—			Kalgoorlie	121	0
Melbourne	117	0	Geraldton	117	0
Geelong	*b*117	0	Five Towns (*d*)	112	0
Warrnambool	*b*117	0			
Mildura	*b*117	0	Tasmania—		
Yallourn	*c*123	6	Hobart	115	0
Five Towns (*d*)	116	0	Launceston	112	0
			Queenstown	114	0
			Five Towns (*d*)	114	0
Queensland—					
Brisbane	113	0	Thirty Towns(*d*)	116	0
Five Towns (*d*)	113	0	Six Capital Cities (*d*)	116	0

(*a*) Based on Sydney. (*b*) Based on Melbourne. (*c*) Based on Melbourne plus 6s. 6d. loading. (*d*) Weighted average.

The rate for provincial towns other than those mentioned above is 3s. less than that of their respective capital cities. The rate for adult females—prescribed by the individual judges—is approximately 54 per cent. of the adult male rate.

A table will be found on page 88 of *Labour Report* No. 35 (1945 and 1946) showing the quarterly movements of this wage in all capital cities and the six capital cities as a whole during the years 1939 to 1947.

3. **Australian Territories.**—A full account of the basis upon which the basic wages are determined in (*a*) Australian Capital Territory and (*b*) Northern Territory (both north and south of the 20th parallel of south latitude) will be found on pages 95 to 99 of *Labour Report* No. 35, for 1945 and 1946.

The latest basic rates payable in these Territories are as follows :—

Australian Capital Territory : £6 5s. 6d. per week (in respect only of workers outside the Commonwealth Public Service), operative from 1st August, 1948 ;

Northern Territory : (i) North of 20th Parallel of south latitude ("Darwin" rate)—£6 14s. 9d. per week ; (ii) South of 20th Parallel ("Port Augusta" rate)—£5 19s. per week, operative from 1st August, 1948.

4. **Basic Wage Rates for Females.**—Reference should be made to the *Labour Report* No. 35 for 1945 and 1946 (page 88) for a statement of the general principles followed by the Commonwealth Court of Conciliation and Arbitration in fixing basic wage rates for females in relation to those of males, and of the principles followed by the Women's Employment Board which, operated over the period March, 1942 to October, 1944 in respect only of females in war industries employed on work usually performed by males, or on work which, immediately prior to the outbreak of war, was not performed in Australia by any person.

5. **State Basic Wages.**—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard living wage for adult male employees was made on 16th February, 1914, by the Court of Industrial Arbitration. The Board of Trade was established in 1918 with power to determine the living wage for adult male and female employees in the State. The Board made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act 1926 established the Industrial Commission of New South Wales, which exercised the powers of the Board of Trade from 15th April, 1926.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. With the adoption in 1937 of the Commonwealth basic wage referred to below, however, the identification of a specified family unit with the basic wage disappeared.

Employees in rural industries are not covered by the rates shown in the following table; a wage for rural workers of £3 6s. per week was in force for twelve months from October, 1921, and a rate of £4 4s. operated from June, 1927, to December, 1929, when the power of industrial tribunals to fix a living wage for rural workers was withdrawn.

The variations in the living wages determined by the industrial tribunals of New South Wales up to 27th April, 1937, are shown in the following table. Thereafter changes are made automatically in accordance with the procedure outlined in the next paragraph, and the latest current rate payable will be found in the table in sub-par. vi, page. 484.

(*a*) Rate declared, £1 15s. 6d., but law amended to provide a rate for females at 54 per cent. of that for males. (*b*) *See* below.

Following on the judgment of the Commonwealth Arbitration Court referred to on page 477, the Government of New South Wales decided to make the State Basic Wage accord with the Commonwealth rates ruling in the State, and secured an amendment of the Industrial Arbitration Act to give effect thereto. The Act (No. 9 of 1937) was passed on 7th October, 1937, and was to operate from the commencement of the first pay period in October, practically from 1st October, 1937. The general principles laid down by the Commonwealth Court were followed as closely as practicable, and provision was made for the automatic adjustment of wages in conformity with variations in retail prices as shown by the Commonwealth Court's "All Items" Retail Price Index-numbers, shortly known as the "Court" Series of Index-numbers. The Commonwealth Court's principle of treating the "prosperity loadings" as a separate and non-adjustable part of the total basic wage was adopted. The basic rate for adult females was fixed at 54 per cent. of the adult male rate to the nearest sixpence. The provisions of the main Acts for the periodic declaration of the living wage by the Industrial Commission were repealed, but the amending Act placed on the Commission the responsibility of altering all awards and agreements in conformity with the intentions of the new Act; to define boundaries within which the various rates are to operate; and to specify the appropriate "Court" Series retail price index-numbers to which they are to be related.

Compared with State adult basic wages of £3 11s. 6d. per week for males, and £1 18s. 6d. for females operative at the time, the alteration represented for males increases of 6s. 6d. in Sydney; 3s. 6d. in Country districts (with certain exceptions); and 4s. 6d. for railway and other Crown employees as defined by the Act. For females the increases were 54 per cent. of the foregoing, and amounted to 3s. 6d., 2s., and 2s. 6d., respectively.

The latest rates applicable in the metropolitan area from 1st August, 1948 are £6 for males and £3 5s. for females.

The principle of supplementing wages by a payment in respect of dependent children under fourteen years of age was operative in New South Wales from July, 1927 until superseded by the Commonwealth Government Scheme operative from 1st July, 1941, and a brief account of the main features of the system appears in § 4, par. 2 hereafter.

(ii) *Victoria and Tasmania.* A State basic rate of wage is not declared in Victoria and Tasmania. In these States the Wages Board system of wage fixation is in operation, and each Board determines the minimum rate of wage to be paid in the industry or calling under review. In the majority of cases the practice of the Commonwealth Arbitration Court of adjusting wages in accordance with variations in retail prices has been followed in the past by these bodies. In the case of Victoria, by amendments of the Factories and Shops Act No. 4275 of 1934 and No. 4461 of 1936, it is now obligatory on all Wages Boards to adopt such provisions of Commonwealth Awards which such Boards are empowered under the Factory and Shops Acts to include in their determinations The Secretary of Labour is also empowered under this Act to make adjustments of wages according to variations in retail price index-numbers without calling the Board together. The latest Commonwealth adult rate for Melbourne is £5 17s. per week (operative from 1st August, 1948), and for Hobart £5 15s. per week (operative from 1st August, 1948). Female rates are approximately 54 per cent. of those rates.

(iii) *Queensland.* The first formal declaration by the Industrial Arbitration Court in this State of a basic wage was gazetted on 24th February, 1921. Prior to this declaration the rate of £3 17s. per week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The basic wage is nominally intended to provide for the needs of a man, his wife and three children. The variations in the adult basic wages determined by the Industrial Arbitration Court are shown below:—

BASIC WAGE VARIATIONS IN QUEENSLAND. (*State Jurisdiction.*)

Date of Operation.	Adult Basic Wage.	
	Male.	Female.
	£ *s.* *d.*	£ *s.* *d.*
1st March, 1921	4 5 0	2 3 0
1st March, 1922	4 0 0	2 1 0
28th September, 1925 (*a*)	4 5 0	2 3 0
1st August, 1930	4 0 0	2 1 0
1st December, 1930	3 17 0	1 19 6

7th August, 1939	4 4 0	2 5 0
31st March, 1941	4 9 0	2 8 0
4th May, 1942 (*b*)	4 11 0	2 9 6
23rd December, 1946 (*c*)	5 5 0	3 0 6

(*a*) Fixed by Basic Wage Act.
(*b*) Quarterly adjustments provided by judgment of 21st April, 1942—see below for latest rates.
(*c*) Consequent on "Interim" basic wage of Commonwealth Court of December, 1946.

The rates shown above are applicable throughout the South-Eastern Division of the State, which includes the metropolitan area; allowances are added for the following divisions—Northern, 10s.; North-Western, 17s. 4d.; Mackay, 5s. 6d.; and South-Western, 7s. 4d. Half of these allowances are granted to females.

On 15th April, 1942, the Court declared the rates operative from 31st March, 1941 as adequately meeting the requirements of Section 9 of the Industrial Conciliation and Arbitration Act 1932, having regard to the level of the "C" Series (All Items) retail Price Index for Brisbane for the December quarter, 1941. In order to ensure, however, that it would continue to do so under present exceptional conditions, the Court decided to make a quarterly declaration of the basic wage on the basis of the variations in the "cost of living" as disclosed by the "C" Series Index for Brisbane, commencing with the figures for the March quarter, 1942. This declaration was duly made by the Court on 21st April, 1942, at the rates of £4 11s. for adult males, and £2 9s. 6d. for adult females. The latest rates are £5 17s. for adult males, and £3 10s. 6d. for adult females, and have been operative since 2nd August, 1948.

(iv) *South Australia.* The Industrial Code 1920–1943 provides that the Board of Industry shall after public inquiry declare the living wages to be paid to adult male and female employees. Prior to the passing of this Act the living wage was declared by the Industrial Court, the first award, 7s. per day, being made by Mr. Justice Gordon in the Brushmakers' Case in December, 1908.

The first declaration by the Board of Industry was made on 15th July, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. per week.

The family unit is not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage is to be declared is a man with a wife and three children.

Following on the declaration of an "interim" increase in its "needs" basic wage by the Commonwealth Court of Conciliation and Arbitration on 13th December, 1946 (*vide* p. 479) the South Australian Parliament, by virtue of the Economic Stability Act No. 52 of 1946, and other enabling powers, provided for the Governor, by proclamation, to declare the "daily living wage" for adult males in the metropolitan area to be one-sixth of the Commonwealth weekly basic wage for this area (102s. per week, inclusive of the "prosperity loading" of 4s.) and to be operative from 7th January, 1947. The Act mentioned also provided for similar proclamations in respect of any adjustment of such wage, but the powers of the Board of Industry to declare a "living wage" were retained, and any such wage so declared will supersede that declared by proclamation.

The variations in the living wages determined by the Board of Industry are shown below :—

(*a*) Commonwealth rate for metropolitan area adopted.

(v) *Western Australia.* The Industrial Arbitration Act 1912–1941 provides that the Court of Arbitration shall determine and declare a basic wage to operate from 1st July of each year and, wherever and whenever necessary, differential basic rates in special or defined areas of the State. In an amending Act of 1930 provision is made for quarterly adjustments when the Government Statistician reports a variation in the cost of living of 1s. or more per week compared with the previous quarter.

The first declaration of the basic wage by the Court of Arbitration, since the authority to fix one was vested in the Court in 1925, was made on 11th June, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. The variations in the annual declarations of the Court of Arbitration are shown in the following table :—

Western Australia(*e*)	5 17 5	3 3 5	26 7.48	Man, wife and two children
Tasmania (*c*) ..	5 15 0	3 2 0	1.8.48	(*c*)

(*a*) Sydney, Newcastle, Port Kembla-Wollongong. Broken Hill—males £6 5s., females £3 7s. 6d. Elsewhere, males £5 17s., females £3 3s. (*b*) Commonwealth Basic Wage operative—no defined family unit. (*c*) None declared, but rates shown are those of Commonwealth Court which are followed to a large extent. (*d*) South-Eastern Division. Allowances are added for the following Divisions—Northern, 10s.; North-Western, 17s. 4d.; Mackay, 5s. 6d.; and South-Western, 7s. 4d. Half of these allowances are granted to females. (*e*) Metropolitan Area. Basic wage for Gold-fields areas and portions of State excluding the South-West Land Division—males, £6 5s. 10d.; females, £3 7s. 11d.; South-West Land Division (excluding Metropolitan Area)— males £5 17s. 1d.: females £3 3s. 3d.

6. **Royal Commission on the Basic Wage, 1920.**—Only one comprehensive attempt has been made by the Commonwealth authorities to ascertain specifically what the actual requirements were in the various States according to reasonable standards of comfort, including all matters comprised in the ordinary expenditure of a household in respect of a family consisting of a man, wife and three children under fourteen years of age.

The attempt referred to was made by a Royal Commission which in its report, issued in 1920, recommended the following amounts for the various capital cities :—

	£	s.	d.
Sydney	5	17	1
Melbourne	5	16	6
Brisbane	5	6	2
Adelaide	5	16	1
Perth	5	13	11
Hobart	5	16	11
Six Capitals (Weighted Average)	5	15	8

The recommendations of this Commission were not carried out owing largely to the marked advance of the amounts suggested over ruling rates* and the grave doubts expressed as to the ability of industry to pay such rates.

§ 4. Child Endowment in Australia.

1. **General.**—The principle of supplementing wages by a payment in respect of dependent children under sixteen years of age became prominent in Australia following the recommendations of the Royal Commission on the Basic Wage of 1920, and was implemented in Australia as described in the following paragraphs. The system has been in force in various forms in England and on the Continent as far back as 1795, the first instance occurring in England in that year.

2. **New South Wales.**—The first attempt in Australia to institute the system was made in New South Wales in 1919, when a Bill was introduced into the State Parliament to provide a flat basic wage for a man and wife, and an allowance of 5s. per week for each child, the latter rate to be reduced on a sliding scale and to cease automatically when the income reached an amount of £3 per week above the basic wage. The Bill was rejected, but the subject again came up in the Session of 1926–27, when Acts,† which have been amended during subsequent years, provided for the payment of child allowances, in respect of dependent children under the age of fourteen years. The original Act was assented to on 11th April, 1927, and provided for (*a*) the declaration of a basic wage for a man and wife,‡ and (*b*) the payment of an allowance of 5s. per week in respect of each dependent child, subject to the provision that child allowances would be paid only to the extent to which the total earnings of the worker and his family fall short of the sum represented by the *basic wage* plus child allowance at the rate of 5s. per week for each child under the age of fourteen years. Thus, a worker with three dependent children receiving £5 by way of wages would not be entitled to the allowance, but would receive it in respect of a fourth child. These payments in New South Wales operated from 23rd July, 1927. The basic wage was determined for a family unit of a man, wife and one child on 20th December, 1929, and an amending Act, assented to on 23rd December, 1929, excluded one child in each family from endowment. The fund from which child endowment payments were originally made was created by a levy on the wages bill of employers. The rate of tax from employers during the year 1930 was fixed

---

* The " Harvester " equivalent for Melbourne at the time (September quarter, 1920) was £4 13s. per week, but only £3 18s. to £4 2s. was being paid on the basis of an annual index-number.

† Family Endowment Act 1927 ; Finance (Family Endowment Tax) Act 1927 ; Industrial Arbitration (Living Wage Declaration) Act 1927 and subsequent amendments.

‡ This was subsequently declared at £4 5s. per week for adult males and £2 6s. per week for adult females. A separate rate for rural employees was declared later at £4 4s. per week.

at 1 per cent. From 1st July, 1931, the rate was fixed at 2 per cent., and from 1st January, 1932, at the rate of 5d. in the £1 on all wages above £3 per week. The levy was discontinued as from 1st January, 1934, the cost of endowment being met from the Special Income and Wages Tax, which was also used for other social services. The scheme was abolished upon the introduction of the National Scheme by the Commonwealth Government in July, 1941.

3. **Commonwealth Public Service.**—The first system of child endowment in Australia was instituted within the Commonwealth Public Service. It came into operation on 1st November, 1920, when, following on the recommendations of the Royal Commission on the Basic Wage,* the Commonwealth Government decided to pay a basic wage of £4 a week in certain cases and child allowances to officers at the rate of 5s. per week for each dependent child under fourteen years of age, with a limitation of salary plus allowance of £400 per annum. As the result of proceedings before the Public Service Arbitrator in 1923, these allowances were confirmed as a permanent part of the salary scheme, and the necessary fund to meet them was created by deducting the average value of the payment from the basic wage of all adult officers. In effect, therefore, the officers themselves provided the fund from which the allowance was paid. The deduction was originally £11 per annum, but later £12. The payment was subsequently limited to officers receiving up to £500 per annum including the allowance. Details regarding the introduction and method of calculating the payments under this scheme have been published in previous issues of the Official Year Book and will be found also in the *Labour Reports* issued by this Bureau. The scheme was abolished at the instance of the officers upon the introduction of the National Scheme by the Commonwealth Government in July, 1941, particulars of which appear below. The deduction of £12 per annum from salaries was consequently discontinued from 10th July, 1941.

4. **National Scheme.**—The Commonwealth Government, in June, 1927, called a conference in Melbourne of the Premiers of the several States to consider the question from a national standpoint. The Prime Minister submitted various estimates of the cost of endowing dependent children under fourteen years of age in Australia at 5s. per week. After discussion, it was decided to refer the matter to a Royal Commission, to be appointed by the Commonwealth Government.

The Commission submitted its report on 15th December, 1928. It was not unanimous in its findings, and the opinions and recommendations of the members were embodied in two separate reports, which dealt exhaustively with the constitutional aspects, existing systems, industrial legislation, the basic wage, standard of living, regulation of wages, working conditions and cognate matters.

At the conference of Commonwealth and State Ministers held in Canberra in May, 1929, the Prime Minister stated that the Commonwealth Government was not prepared to adopt the scheme financed entirely from the proceeds of taxation, as had been recommended in the minority report. The Commonwealth Government agreed with the majority of the Commission that child endowment could not be separated from the control of the basic wage—a power which the Commonwealth did not possess and which the States were not prepared to relinquish. The Government, therefore, did not propose to establish any system of child endowment. It was generally agreed that any scheme which would increase the charges upon industry would be unwise at that particular time. The matter of child endowment was accordingly left to be dealt with as the State Governments should think proper.

---

* The Chairman of the Commission (Mr. A. B. Piddington, K.C.), in a supplementary report, had suggested that the wage recommended (£5 16s.) be split up into a flat basic wage of £4 and a Child Endowment of 12s. per week for each dependent child, the fund for the payment of this allowance to be created by a tax on employers of 10s. 9d. per employee per week.

The findings and recommendations in the *majority* and *minority* reports are given in *Labour Report*, No. 19.

In 1941, the Commonwealth Government introduced a scheme of child endowment throughout Australia. The necessary legislation* was introduced into Parliament on 27th March, and finally passed on 3rd April, 1941. The main features of the scheme, which came into operation on 1st July, 1941, are as follows :—

(*a*) Payment at the rate of 7s. 6d. per week (increased from 5s. per week from 26th June, 1945) for all children under the age of sixteen in excess of one child in each family, provided the persons claiming the endowment, and the child in respect of whom the endowment is claimed, have resided in Australia for a period of twelve months preceding the date of claim.

(*b*) The endowment is payable to the mother of the child, or to such persons as are prescribed.

(*c*) Endowment is also payable to approved institutions, not wholly or mainly dependent upon the Commonwealth or a State for their revenue, in respect of all children under 16 years of age maintained therein.

(*d*) The scheme, which formerly was financed partly from Consolidated Revenue, partly from the abolition of the exemptions from taxation in respect of children after the first, and the major part from a tax of 2½ per cent. of all pay-rolls in excess of £20 per week, is now a charge on the National Welfare Fund.

(*e*) The general administration of the Act is under the control of the Director-General of Social Services, and the detailed administration is carried out by Deputy-Directors in each State.

A summary of the operations under the Child Endowment Act from 1st July, 1942 to 30th June, 1947, is given on pp. 300-1 of Chapter VIII. "Public Benevolence, etc.".

Consequent upon the operation of the Commonwealth Child Endowment Scheme, appropriate steps were taken for the termination of the schemes operating in New South Wales and the Commonwealth Public Service.

E. EMPLOYMENT.

§ 1. Employment.

1. **Total Occupied Persons.**—The following estimates of the total numbers of occupied males and females are based principally on data from the Census (June, 1933), the National Register (July, 1939), the Civilian Register (June, 1943) and the Occupation Survey (June, 1945). These sources of information have been supplemented by Pay-roll Tax returns, which commenced in July, 1941.

The estimates in the table below are divided into three categories (*a*) Defence Forces ; (*b*) all persons fully occupied as employers, or as self employed in businesses or on farms ; and (*c*) wage or salary earners fully employed, or occupied as casual, part-time intermittent or seasonal workers. Wage earners unemployed, in the sense that they are incapacitated or have no work to go to, are excluded, as also are persons engaged on Government relief works.

---

* Act No. 8, 1941 (Child Endowment Act) as amended by No. 5, 1942, and Nos. 10 and 41, 1945 ; Act No. 2, 1941 (Pay-roll Tax Assessment Act) ; and Act No. 3, 1941 (Pay-roll Tax Act).

All unpaid helpers in non-rural industry have been included with wage and salary earners. Male unpaid helpers in rural industry have been included with employers and workers on own account, as it is considered that the majority of these are sons or other close relatives of farmers working in an unofficial partnership, or as learners with the farm owner. Unpaid female helpers on farms are very numerous, but their exact number is not known. Generally, they combine part-time dairy or other farm work with part-time duties in the home. Together with women occupied in unpaid home duties they have been excluded from the category of occupied persons.

Statistics of net enlistments in the Defence Forces shown in the table below represent total enlistments for full-time duty less deaths and discharges. Prior to December, 1941, men in certain age-groups were called-up for short training courses but these men are excluded from the figures. In July, 1941, the number of such men was approximately 50,000.

(a) Occupation Survey, 1st June, 1945. (b) Subject to revision. (c) Excludes approximately 50,000 men called up for short training courses. (d) Includes females in thousands, in private domestic service as follows :—106.7 in June, 1933; 124.5 in July, 1939; 100.0 in July, 1941; 41.5 in June, 1943; 47.6 in June, 1945; and 50.1 in June and December, 1946.

From June, 1933 to July, 1939, the number of occupied persons of both sexes had increased by 488,900, due to the increases of 223,700 in the number of available bread-winners and to the decrease of 265,200 in the number unemployed from 563,200 to 298,000.

During the war years from July, 1939 to June, 1943, the number of males occupied as civilians decreased by 288,000, while females occupied as civilians increased by nearly 113,000, representing a net decrease of 175,000 persons. This decrease, together with decrease of unemployment (272,000), normal increase of breadwinners (91,000) and an abnormal war-time increase of 178,000 bread-winners (persons who would not otherwise have been working), balanced the net intake into the Defence Forces at June, 1943 (716,000).

2. **Total Occupied Persons—States.**—The following table shows total occupied males and females in each State in July, 1939, and December, 1946, divided into Defence Forces, Employers and Self Employed, and Wage and Salary Earners.

(*a*) Estimates for December, 1946, are subject to revision. (*b*) Includes Australian Capital Territory and Northern Territory.

Between July, 1939 and December, 1946, the occupied population of Australia (including Defence Forces but excluding unemployed, pensioners, retired persons of independent means and dependants) increased by approximately 16.4 per cent. The proportionate increase in each State was as follows: New South Wales, 18.4; Victoria, 15.6; Queensland, 13.9; South Australia, 15.4; Western Australia, 11.9; Tasmania, 19.3. The figures for Victoria and Queensland in December, 1946 were adversely affected by industrial disputes and seasonal conditions respectively.

3. Wage and Salary Earners in Employment.—(i) *Commonwealth and States.* Estimates are made monthly of wage and salary earners in employment (excluding employees in rural industry and female domestics in private homes), based on Pay-roll Tax returns and statistics of Commonwealth Government employment. Pay-roll Tax returns cover only a small proportion of wage earners on rural holdings, and practically no private domestic servants. It is not possible to obtain actual numbers of farm employees and private domestic servants except when a Census or quasi-Census such as Occupation Survey (1st June, 1945) is taken, but estimates have been made from time to time using available data. The next table shows for each State and for Australia as a whole the trend in that section of wage and salary earning employment which it is possible to estimate monthly. Figures are shown as at June, 1933 (Census) and July, 1939 (based on National Register). From July, 1941 (commencement of Pay-roll Tax returns) the estimates are available for each month, and the table shows the level at November, 1941 (just before the Pacific War commenced and when the number of male wage and salary earners in civilian work, excluding rural, had reached a maximum), and at June of the years 1943 and 1945 to 1947.

1947—June (*c*)	923.9	643.1	294.7	188.9	139.5	68.0	2,269.0

(*a*) Includes Australian Capital Territory and Northern Territory. (*b*) 1st June, 1945 (Occupation Survey). (*c*) Subject to revision.

Estimates for recent months for Australia, corresponding to the foregoing together with details for certain industrial groups, are published regularly in the *Monthly Review of Business Statistics.*

(ii) *Industrial Groups.* The following table shows the total male and female wage and salary earners in employment (excluding employees in rural industry and female private domestics) subdivided to show the extent of employment provided by Governmental authorities and by private employers respectively. Some principal industrial groups included in the total are shown separately and include both Governmental and private employees, except in the case of retail trade, where there are no Governmental employees.

(*a*) Includes employees of Australian Government Authorities (Commonwealth, State and Local) and of Allied Governments. (*b*) 1st June, 1945 (Occupation Survey). (*c*) Subject to revision.

4. **Employment in Factories.**—Actual mid-monthly factory employment derived from the results of annual factory censuses is published in the *Production Bulletin* issued by this Bureau. Estimated employment in each State in later months, subject to revision, may be obtained from the *Monthly Review of Business Statistics.*

An index of factory employment in Australia, published in the *Monthly Review of Business Statistics*, shows that in 1946–47 factory employment was 47 per cent. higher than the average employment for the three years ended 1938–39.

5. Index of Employment in Retail Stores.—Indexes for Australia and each State are published in the *Monthly Review of Business Statistics* and are based on Pay-roll Tax returns, which commenced in July, 1941.

The index shows that in Australia in June, 1947, employment in retail stores was 9 per cent. higher than in July, 1941.

6. Seasonal Employment in Australia.—An investigation concerning the extent of seasonal employment in Australia was made during 1928 and the results were published in the Official Year Book, No. 22, and in *Labour Report*, No. 19.

§ 2. Unemployment.

1. Total Persons Unemployed.—The total number of persons unemployed has been recorded only at the dates of the various censuses. The Census records include all persons who state that they are unemployed, and distinguish between unemployment on account of sickness, accident, scarcity of work, industrial dispute, and all other causes combined. The following table sets out the number of unemployed at the Censuses of 1911, 1921 and 1933, the National Register, 1939, the Civilian Register, 1943, and the Occupation Survey, 1945, and estimates have been inserted for June and December, 1946. The percentage which the unemployed bore at each time to all wage and salary earners of the same sex, comprising those estimated to be in employment and those unemployed is also shown. Of the total wage and salary earners shown below as being unemployed at the Census of 30th June, 1933, 1.4 per cent. was on account of sickness and accident.

UNEMPLOYMENT (ALL CAUSES): AUSTRALIA.

Year and Month.	Wage and Salary Earners Unemployed.			Percentage of Wage and Salary Earners Unemployed.		
	Males.	Females.	Total.	Males.	Females.	Total.
	'000.	'000.	'000.	%	%	%
1911—April (Census)	48.0	8.3	56.3	4.3	2.7	4.0
1921—April ,,	139.4	21.5	160.9	10.7	5.7	9.6
1933—June (*a*) ,,	460.2	103.1	563.3	27.9	19.1	25.8
1939—July (*b*) ..	264.0	34.0	298.0	15.0	5.7	12.6
1943—June (*c*) ..	19.5	6.3	25.8	1.4	0.9	1.2
1945—June (*d*) ..	39.9	16.2	56.1	2.7	2.3	2.6
1946—June (*e*) ..	109.0	25.0	134.0	6.1	3.6	5.4
December (*e*) ..	66.4	16.3	82.7	3.6	2.4	3.3

(*a*) The figures shown for 1933 are in excess of those actually recorded at the Census through an allowance having been made for a number of youths and girls who would normally have been wage and salary earners, but who, on account of the economic depression, having never been employed, were not classed as wage and salary earners. (*b*) Derived from National Register, 1939. (*c*) Derived from Civilian Register, 1943. *See* comment below. (*d*) Derived from Occupation Survey, 1945. (*e*) Estimate subject to revision.

The estimates and percentages of unemployment given above for periods subsequent to the Census of 1933 should be interpreted in conjunction with the notes below.

The estimates for 1939 were based on the National Register, which covered males aged 18–64 years, and data available from other sources. Owing to the absence of specific definition of an unemployed person on the Civil Registration card used in 1943, and use on the Occupation Survey (1945) card of the definition "a person normally working for wages but without a job on 1st June", it appears that the 1943 and 1945 figures exclude some persons who were temporarily absent from their jobs at the dates of the surveys.

The proportion of wage earners unemployed in July, 1939, immediately prior to the 1939–45 War, was estimated at approximately 12½ per cent. In July, 1941, it was about 4 per cent. and by June, 1943, under conditions of intensive mobilization of manpower for war purposes involuntary unemployment was practically nil. After August, 1945, considerable numbers of ex-Service personnel were idle prior to resuming civil employment. These persons were included in the estimates of numbers unemployed.

2. **Unemployment of Members of Trade Unions.**—(i) *General.* The particulars given in the following tables are based upon information furnished by the secretaries of trade unions. The membership of the unions regularly reporting exceeds 690,000, consisting predominantly of males and representing about 56 per cent. of the total trade union membership, and between 20 and 25 per cent. of all wage and salary earners. Unemployment returns are not collected from unions whose members are in permanent employment, such as railway and tramway employees, and public servants, or from unions whose members are casually employed (wharf labourers, etc.). Very few of the unions pay unemployment benefit, but the majority of the larger organizations have permanent secretaries and organizers who are closely in touch with the members and with the state of trade within their particular industries. In many cases unemployment registers are kept, and provision is made in the rules for payment of reduced subscriptions by members out of work Seasonal fluctuations in unemployment have been provided for by collecting returns quarterly since 1st January, 1913. The quarterly figures relate to persons who were out of work for three days or more during a specified week in each quarter: they include persons out of work through sickness but exclude persons out of work through strikes and lock-outs, except those outside the industry who are indirectly affected. The yearly figures quoted represent the average of the four quarters.

The value of the percentages of unemployment derived from trade union returns is in the indication they give of the trend of unemployment among trade unionists as reported by secretaries of trade unions.

(ii) *Summary for Australia,* 1939 *to* 1946. The following table gives a summary for Australia for the years 1939 and 1941 to 1946 and quarterly for the years 1939 and 1944 to 1946. Particulars of unemployment percentages at intervals since 1911 will be found on page 512 :—

December " ..	381	692,546	9,468	1.4

NOTE.—Similar figures for each of the four quarters of the years since 1912 will be found in the *Labour Reports.* The quarterly figures show the number of persons who were out of work for three days or more during a specified week in each quarter, and the annual figures, the average of the four quarters; the returns do not include persons out of work through strikes or lock-outs, except those outside the industry concerned who are indirectly affected.

The highest percentage of unemployed yet recorded (30.0) was reached in the quarter ended June, 1932.

(iii) *Australia, Industrial Groups,* 1945 *and* 1946. Below are shown the percentages unemployed in industrial groups. Industries or occupations in which employment is stable, such as railways, and those which are subject to exceptional fluctuations, such as wharf labour, agricultural, pastoral, etc., are not included. Other occupations—domestic, hotel employees, etc.—are included in the "Other and Miscellaneous" group. as their returns are not sufficiently representative :—

(iv) *States,* 1945 *and* 1946. In making interstate comparisons of unemployment percentages, allowances must be made for the circumstance that the industries included in the returns from trade unions are not quite identical in the various States, and that for some States the returns are a more representative sample than for others. The State percentages shown below, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of the trend of unemployment as reported by the trade unions.

3. **Special Legislation for the Relief of Unemployment.**—The position in regard to unemployment in Australia became so serious during 1930 that the usual methods of providing funds for relief works and sustenance were found to be inadequate. The cessation of loans, and the general depression in industry and business, due mainly to the decline in the prices of primary products, brought about an economic crisis in all States. The number of persons thrown out of work increased rapidly with little prospect of conditions improving during the immediate future. The Commonwealth and State Governments realized that special action was necessary to provide additional funds to relieve the distress caused by continued unemployment, as the money ordinarily available was not sufficient to meet the abnormal conditions.

Special grants to the States were made by the Commonwealth Government, while special legislation relating to the relief of unemployment was enacted in practically all the States. In New South Wales, Victoria and Queensland, the Acts provided for special taxation for the purpose of creating funds for relief works and sustenance for the unemployed. The funds necessary for the relief of unemployment in South Australia, Western Australia and Tasmania were provided from revenue.

Further references to the special legislation relating to unemployment, rates of tax and sustenance payments will be found in *Labour Reports*, Nos. 22 to 31.

§ 3. Commonwealth Employment Service.

The Commonwealth Employment Service was established under Section 47 of the Re-establishment and Employment Act of 1945, and under the Social Services Legislation Declaratory Act 1947.

The principal function of this Service, as set out in Section 48 of the first-mentioned Act, is to provide services and facilities in relation to employment for the benefit of persons seeking to become employed, to change employment, or to engage labour, and to provide facilities to assist in bringing about and maintaining a high and stable level of employment throughout the Commonwealth. The Act also gives the Service a number of specific functions in relation to the re-establishment of ex-servicemen and war workers.

The Service also assists in the administration of the Unemployment and Sickness Benefits. provided under the Social Services Consolidation Act 1947, as well as the Re-Employment Allowance. provided under the Re-Establishment and Employment Act for certain classes of discharged members of the Forces. All persons who wish to claim unemployment benefits or re-employment allowances must register with their residential Employment Office which is responsible for checking the claim and arranging for payment of benefit, if appropriate, and if no suitable employment can be offered to the applicant.

The Service functions within the Employment Division of the Department of Labour and National Service, and is under the control of a Director of Employment. It functions on a decentralized basis. The Central Office is in Sydney, and there are State Head Offices in each of the capital cities, with 153 District Employment Offices in suburban and the larger provincial centres, and with some 500 agents in the smaller country centres who are responsible to the various District Employment Offices. The District Offices are distributed as follows :—New South Wales, 57 ; Victoria, 39 ; Queensland, 22 ; South Australia, 15 ; Western Australia, 15 ; Tasmania, 5.

The Service completed its first year of operation in May, 1947, and monthly average statistics of the principal items of business transacted during that period were as follows :—applicants for employment—new registrations 39,536, referred to employers 28,146, placed in employment 17,381 ; vacancies—new notifications 29,848, unfilled at end of month 57,696 ; Persons receiving advice or information 44,635 ; and discharges (ex-Service) dealt with 12,436.

§ 4. Industrial Disputes.

1. **General.**—Information with regard to the collection of particulars and the methods of tabulation of industrial disputes involving stoppage of work are given in previous issues of the Official Year Book, and also in the annual *Labour Reports* of this Bureau.

In *annual* tabulations particulars are included of all disputes which either *commenced* or were *current* during the year under review. As regards " number of disputes ", " establishments involved ", and " workpeople involved ". therefore, duplication will take place in respect of those disputes which started in and were unsettled at the end of a preceding year; the number involved will, however, be indicated in a footnote, to permit of due allowance being made in any calculations made from the tables.

2. **Industrial Disputes Involving Stoppage of Work, Classified in Industrial Groups, 1945 and 1946.**—The following tables give particulars of industrial disputes which either commenced or were current during 1945 and 1946, classified according to industrial groups.

3. **Industrial Disputes, Australia, 1939 to 1946.**—The following table gives particulars of the number of industrial disputes, the number of workpeople involved, and the losses in working days and wages caused by disputes which either commenced or were current during each of the years 1939 and 1941 to 1946, classified according to industrial groups.

Satisfactory comparisons of the frequency of industrial disputes in classified industries can be made only after omitting those which are recorded for coal-mining (Group VIII.(*a*)). For 1913 the proportion of disputes in the mining industry represented practically 50 per cent. of the total number recorded. In subsequent years the proportion remained high, ranging from 45 per cent. in 1917 and 1918 to as much as 82 in 1940. For the years 1945 and 1946 these disputes represented 73 and 79 per cent. respectively of the annual total. In the five years 1942 to 1946 working days lost through dislocations involving workpeople engaged in coal-mining amounted to 1,855,056, representing 29 per cent. of the total loss of working days during the period :—

7. Other Causes..	5,212	86,370	63.079	271,132	226,979	188,927	72,533
Total	623.528	459,154	378,195	990,151	912.752	2,119,641	1,947,844

The main causes of industrial disputes are "Wage" questions, "Working Conditions," and "Employment of Particular Classes or Persons." In each of the years 1913 to 1925 with the exception of 1922, the number of dislocations concerning "Wages" exceeded those caused by any other question. From 1913 to 1946 the proportions varied between 19 per cent. in 1942 and 45 per cent. in 1916. Since 1925 the number of disputes concerning "Wages" has averaged about 20 per cent. of the total number for each year. The majority of the dislocations of work classified under the heading, "Employment of Particular Classes or Persons," are stoppages for the purpose of protesting against the dismissal of certain employees, who, in the opinion of their fellow-workers, have been unfairly treated or victimized. This class of dispute occurs very frequently in the coal-mining industry, and has been the principal cause of industrial disturbance in most of the years since 1925, averaging about 30 per cent. of the total number for each year during that period. The number of disputes over "Trade Union" questions has averaged below 10 per cent. of the total number of disputes during the years under review. Stoppages of work concerning "Hours of Labour" increased during 1926 and 1927, but have been relatively unimportant during recent years.

The numbers of disputes concerning "Wages" were 152 in 1945 and 142 in 1946, representing for each year 16 per cent. of the total. Stoppages concerning "Employment of Particular Classes or Persons" numbered 243 in 1945 and 205 in 1946, 26 per cent. of the total in each case, and those concerning "Working Conditions" 268 in 1945 and 273 in 1946 or 28 per cent. and 31 per cent. respectively. Disputes classified under these three headings numbered 663 or 70 per cent. of the total dislocations during the year 1945 and 620 or 71 per cent. in 1946.

7. **Results of Industrial Disputes.**—The results of industrial disputes during 1939 and each of the years 1941 to 1946 are shown in the following table —

INDUSTRIAL DISPUTES CLASSIFIED ACCORDING TO RESULTS : AUSTRALIA.

Year.	Number.				Workpeople Involved.				Working Days Lost			
	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.
1939..	75	302	19	20	22,517	117,445	6,233	6,635	104,192	256,602	43,569	54,791

(*a*) See note to previous table.

The majority of disputes are settled by direct negotiations between employers and employees, the proportion so settled since 1913 ranging between 43 per cent. in 1925 and 78 per cent. in 1937. The percentage was 51 in 1945 and 45 in 1946. The proportion of dislocations settled by compulsory conferences or the intervention and assistance of officials under State or Commonwealth Arbitration Acts has varied considerably during the period under review, ranging between 3 per cent. in 1915 and 22 per cent. in 1913. The proportion was 8 per cent. in 1945 and 5 per cent. in 1946. In connexion with the comparatively large number of disputes which are classified as having been settled "By other methods," many stoppages of work occur each year, principally at collieries, but the cause of such stoppages is not officially known to the employers or their representatives. Such stoppages usually last for one day, and work is resumed without negotiations for a settlement of the trouble. In 1946 the percentage of disputes settled by "other methods" rose to 40, the highest recorded for that class of settlement.

F. ASSOCIATIONS.

§ 1. Labour Organizations.

1. **Registration.**—(i) *Under Trade Union Acts.* The benefits obtained by registering trade unions under the Trade Union Acts in force in the various States are not considered of much value, consequently the statistics of registered trade unions of employees do not accurately represent the position of unionism. Further, the returns for past years are so defective as to be practically valueless, inasmuch as no reliable indication is afforded of the numerical and financial position of the unions. Some of the registered unions fail to supply returns; this non-supply may lead to cancellation of the registration. Others have obtained the cancellation of their certificates of registration, the apparent reason being that they proposed to register under the Commonwealth Conciliation and Arbitration Act or a State Arbitration Act. In Queensland, some of the largest labour unions withdrew from registration during 1911, mainly on account of the necessity for closer restriction of their objects as set forth in their rules, consequent on legal decisions affecting trade unions In Victoria and in South Australia very few of the existing unions are registered under the Trade Union Acts. It will be seen, therefore, that the available information under this heading is too meagre for statistical purposes.

(ii) *Under Industrial Arbitration Acts.* Information with regard to registrations of employers' associations and trade unions under the various State Industrial Arbitration Acts will be found in previous issues of the Official Year Book. The latest information available as to registrations is as follows:—New South Wales, 202 industrial unions of employers and 154 industrial unions of employees, the membership not being available in either case; Queensland, 20 industrial unions of employers with approximately 17,000 members, and 75 industrial unions of employees with approximately 194,000 members; South Australia, 34 organizations of employees with 48,000 members; Western Australia, 35 organizations of employers with 883 members, and 131 organizations of employees with 66,000 members. There is no provision in the South Australian Industrial Acts for the registration of organizations of employers, and in Victoria and Tasmania, where Wages Board systems of wage fixation are in operation, organizations of employers and employees are not required to register. Registration under Commonwealth legislation began in 1906. In that and the four years following, there was but one union of employers; another was registered in 1911. The unions of employees registered in 1906 were 20, with 41,413 members. At the end of 1945 and 1946, the number of employers' organizations registered under the provisions of the Commonwealth Conciliation and Arbitration Act was 42. The number of unions registered at the end of 1945 and 1946 was 161, with a membership of approximately 1,082,472 at the end of 1945 and 1,120,858 at the end of 1946 representing 90 and 89 per cent. respectively of the total membership of all trade unions in Australia.

2. **Particulars regarding Trade Unions.**—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be merely a branch of a British or International union. Broadly speaking, there are four distinct classes of labour organizations:—(i) the local independent; (ii) the State; (iii) the interstate; and (iv) the Australian or International; but a number of variations occur from each of these classes. The leading characteristics of each of these types are briefly outlined in *Labour Report* No. 2 (pp. 7–9) issued by this Bureau.

(ii) *Number and Membership.* As already stated, the figures for trade unions registered under the Acts do not represent the position of unionism in Australia. In 1912 the Labour and Industrial Branch of the Commonwealth Bureau of Census and

Statistics was established and with the cordial co-operation of the officials of the labour organizations comprehensive figures relating to the development of organized labour are now available. The following table shows the position at the end of 1945 and 1946 :—

TRADE UNIONS: BRANCHES AND MEMBERS, 1945 and 1946.

State or Territory.	Number of Separate Unions.		Number of Branches.		Number of Members.	
	1945.	1946.	1945.	1946.	1945.	1946.

Tasmania	71	69	71	70	27,114	28,314
Northern Territory ..	4	4	..	..	1,406	1,997
Australian Capital Territory.. ..	15	15	1	1	1,953	2,293
Total ..	767	760	1,733	1,733	1,200,395	1,263,658
Australia	(a) 362	(a) 362	(b) 2,138	(b) 2,131	1,200,395	1,263,658

(a) Allowing for interstate duplication. The figures represent the number of distinct organizations and interstate groups of organizations in Australia—not the total number of organizations which are practically independent and self-governing. (b) See remarks below.

In the preceding table the number of separate unions in each State refers to the number of unions which are represented in each State, excluding branches therein, and each union is counted once only. Except in the last line, the number of branches indicates the number of branches of State head offices, which may, of course, themselves be branches of an interstate or larger organization. In taking the total number of separate unions in Australia (see last line but one), it is obvious that, in the case of interstate and similar unions, there will be duplication, since each such union is counted once in each State in which it has any branches. In the figures given in the last line, allowance has been made for this duplication. State branches of interstate or federated unions, as well as sub-branches within a State, are included under the heading " Branches " in the fourth and fifth columns—last line. The scheme of organization of these interstate or federated unions varies greatly in character, and the number of separate Commonwealth unions does not, therefore, fairly represent the number of practically independent organizations in Australia. In some of these unions the State organizations are bound together under a system of unification and centralized control while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. At the end of 1946 there were, therefore, 362 distinct organizations and interstate groups of organizations in Australia, having 2,131 State branches and sub-branches, and a total of 1,263,658 members.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members thereof in Australia at the end of each of the years 1943 to 1946 compared with 1939. The number of unions specified refers to the number of different unions represented in each State and, while interstate or federated unions are counted once in each State in which they are represented, sub-branches within a State are not counted. Each year since 1939 the number of unions has decreased while membership has increased. Compared with 1939, membership in 1946 had increased by 38 per cent.

(v) Other Miscellaneous ..	50,392	51,239	57,867	59,014	67,827
Total	915,470	1,204,863	1,218,778	1,200,395	1,263,658

(a) Allowing for interstate duplication.

(iv) *Trade Unions : Numbers of Male and Female Members and Percentage to Total Wage and Salary Earners, Australia.* Prior to 1939 the numbers of male and female wage and salary earners (including unemployed) aged 20 years and over were estimated by increasing the numbers of such persons enumerated at the 1933 Census in ratio to the annual increases in males and females aged 20 to 64 years. Similarly, for wage and salary earners (including unemployed) under 20 years the numbers of such persons at the 1933 Census were increased in ratio to the annual increases in males and females 15 to 19 years. Further, allowance was made for (a) increase in the proportion of females who became wage and salary earners and (b) youths and girls who were without occupation but were not recorded in the wage-earning group at the 1933 Census. While the foregoing method of estimation would produce fairly accurate results during normal times, the drastically altered conditions of employment over the period of the recent war necessitated the adoption of more direct methods. For 1939 and subsequent years, therefore, the estimates are based on data obtained largely from the National Register of July, 1939, the Pay-roll Tax returns commencing from July, 1941, the Civilian Register of June, 1943, the Occupation Survey of June, 1945 and records of Defence Forces. Since 1939 the estimated numbers of wage and salary earners *include* (a) wage earners enlisted in the Defence Forces and (b) persons who were "not gainfully occupied" before the outbreak of war but who subsequently entered wage-earning employment, and (c) persons who in normal times would be occupied in their own businesses but undertook wage and salary earning employment during the war and post-war period.

The following table shows separately for males and females (a) the number of members of trade unions; (b) the estimated number of wage and salary earners of each sex 20 years of age and over in all professions, trades and occupations; and (c) the percentage of the former (a) on the latter (b) at the end of each year, 1943 to 1946 as compared with 1939. The estimated number of wage and salary earners includes all persons 20 years of age and over in receipt of wages or salary, as well as those unemployed, and therefore embraces a large number of adults who are not eligible for membership of any trade union, such as certain persons employed in professional occupations, as well as others who, while eligible for membership so far as the nature of their trade or occupation is concerned, do not reside in a locality which is covered by any union devoted to their particular trade or occupation. Moreover, the age at which persons are eligible for membership varies in different unions. The census results are classified in five-yearly age groups, and age 20 years is taken as approximating to the age of admission to membership. A line has also been added showing the estimated numbers of "junior" workers under 20 years of age.

TRADE UNIONS: NUMBER OF MALE AND FEMALE MEMBERS AND PERCENTAGE TO TOTAL WAGE AND SALARY EARNERS, AUSTRALIA.(a)

Particulars.	1939.	1943.	1944.	1945.	1946.

Junior Wage and Salary Earners (under 20)	187,200	227,000	222,000	219,000	211,300

(a) Includes wage earners enlisted in the defence forces.

TRADE UNIONS: NUMBER OF MALE AND FEMALE MEMBERS AND PERCENTAGE TO TOTAL WAGE AND SALARY EARNERS, AUSTRALIA.(a)—*continued.*

Particulars.	1939.	1943.	1944.	1945.	1946.
TOTAL.					
Estimated No. of Adult Wage and Salary Earners (20 years of age and over) ..	1,925,100	2,295,700	2,248,400	2,213,000	2,121,100
No. of Members of Unions	915,470	1,204,863	1,218,778	1,200,395	1,263,658
Percentage of Members on Estimated Number of Adult Wage and Salary Earners ..	47.6	52.5	54.2	54.2	59.6
Junior Wage and Salary Earners (under 20)	462,800	502,300	494,600	485,000	469,200

(a) Includes wage earners enlisted in the defence forces.

(v) *Interstate or Federated Unions.* The following table gives particulars of the number and membership of interstate or federated unions in 1945 and 1946 :—

INTERSTATE OR FEDERATED UNIONS: AUSTRALIA.

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States. (a)	
1945.						
Number of Unions ..	16	17	16	25	46	120
,, ,, Members ..	29,998	39,434	117,131	300,011	522,340	1,008,914
1946.						
Number of Unions ..	15	17	16	26	46	120
,, ,, Members ..	23,549	43,969	143,495	318,356	549,042	1,078,411

(a) Certain unions in this group have, in addition to branches in each of the six States, branches in the Northern Territory and the Australian Capital Territory.

The number of organizations operating in two or more States increased from 72 in 1912 to 120 in 1946, and the percentage of the membership of such organizations on the total membership of all organizations rose from 65 to 85 during the same period.

3. **Central Labour Organizations.**—In each of the capital cities and in a number of industrial centres elsewhere, delegate organizations, consisting of representatives from a group of trade unions, have been established. Their revenue is raised by means of a per capita tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council, or the Labour Federation. In Western Australia a unified system of organization extends over the industrial centres throughout the State. In this State there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, to which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are, as a matter of fact, independent bodies.

A new Central Labour Organization called the Australasian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the Trade Unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The Australasian Council is based on the Metropolitan Trades and Labour Councils in each State, such bodies having the right to appoint two representatives to act on the Executive of the Council. The Metropolitan Trades and Labour Councils are the branches of the Australasian Council. In addition to the representatives from the Metropolitan Councils, the Executive consists of four officers—the President, two Vice-Presidents, and a Secretary, who are elected by and from the All-Australian Trade Union Congress.

The objective of the Council is the socialization of industry, i.e., production and exchange. The methods to be adopted are :—(*a*) The closer organization of the workers by the transformation of the Australasian Trade Union Movement from the craft to an industrial basis by the establishment of one Union in each industry; (*b*) the consolidation of the Australasian Labour Movement with the object of unified control, administration and action; (*c*) the centralized control of industrial disputes; and (*d*) educational propaganda among unions. The Australasian Council of Trade Unions is the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the Trade Union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the Annual International Labour Conference.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated thereto, in each State at the end of 1945 and 1946 :—

CENTRAL LABOUR ORGANIZATIONS: NUMBER AND UNIONS AFFILIATED.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
1945.								
Number of Councils	7	9	10	3	9	4	1	43
Number of Unions and Branch Unions affiliated ..	223	258	112	78	295	88	15	1,069
1946.								
Number of Councils	9	9	11	7	9	5	1	51
Number of Unions and Branch Unions affiliated ..	260	261	121	138	296	102	15	1,193

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated to the local trades councils in the several towns in which they are represented.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

§ 2. Employers' Associations.

The collection of detailed particulars in respect of Employers' Associations has now been discontinued, but particulars for the years 1922 to 1939 appear in issues of the Official Year Book prior to No. 34 and in the *Labour Reports*.

G. COMPARATIVE INDEX-NUMBERS.

In order to show the relative movements of certain price and related data, the following table of annual and quarterly index-numbers for the six capital cities combined has been compiled with a common base 1911 = 1,000.

COMPARATIVE INDEX-NUMBERS FOR THE SIX CAPITAL CITIES COMBINED.

(Base of each Group. Weighted Average of Six Capitals 1911 = 1,000 (a).)

Period.	Retail Price Index-numbers.						Nominal Wages, Adult Males.	Real Wages. (c)	Percentage of Unemployment among Trade Unionists.

(a) The index-numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing and food and groceries, since the cost in 1911 *in each group or combination of groups* is made equal to 1,000. (b) *See* footnote (b) on page 443 (c) Index of nominal weekly wage rates divided by "C" Series Retail Prices Index. (d) Taken back from true base (November, 1914 = 1,000) by means of the Food and Rent (All Houses) Index.

CHAPTER XIII.

LOCAL GOVERNMENT.

§ 1. Introduction.

1. **General.**—The statistics on Local Government operations are not entirely satisfactory, as they are incomplete, and not sufficiently comparable and up to date. Efforts are continually being made, however, as opportunity and circumstances permit, to improve them. Various returns supplied by State Statisticians, but discontinued during the war, have now been recommenced. In consequence, the matter in § 2 has been considerably advanced.

2. **Local Government Authorities.**—A description of the various systems of municipal government in the different States, and their development from the earliest date, was published in 1919 by this Bureau in a separate work entitled *Local Government in Australia.* In this publication the systems in force at that time are examined, the development of local government in Australia is traced since its inception, and all available statistical information is collected. The scope of the work includes those water supply, sewerage, drainage and irrigation boards, harbour and marine boards, and fire brigade boards, whose members are elective. Details are given of the various classes of authorities, their constitutions and powers, the qualifications required of electors and those elected, methods of valuation, rates, borrowing powers, revenue and expenditure, government grants, etc. A conspectus is appended of the acts in force relating to local government, together with acts relating to duties and functions which might be imposed on a local authority.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a Government department whose duties relate to the construction and maintenance of " main " and " developmental " roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the Government or by the central road authority do not properly come under the heading of " Local Government ", they have been included in this chapter for the sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure by the various local governing bodies in regard to roads under their control, the details of receipts and expenditure given in § 3 are those of the Government only, relating either to the supervisory board or commission in the State or to direct activities of a department. In § 2 some information is given of the revenue and expenditure of Local Government Authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne the control of water supply and sewerage is in the hands of special Boards, while in Adelaide and Perth these services are under the direct supervision of Government departments. In most of the other cities and towns, the municipal councils, or, in some cases, water trusts, are the controlling bodies which either construct the works out of their own resources or take them over after they have been constructed by the Government.

5. **Harbours.**—The majority of the harbours in Australia are managed by Boards, the members of which are either elected by persons interested, or are appointed by the Government. In a few instances, however, they are directly controlled by the Government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by Boards. These Boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the Government. Occasionally volunteer or country fire brigades are represented.

7. **Other Local Government Activity.**—The activities referred to above are not the only forms of local government undertakings. There are others, the most important being tramways and omnibus services and electric light and gas undertakings, whose control generally is less restricted to local government authorities. These are not dealt with in this chapter, except to the extent that they are represented in the finances as shown in the following section. Chapter V.—Transport and Communication contains information on municipal transport services, while particulars of electric light and gas undertakings, although not shown separately, are included in the relevant sections in Chapter XXIV.—Manufacturing Industry.

§ 2. Local Government Authorities.

1. **Area, Population and Value of Ratable Property.**—(i) *New South Wales.* For purposes of local government the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into municipalities (cities and principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1945 the area incorporated was 184,000 square miles, or nearly three-fifths of the total area of the State.

The operations of the Capital City are regulated by the Sydney Corporation Act and of other municipalities and shires by the Local Government Act. Councils elected for a term of three years comprise: City of Sydney, 20 aldermen; City of Greater Newcastle, 21 aldermen; other municipalities, 6 to 15 aldermen; shires, 6 to 9 councillors.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. There were 13 county councils at 31st December, 1945.

The area, population and value of ratable property in the incorporated areas for the year ended 31st December, 1945, are given below. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value is not inconsiderable in the aggregate.

LOCAL GOVERNMENT AUTHORITIES, NEW SOUTH WALES: AREA, POPULATION AND VALUE OF RATABLE PROPERTY, 1945.

Local Bodies.	Number.	Area.	Population. (*a*)	Value of Ratable Property.		
				Unimproved Capital Value.	Improved Capital Value.	Assessed Annual Value.(*b*)
		Acres.		£'000.	£'000.	£'000.

Grand Total ..	289	117,776,171	2,963,361	346,478	(*c*)	(*c*)

(*a*) As at Census, 30th June, 1947. (*b*) Nine-tenths annual rental value of land with improvements thereon. (*c*) Not available. (*d*) Includes City of Greater Newcastle.

(ii) *Victoria.* Local Government is established throughout the State, the various divisions being termed cities, towns, boroughs, or shires. The only unincorporated areas are French Island in Westernport Bay and Julia Percy Island, off Port Fairy. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act.

The financial years of the cities of Melbourne and Geelong, which, prior to 1938, ended on 31st December and 31st August respectively, now end, with those of all other municipalities, on 30th September. The area, population and value of ratable property in the incorporated areas are given below :—

LOCAL GOVERNMENT AUTHORITIES, VICTORIA : AREA, POPULATION AND ESTIMATED VALUE OF RATABLE PROPERTY.

Local Bodies.	Number.	Area 1940–41.	Population. (*a*)	Estimated Value of Ratable Property 1945–46.	
				Improved Capital Value.	Annual Value.
		Acres.		£'000.	£'000.
Metropolitan—					
Capital City	1	7,740	99,868	103,464	5,173
Other(*b*)	28	160,906	1,116,932	326,910	17,682

Grand Total	197	56,243,541	2,051,263	748,033	38,771

(*a*) As at Census, 30th June, 1947. (*b*) Includes the whole of the Shire of Braybrook and the whole of the City of Heidelberg (*c*) Includes the whole of the Shires of Broadmeadows, Keilor and Mulgrave.

Particulars of the unimproved capital value are not available.

(iii) *Queensland.* The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments. The following table gives particulars of the area, population, and value of ratable property in the incorporated areas for the year 1944–45 :—

LOCAL GOVERNMENT AUTHORITIES, QUEENSLAND : AREA, POPULATION AND VALUE OF RATABLE PROPERTY, 1944–45.

Local Bodies.	Number.	Area.	Population. (*a*)	Unimproved Capital Value.
		Acres.		£'000.
Capital City	1	246,400	402,172	21,015
Outside Metropolitan Area ..	143	428,873,600	697,257	53,570
Total	144	429,120,000	1,099,429	74,585

(*a*) As at Census, 30th June, 1947.

Particulars of improved capital value and annual value are not available.

(iv) *South Australia.* The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

The following table gives the area, population and value of ratable property in incorporated areas for the year ended 30th June, 1946.

LOCAL GOVERNMENT AUTHORITIES, SOUTH AUSTRALIA: AREA, POPULATION AND VALUE OF RATABLE PROPERTY, 1945-46.

Local Bodies.	Number.	Area.	Population. (a)	Value of Ratable Property.		
				Unimproved Capital Value.	Improved Capital Value.	Annual Value.
Metropolitan—		Acres.		£'000.	£'000.	£'000.

Grand Total ..	143	34,505,146	636,459	(b)	205,000	10,259

(a) As at Census, 30th June, 1947. (b) Not available.

(v) *Western Australia.* In this State, Local Government is carried on by means of municipalities and district road boards. Certain functions are delegated to health boards, whose personnel, in most cases, coincides with those of the municipalities and district road boards. The following table gives particulars of the area population and value of ratable property in incorporated areas for the year ended October, 1946 for municipalities, and the year ended June, 1946 for district road boards.

LOCAL GOVERNMENT AUTHORITIES, WESTERN AUSTRALIA: AREA, POPULATION AND VALUE OF RATABLE PROPERTY, 1945-46.

Local Bodies.	Number.	Area.	Population. (a)	Value of Ratable Property.		
				Unimproved Capital Value.	Improved Capital Value.	Annual Value.
Municipalities—		Acres.		£'000.	£'000.	£'000.

Grand Total ..	148	624,588,993	499,443	(b)	(b)	3,407

(a) As at Census, 30th June, 1947. (b) Not available. (c) Includes Swan District (235,264 acres) of which 8,064 acres only are in the Metropolitan Area.

The method of valuation is not identical in the case of all district road boards, as in some the assessment is based on the unimproved capital value and in others partly on the unimproved capital value and partly on the annual value. The amounts given are the totals for the areas rated on each valuation, and are not a function of each other.

(vi) *Tasmania.* The whole State is divided into municipal districts, Hobart and Launceston being incorporated under separate Acts. The following table gives particulars of the area, population and value of ratable property in incorporated areas for the year ended June, 1946.

LOCAL GOVERNMENT AUTHORITIES, TASMANIA: AREA, POPULATION AND VALUE OF RATABLE PROPERTY, 1945–46.

Local Bodies.	Number.	Area.	Population. (a)	Value of Ratable Property.		
				Unimproved Capital Value.	Improved Capital Value.	Annual Value.

Grand Total ..	49	16,778,000	256,407	23,631	60,030	3,466

(*a*) As at Census, 30th June, 1947. (*b*) Comprises the whole of the Municipalities of Clarence and Glenorchy.

2. **Finances.**—(i) *General.* As the result of resolutions adopted at a conference of Statisticians in 1936 the financial statistics of Local Government Authorities were compiled in the various States on a more comparable basis than formerly. The collection of this information was suspended in most States for the duration of the war, but has now been resumed. The tables following show the latest figures available, which, however, do not all relate to the same year.

(ii) *Ordinary Services.* (*a*) *Details.* In the returns of revenue and expenditure in the following table the proceeds from loans and expenditure thereof have been excluded, as have the operations of business undertakings controlled by the various Local Government Authorities. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

(*a*) Figures for New South Wales relate to the year ended 31st December, 1945, and are on an income and expenditure basis as distinct from those of other States, which are on a cash basis. (*b*) Year ended 30th September, 1946. (*c*) Year ended 30th June. (*d*) Municipalities—Year ended 31st October, 1946; Road Districts—Year ended 30th June, 1946. (*e*) Includes £8,065 reimbursements from Highways Departments for work done. (*f*) Includes £57,573 for sewerage and drainage. (*g*) Includes £83,964 for sewerage and drainage. (*h*) Compulsory contributions included under Public Works and Services. (*i*) To Main Roads Department. (*j*) Includes £120,545 to Country Roads Board. (*k*) This deduction offsets duplications caused by the inclusion above of particulars of expenditure on (i) the purchase from revenue of assets and the depreciation of these assets, and (ii) the depreciation of assets purchased from loans and the repayment of those loans. The amount deducted cannot be apportioned according to the various headings.

(*b*) *Years* 1938–39 *and* 1942–43 *to* 1945–46. The following table shows the revenue and expenditure (excluding loan) of local government authority ordinary services for the years 1938–39 and 1942–43 to 1945–46.

3. **Local and Semi-Governmental Authorities' Debt.**—Previous issues of the Official Year Book (*see* No. 36, page 595) have contained particulars of Local and Semi-Governmental Debt up to and including 1940–41. Similar information is not yet available for later years, but it is hoped to include it in the next issue. A summary of the debt of municipal and semi-governmental bodies to persons and institutions other than central Governments at 30th June, 1947 is shown in Chapter XV.—Public Finance, C, para. 3 (v).

§ 3. Roads and Bridges.

1. **New South Wales.**—(i) *General.* A central road authority was created by legislation early in 1925 for the purpose of providing improved and uniform standards of construction and maintenance of the principal roads, and to administer Governmental subsidies for work on those roads. The funds of this authority (now the Department of Main Roads) are derived principally from taxation of motor vehicles, contributions by the Commonwealth Government from the proceeds of a tax on petrol, direct contributions by municipal and shire councils, and special (not statutory) assistance by the State Government by way of loan moneys or special grants from revenue funds. *See* paragraph (iii) (*b*) for details of receipts and payments.

The Main Roads Department exercises control over Governmental activities in connexion with road works, these activities embracing works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and proclaimed national works, principally bridges and ferries, constructed from Government funds. The department co-operates with the municipal and shire councils in the work of constructing and maintaining a well-organized system of main highways. Assistance is granted by the department in respect of the following five classes of roads :—

State Highways.—Roads which are principal avenues of communication between the coast and the interior or throughout the State, and connect with such avenues in other States.

Trunk Roads.—Roads which, being secondary avenues of road communication, form with the State Highways the framework of general system of intercommunication throughout the State.

Ordinary Main Roads.—Roads which are used principally by through traffic as the means of intercommunication between towns or important centres of population and which, with the State Highways and Trunk Roads, form part of the general system of road communication throughout the State.

Secondary Roads.—Roads in the metropolitan area of Sydney which carry a substantial amount of through traffic and relieve neighbouring main roads of traffic which they would otherwise have to bear.

Developmental Roads.—Roads which serve to develop a district or area of land by improving or providing access to a railway station or a shipping wharf, or to a road leading to a railway station or a shipping wharf.

In the Eastern Division of the State assistance is given to local councils for works on classified roads. For other roads the cost of both construction and maintenance work is generally chargeable to the revenue of local authorities, although Governmental assistance is not infrequently granted for works of construction and reconstruction. In the Western Division the full cost of all roads and bridges is met by the Department of Main Roads.

The length of roads maintained by the Department of Main Roads at 30th June, 1946 (excluding the Western Division) was 2,561 miles (15 per cent.), while the length maintained by Councils was 14,642 miles (85 per cent.).

In the Western Division 7,706 miles (excluding 18 miles maintained by the Bourke and Broken Hill Municipal Councils) were maintained by the Department.

(ii) *Length of Roads.* The following particulars show lengths of road according to (*a*) type of road and (*b*) composition :—

(*a*) *Type.*	Miles.
Eastern Division—	
Proclaimed Roads (30th June, 1946)—	
State Highways	5,147
Trunk Roads	2,367
Ordinary Main Roads	9,611
Secondary Roads	78
Developmental Roads	2,749
Total	19,952
Minor Roads (30th June, 1939)	98,339
Western Division (30th June, 1946)	7,905
Total	126,196

(*b*) *Composition.*	Miles.
	(30th June, 1939)
Wood block	32
Cement concrete	332
Asphaltic concrete	248
Tar or bituminous macadam	3,282
Surfaced water-bound macadam or gravel	2,591
Water-bound macadam	3,684
Gravel or crushed rock	27,037
Formed only	25,091
Cleared or natural surface only	63,761
Total	126,058

(iii) *Main Roads Department.* (*a*) *General.* An amendment to the Main Roads Act in 1945 provides for the co-ordination between public authorities in the construction of new road projects estimated to cost over £5,000. Shire, municipal and government departments will be required to submit details of these projects to the Commissioner for Main Roads in order to co-ordinate councils' road works with the planned development of the State main roads system. Provision was also made for the Department to exercise greater control, in the interest of safety, over advertising signs on main roads, and for the referring to the Department of proposed new road connexions with main roads in order to avoid unnecessary junctions. Other provisions relate to a new classification of main roads as " motor ways ", and to the proclamation of main road reserves.

In December, 1944, the Department of Main Roads organization, after completion of the work allotted to it, was withdrawn from the Northern Territory, where it had played an important part in the construction of the north-south road (Stuart Highway) connecting Alice Springs and Darwin. The following summary shows the main road works carried out there in each of the years 1940 to 1944 :—

1940.—Construction of Dunmara–Larrimah portion of road, 86.5 miles.

1941.—Construction of major part of road Darwin–Adelaide River, 68.5 miles, to a standard to meet military requirements.

1942.—Construction of road Adelaide River–Katherine, 148 miles, including bridges south of Katherine.

1943.—Maintenance of Darwin–Larrimah section, 332 miles, and bituminous surfacing of part of the road.

1944.—Construction of access roads to aerodromes and completion of bituminous resurfacing and surfacing of road from Darwin towards Pine Creek, 114 miles.

The total cost of the works carried out by the Department in the Northern Territory during the period 1940 to 1944 was £2,784,000.

Despite efforts to commence works of construction or reconstruction on main roads in the County of Cumberland, progress during 1945–46 was inconsiderable because of causes arising out of the war. In the country, preference was given chiefly to works which had been in hand, but were discontinued because of the war. Maintenance work was carried out as well as shortages and high costs of certain materials permitted, and a limited number of developmental works was commenced. Special defence works were carried out on a reduced scale during 1945–46, and the Department undertook to construct streets of access to dwellings being erected by the State Housing Commission.

Investigation and planning to provide for the present and future needs of road traffic in the County of Cumberland, in Newcastle and district, and in the Wollongong–Port Kembla district which was commenced in 1943 with very limited staff, was continued during 1945–46.

(*b*) *Receipts and Payments.* The receipts and payments of the Department of Main Roads for the four years 1942–43 to 1945–46 compared with the income and expenditure for 1938–39 are shown below. The particulars include extensive defence works, whose cost to 30th June, 1946 amounted to £7,546,158, constructed in New South Wales and elsewhere on behalf of the Commonwealth Government. Commencing with the year 1941–42 a change was made to a receipts and payments system of accounting :—

DEPARTMENT OF MAIN ROADS, NEW SOUTH WALES: RECEIPTS AND PAYMENTS.

Item.	1938–39. (a)	1942–43.	1943–44.	1944–45.	1945–46.

Total	3,711,384	6,198,693	4,059,641	3,682,930	3,477,243

(*a*) Income and expenditure. (*b*) Not fully comparable with corresponding figures in following years. (*c*) Includes maintenance and construction, respectively, of roads and bridges outside New South Wales—£665,091 and £2,661,572 to 30th June, 1946.

The figures shown above represent the aggregate receipts and payments of three funds—the County of Cumberland Main Roads Fund, the Country Main Roads Fund and the Developmental Roads Fund. From 1st January, 1925 to 30th June, 1946, receipts amounted to £77,330,727 and payments to £74,729,342. Particulars of the individual funds are—County of Cumberland, receipts £21,706,585, payments £20,137,133; Country, £52,410,721, £51,423,810; Developmental, £3,213,421, £3,168,399.

The total expenditure on roads streets and bridges in the State by all authorities during the years 1938–39 and 1942–43 to 1945–46 was, respectively, £8,894,099, £3,614,502, £4,251,306, £4,606,189 and £5,251,638. These figures are approximate, and, for the years 1942–43 and 1943–44, subject to revision. They include expenditure on construction, maintenance and direct administration, but not on debt charges. Expenditure on the Sydney Harbour Bridge is not included.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway, two railway tracks and two tramway tracks, and there is also a footway on each side. The capital cost of the bridge to the 30th June, 1946, was £9,746,329, but this amount will be reduced by approximately £138,000 upon the disposal of all surplus resumed property. The portion met from repayable loan funds, over £8,000,000, is to be repaid over a period of 53 years, ending approximately in 1985. The accumulated balance of the Bridge Account to 30th June, 1946, showed a deficiency of £545,241. The following table shows income and expenditure for the years 1938–39 and 1942–43 to 1945–46 :—

SYDNEY HARBOUR BRIDGE, NEW SOUTH WALES : INCOME AND EXPENDITURE.

During 1945–46, 25,899,000 rail travellers, 23,299,000 tram and omnibus travellers, and 9,779,000 road travellers in 5,515,000 road vehicles crossed the bridge.

2. **Victoria.**—(i) *General.* With the object of improving the main roads of the State the Country Roads Board was established by legislation passed in 1912. The principal duties of the board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

(ii) *Length of Roads and Streets.* The approximate length of all roads and streets in Victoria at the end of 1945, according to composition, was as follows :—

	Miles.
Wood or stone	67
Portland cement concrete	146
Asphaltic concrete and sheet asphalt	223
Tar or bitumen surface seal	8,973
Waterbound macadam, gravel, sand and hard loam pavements ..	26,062
Formed only	24,842
Surveyed only	43,085
Total	(*a*)103,398

(*a*) Includes 2,909 miles State Highways.

(iii) *Country Roads Board.* (*a*) *General.* The end of the war brought about a reduction in the expenditure on defence works carried out by the Victorian Country Roads Board. The total expenditure on these works to 30th June, 1946, was £6,135,537, of which £2,454,534 was spent on works in Central Australia and Northern Territory. The works included the strengthening and sealing of the North-South Road (Stuart Highway), aerodrome construction, and surfacing at various places.

Reconstruction and maintenance of State highways and main roads were restricted during 1945–46 because of post-war difficulties, and the work done was confined strictly to what was essential. Provision was made for linking up sections of developmental roads on which funds had already been spent, and for completing short lengths of road of an urgent nature.

(*b*) *Receipts and Payments.* Funds created under the Act were the Country Roads Board Fund, the Loan Account and the Developmental Roads Loan Account. Particulars of the operations of these funds, together with those of the Federal Aid Roads and Works Account, are given hereunder :—

Country Roads Board Fund. All fees (other than fees for licences to drive motor cars) and fines under the Motor Car Act, and all registration fees and fines for traction engines, less cost of collection of such fees and fines, are credited to this fund. Particulars of receipts and payments connected with Commonwealth Defence Works are not included therein, but some detail on expenditure may be found on the following page. The total receipts and payments for the years 1938–39 and 1942–43 to 1945–46 were as follows :—

COUNTRY ROADS BOARD FUND, VICTORIA : RECEIPTS AND PAYMENTS.

Country Roads Board Loan Account. Loans have been authorized from time to time under the Country Roads Acts for permanent works on main roads and State highways. During the years ended 30th June, 1945 and 1946 there were no transactions. The total expenditure to 30th June, 1946, was £5,047,126.

Developmental Roads Loan Account. This fund was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan moneys raised were exhausted at 30th June, 1937, the total expenditure at that date being £6,425,757.

Federal Aid Roads and Works Account. Revenue and expenditure in respect of the Federal Aid Roads and Works Account, particulars of which are not included above, were as follows :—

Item.	1938–39.	1942–43.	1943–44.	1944–45.	1945–46.

(*a*) Includes amounts contributed by the Commonwealth Government under the provisions of the Federal Aid Roads and Works Acts.

3. **Queensland.**—(i) *General.* Under the Main Roads Act 1920 a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925 the Board was abolished and its powers conferred upon a single Commissioner. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, farmers', mining access and tourist roads or tourist tracks, and, under certain circumstances, to undertake their construction and maintenance. With the exception of State highways, mining access roads or tourist tracks, no road can be proclaimed until the Commission has considered any objections thereto lodged by interested local authorities.

Certain major roads are constructed and maintained by the Main Roads Commission with assistance from the local authorities, while roads of local importance are constructed and maintained solely by these authorities. In many cases construction is subsidized by the State Government by means of Treasury loans. Other roads are built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* The total length of roads and streets in Queensland at 30th June, 1946, was—

	Miles.
Concrete	71
Bitumen	3,328
Macadam	7,209
Other formed	42,998
Unconstructed	78,603
Total	132,209

Roads gazetted by the Main Roads Commission as at 30th June, 1946, and their respective lengths were :—State highways, 6,983 miles ; main roads, 9,932 miles ; developmental roads, 244 miles ; tourist roads, 247 miles ; other roads, 1,033 miles ; total, 18,439 miles.

(iii) *Main Roads Commission.* (*a*) *General.* Among the more important defence road works carried out by the Queensland Main Roads Commission was the construction of the middle section (99 miles) of the Birdum–Tennant Creek Road (304 miles), in the Northern Territory, the remainder of the road being built by the Department of Main Roads, New South Wales (the northern 85 miles), and the Highways Department, South Australia (the southern 120 miles). The new route of the North-South Road, whose entire length from Alice Springs to Darwin is 954 miles, was constructed as far as possible on sounder, higher and better drained country than the old route, which generally followed the overland telegraph line over open plain country. The Queensland section was constructed in 88 days, the total cost being about £64,000. The total cost of the entire road was £2,840,000. Another important road work was the construction of the Tennant Creek (N.T.)–Mount Isa (Qld.) Road (403 miles). Preliminary work of clearing and formation of the 286 miles from Camooweal on the Queensland border to the junction with the North-South Road was completed in 52 working days, and metalling was commenced before the entry of Japan into the war. The construction of the section in Queensland from Mount Isa to Camooweal had been previously under way, but the organization on this job had been reinforced and transferred across the border to complete the Northern Territory section first. The advent of the Japanese into the war made necessary a first-class all-weather highway, and in March, 1942 the organization was built up to meet the new conditions. The gravelling of the whole length was completed in February, 1943, and the bitumen surfacing in April, 1944. Construction included the erection of eight bridges on major water-ways, concrete slab crossings of all other important creeks, and the sinking and equipping of 22 bores. The cost of the road was £1,100,000. Other defence road work was the construction of the Ipswich–Duaringa section of the Inland Defence Road (the portion from Duaringa to Charters Towers being constructed by the Department of Main Roads, New South Wales), the Charleville–Blackall Road, the Banana–Gladstone Road, and the Toowoomba–Landsborough lateral defence road, all forming part of the strategic road construction plan. The Inland Defence Road, 875 miles in length, cost £2,127,000, and the Charleville–Blackall Road, 187 miles, cost about £285,000. The other two roads were each about 80 or 90 miles long. In addition to these roads, about 200 miles of roads, at an approximate cost of £350,000, were constructed on the Atherton Tablelands.

Apart from road works, extensive work was carried out in the construction and maintenance of aerodromes, a flying-boat base, landing-strips, shipping slipways, jetties, gun emplacements and ammunition storages. A graving dock, involving the expenditure of over £1,000,000, was constructed on the Brisbane River. With the cessation of hostilities in the Pacific, works for the Services and the Commonwealth practically ceased, although a few jobs, principally at aerodromes, have since been requested.

The extent of the Commission's activities can be gauged by the following figures of disbursements in connexion with defence work, including the purchase of plant and materials, during the years 1939–40 to 1945–46, and the total to 30th June, 1946 :—

	£
1939–40	284,000
1940–41	303,000
1941–42	2,197,000
1942–43	10,576,000
1943–44	12,001,000
1944–45	2,760,000
1945–46	792,000
Total	28,913,000

During 1945–46 (1944–45 in brackets), the Commission completed 107 (122) miles of new roadway, while 68 (89) miles of previously improved road were further improved in process of stage construction. At the end of the year a programme involving 243 (150) miles of new work, and 292 (152) miles of stage construction was in hand or authorized. The total length of road constructed from the inception of Main Roads operations to 30th June, 1946 (1945 in brackets) was 8,424 (8,316) miles. Bridges of all types to a length of 2,120 (1,021) lineal feet were constructed during 1945–46 (1944–45), bringing the total constructed by the Commission to 137,807 (135,687) feet, approximately 26 miles. In addition, at 30th June, 1946 (1945), 4,635 (2,450) feet were under construction.

The total mileage of roads controlled by the Commission at 30th June, 1946 (1945) was 18,439 (17,183).

(*b*) *Receipts and Payments.* The funds of the Main Roads Commission are obtained chiefly from motor vehicle registration and transport licensing fees, contributions from the Federal Aid Roads and Works Fund, loans from the State Treasury, and the Developmental Works and Projects Fund. The total receipts and payments, including amounts for defence works, during each of the years 1938–39 and 1942–43 to 1945–46 are shown below :—

4. **South Australia.**—(i) *General.* The Highways Act 1926–44 created a Commissioner of Highways and provided for a Highways Fund. The Commissioner is virtually empowered to determine upon which main roads he will spend the moneys available ; in doing which he has to take into account (*a*) the moneys voted or likely to be voted by Parliament for main roads ; (*b*) whether the road is or will be the main trunk route (i) connecting with its market or nearest port or railway station any large producing area or any area capable of becoming in the near future a large producing area, (ii) connecting two or more large producing areas, or areas capable of becoming in the near future large

producing areas, or between two or more large centres of population, (iii) between the capital and any large producing area or any large centre of population, (iv) between the capital of the State and that of any other State; and (c) whether the area through which the road passes is, or in the near future will be, sufficiently served by a railway or railways.

After providing for certain fixed charges the Highways Fund is credited with the balance received from (a) licence fees and registration fees under the Road Traffic Act 1934–44; (b) fees for hawkers' licences; and (c) all loans raised and appropriated for roads. All moneys received by the State from the Commonwealth under the Federal Aid Roads and Works scheme are also expended by the Commissioner of Highways under the general provisions of the Highways Act.

(ii) *Length of Roads.* The total length of roads in use for general traffic within local governing areas at 30th June, 1946, was as follows:—

	Miles.
Wood or stone paved	9
Bituminous or cement concrete	294
Bituminous or cement penetration	2,122
Tar paved, metalled or gravelled	14,640
Formed only	8,823
Surveyed but not formed	26,310
Total	52,198

Of this total 7,554 are main roads and 44,644 district roads. The Highways Department has improved 2,250 miles to modern types.

(iii) *State Highways and Local Government Department.* (a) *General.* During the war the South Australian Highways and Local Government Department, in common with other State road organizations, carried out considerable road and other defence work on behalf of the Commonwealth. The cost of this work, which was reimbursed by the Commonwealth, was as follows:—

	£		£
1940–41	190,032	1944–45	46,588
1941–42	563,796	1945–46	2,723
1942–43	527,352		
1943–44	62,796	Total	1,393,287

The various projects undertaken included work on the North-South and East-West Roads.

A programme has been prepared of road works proposed to be carried out during the period of five years after the cessation of hostilities. This provides for the reconstruction of approximately 2,850 miles of main roads throughout the State at an estimated cost of more than £3,000,000, the greater proportion of which will be provided from motor vehicle taxation. The programme includes (i) the realignment and widening of roads constructed in the early stages of the first five-year plan (prepared in 1936, but suspended because of the war), now below the accepted standard necessary for modern traffic, (ii) the construction or reconstruction of existing unimproved main roads, and (iii) the construction of roads to assist development in the newer settled areas, with particular reference to the south-eastern part of the State. Heavy plant is being acquired for these purposes, and it is expected that the work will be well on the way at an early date.

(b) *Receipts and Payments.* The following table shows particulars of receipts and payments during the years 1942–43 to 1945–46 of funds controlled by the Highways and Local Government Department. Comparable figures for 1938–39 are not available.

STATE ROADS (ALL FUNDS COMBINED), SOUTH AUSTRALIA: RECEIPTS AND PAYMENTS.

(*a*) Part only. *See* above.

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1938–39 and 1942–43 to 1945–46 was, respectively, £1,966,000, £953,000, £1,141,000, £1,198,000 and £1,461,000.

5. **Western Australia.**—(i) *General.* In Western Australia the construction, maintenance and management of roads, streets and bridges are the functions of Municipalities and Road Districts.

(ii) *Length of Roads and Streets.* Certain principal highways and developmental roads are proclaimed main roads under the control of the Commissioner of Main Roads, appointed under the Main Roads Act 1930–39. The total known length of streets and roads in existence in the various Municipalities at 31st October, 1946, and in Road Districts at 30th June, 1946, was as follows:—

	Miles.
Concrete	5
Bituminous	2,925
Granite, limestone, etc., waterbound	321
Gravel waterbound	9,742
Other constructed surfaces	232
Formed only	27,286
Unprepared	(*a*) 33,737
Total	74,248

(*a*) Incomplete.

During the war the East-West Road (Forrest Highway) was built, at a cost of £300,000. The road is 1,074 miles long and connects Port Augusta, South Australia to Norseman, Western Australia. Work was also carried out on the Meekatharra–Marble Bar Road, 462 miles, connecting the railway town of Meekatharra to the rail-head at Marble Bar. The work consisted mainly of strengthening the existing road, deviating where necessary, and raising it in certain parts.

(iii) *Receipts and Payments.* The following table shows the combined transactions of the Main Roads Contributions Trust Account, the Metropolitan Traffic Trust Account, the Transport Co-ordination Fund and the Federal Aid Roads and Works Account during the years ended 30th June, 1939 and 1943 to 1946.

ROAD FUNDS, WESTERN AUSTRALIA: RECEIPTS AND PAYMENTS.

Total	1,145,273	373,711	370,230	448,038	549,104

(*a*) Includes net transfers to and from other funds.

6. **Tasmania.**—(i) *General.* In Tasmania the cost of construction of roads and bridges is borne almost entirely by the State Government. During 1945–46 the expenditure of the Public Works Department on roads, tracks and bridges amounted to £347,767, of which £314,715 was charged to road funds, £16,640 to revenue, £15,889 to loan, and £523 to crown lands funds. Roads were amongst the large range of defence works, valued at £1,604,925, carried out by the Department during the war. Others included water supply, sewerage and drainage, buildings, aerodrome construction, ship repair and construction and fuel storage.

Under the Transport Act 1938, which came into operation on 1st July, 1939, the Transport Commission was constituted to co-ordinate, regulate, control, and improve the means of, and facilities for, transport by road, rail or air within the State. Revenues at its disposal for road and motor traffic purposes are the Federal Aid Roads and Works Grant, motor vehicle registration fees and tax, and licensing fees for drivers and public motor vehicles. Under the Roads and Jetties Act 1944, which provides for the classification of the whole of the roads of the State so that they will be adequately and efficiently maintained, the cost of maintenance of roads classified as State highways, tourist roads and developmental roads will be borne by the Transport Commission. It will also be responsible for a proportion of the cost of maintenance of main and secondary roads. Municipal councils will bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads, except in special cases. Roads controlled by the Commission at 30th June, 1946, were : State highways, 1,199 miles, main roads, 647 miles, secondary roads, 136 miles, tourist roads, 50 miles, developmental roads, 11 miles, total 2,043 miles.

(ii) *Length of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1942, was as follows :—

	Miles.
Sheet asphalt on concrete base	1
Other bituminous	788
Concrete	6
Granite, limestone, etc., waterbound	4,797
Surfaces of lower grade	6,794
Total	12,386

(iii) *Receipts and Payments.* The table hereunder shows particulars of the receipts and payments of the combined Road Fund and Federal Aid Roads and Works Funds under the control of the Transport Commission for the years 1939–40 and 1942–43 to 1945–46 :—

Total	319,285	202,907	267,839	366,915	377,924

(iv) *Hobart Bridge.* Under the Hobart Bridge (Acquisition and Administration) Act 1944 the Transport Commission has been responsible for the administration, control and management of the Hobart Bridge and transport services since 11th December, 1944. Receipts from bridge tolls from that date to 30th June, 1945 amounted to £13,306, and expenditure to £4,003. Capital expenditure amounted to £31,264. Corresponding figures for 1945–46 were £29,349, £8,065 and £22,641.

7. **Summary of Roads used for General Traffic.**—The following table represents an attempt to classify the roads used for general traffic in Australia, at the latest date available, according to States and to certain broad composition groups. The results are not entirely satisfactory, (i) because the whole of Australia is not covered, (ii) because the dates of reference differ, and (iii) because the figures constituting each group are not wholly comparable, State by State. It is hoped, however, despite these defects, that the table will provide an approximate and general idea of the main types of roads in Australia.

The data in the table are compiled from publications of the State Government Statisticians, and are derived mainly from local government sources. They therefore exclude the Territories of the Commonwealth and probably unincorporated areas in some States. Furthermore, the figures on the returns supplied by the local government authorities are in some cases of doubtful accuracy. Details of the composition of roads, as far as they are available, vary to such an extent between States that it was considered preferable to show here only major divisions, rather than to attempt greater dissection, which would have resulted either in a lengthy total column incomplete for most of its items, or, by the expedient of " forcing ", in some mixed classes of little value. Even the broad classes shown suffer somewhat from this latter defect, but not to an extent sufficient to mar the table as a whole.

Groups 1–4 as shown in the table include, respectively, the following types of composition :—

1. *Wood or Stone.* Wood blocks ; stone paved.
2. *Concrete.* Cement concrete ; asphaltic concrete ; bituminous concrete ; sheet asphalt on concrete base.
3. *Bituminous.* Tar or bituminous macadam ; tar and bituminous surface seal ; surfaced water-bound macadam or gravel ; bituminous or cement penetration.
4. *Macadam and Other.* Water-bound macadam ; granite, limestone, and blast-furnace slag, water-bound ; gravel water-bound ; gravel or crushed rock ; tar paved, metalled and gravel ; gravel, sand and hard loam pavements.

Groups 5 and 6 include roads so-called mainly because they are used for general traffic, irrespective of their surfaces, prepared or otherwise.

It will be noticed that some of the terms used above are practically synonymous. Such terms are, of course, not used by any one State, but are the classifications adopted by different States. This variety of classification is responsible, too, for some irregular grouping.

For details of any particular State, *see* the respective paragraphs in the preceding pages.

MILEAGE OF ROADS USED FOR GENERAL TRAFFIC.

Composition of Road.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
	30th June, 1939.	31st Dec., 1945.	30th June, 1946.	30th June, 1946.	31st Oct., and 30th June, 1946. (*a*)	30th June, 1942.	
	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.
1. Wood or stone ..	32	67	..	9	..	..	108
2. Concrete ..	580	369	71	294	5	7	1,326
3. Bituminous ..	5,873	8,973	3,328	2,122	2,925	788	24,009
4. Macadam and other ..	30,721	26,062	7,209	14,640	10,295	4,797	93,724
5. Formed only ..	25,091	24,842	42,998	8,823	27,286	(*b*)2,274	131,314
6. Cleared, or natural surface, only ..	63,761	43,085	78,603	26,310	33,737	(*b*)4,520	250,016
Total ..	126,058	103,398	132,209	52,198	74,248	12,386	500,497

(*a*) Municipalities and Road Districts respectively. (*b*) Approximate.

It will be seen from the foregoing table that less than one-quarter of the road lengths of Australia has actually been constructed, the remainder, for the greater part, being in little more than the natural state. The percentages for each group are as follows :—Group 1, 0.02 ; Group 2, 0.26 ; Group 3, 4.80 ; Group 4, 18.73 ; Group 5, 26.24 ; Group 6, 49.95. The percentage of constructed lengths to total length in each State is as follows :—New South Wales, 29 ; Victoria, 34 ; Queensland, 8 ; South Australia, 33 ; Western Australia, 18 ; Tasmania, 45. Comparisons between the States should be made with caution, however, because, in addition to the defects enumerated at the beginning of this section, factors such as the area, physiography, density and distribution of population, nature of economic activity, other facilities for transport, etc., in each State must be taken into account.

8. **Summary of Expenditure on Roads and Bridges.**—(i) *General.* Figures showing the total expenditure on roads and bridges in all States are not available. Such totals are very difficult to obtain, not only because of the number of States, but also because of the number of authorities concerned. In most States there are three classes of authorities—the State Government, the central road authority, and the numerous local government bodies. Both State Government and local government bodies operate through revenue and loan funds, and payments may be made by the State Government direct from either fund, or through the funds of other authorities. The expenditure of the central road authority may also be direct or indirect. Consequently the problem of duplication caused by inter-fund payments arises. On the other hand, some expenditure may be omitted because separate particulars are not available, or they may be overlooked by the compiler. Ignorance of the precise nature of items may cause either incorrect inclusion or omission. To produce accurate figures would entail more research than at present can be undertaken.

The two paragraphs following therefore represent only : (i) aggregate expenditure from the various State road funds referred to in the foregoing pages, and (ii) loan fund expenditure by State Governments. No direct expenditure by local government bodies is included. Sub-section 2. Finances, of the foregoing section on local government authorities, contains some particulars of local government revenue and expenditure in connexion with roads, streets and bridges (*see* pages 518 and 521).

(ii) *Aggregate Expenditure from Road Funds.* The following table shows the expenditure on the construction and maintenance of roads, including payments to local government bodies, by each State during the years 1938–39 and 1942–43 to 1945–46, as summarized from the foregoing sections. Expenditure on administration, debt charges, Commonwealth defence works, payments to State consolidated revenues, and on plant and materials is not included.

ROADS AND BRIDGES: AGGREGATE EXPENDITURE FROM ROAD FUNDS.

Year ended 30th June—	N.S.W. (*a*)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
1939 ..	3,257	2,099	2,405	692	1,067	(*b*) 272	9,792
1943 ..	1,718	658	1,390	363	283	164	4,576
1944 ..	2,017	808	851	481	306	191	4,654
1945 ..	2,054	977	1,275	507	382	250	5,445
1946 ..	2,373	1,071	1,341	605	480	331	6,201

(*a*) Excludes Sydney Harbour Bridge. (*b*) Year 1939–40.

The figures above are not completely comparable as between States, and, in some States, as from year to year.

(iii) *State Net Loan Expenditure.* The following table shows the net loan expenditure by State Governments on roads and bridges during the years 1938–39 and 1942–43 to 1945–46, and also the aggregates to 30th June, 1946. Some of the expenditure included here is also included in the previous table.

ROADS AND BRIDGES: STATE NET LOAN EXPENDITURE.

Year ended 30th June—	N.S.W.	Victoria.(*a*)	Q'land.(*b*)	S. Aust.(*c*)	W. Aust.	Tasmania. (*d*)	Total.
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
1939 ..	1,850	*Cr.* 22	357	200	145	141	2,671
1943 ..	10	*Cr.* 30	*Cr.* 13	*Cr.* 17	..	20	*Cr.* 30
1944 ..	*Cr.* 69	*Cr.* 31	164	*Cr.* 16	..	30	78
1945 ..	*Cr.* 43	*Cr.* 21	85	*Cr.* 17	..	16	20
1946 ..	284	*Cr.* 26	309	*Cr.* 16	..	16	567
Total to 30/6/46	21,097	(*e*) 12,667	7,058	3,809	3,183	5,855	53,669

(*a*) Represents expenditure from loan and on account of loan. (*b*) Amounts include relative expenditure by the Public Estate Improvement Branch. (*c*) Excludes credits arising from cancellation of securities redeemed from Sinking Fund. (*d*) Actual amounts expended by Department of Public Works. (*e*) Gross loan expenditure.

The loan expenditure shown above does not represent the total expenditure on roads and bridges. It relates for the most part to capital expenditure on new works, and it must be supplemented by similar expenditure from loan funds of local bodies and by expenditure by central road authorities and also from State revenues.

§ 4. Water Supply, Sewerage and Drainage.

1. **New South Wales.**—(i) *General.* The largest two domestic water supply and sewerage systems are controlled by statutory boards consisting of a president and a vice-president appointed by the State Government and other members elected by local councils. These are (*a*) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra, and (*b*) the Hunter District Water Board, serving the Newcastle area. At Broken Hill a similar board includes a representative of the mining companies. At the end of 1944 five county councils had been created with authority to supply water to towns in constituent municipalities and shires, one of them being also empowered to conduct a sewerage system. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by municipal and shire councils.

(ii) *Water Supply—to 30th June*, 1946. (*a*) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined capacity of 125,144 million gallons, drain a catchment area of 376 square miles. Water is drawn also from the Warragamba River, with a catchment of 3,383 square miles. This system is being developed, and proposals exist for a dam to be built to a height of 342 feet above bed level, giving a safe draught of 260 million gallons per day. The existing temporary storage is supplied by a weir 50 feet high, with a maximum daily off-take of 40 million gallons. At 30th June, 1946, there were 93 service reservoirs with a combined capacity of 537.6 million gallons, and the length of mains was 4,656.8 miles.

(*b*) *Newcastle.* The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. About 30 square miles of water-bearing sand at present being tapped are expected to give a continuous yield of 15 million gallons a day. Service reservoirs distributed throughout the Water Supply District number 42, with a total storage capacity of 106 million gallons. The total length of mains at 30th June, 1946, was 1,098 miles.

(*c*) *Water Supplied, etc.* The following table gives the number of improved properties, the estimated population supplied, and other details for the years 1944–45 and 1945–46 :—

WATER SUPPLY, SYDNEY(*a*) AND NEWCASTLE : SERVICES.

System.	Improved Properties for which Water Main available.	Estimated Population Supplied.	Average Daily Supply.	Total Supply for the Year.	Average Daily Supply.	
					Per Property.	Per Head of Estimated Population.
	No.		Million Gallons.	Million Gallons.	Gallons.	Gallons.
Sydney (*a*)—						
1944–45 ..	374,660	1,596,647	112.6	41,107	301	71.2
1945–46 ..	378,277	1,628,269	121.7	44,437	322	74.8
Newcastle—						
1944–45 ..	54,015	214,184	17.6	6,413	325	81.4
1945–46 ..	55,171	217,956	17.6	6,413	319	80.1

(*a*) Includes part of South Coast.

(iii) *Sewerage and Drainage—to 30th June*, 1946. (*a*) *Metropolitan.* The Sydney sewerage system consists mainly of three outfall systems discharging into the Pacific Ocean. At 30th June, 1946, there were six individual outfalls and six treatment works connected with 2,780 miles of sewers, and serving a population of 1,178,064 persons.

Stormwater drainage channels under the Metropolitan Water, Sewerage and Drainage Board's control at the same date were 99 miles long.

(*b*) *Newcastle.* The main sewerage system of the Newcastle area discharges into the Pacific Ocean at Merewether Gulf. In some of the outlying districts treatment works have been installed. There were 37 miles of stormwater drains at 30th June, 1946.

(c) *Particulars of Services.* The following table supplies details of sewerage services and stormwater drains as at 30th June, 1945 and 1946.

SEWERAGE AND DRAINAGE, SYDNEY(*a*) AND NEWCASTLE : SERVICES.

System—at 30th June.	Improved Properties for which Sewer Available.	Population Served.	Length of Sewers.	Length of Storm-water Drains.

(*a*) Includes part of South Coast. (*b*) Includes provision for renewals, long service leave, loss on exchange, etc.

(v) *Country Water Supply and Sewerage Systems**. The capital indebtedness of the country water and sewerage schemes controlled by municipalities, shires and county councils was £6,923,754 at 31st December, 1944, namely, £4,265,076 for water and £2,658,678 for sewerage. Of the foregoing amounts, Government advances amounted to £631,680. Debt of the municipalities amounted to £5,352,826, shires to £1,032,902 and county councils to £538,026. At 31st December, 1944, country water supply services were in operation or under construction in 76 municipalities, 44 shires and four county councils and country sewerage services in 53 municipalities and 11 shires.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers ; only a small quantity is sold directly to private consumers. The capital indebtedness of these systems was £2,102,084 at 31st December, 1946.

There are also the Mulwala Water Supply and Sewerage System, constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System administered by the Department of Public Works in conjunction with the Junee supply.

A water supply system at Broken Hill was transferred from the control of the then Department of Works and Local Government (now the Department of Public Works) to a special Board on 1st January, 1939. Capital debt owing to the State was written off and the Board commenced to raise loans on its own behalf to finance the construction of water amplification works and sewerage services. The debenture debt was £334,625 at 31st December, 1946.

2. **Victoria.**—(i) *Melbourne and Metropolitan Board of Works.* (*a*) *General.* All land within a radius of 13 miles of the Post Office at the corner of Bourke and Elizabeth-streets, Melbourne, and the remaining portions of the Cities of Mordialloc, Moorabbin and Nunawading and certain portions of the Shires of Eltham, Doncaster, and Templestowe, and Dandenong (all of which portions are outside such radius), but excluding a portion of the Shire of Werribee within such radius, are included in the metropolis for water supply, sewerage, main drainage and river improvement purposes. This territory has an area of 443 square miles and comprises 27 cities and parts of one other city and 10 shires. The Board comprises 48 members, including the chairman, who is elected every four years by the other members. These members, or commissioners, are from time to time elected by the councils of the municipal districts wholly or partly within the metropolis. The principal functions of the Board are to control and manage the metropolitan water supply system ; to provide the metropolis with an efficient system of main and general sewerage ; to deal with main drains and main drainage works ; and to control and manage the rivers, creeks and watercourses within the metropolis.

A summary of the combined financial results of the operations of the Board is shown below in respect of the years 1944–45 and 1945–46 :—

MELBOURNE AND METROPOLITAN BOARD OF WORKS : FINANCES.

Year.	Capital Debt.	Revenue.	Expenditure.					
			Working Expenses.	Interest and Exchange.	Sinking Fund.	Depreciation, Renewals, Reserves and Other Funds.	Other.	Total.

---

* Excludes the area of operation of the Hunter District Water Board (Newcastle).

In the following tables showing particulars of the finances of each of the various services, exchange, sinking fund, depreciation, renewal, etc., charges against General Revenue Account amounting to £593,475 in 1944–45 and to £404,350 in 1945–46 have not been included.

(*b*) *Water Supply.* The following table gives particulars of water supply services for 1944–45 and 1945–46. The rate levied in 1945–46 was 6d. in the £1 on the net annual value of the property served.

WATER SUPPLY, MELBOURNE: SERVICES.

Year.	Number of Properties Supplied.	Estimated Population Supplied.	Average Daily Consumption.	Total Water Consumption for the Year.	Average Daily Consumption.		Length of Mains, Reticulation, etc.
					Per Property.	Per Head of Estimated Population.	
			Million Gallons.	Million Gallons.	Gallons.	Gallons.	Miles.
1944–45 ..	305,730	1,213,748	96.2	35,107	315	79.2	3,492
1945–46 ..	308,731	1,225,662	78.4	28,611	254	64.0	3,539

The financial operations of the Melbourne water supply system for the years 1944–45 and 1945–46 are shown below. The total capital cost to 30th June, 1945, was £13,179,202 and to 30th June, 1946, £13,347,341.

WATER SUPPLY, MELBOURNE: FINANCES.

(*d*) *Drainage and Rivers.* At 30th June, 1946 the Melbourne and Metropolitan Board of Works had 115 miles of main drains under its control—98 miles of underground, 12 miles of constructed open drains, and 5 miles of natural watercourses and unlined open drains. The following table gives details of the financial operations of the Melbourne drainage and river control system for the years 1944–45 and 1945–46. The total capital cost to 30th June, 1945, was £1,784,054 and to 30th June, 1946 £1,837,847.

(ii) *Geelong Waterworks and Sewerage Trust.* (*a*) *General.* The Geelong Waterworks and Sewerage Trust, constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910, consists of five commissioners. The amount of loan money which may be raised is limited to £900,000 for water supply undertaking, £760,000 for sewerage undertaking, and £270,000 for sewerage installation to properties under the deferred payment system. The population supplied is estimated by the Trust at 51,500. This and other general information relates to 30th June, 1946.

(*b*) *Water Supply.* The catchment area is about 16,000 acres. The storage capacity of all reservoirs and service basins is 2,738 million gallons. In addition, the State Rivers and Water Supply Commission has made available a supplementary supply of a minimum quantity of 545 million gallons of water per annum from the Bellarine Peninsula System. There are 320 miles of mains within the water supply area. The total expenditure on waterworks to 30th June, 1946 was £789,789. Expenditure for 1945–46 comprised £27,404 (£29,217 in 1944–45) on working expenses and £45,042 (£44,355 in 1944–45) on interest, sinking fund and reserves, and the revenue for the year 1945–46 was £57,667 (£66,255 in 1944–45). The sinking fund appropriations at June, 1946 amounted to £100,336. The replacement and contingencies reserve amounted to £121,275. There is a water rate of 1s. in the £1 (with minima of five shillings for unbuilt-on land and one pound for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 147 miles of main and reticulation sewers. The sewerage area is 9,571 acres, and the number of buildings within the sewered areas is 12,552, of which 12,532 have been connected. The number of buildings within the drainage area is 12,802. The total expenditure to 30th June, 1946 on sewerage works was £653,921, and on the cost of sewerage installation under deferred payment conditions £257,897 of which £163 is outstanding. The revenue in 1945–46 amounted to £45,193 (£44,788 in 1944–45) and the expenditure comprised £9,427 (£10,511 in 1944–45) on working expenses and £34,871 (£35,013 in 1944–45) on interest, sinking fund and reserves. Sinking fund appropriations at June, 1946 were £91,609. Replacement and contingencies reserve amounted to £90,410. A general rate of 1s. 2d. in the £1 is levied on the net annual value of ratable properties.

(iii) *The Ballarat Water Commission and the Ballarat Sewerage Authority.* (*a*) *General.* The Ballarat Water Commission was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commission constitute the Sewerage Authority. The Commissioners number seven, three (one of whom is chairman) being appointed by the Government, and four being elected by the Council of the City of Ballarat. General information is as at 31st December, 1946.

(*b*) *Water Supply.* The Water Supply District embraces an area of about 27 square miles, containing a population of about 45,000. The total storage capacity of the six reservoirs is 2,332 million gallons and the catchment area is 17,545 acres.

The capital cost of construction of the waterworks was £767,333 to 31st December, 1946. The liabilities are loans due to the Government, amounting to £270,444 at 31st December, 1946. The revenue for the year 1946 was £42,851 (£47,156 in 1945). Working expenses during 1946 amounted to £23,971 (£17,966 in 1945) and interest and other charges to £22,120 (£24,580 in 1945). A rate is levied of 1s. in the £1 on the net annual value of all ratable properties, with a minimum of 15s. per annum for land on which there is a building or water supply.

(*c*) *Sewerage.* The scheme as designed provides for a population of 90,000 persons, but at 30th June, 1946 about 39,700 persons were being served. The capital cost of sewerage construction works to 31st December, 1946, was £467,402. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. One hundred and one sewered areas had been declared as at 1st January, 1946, comprising 9,853 tenements, of which 8,913 were connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1946 amounted to £393,035, redemption payments at that date totalling £58,485. An expenditure of £187,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1946 (1945 in brackets) amounted to £36,375 (£34,869) and expenditure, including £23,947 (£24,080) on interest and redemption, to £33,858 (£33,264).

A general rate is levied of 1s. 6d. in the £1 of the net annual value of all properties within the drainage area.

(iv) *Sewerage Authorities.* At 30th June, 1946, 40 sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts and the systems were in operation in the following districts :—Ararat, Bairnsdale, Ballarat (*see* above), Benalla, Bendigo, Castlemaine, Colac, Dandenong, Dimboola, Echuca, Hamilton, Horsham, Kerang, Kyabram, Kyneton, Mildura, Mornington, Morwell, Murtoa, Nhill, Portland, Shepparton, Swan Hill, Wangaratta, Warracknabeal, Warragul and Warrnambool. At Beechworth, Euroa, Lorne, Sale, Werribee, Wodonga and Yarram, operations had been suspended and the undertakings at Charlton, Leongatha, Maffra, Maryborough, Traralgon and Yarrawonga had not been brought into operation. After Ballarat (*see* details above), Bendigo is the largest system, serving approximately 26,175 persons, with 6,565 properties connected to sewers.

(v) *Water Supply in Country Towns and Districts.* Most of the country waterworks are controlled by the State Rivers and Water Supply Commission, but in some instances the control is by waterworks trusts or by municipal corporations.

The waterworks controlled by the State Rivers and Water Supply Commission at 30th June, 1946 included 35 large reservoirs and 225 subsidiary reservoirs and service basins with a total storage capacity of 536,000 million gallons (1,969,970 acre feet). Length of channels was 14,842 miles and of pipe lines 1,112 miles. The quantity of water delivered to water users during 1945–46 was 557,625 acre feet. The table below gives a summary of the Commission's finances for operations in districts under its control for the years 1944–45 and 1945–46 :—

STATE RIVERS AND WATER SUPPLY COMMISSION, VICTORIA: FINANCES.(*a*)

Year.	Receipts.	Payments.					Total Loan Capital Expenditure to 30th June.
		Operating Expenses.	Interest on Capital Allotted.	Depreciation.	Redemption.	Total.	
	£	£	£	£	£	£	£
1944–45 ..	788,689	895,344	132,496	48,736	3,807	1,080,383	25,782,791
1945–46 ..	773,423	1,110,170	41,864	48,420	1,767	1,202,221	26,417,497

(*a*) Excludes Waterworks Trusts and Local Governing Bodies.

The financial operations of the State Rivers and Water Supply Commission form part of Consolidated Revenue Fund, but are included in this section for convenience. The major proportion of the interest payable is borne by the State and is additional to that shown above. The net expenditure borne by the State during 1945–46 was £1,511,616.

The Commission administered 80 rural districts during 1945–46 (28 irrigation districts, 34 waterworks districts, 4 flood protection districts and 14 drainage districts), and the reticulated pipe supplies for domestic and industrial purposes in 126 urban districts. In addition, 116 urban districts were administered by waterworks trusts and 16 by local governing bodies. The total loan capital expenditure of these trusts and local government bodies at 30th June, 1946 was £3,995,967, making a grand total of £30,413,464 when added to the figure for works under the control of the Commission. The net loan capital after redemption payments of £1,502,190, was £28,911,274.

3. **Queensland.**—(i) *The Metropolitan Works Board, Department of Works, Brisbane City Council.* (*a*) *General.* This organization conducts the water supply and sewerage systems of the City of Greater Brisbane, extending them, in the case of water supply, to the Cities of Ipswich and Redcliffe. Prior to 1928 water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council.

(*b*) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in brackets); Somerset Reservoir, 20,000 million gallons (20,000 million gallons); Lake Manchester, 5,806 million gallons (5,725 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 2,500,000 gallons (2,500,000 gallons); Enoggera Reservoir, 1,000 million gallons

(631 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are ten service reservoirs with a capacity of approximately 35.1 million gallons. The Somerset reservoir is under the control of the Stanley River Works Board and is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. The following table gives a summary of operations for the years 1944–45 and 1945–46 :—

WATER SUPPLY, BRISBANE : SERVICES.

Year.	Length of Trunk and Reticulation Mains.	Number of Services Connected.	Estimated Population Supplied.	Quantity Supplied.	Average Daily Supply.	Average Daily Supply per Head of Estimated Population.	Total Length of Trunk Mains.
	Miles.			Million Gallons.	Million Gallons.	Gallons.	Miles.
1944–45 ..	1,264	82,549	338,451	7,382	20.2	59.8	183
1945–46 ..	1,276	84,851	347,889	7,549	20.7	59.5	183

Water supplied to Ipswich and Redcliffe is not included in the table above. Adding this in, the total quantity supplied during 1944–45 was 8,007 million gallons and during 1945–46, 8,206 million gallons.

(c) *Sewerage.* The following table gives a summary of operations for the years 1944–45 and 1945–46 :—

SEWERAGE WORKS, BRISBANE : SERVICES.

Year.	Premises Connected.	Estimated Population Served.	Total Length of Sewers in operation.	Sewers within Premises.	Main and Reticulation Sewers.
			Miles.	Miles.	Miles.

1945–46..	41,381	169,662	1,219	684	536

(d) *Water Supply and Sewerage Works' Finances.* The following table gives particulars regarding finances for the years 1944–45 and 1945–46 :—

WATER SUPPLY AND SEWERAGE WORKS, BRISBANE : FINANCES.

Service and Year.	Capital Cost.	Revenue.	Working Expenses.	Interest, Redemption, etc. Charges.	Total Expenditure.	Surplus or Deficit.
	£	£	£	£	£	£
Water Supply—						
1944–45.. ..	6,425,791	763,510	179,980	300,541	543,339	+ 220,171
1945–46.. ..	6,637,459	754,521	210,718	301,609	550,605	+ 203,916
Sewerage—						
1944–45.. ..	6,472,030	240,559	56,771	336,310	416,129	— 175,570
1945–46.. ..	6,540,181	234,731	57,135	335,308	410,801	— 176,070

(ii) *Country Towns.* (*a*) *Water Supply.* In addition to the city of Brisbane, there were at 30th June, 1945, 85 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(*b*) *Sewerage Systems.* At 30th June, 1945, there were ten cities or towns outside the metropolitan area—Bundaberg, Cunnamulla, Goondiwindi, Mackay, Maryborough, Quilpie, Rockhampton, Toowoomba, Townsville and Warwick—with sewerage systems. Sewerage systems were in course of construction in Charleville and Ipswich.

(*c*) *Finances.* The receipts (other than loan) of water and sewerage undertakings controlled by the cities and towns referred to above (excluding one joint authority classed as semi-governmental) amounted to £491,803 in 1944–45. Expenditure amounted to £486,891, including £185,226 for debt charges. In addition, loan expenditure amounted to £132,493.

4. **South Australia.**—(i) *General.* The water supply and sewerage systems in this State were constructed and are maintained by the Engineering and Water Supply Department under the control of the Minister of Works. The works controlled comprise the Adelaide, Barossa, Baroota Creek, Beetaloo, Bundaleer, Tod River, Warren and other country water districts systems, the Morgan-Whyalla water supply system, the Adelaide metropolitan sewerage system, the Murray River Weirs, water conservation, and the Metropolitan Flood Waters Scheme.

(ii) *South Australian Waterworks.* (*a*) *Summary.* The table hereunder gives particulars of the area, capacity, etc. of combined metropolitan and country water works for the years 1944–45 and 1945–46 :—

WATERWORKS, SOUTH AUSTRALIA : SERVICES.

	Number.	Annual Value.				
		£	Acres.	Million Gallons.	Miles.	
1944–45 ..	193,109	6,980,468	11,873,499	23,904	6,781	105,329
1945–46 ..	196,021	7,035,516	11,901,977	23,910	6,845	103,462

(*a*) Excludes Morgan-Whyalla Water Supply—water sold by measure.

(*b*) *Finances.* Figures for 1944–45 and 1945–46 are shown in the following table.

WATERWORKS, SOUTH AUSTRALIA : FINANCES.

Year.	Capital Cost.	Revenue.	Working Expenses.			Interest and Sinking Fund Charges.	Profit or Loss.
			Administration.	Maintenance.	Total.		
	£	£	£	£	£	£	£
1944–45 ..	18,261,861	882,505	69,503	267,536	470,280	701,878	−289,653
1945–46 ..	18,712,037	853,406	81,936	305,434	520,078	685,615	−352,287

(iii) *Adelaide Waterworks.* At 30th June, 1946 the Adelaide waterworks supplied a district of 138,784 acres. The capacity of its reservoirs was 14,449 million gallons.

Particulars of finances for the years 1944–45 and 1945–46 are given below :—

ADELAIDE WATERWORKS : FINANCES.

Year.	Capital Cost.	Revenue.	Working Expenses.			Interest and Sinking Fund Charges.	Profit or Loss.
			Administration.	Maintenance.	Total.		
	£	£	£	£	£	£	£
1944–45 ..	5,092,958	537,017	31,880	92,592	149,292	200,920	+ 186,805
1945–46 ..	5,335,798	517,555	38,068	122,512	185,603	196,576	+ 135,376

(iv) *Adelaide Metropolitan Sewerage.* Particulars for 1944–45 and 1945–46 are given hereunder :—

ADELAIDE METROPOLITAN SEWERAGE : SUMMARY.

Year.	Length of Sewers.	Number of Connexions.	Capital Cost of Revenue-Producing Works.	Revenue.	Working Expenses.		Interest and Sinking Fund Charges.	Profit or Loss.
					Administration, Maintenance, etc.	Total.		
	Miles.		£	£	£	£	£	£
1944–45 ..	968	89,672	3,782,183	300,150	103,928	114,445	150,608	+ 35,097
1945–46 ..	985	91,201	3,874,065	300,207	111,381	121,554	148,283	+ 30,370

(v) *Country Water Supply.* Water district systems outside Adelaide at 30th June, 1946 served an area of 11,763,193 acres, and the capacity of the reservoirs was 9,417 million gallons. These figures exclude the Morgan-Whyalla supply system, which obtains its water from the River Murray. The storage tanks of this system had a capacity of 44 million gallons.

The following table gives financial information for 1944–45 and 1945–46 :—

COUNTRY WATERWORKS, SOUTH AUSTRALIA : FINANCES.(*a*)

Year.	Capital Cost.	Revenue.	Working Expenses.	Interest and Sinking Fund Charges.	Profit or Loss.
	£	£	£	£	£
1944–45	10,654,856	262,917	304,297	421,419	— 462,799
1945–46	10,833,353	247,733	304,848	406,127	— 463,242

(*a*) Excludes Morgan-Whyalla system.

(vi) *Morgan-Whyalla Water Supply Scheme.* This scheme, which involved the laying of 223 miles of main, was officially opened on 31st March, 1944, the cost to 30th June, 1946, being £2,542,886. Particulars of this scheme, where applicable, are included in the tables of the combined waterworks in section (ii) above. The water is sold by measure ; hence particulars of assessments and area supplied do not apply. Revenue for the year 1944–45 was £113,851, working expenses, etc. £47,969, interest and sinking fund charges, £79,540 and net loss £13,658. Corresponding figures for 1945–46 were, respectively, £115,799, £57,307, £82,913 and £24,421.

5. **Western Australia.**—(i) *General.* The water supply and sewerage systems of Western Australia are principally under the management of Government Departments, and are divided into the following categories :—(*a*) Metropolitan Water Supply, Sewerage and Drainage, covering Perth, Fremantle, Claremont, Guildford, Midland Junction and Armadale District ; (*b*) Goldfields Water Supply ; (*c*) Water Supply of other towns, etc. ; (*d*) Agricultural Water Supply ; and (*e*) Artesian and sub-artesian waters.

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (*a*) *General.* The sources of the metropolitan water supply are the Canning Dam, Churchman Brook, Wongong Brook, Victoria Reservoir, Armadale Pipe Head Dam and Well, and certain bores. The largest water supply project, the Canning Dam, with a capacity of 20,550 million gallons, was completed during 1940.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent direct to the ocean. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. At 30th June, 1945, the number of premises connected with sewers was 42,969, and the length of sewers was 527 miles. Corresponding figures for 1946 were, respectively, 43,509 and 529. The estimated population served at 30th June, 1945 was 193,960, and at 30th June, 1946, 208,296.

There are 33 miles of stormwater drains in the metropolitan area.

(*b*) *Summary.* The following table gives particulars of water supply for 1944–45 and 1945–46 :—

METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA : SERVICES.

Year.	Estimated Population Supplied.	Number of Services.	Annual Consumption of Water.	Average Daily Consumption. Per Head.	Average Daily Consumption. Per Service.	Number of Meters.	Length of Mains.
			Million Gallons.	Gallons.	Gallons.		Miles.
1944–45 ..	243,610	66,863	7,662	86.2	314.0	41,632	1,029
1945–46 ..	247,090	68,310	8,041	89.2	322.6	41,923	1,054

(*c*) *Finances.* The table hereunder gives separate information for the water supply, and sewerage and drainage branches for 1944–45 and 1945–46 :—

METROPOLITAN WATER SUPPLY, AND SEWERAGE AND DRAINAGE, WESTERN AUSTRALIA : FINANCES.

Year.	Water Supply. Capital Cost.	Water Supply. Revenue.	Water Supply. Expenditure.(*a*)	Sewerage and Drainage. Capital Cost.	Sewerage and Drainage. Revenue.	Sewerage and Drainage. Expenditure.(*a*)
	£	£	£	£	£	£
1944–45 ..	5,288,815	375,331	330,853	3,848,205	216,128	238,476
1945–46 ..	5,355,908	360,904	343,807	3,885,585	214,605	246,030

(*a*) Includes interest and sinking fund.

(iii) *Goldfields Water Supply.* The source of supply for the Coolgardie and adjacent goldfields, as well as for the towns and districts on or near the pipeline, is the Mundaring Reservoir, which has a capacity of 4,650 million gallons. This scheme is now linked by pipeline with the Canning Dam. In 1944–45 the railways consumed 6.8 per cent., the mines 24.8 per cent., and domestic, etc., 68.4 per cent. of the supply. The following table gives details for 1944–45 and 1945–46 :—

GOLDFIELDS WATER SUPPLY, WESTERN AUSTRALIA : SUMMARY.

Year.	Total Consumption.	Number of Services.	Length of Water Mains.	Capital Cost.	Revenue.	Expenditure.(a)
	Million Gallons.		Miles.	£	£	£
1944–45 ..	1,764	14,196	1,745	6,127,843	314,422	392,338
1945–46 ..	1,831	(b) 14,196	1,750	6,178,682	317,913	405,615

(a) Includes interest and sinking fund. (b) At 30th June, 1945.

(iv) *Water Supply of Other Towns, etc.* (a) *Controlled by Public Works Department.* During 1944–45 water supplied to other towns and districts, excluding minor water supplies, amounted to 442 million gallons, including service to adjacent mines (3,045,500 gallons) and railways (50,934,500 gallons). Estimated population served numbered 31,874.

(b) *Controlled by Government Railways.* Consumption for the year ended 30th June, 1945, was 358 million gallons. In addition, 376 million gallons were obtained from other sources, mainly the Goldfields Water Scheme and the Metropolitan Water Supply. This amount is apportioned between the consumption totals of the two systems as shown above.

(c) *Water Boards not Controlled by Government.* During 1944–45 approximately 442 million gallons of water were supplied to an estimated population of 18,983.

(v) *Agricultural Water Supply.* During the thirty-five years from 1st July, 1910 to 30th June, 1945, 551 tanks were built, 385 wells sunk, and 3,669 bores put down to a total depth of 200,607 feet. Of the bores put down, 555 yielded fresh and 327 stock water.

(vi) *Artesian and Sub-artesian Waters.* Up to 30th June, 1945, the total number of bores put down in search of artesian or sub-artesian water and in which water was struck (exclusive of operations by Defence Services) was 284, ranging in depth from 30 to 4,006 feet. These figures include 52 bores sunk in the metropolitan area.

6. **Tasmania.**—(i) *Waterworks.* At the end of 1945–46 (1944–45 in brackets) there were 36 (36) municipal waterworks in Tasmania. The capacity of the reservoirs was 876 (889) million gallons, the estimated population served was 155,955 (157,143), the number of properties assessed was 49,771 (49,539), and the length of aqueducts, mains and reticulation was 1,030 (1,010) miles. Costs of construction amounted to £1,820,444 (£1,802,220). The largest of these undertakings is Hobart, with a reservoir capacity at the end of 1945–46 of 578,440 gallons, and 150 miles of reticulation and 91 miles of aqueduct and main.

(ii) *Sewerage.* Sewerage in Tasmania also is the concern of local authorities.

§ 5. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of all vessels which entered the major ports in each State during the years 1938–39 and 1942–43 to 1945–46 are shown in Chapter V.—Transport and Communication, § 3. Shipping at Principal Ports. Particulars of oversea and interstate cargo discharged and shipped during 1945–46 are given in § 6 of the same chapter.

1. **New South Wales.**—(i) *Maritime Services Board of New South Wales.* (*a*) *General.* The port of Sydney is administered by the Maritime Services Board of New South Wales, a corporate body of five Commissioners, three of whom are full-time members and two, representing shipping and commercial interests, part-time members. The Board was brought into existence on 1st February, 1936 by the Maritime Services Act 1935, in order to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-State shipping, including the survey and certification of vessels and the examination and issue of certificates to officers; is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities; imposes and collects rates and charges on goods and vessels; and is vested with the general control and management of the navigable waters and ports within the State.

At the Port of Sydney, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales such work is undertaken by the Department of Public Works on behalf of the Board.

(*b*) *Port of Sydney.* The entrance to Sydney Harbour is nearly a mile wide, and is not less than 80 feet deep. Between the entrance, known as "The Heads", and the Harbour proper, a distance of 4 miles, there are two separate channels, each with a depth of 40 feet at low tide and a width of 700 feet. The foreshores, which have been reduced by reclamations, are 152 miles in length, and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

Excluding ferry wharves and jetties used for private purposes, there are 64,676 feet of wharfage controlled by the Maritime Services Board and 9,928 feet of commercial wharfage privately owned. Ferry berths cover 3,427 feet, and the total for all purposes is 78,031 feet. The principal wharves are leased to shipping companies whose vessels engage regularly in the trade of the port: the remainder are reserved for vessels which visit the port occasionally. There is ample shed accommodation for normal demands and the port is well equipped with railway wharfage for the handling of traffic which is required to pass direct from ship to rail and vice versa. For the wheat export trade, in both bulk and bag, ample wharfage accommodation and handling equipment of the most modern character are available. Special facilities for the storage and handling of other staple products such as wool, etc., are provided on the waterside, and modern plant has been installed for replenishing ships' bunkers with oil or coal. Facilities in all directions can be very considerably extended when required.

The docking facilities comprise five large graving docks, three floating docks and eight patent slips. The Captain Cook Graving Dock, opened in March, 1945, is capable of accommodating the largest vessel afloat.

The following table gives particulars of the finances of the Board for 1944–45 and 1945–46 in respect of the Port of Sydney :—

MARITIME SERVICES BOARD : FINANCES OF THE PORT OF SYDNEY.

Year.	Revenue.			Expenditure.			Surplus.	Total Capital Debt.
	Wharfage and Transhipment Rates.	Tonnage Rates and Berthing Charges.	Total.	Administration and Maintenance.	Interest, Sinking Fund, Exchange. etc.	Total.		
	£	£	£	£	£	£	£	£
1944–45 . .	843,449	167,025	1,445,975	472,392	558,563	1,030,955	415,020	11,050,206
1945–46 . .	799,734	170,766	1,420,187	640,703	550,957	1,191,660	228,527	11,048,854

(c) *Port of Newcastle.* Newcastle Harbour is administered by the Maritime Services Board and an advisory committee consisting of five members appointed by the Governor. In regard to volume of shipping entered, Newcastle ranks second in importance in New South Wales and third in Australia. It is primarily a coal-loading port, but its activities cover the shipment of general commodities. The wharfage and other facilities of the port have been further improved and extended to meet the actual and the anticipated growth of trade with the expansion of industry in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

Wharfage accommodation amounts to almost 20,000 feet. Depths of water range from 25 to 28 feet (low water ordinary spring tide).

(d) *Port Kembla.* The Navigation and Harbour and Tonnage Rates Acts are administered at Port Kembla by the New South Wales Department of Public Works on behalf of the Maritime Services Board. Port Kembla, which is sharing to an increasing extent in the shipping trade of the State, has an area of approximately 330 acres, with depths ranging from 18 to 50 feet (low water ordinary spring tide) and wharfage accommodation has been provided for large ocean-going vessels. Being adjacent to the southern coalfields and a rapidly developing centre of secondary industries, its trade is growing and a great future for the port is predicted.

(e) *Other Ports.* In addition to the ports of Sydney and Newcastle, the Board controls more than 20 outports along the coastline of 609 miles.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Lighthouses Act and the Federal Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. The gross collections by the State authorities amounted to more than £1,743,000 in each of the years 1944–45 and 1945–46. Commonwealth Government revenue from marine sources for the whole of Australia amounted to £261,068 in 1944–45 and £250,991 in 1945–46.

2. **Victoria.**—(i) *Melbourne Harbour Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, p. 970 *et seq.* At 31st December, 1946, the sheds available for wharfage accommodation had a length of 19,567 feet, covering an area of 1,338,578 square feet. The area of water in the bay and River Yarra under the control of the Trust is approximately 5,321 acres and the total length of wharves, piers and jetties in the port is 61,740 feet, giving an area of over 58 acres of wharfage, of which 52,799 feet is effective berthing space. The depths of water (low water ordinary spring tide) of main channels and at principal wharves are about 30 feet, the maximum being about 36 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1945 and 1946 :—

MELBOURNE HARBOUR TRUST : FINANCES.

Year.	Revenue.		Expenditure.				Surplus.	Gross Loan Indebtedness.
	Wharfage and Tonnage Rates.	Total. (a)	Administration and Maintenance.	Interest, Sinking Fund, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a) (b)		
	£	£	£	£	£	£	£	£
1945 ..	662,990	917,565	358,991	244,905	130,062	885,556	32,009	4,008,151
1946 ..	701,591	961,037	424,601	244,890	129,200	958,009	3,028	3,973,100

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust: 1945, £151,598; 1946, £159,318. (b) Excludes capital expenditure: 1945, £184,264; 1946, £403,400.

(ii) *Geelong Harbour Trust.* The Geelong Harbour Trust was constituted in 1905, and reconstituted in 1934 under the provisions of the Melbourne and Geelong Harbour Trusts Act 1934. The Trust is under the control of three Commissioners appointed by the Governor-in-Council. Revenue for the years 1945 and 1946 was £98,625 and £105,637 respectively. Revenue expenditure was £79,184 and £81,273, capital expenditure £13,651 and £27,507, and loans outstanding at the end of each year amounted to £533,193 and £529,087. Depths of water available in Geelong Harbour range from 24 to 29 feet (low water ordinary spring tide).

(iii) *Other Ports.* Portland is the only Victorian port other than Melbourne and Geelong of more than minor importance.

3. **Queensland.**—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly, because of the increasing size of vessels, are still within easy access of the city. The maximum depths (low water ordinary spring tide) of the shipping channel decrease from 33 feet in the North-West channel to 18 feet in the Bulimba Reach to Victoria Bridge section. Depths at wharves vary between 24 and 30 feet. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1944–45 and 1945–46 are shown below :—

BRISBANE HARBOUR : FINANCES.

Year.	Revenue.		Expenditure.		Credit Balance.	Loan Indebtedness.
	Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption).		
	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
1944–45 ..	164	198	97	176	132	1,099
1945–46 ..	146	247(*a*)	127	206	173	1,086

(*a*) Includes accumulated hire charges, etc., for dredging work done for the Commonwealth Government.

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, the Brisbane River, and ten smaller harbours not administered by Harbour Boards.

(iii) *Harbour Boards.* Harbour Boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. Finances for each port for the year 1946 are shown below, and a summary for the year 1945 as well as for 1946.

HARBOUR BOARDS, QUEENSLAND : FINANCES, 1946.

Harbour Board.	Revenue.		Expenditure (excluding Loan).		Surplus or Deficit.	Loan Indebtedness.
	Wharfage and Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption).		
	£	£	£	£	£	£
Bowen	10,475	12,390	5,654	13,058	−668	268,366
Bundaberg	4,048	5,078	2,649	6,194	−1,116	13,293
Cairns	60,642	83,296	78,593	90,775	−7,479	163,317
Gladstone	8,179	11,269	3,571	18,673	−7,404	91,680
Mackay	66,575	72,176	11,298	52,481	+19,695	376,078
Rockhampton ..	15,328	33,426	25,224	39,279	−5,853	504,534
Townsville	62,684	107,215	48,959	99,618	+7,597	72,013
Total, 1946 ..	227,931	324,850	175,948	320,078	+4,772	1,489,281
Total, 1945 ..	382,751	474,104	173,203	298,872	+175,232	1,442,740

4. **South Australia.**—*The South Australian Harbours Board.* All South Australian harbours are controlled by the South Australian Harbours Board, which consists of three commissioners, appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions, and controls about 60 ports, but at many of them there is little or no shipping movement. The more important are Adelaide, Augusta, Lincoln, Pirie, Wallaroo and Whyalla. Maximum depths of water (low water ordinary spring tide) at the wharves of these ports range from 20 to 24 feet at Pirie to 35 feet at Adelaide (Outer Harbour). The following table shows the finances of the Board for 1944–45 and 1945–46.

SOUTH AUSTRALIAN HARBOURS BOARD : FINANCES.

Year.	Revenue.	Expenditure from Revenue.				Surplus or Deficit.	Capital Expenditure to 30th June.
		Working Expenses.	Interest.	Sinking Fund.	Total.		
	£	£	£	£	£	£	£
1944–45 ..	638,516	268,961	316,862	50,459	636,282	+ 2,234	8,192,447
1945–46 ..	600,658	292,010	301,583	52,696	646,289	− 45,631	8,224,568

5. **Western Australia.**—(i) *Fremantle Harbour Trust.* Fremantle Harbour is controlled by a board of five commissioners appointed by the Governor-in-Council. Maximum depth of water (low water ordinary spring tide) at the entrance to the harbour is 36 feet, and at the wharves 33 feet. The length of wharf berth accommodation is 10,177 feet.

Gross earnings for the year 1944–45 amounted to £780,078, working expenses to £451,149, interest, £142,582, sinking fund, £25,262, replacement fund, £2,000, and payment of surplus cash to Consolidated Revenue, £158,385. Corresponding figures for 1945–46 were : £709,810, £416,041, £141,911, £26,462, £2,000 and £123,837.

(ii) *Bunbury Harbour Board.* The Bunbury Harbour Board consists of five members appointed by the Government. The depth of water at the entrance to and at the wharf is 27 feet (low water ordinary spring tide). Berthage accommodation is 3,700 feet. Gross earnings in 1944–45 were £33,944, working expenses £23,922 and interest £33,768 (1945–46, £24,420, £32,219, £33,779).

(iii) *Other Ports.* Of the remaining eleven ports of Western Australia, Albany, Carnarvon and Geraldton have the largest amount of shipping movement.

6. **Tasmania.** There are seven Marine Boards and two Harbour Trusts in Tasmania. The Marine Boards control the ports of Hobart, Launceston, Circular Head, Burnie and Table Cape, Devonport, Strahan, and King Island (Currie), and the Harbour Trusts those of Smithton and Leven. Aggregate receipts of all these authorities during the year 1944–45 were £201,404 and expenditures, £190,744, including loan charges, £46,125. Corresponding figures for 1945–46 were £214,327, £246,393 and £49,610. The total receipts of the Hobart Marine Board during 1944–45 were £43,182, loan charges £1,074 and total expenditure £45,597. Corresponding figures for 1945–46 were £55,394, £1,110 and £63,172. Launceston Marine Board receipts during 1944–45 amounted to £67,089, loan charges to £11,024 and total expenditure to £69,199. The figures for 1945–46 were, respectively, £60,751, £10,145 and £60,751.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic there is also considerable oversea shipping. Depths of water at wharves vary, in general, between 16 and 40 feet (low water ordinary spring tide), but at Hobart the Ocean Pier has a depth of water of from 36 to 60 feet.

§ 6. Fire Brigades.

1. **New South Wales.**—(i) *General.* Under the Fire Brigades Act 1909–44, a Board of Fire Commissioners, consisting of eight members, operates, and 137 fire districts had been constituted at the end of 1946. The cost of maintenance of fire brigades is borne in proportions of quarter, quarter, and half by the Government, the municipalities, and the insurance companies concerned, but the expenditure must be so regulated that the proportion payable by the councils in a fire district shall not, except in special circumstances, exceed the amount obtainable from ¼d. in the £1 rate on the unimproved capital value of ratable land in the fire district.

(ii) *Board of Fire Commissioners of New South Wales.* At 31st December, 1946, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 216 officers and 823 permanent, 1,908 volunteer and 1,686 reserve firemen. Corresponding figures for the Sydney Fire District were 160, 772, 268 and 539. The revenue for the year 1946 (figures for the year 1945 in parenthesis) was £707,177 (£594,704), made up as follows :—From the Government, £172,178 (£140,931) ; municipalities and shires, £172,178 (£140,931) ; fire insurance companies and firms, £344,356 (£281,862) ; and from other sources, £18,465 (£31,070). The disbursements for the year were £700,859 (£653,608).

2. **Victoria.**—(i) *General.* The Fire Brigades Act of 1928 provided for a Metropolitan Fire Brigades Board and a Country Fire Brigades Board each consisting of nine members. In December, 1944, the latter Board was superseded by the Country Fire Authority under an Act of that title, and the number of members was increased to ten. The income of each Board is derived in equal proportions from the Treasury, the municipalities and insurance companies.

(ii) *Metropolitan Fire Brigades Board.* On 30th June, 1946, the Board had under its control 42 stations, 350 permanent staff, 189 special service and clerical, etc. staff, and 147 partially-paid firemen. The total receipts for 1945–46 (1944–45 in parenthesis) were £298,204 (£309,525), comprising contributions £218,982 (£224,964), receipts for services £53,385 (£59,040), and interest and sundries £25,837 (£25,521). The expenditure was £305,081 (£299,096).

(iii) *Country Fire Authority.* This authority, constituted in 1944, is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. At 30th June, 1946, there were 170 municipal councils and 118 insurance companies included in the operation of the Act, and 185 urban and 776 rural fire brigades.

The receipts for the first complete period of operation of the authority (2nd April, 1945 to 30th June, 1946) amounted to £117,791. Total expenditure other than loan amounted to £103,106.

3. **Queensland.**—(i) *General.* The Acts of 1920–31 made provision for the retention of existing fire districts, and for the constitution of new districts. For each district there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows :—The Treasury two-sevenths, insurance companies three-sevenths, and local authorities two-sevenths. All volunteer fire brigades in a district must be registered.

(ii) *Fire Brigades Boards.* At 30th June, 1946, there were fire brigades in 44 towns. The total revenue for the year 1945-46 (figures for 1944–45 in parenthesis) was £210,985 (£224,135), received mainly from the following sources : Government £54,119 (£58,964), local authorities £53,560 (£51,647), insurance companies £80,289 (£77,425), and loans (Government and other), £470 (£7,181). The total expenditure for the year was £210,363 (£220,872), the chief items being salaries and wages £145,528 (£150,847), and interest and redemption of loans, £21,915 (£21,804).

4. **South Australia.**.—The Fire Brigades Act 1936–44 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury, five-ninths by insurance companies, and two-ninths by the municipalities concerned. The contribution of the Treasury, however, is limited to £10,000 and if two-ninths of the expenses and maintenance exceeds this amount, five-sevenths of the excess is contributed by the insurance companies and two-sevenths by the municipalities. At the 30th June, 1946 there were altogether 32 fire brigade stations, and the total revenue for the years 1944–45 and 1945–46 was £86,561 and £85,096 respectively.

5. **Western Australia.**—(i) *General.* Under the 1942 Act certain Municipal and Road Board Districts are constituted fire districts under the control of the Western Australian Fire Brigades Board. The income of the Board is derived in the proportion of two-ninths from the Government, two-ninths from Local Government Authorities, and five-ninths from insurance companies.

(ii) *Western Australian Fire Brigades Board.* The whole of the brigades throughout the State are now controlled by the Western Australian Fire Brigades Board, and number 43. The revenue for the year ended 30th September, 1945 was £78,589 and the expenditure £80,173. Corresponding figures for the year ended September, 1946 are : £85,410 and £93,682.

6. **Tasmania.**—(i) *General.* The municipal council of any municipality may, under the Act of 1920, petition the Government to proclaim the municipality or any portion of it to be a fire district, each district to have a Board of five members. The expenses of each Board are borne in equal proportions by contributions from the Treasury, the municipality concerned, and insurance companies insuring property within the district.

(ii) *Hobart Fire Brigade Board.* The revenue of the Board for the year 1945 amounted to £11,412, for the half-year ended 30th June, 1946 to £6,486, and for the year ended 30th June, 1947 to £13,278.

CHAPTER XIV.

PRIVATE FINANCE.

NOTE.—This chapter, for convenience, has been sub-divided into six sections as follows :—

Currency ; Banking, including Savings Banks ; Companies ; Insurance ; Friendly Societies ; and Probates.

A. CURRENCY.

§ 1. General.

The Australian monetary system is based on the British system of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian sovereign was identical in weight and fineness with the English sovereign. As the currency was then based on a gold standard the Australian pound was equivalent to the sovereign (i.e. 123.27447 grains of gold $^{11}/_{12}$ths fine) and, until the depression in 1930, was generally regarded as identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the agreement, that the par value of the Australian pound was 2.86507 grammes of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, bank notes issued by the trading banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution the control of currency, coinage and legal tender and the issue of paper money were vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

§ 2. Coinage.

1. **Coins in Circulation.**—Until 1910 the coins used for currency in Australia were United Kingdom gold, silver and bronze coins. The gold coins in general circulation were sovereigns and half-sovereigns minted by the Royal Mint in England or by branches of the Royal Mint established in Sydney, Melbourne and Perth. Wherever minted, these gold coins were British currency and were identical in weight and fineness. British token coins in general circulation were the half-crown, florin, shilling, sixpence and threepence of silver and the penny and half-penny of bronze. The Coinage Act 1909 authorized the Treasurer to issue Australian coins of the following denominations, viz. :—

Silver—Florin, shilling, sixpence and threepence.
Bronze—Penny and half-penny.

Coins of these denominations having a distinctive Australian design were first issued under this Act in 1910. The United Kingdom silver and bronze coins in circulation when the Australian coins were introduced continued to be legal tender, but arrangements were made with the British Government to withdraw United Kingdom silver coins from circulation at the rate of £100,000 per annum. The withdrawal under these arrangements continued for some years and was greatly accelerated by the appreciation of sterling in terms of Australian currency in 1930 and 1931. At the present time practically the only coins circulating in Australia are those issued under the Coinage Act 1909–1947. In 1936 the Coinage Act 1909 was amended to permit the issue of an additional silver coin—the Crown (5s.). A further amendment in 1947 reduced the silver content of silver coins from 92.5 per cent. to 50 per cent. The first issues of the new coins were made in July, 1947.

From 1910 to 1916 Australian coins were minted in England by the Royal Mint, London. Since 1916 they have been minted at the Melbourne branch of the Royal Mint. Gold coins practically disappeared from circulation during the 1914–18 War and their place was taken by Australian notes. In September, 1931 the Australian Mints ceased to mint gold coins. During the 1939–45 War the Melbourne Mint was unable to meet the full demand for Australian coins and some coins were minted at the Perth Mint and at mints in the United States of America and India.

2. **Issues of Australian Coins.**—The total issues of silver and bronze coinage on account of the Commonwealth since 1910 are set out in the following table :—

AUSTRALIAN COINS : SILVER AND BRONZE ISSUES.

Year.	Silver.						Bronze.		
	Crown. 5s.	Florin. 2s.	Shilling. 1s.	Sixpence. 6d.	Three-pence. 3d.	Total.	Penny. 1d.	Half-penny. ½d.	Total.
	£	£	£	£	£	£	£	£	£
1910 to 1937	200,000	4,525,900	1,947,300	1,008,300	972,300	8,653,800	*a*427,013	154,635	581,648

(*a*) Includes £4,100 issued to New Zealand.

3. **Standard Weight and Fineness of Coinage.**—The standard weight and fineness of the sovereign, half-sovereign and Australian silver and bronze coins are set out in the schedule to the Coinage Act 1909–1947. These details are given in the following table :—

IMPERIAL GOLD COINS AND AUSTRALIAN SILVER AND BRONZE COINS : STANDARD WEIGHT AND FINENESS.

Denomination of Coin.	Standard Weight.	Least Current Weight.	Standard Fineness.	Remedy Allowance.(*a*)		
				Weight per Piece.	Proportion of weight applicable to tests of 1,000 pieces in bulk.	Millesimal Fineness.
	Grains.	Grains.		Grains.		
Gold—						
Sovereign ..	123.27447	122.50000	Eleven-twelfths fine gold, one-twelfth alloy ; or millesimal fineness 916.$\dot{6}$	0.20	..	2
Half-sovereign	61.63723	61.12500		0.15	..	
Silver—						
Crown ..	436.36363	..	One-half fine silver, one-half alloy ; or millesimal fineness 500(*b*)	..	1 in 220	5
Florin ..	174.54545	..		..	1 in 175	
Shilling ..	87.27272	..		..	1 in 150	
Sixpence ..	43.63636	..		..	1 in 125	
Threepence ..	21.81818	..		..	1 in 100	
Bronze—						
Penny ..	145.83333	..	Mixed metal, copper, tin and zinc	..	1 in 40	none
Halfpenny ..	87.50000	..		..	1 in 40	

(*a*) Permissible variation from standard weight and fineness. (*b*) Coin issued prior to 8th July, 1947—thirty-seven fortieths fine silver, three fortieths alloy ; or millesimal fineness 925.

4. **Legal Tender.**—Imperial gold coins of the specified weight and fineness are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

5. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is much greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1938–39 and 1943–44 to 1946–47.

AUSTRALIAN SILVER AND BRONZE COINS: PROFITS FROM ISSUE.

Year.	Coin Issued.	Cost of Bullion.	Gross Profit.	Cost of Minting and sundry charges.	Net Profit to Consolidated Revenue.
SILVER COIN.

1944–45 ..	97,840	23,362	74,478	65,796	8,682
1945–46 ..	55,480	14,393	41,087	32,172	8,915
1946–47 ..	30,180	7,714	22,466	27,332	– 4,866
TOTAL.					
	£	£	£	£	£
1938–39 ..	261,400	89,152	172,248	44,484	127,764
1943–44 ..	4,508,410	2,100,569	2,407,841	379,955	2,027,886
1944–45 ..	2,922,040	1,324,590	1,597,450	290,413	1,307,037
1945–46 ..	1,528,880	791,203	737,677	133,078	604,599
1946–47(*a*) ..	30,180	7,714	22,466	192,383	– 169,917

(*a*) During 1946–47 a considerable quantity of new silver coin was minted but not issued until 1947–48. The cost of minting this coin is included and consequently a loss resulted.

NOTE.—Minus sign (–) denotes loss.

6. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June 1872, and the Perth branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid into the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916 the Melbourne branch took over from the Royal Mint, London the minting of Australian silver and bronze coins, and during the 1939–45 War the Perth branch commenced minting Australian coins. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (*a*) *Receipts.* The receipts of gold during 1945, 1946 and 1947 and the aggregate at each mint to the end of 1947 were as follows :—

AUSTRALIAN MINTS : RECEIPTS OF GOLD.

Mint.	Deposits during year—			Total to end of 1947.		
				Quantity.		Value.(*b*)
	1945.	1946.	1947.	Gross.	Fine.	
	Oz.	Oz.	Oz.	Oz.	Oz.	£
Sydney(*a*)	. .	. .	. .	42,082,928	36,907,045	156,771,141
Melbourne . .	128,727	175,184	265,625	46,996,090	42,042,971	178,587,076
Perth . .	653,737	817,721	1,032,388	50,237,664	39,967,709	169,771,926
Total	782,464	992,905	1,298,013	139,316,682	118,917,725	505,130,143

(*a*) To end of 1926, when the mint was closed. (*b*) At £3 17s. 10½d. per standard ounce.

(*b*) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc), and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped in 10-oz. bars to India. Since early in the 1939–45 War all gold has been acquired by the Commonwealth Bank and the export and use of gold has been subject to regulation by the Commonwealth Government. The issues during the years 1945 to 1947, and the total to the end of 1947, are shown in the table below :—

AUSTRALIAN MINTS : ISSUES OF GOLD.

Mint.	Coin.			Bullion.(*a*)	Total.
	Sovereigns.	Half-sovereigns.	Total.		
	£	£	£	£	£
1945—

Perth . .	106,384,197	367,338	106,751,535	63,048,115	169,799,650
Total to end of 1947 . .	398,102,878	6,095,118	404,197,996	100,954,695	505,152,691

(*a*) Value expressed at £3 17s. 10½d. per standard ounce.

7. **Price of Gold.**—In consequence of Great Britain's departure from the gold standard on 21st September, 1931, the London market value of gold immediately rose by about 17½ per cent. from £4 4s. 11d. to £4 19s. 7d. per fine ounce. Considerable fluctuations have since taken place, but during the years just prior to the 1939–45 War the price was steadily rising. At the outbreak of war the price in London was fixed at £stg.8 8s. 0d. per fine ounce, and in June, 1945, was raised to £8 12s. 3d. per fine ounce. In Australia the price of gold is fixed by the Commonwealth Bank.

The following table shows the average prices of gold and the average value of the sovereign in London and Australia for the years 1937–38 to 1946–47. The average price of gold in Australia is based on the Commonwealth Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA.

Period.	London.		Australia.		
				Sovereign.

§ 3. Notes.

1. **General.**—In 1901 notes in circulation in Australia consisted of bank notes payable in gold coin and issued by the trading banks, and Queensland Treasury notes. Bank notes circulated in all States except Queensland; but were not legal tender. There were, however, some restrictions on their issue or other provisions for the protection of the public. Queensland Treasury notes were issued by the Queensland Government and were legal tender in that State. These notes continued in circulation until 1910 when the Australian Notes Act 1910 and Bank Notes Tax Act 1910 were passed by the Commonwealth Parliament. The Australian Notes Act 1910 prohibited the circulation of State notes as money and the Bank Notes Tax Act 1910 imposed a tax of 10 per cent. per annum on "all bank notes issued or re-issued by any bank in the Commonwealth after the

commencement of this Act, and not redeemed ". These Acts put an end to the issue of notes by the trading banks and the Queensland Treasury. The Commonwealth Bank Act 1945 prohibited the issue of notes by any person (including a bank).

2. **The Australian Note Issue.**—(i) *General.* The Australian Notes Act 1910 empowered the Governor-General to authorize the Commonwealth Treasurer to issue Australian notes in denominations of 10s., £1, £5, £10 and any multiple of £10. These notes were to be legal tender and payable in gold coin on demand at the Commonwealth Treasury at the Seat of Government. The Act came into force by proclamation on 1st November, 1910 and notes were issued forthwith. The control of the Australian note issue remained with the Commonwealth Treasury until 1920 when it was transferred to the Note Issue Department of the Commonwealth Bank. This department was controlled by a separate Board of Directors until 1924 when it was brought under the authority of the newly created general Board of Directors of the Bank. This form of control continued until 1945 when the management of the Commonwealth Bank was reorganized and placed, together with the Note Issue Department, under a Governor assisted by an Advisory Council.

The Commonwealth Bank Act 1920 authorized the issue of a 5s. note. However, notes of this denomination have not been issued. As stated above, Australian notes originally issued were payable in gold coin on demand at the Commonwealth Treasury at the Seat of Government. When the control of the Australian Note Issue was transferred to the Note Issue Department of the Commonwealth Bank, it was provided that the notes should " bear the promise of the Treasurer to redeem the notes in gold coin . . . . . on demand at the Head Office of the Commonwealth Bank ". By the Commonwealth Bank Act 1932 this provision was abolished and since 1932 Australian notes have not contained any such promise and are merely stated to be legal tender in the Commonwealth and in all Territories under the control of the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000.

(ii) *Gold Reserve against the Note Issue.* The Australian Notes Act 1910 provided that the Treasurer should hold, in gold coin, a reserve of an amount not less than one-fourth of the notes issued up to £7,000,000 and an amount equal to the excess over £7,000,000. In 1911, this provision was amended and the Treasurer was required only to hold, in gold coin, an amount not less than one-fourth of the total amount of Australian notes issued. In June, 1931, to permit further shipments of gold to meet short term obligations in London, an amendment to the Commonwealth Bank Act provided for the reduction of the gold reserves for the two years ended 30th June, 1933, to not less than 15 per cent. The reserve was again to be increased, by graduated steps, to 25 per cent. by 30th June, 1935. In May, 1932, a further amendment to the Commonwealth Bank Act provided that the reserve might be held " in gold or in English sterling or partly in gold and partly in English sterling ". English sterling was defined as " currency which is legal tender in the United Kingdom, and included—(*a*) balances standing to the credit of the Bank at the Bank of England or at any other of its bankers in London ; (*b*) Bills of Exchange or advances secured by Bills of Exchange which—(i) are payable in the United Kingdom in currency which is legal tender in the United Kingdom , (ii) will mature in not more than three months, and the security for the payment of which Bills is, in the opinion of the Bank, satisfactory ; and (*c*) Treasury Bills or other securities of the United Kingdom which will mature in not more than three months ". The provisions for the holding of a reserve in gold or English sterling against the note issue were abolished by the Commonwealth Bank Act 1945.

(iii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1938–39 and 1943–44 to 1946–47 are given in the following table :—

AUSTRALIAN NOTE ISSUE.

Denomination.	Average of monthly statements for year—				
	1938–39.	1943–44.	1944–45.	1945–46.	1946–47.
	£'000.	£'000.	£'000.	£'000.	£'000.
10s.	4,141	7,332	8,177	8,187	7,912
£1	21,124	55,195	65,207	74,170	68,161
£5	11,718	60,437	71,745	77,327	78,814
£10	5,126	32,875	39,280	32,250	44,004
£20	111	53	43	11	9
£50	1,259	3,566	3,616	176	103
£100	2,238	4,813	4,761	273	183

Held by Banks	15,454	15,573	16,669	17,077	18,895
Held by Public	33,118	149,335	177,054	175,741	180,744
Total	48,572	164,908	193,723	192,818	199,639

(iv) *Commonwealth Bank—Note Issue Department.* The following statement shows particulars of liabilities and assets of the Note Issue Department of the Commonwealth Bank as at 30th June, 1946 and 1947.

NOTE ISSUE DEPARTMENT.

Liabilities.	30th June—		Assets.	30th June—	
	1946.	1947.		1946.	1947.
	£'000.	£'000.		£'000.	£'000.
Notes on Issue(*a*) ..	198,930	202,643	Gold and English sterling ..	50,880	50,880
Special Reserve—premium on gold sold	5,755	4,755	Debentures and other Securities ..	155,702	158,521
Other Liabilities(*a*) ..	1,975	2,076	Other Assets ..	78	73
Total Liabilities ..	206,660	209,474	Total Assets ..	206,660	209,474

(*a*) Notes of a denomination not exceeding one pound which have been on issue for more than twenty years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

Until the end of 1943 all the net profits of the Note Issue Department, except £2,000,000 paid between 1926 and 1933 to the capital account of the Rural Credits Department, were paid to the Commonwealth Treasury. The Commonwealth Bank Act amendment of 1943 which established a Mortgage Bank Department (see page 570), provided for the transfer of £1,000,000 from the Special Reserve and for an annual payment of £150,000 from the Note Issue profits towards the capital of the new department, the latter payments to cease when the capital amounts to £4,000,000. In 1945–46 the net profits of the Note Issue Department amounted to £3,089,000, of which £2,939,000 was paid to the Commonwealth Treasury and £150,000 to the capital account of the Mortgage Bank Department.

In 1946–47 the net profits of the Note Issue Department amounted to £3,942,000 of which £3,792,000 was paid to the Commonwealth Treasury and £150,000 to the capital account of the Mortgage Bank Department.

§ 4. Legal Tender Extant.

Accurate information regarding the amount of legal tender in circulation is not available, but the following table gives an estimate of the amount of legal tender extant about the middle of the years 1939 and 1944 to 1947.

ESTIMATED LEGAL TENDER EXTANT : AUSTRALIA.

Particulars.	1939.	1944.	1945.	1946.	1947.
	£'000.	£'000.	£'000.	£'000.	£'000.
Australian Notes(*a*)—					
Held by Banks	14,829	15,253	15,934	17,291	19,037
Held by Public	32,701	174,258	169,810	181,673	183,643
Coin(*b*)—					
Gold(*c*)—Held by Banks (*d*) ..	79	69	59	78	81
Held by Public	..	..	..	..	..
Silver—Held by Banks (*d*) ..	2,508	3,884	4,340	6,077	5,168
Held by Public	6,843	18,141	20,503	20,237	21,114
Bronze—Held by Banks (*d*) ..	132	195	225	189	169
Held by Public	521	1,045	1,123	1,214	1,264
Total	57,613	212,845	211,994	226,759	230,476

(*a*) Last Monday in June to 1946. Last Wednesday in June for 1947. (*b*) *See* paragraph below. No allowance has been made for coin lost or destroyed, which, during the war years, may have been considerable. (*c*) Value—one sovereign equals £1. (*d*) At 30th June.

The figures given above for silver coin represent the total issues of Australian silver coin less the excess of exports of Australian coins to New Zealand and the Pacific Islands over the reimports of Australian coins. The amount of English coin in circulation in Australia is negligible, and, as it is not possible to ascertain accurately its volume, no allowance has been made for it. The figures given for bronze coins refer to the total issues of Australian coin, the small amount of United Kingdom coin in circulation being disregarded. Notes of trading banks outstanding, included in earlier issues of the Year Book, have been excluded as they are not legal tender.

B. BANKING.

§ 1. Cheque-Paying Banks.

1. **Banking Legislation.**—(i) *Commonwealth Legislation.* (*a*) *General.* Under Section 51 of the Commonwealth Constitution the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking, also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money". The principal Commonwealth Acts at present in force relating to Banking are—

(*a*) The Commonwealth Bank Act 1945 which replaced the Commonwealth Bank Act 1911–1943, and provides for the constitution and management of the Commonwealth Bank and Commonwealth Savings Bank and the management of the Australian note issue ;

(*b*) The Banking Act 1945, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth ; and

(*c*) The Banking Act 1947, which provides for the expansion of the banking business of the Commonwealth Bank; the taking over, by the Commonwealth Bank, of the banking business in Australia of the private banks, and the acquisition of property used in that business ; and the prohibition of private banks carrying on banking business in Australia.

(*b*) *The Banking Act* 1945. *General.* The Banking Act 1945 is the first comprehensive piece of legislation passed by the Commonwealth Parliament under its powers to legislate with respect to banking. Except for war-time regulations, earlier Commonwealth legislation in relation to banking was limited in its effect and related only to certain phases of banking. The most important constituents of the earlier legislation were the Bank Notes Tax Act 1910 designed to stop the issue of bank notes by the trading banks, and the Commonwealth Bank Act 1911–1943 providing for the establishment and management of the Commonwealth Bank, the Australian note issue, the control of the exportation and mobilization of gold, the settling of bank clearings and the collection of banking statistics. The Banking Act 1945 was assented to on 3rd August, 1945, and came into operation on 21st August, 1945. It applies to all banks except State banks operating in Australia or Territories of the Commonwealth.

Objects. In introducing the Bill for the Banking Act 1945 the Commonwealth Treasurer stated that the objects of the Bill were :—

(*a*) To provide a legal framework, uniform throughout Australia, for regulating the banking system. (*b*) To safeguard depositors of the banks from loss. (*c*) To provide for the co-ordination of banking policy under the direction of the Commonwealth Bank. (*d*) To control the volume of credit in circulation and bank interest rates. (*e*) To mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy.

Provisions. The main provisions of the Act are as follows : (*a*) *Authority to carry on Banking Business.* Banking business can only be carried on by a body corporate in possession of an authority in writing granted by the Governor-General. A company which is not a bank but which conducts some banking business may be granted an exemption from some or all of the provisions of the Act. (*b*) *Protection of Depositors.* If it appears that a bank may be unable to meet its obligations or is about to suspend payments, the Commonwealth Bank may " assume control of and carry on the business of that bank ". Provision is made for the banks to supply to the Commonwealth Bank such information relating to their financial stability as is required. Each bank is required, unless otherwise authorized by the Commonwealth Bank, to hold assets (other than goodwill) in Australia of a value not less than the amount of its deposit liabilities in Australia. (*c*) *Special Deposits.* Banks may be required by the Commonwealth Bank to lodge deposits in a special account with the Commonwealth Bank. The amount to be deposited is fixed each month by the Commonwealth Bank; but no bank may be required to deposit an amount sufficient to make the total of its special account exceed the sum of any increase in its assets since 28th August, 1945, and its special deposit on that date under the National Security (War-time Banking Control) Regulations. Interest is paid on these deposits at a rate, not exceeding 17s. 6d. per cent. per annum, determined by the Commonwealth Bank. The special deposits can only be withdrawn with the permission of the Commonwealth Bank. (*d*) *Mobilization of Foreign Currency.* All banks may be required to transfer to the Commonwealth Bank a proportion (determined by the Commonwealth Bank) of their excess receipts of foreign currency in respect of their Australian business during any period. (*e*) *Advances and Investments.* The Commonwealth Bank may determine a general policy in relation to advances to be followed by Banks. Banks may not, except with the consent of the Commonwealth Bank, purchase or subscribe to Commonwealth, State and local and semi-governmental securities, and securities listed on a Stock Exchange in Australia. (*f*) *Foreign Exchange.* The Governor-General may make regulations for the control of foreign exchange, including the fixing of rates of exchange. (*g*) *Gold.* In Part IV. of the Act provision is made for the mobilization and control of gold if it is necessary for the protection of the currency or of the public credit of the Commonwealth. (*h*) *Interest Rates.* The Commonwealth Bank may, with the approval of the Commonwealth Treasurer, make regulations for the control of rates of interest payable to or by the banks or other persons in the course of banking business carried on by them. (*i*) *Other.* Other provisions of the Banking Act 1945 relate to the supply of statistics and other information by banks, the settlement of clearing balances between the banks, investigation of the accounts of banks by the Auditor-General, and restrictions on the use of the words " bank " or " savings bank " in relation to a business. Although a bank may be required to supply information relating to its financial stability and information needed for the determination of banking policy, it cannot be required to disclose details relating to the account of any individual customer. Except with the consent in writing of the Treasurer a bank may not conduct any banking business for a State or for any authority of a State including a local governing authority. This latter provision was held to be invalid by the High Court of Australia.

(*c*) *The Banking Act* 1947. *General.* This Act, which was assented to on 27th November, 1947, provides for the acquisition by the Commonwealth Bank of the Australian business and assets of the private banks operating in Australia, and for the prohibition of private banks from carrying on banking business in Australia. The Act does not apply to State Banks or savings banks.

Objects. The objects of the Act, set out in section 3, are as follows :—

"(*a*) The expansion of the banking business of the Commonwealth Bank as a publicly-owned bank conducted in the interests of the people of Australia and not for private profit ;

(*b*) the taking over by the Commonwealth Bank of the banking business in Australia of private banks and the acquisition on just terms of property used in that business ;

(*c*) the prohibition of the carrying on of banking business in Australia by private banks ".

Two main methods of acquisition are provided, viz. :—

(1) Voluntary or compulsory acquisition of the Australian businesses and assets of the private banks, and

(2) Compulsory acquisition of shares.

The first method may be applied to all banks, whether incorporated in Australia or overseas, and, in the case of banks incorporated in Australia, any part of their overseas assets may also be compulsorily acquired. Under the alternative method, the shares of a private bank may be acquired if the Treasurer is satisfied that the majority of its shares are registered in Australia.

Acquisition of Australian Business. As a preliminary step to the acquisition of the Australian business and assets of a private bank the Treasurer may invite that bank to make an agreement with the Commonwealth Bank, not later than a specified date, for the transfer of its business to the Commonwealth Bank. If no agreement is made the assets of the bank concerned become vested in, and its liabilities are assumed by, the Commonwealth Bank on the day following the specified date. A private bank may make an agreement for the transfer of its business to the Commonwealth Bank before it receives an invitation from the Treasurer to do so. In either case any such agreement must be approved by the Treasurer. In the event of a voluntary agreement for acquisition, the bank concerned and its shareholders are granted certain tax concessions.

Acquisition of Shares. The Commonwealth Bank, with the approval of the Treasurer, may purchase all or any of the shares in a private bank at a price not less than the market value in Australia of those shares on 15th August, 1947. If a majority of the shares in a private bank, incorporated in Australia, are situated in Australia, the Treasurer may, by notice published in the *Commonwealth Gazette*, declare that the Australian shares of that bank shall be vested in the Commonwealth Bank on a specified date and the Commonwealth Bank will thereupon become the holder of the shares and a member of the bank. The directors of a private bank, the shares of which have been compulsorily acquired, will cease to hold office on the date on which the acquisition becomes effective. The Governor of the Commonwealth Bank may appoint directors to carry on the management of the bank and these directors shall have full power to manage the bank, dispose of its Australian business to the Commonwealth Bank and dispose of all or any of the other business of the bank.

Compensation. Provision is made for fair and reasonable compensation to be paid by the Commonwealth Bank for all property or shares acquired. The amount of compensation payable may be determined by agreement but, failing agreement, it will be determined by the Federal Court of Claims established under the Act.

Federal Court of Claims. A Federal Court of Claims is established under the Act to hear and determine claims for compensation arising under this Act or, if the Governor-General makes regulations conferring jurisdiction, any other Commonwealth Act. A determination of the Court shall be final and conclusive and not subject to appeal to the High Court.

Prohibition of carrying on banking business. The private banks are prohibited from carrying on banking business in Australia after a date to be specified by the Treasurer. Until that date they are required to carry on normal business.

Protection of Staff. All officers of the private banks are protected in respect of continuance of employment, salaries and conditions of service. After acquisition of a private bank the Commonwealth Bank is required to employ all officers of the bank on terms not less favorable than those they previously enjoyed.

Other provisions. The Commonwealth Bank is required to provide adequate banking facilities, conduct its business without discrimination and to observe the practices and usages customary among bankers.

Although this Act provides for the acquisition of all private banks in Australia it does not affect the Banking Act 1945 which remains in force. The validity of the Act was challenged in the High Court by the private banks and the States of Victoria, South Australia and Western Australia, and, in a majority judgment delivered on 11th August, 1948, the Court held that certain vital sections were invalid. At the time of writing (December, 1948) the Privy Council had granted the Commonwealth Government leave to appeal against the decision of the High Court.

(*d*) *War-time Banking Control.* The National Security (War-time Banking Control) Regulations which operated from 26th November, 1941, provided for the control of the profits and the advance policy of the banks, supervision of their investments and the investigation and publication of their accounts. Maximum interest rates were fixed by orders issued under the National Security (Economic Organization) Regulations. More detailed information concerning the war-time control of banks appears in Official Year Book No. 36, p. 625.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks, the constitution and management of State banks and the collection and publication of returns for the protection of depositors. The Acts under which the various banks are incorporated differ. While most of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, the Bank of Australasia by Royal Charter, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, the newer banks are generally registered under a " Companies Act " or some equivalent Act. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks constituted under State Acts transacting general banking business are the Rural Bank of New South Wales, the State Bank of South Australia and the Rural and Industries Bank of Western Australia. Banks transacting business in any State were obliged under the State laws to furnish a quarterly statement of their assets and liabilities. In most States this statement was published in the Government *Gazette.* Since the Banking Act 1945 came into operation the banks have been relieved of their obligation to furnish this return.

2. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935 to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, p. 1010.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system Australian cheque-paying banks have for statistical purposes been divided into three groups and a separate series is presented for each of these groups. These groups are :—

(*a*) *The Commonwealth Bank.* This is the Central Bank. It also transacts general banking business through a General Banking Division. Statistics of the Central Banking Business (including the Note Issue Department) and the General Banking Division are presented in separate series.

(*b*) *Nine Trading Banks.* With the General Banking Division of the Commonwealth Bank these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—The Bank of New South Wales, the Commercial Banking Company of Sydney Ltd., The National Bank of Australasia Ltd., the Commercial Bank of Australia Ltd., The Queensland National Bank Ltd., The Bank of Adelaide, The Bank of Australasia, The Union Bank of Australia Ltd., and The English, Scottish and Australian Bank Ltd.

(c) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, The State Bank of South Australia and the Rural and Industries Bank of Western Australia which, in their general banking business, specialize mainly in financing rural industries, (ii) two joint stock banks—The Ballarat Banking Co. Ltd. and the Brisbane Permanent Building and Banking Co. Ltd. which have specialized business in two districts only, and (iii) branches of three overseas banks—The Bank of New Zealand, Comptoir National D'Escompte de Paris and the Bank of China which transact limited business in Australia and are mainly concerned with financing trade, etc. between Australia and the overseas countries concerned.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the General Banking Division of the Commonwealth Bank, the Nine Trading Banks and the other cheque-paying banks included in the third group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the several weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

Until December, 1946 these balance days were the Mondays of each week. From January, 1947 Wednesday became the weekly balance day.

Under the Banking Act 1945 the returns furnished by cheque-paying banks were slightly modified and the figures quoted in the following pages may not in all cases be strictly comparable with those quoted in earlier issues of the Official Year Book. The main changes relate to the classification of assets and liabilities. Under the Commonwealth Bank Act 1945, the Commonwealth Bank was reorganized and figures quoted for this Bank are not comparable with those published in previous issues of the Official Year Book.

4. **Banks Transacting Business in Australia.**—(i) *Number of Branches.* At 30th June, 1947, the 18 banks operating in Australia transacted all classes of banking business at 2,648 branches and 880 agencies. The Commonwealth Bank of Australia and the Nine Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, State Bank of South Australia and Rural and Industries Bank of Western Australia, being State Government banks specializing mainly in financing rural industries, have branches only in those States. Two banks, the Ballarat Banking Company Ltd. and the Brisbane Permanent Building and Banking Co. Ltd., transact business only in Ballarat and Brisbane respectively. The remaining three banks are branches of oversea banks.

CHEQUE-PAYING BANKS : NUMBER OF BRANCHES(a) AT 30th JUNE, 1947.

(a) Includes Head Offices. Excludes 880 agencies.

(ii) *Capital Resources, etc.* The paid-up capital of cheque-paying banks (excluding the three overseas banks, the Bank of New Zealand, the Bank of China and the Comptoir National D'Escompte de Paris), together with their reserve funds, their profits and the amount of their last dividends are shown in the following table. The information relates to the balance-sheet last preceding 31st October, 1947. It must be noted that, in the case of some of the banks, the reserve funds are invested in Government securities, while in other cases they are used in the ordinary business of the banks, and in a few instances they are partly invested and partly used in the business :—

CHEQUE-PAYING BANKS : CAPITAL RESOURCES, 1946–47.

(*a*) Includes dividends declared but not paid at date of balance-sheet. (*b*) Includes uncalled capital. (*c*) Dividends paid and payable out of profits earned during 1946–47. (*d*) In July, 1947 the arrangements were completed for the amalgamation of the National Bank of Australasia Ltd. and the Queensland National Bank Ltd. During this month the National Bank of Australasia Ltd. issued shares to the value of £1,726,025 in exchange for Queensland National Bank Ltd. shares. (*e*) Total stocks and debentures issued including liability in respect of deposits taken over by the Commonwealth Bank in December, 1931. (*f*) Includes £2,944,059 Special Reserve Account established under Section 12 (2) of Rural Bank of New South Wales Act 1932.

NOTE.—Minus sign (−) indicates loss. In the table all items other than paid-up capital and reserve funds of the Bank of Australasia and the Union Bank of Australia Ltd. are in Australian currency.

5. **Commonwealth Bank.**—(i) *General.* A brief account of the foundation of the Commonwealth Bank is given in Nos. 6 to 10 of the Official Year Book. The Bank began operations in the Savings Bank Department in July, 1912, and general banking was commenced in January, 1913. In 1920 the Australian note issue passed to the control of the Bank.

The scope of the Bank was considerably broadened in 1924 when the control was entrusted to a Board of Directors consisting of a Governor, the Secretary to the Treasury and six others who were or had been actively engaged in agriculture, commerce, finance or industry. Commencing without capital the Bank had accumulated profits amounting to about £4,500,000 in 1924. Of this sum, £4,000,000 was transferred to the capital fund of the Bank, and authority was given to increase the capital to £20,000,000. The profits of the Bank, until the establishment of the Mortgage Bank Department, were distributed in the proportion of one-half to the Bank Reserve Fund and the other half to the National Debt Sinking Fund. This excluded the net earnings of the Note Issue Department, which were paid to the Consolidated Revenue Fund. Under the terms of the Commonwealth Bank Act, as amended in March, 1943, one-quarter of the profits of the General Bank Department were to be paid to the Reserve Fund, one-quarter to the Mortgage Bank Department and one-half to the National Debt Sinking Fund. Of the net profits of the Note Issue Department, £150,000 per annum was to be paid to the Mortgage Bank Department and the balance to the Consolidated Revenue Fund. The distribution of the profits of the Savings Bank was not affected by the amendment.

A Rural Credits Department of the Bank was created, by amending legislation in 1925, for the purpose of making short-term credit available for the orderly marketing of primary produce. Portion of the capital for the new department, to the extent of £2,000,000, was provided by an annual appropriation of 25 per cent. of the net profits of the Note Issue Department. One half of the profits of the Rural Credits Department is paid to Reserve Fund and one half to the Development Fund.

The Commonwealth Bank Act 1927 provided for the separation of the Savings Bank Department from the General Bank and its establishment as a separate institution, and the transfer to the "Commonwealth Savings Bank of Australia" of all assets and liabilities of the Savings Bank Department. The date on which this amending Act became operative was fixed by proclamation as 9th June, 1928. The new institution was to be managed by a Commission consisting of three Commissioners, one of whom was to be a member of the Bank Board. The Commissioners were never appointed and this provision was omitted in the Commonwealth Bank Act 1945.

A Mortgage Bank Department of the Bank was established by the Commonwealth Bank Act 1943, assented to on 20th March, 1943. The object is to make long term loans, at reasonable rates of interest and repayment, to primary producers for uses in connexion with primary production or to discharge prior mortgages or charges. Loans are to be secured by mortgages, and have a duration of between five and forty-one years inclusive. They are not to exceed 70 per cent. of the value of the estate or interest in land on which the loans are secured, or £5,000, whichever is the less. Provision was made for the repayment of interest and principal by equal half-yearly instalments of six months' interest together with an amount of not less than one-half of one per cent. of the original amount lent, the balance outstanding, if any, to be paid at the end of the period of the loan. Provision was also made for the repayment of loans before maturity. The capital of the Mortgage Bank Department is not to exceed £4,000,000 and will be derived as follows:—(*a*) £1,000,000 from the Note Issue Department's special reserve from the sale of gold; (*b*) one-quarter of the annual net profits of the General Bank Department (now Central Banking Business); and (*c*) £150,000 per annum from the net profits of the Note Issue Department. Payments from the last two sources will cease when the capital amounts to £4,000,000. In addition, provision exists for advances to be made to the Mortgage Bank Department by the Commonwealth Bank, the Commonwealth Savings Bank and the Treasurer, who may borrow money for this purpose. The net profits of the Mortgage Bank Department are credited to the Mortgage Bank Department Reserve Fund.

(ii) *Commonwealth Bank Act* 1945. (*a*) *General.* The constitution of the Commonwealth Bank was revised by the Commonwealth Bank Act 1945, assented to on 3rd August, 1945. All provisions of the Act came into operation on 21st August, 1945, except those relating to the Industrial Finance Department and Housing Loans which came into operation on 2nd January, 1946.

In introducing the Bill for the Commonwealth Bank Act 1945, the Commonwealth Treasurer said that the main purposes of the Bill were :—" (*a*) To strengthen the central banking functions of the Bank. (*b*) To ensure that the financial policy of the Bank will be in harmony with the main decisions of Government policy and in the interests of the people of Australia. (*c*) To ensure the development and expansion of its general banking functions by active competition with the trading banks. (*d*) To return control of the Bank to the Governor who will be assisted by an Advisory Council. (*e*) To assist in developing small industries and in enabling the people to secure homes."

The general functions of the Bank are set out in the form of a charter in section 8 of the Act which states :—

> " 8. It shall be the duty of the Commonwealth Bank, within the limits of its powers, to pursue a monetary and banking policy directed to the greatest advantage of the people of Australia, and to exercise its powers under this Act and the Banking Act 1945 in such a manner as, in the opinion of the Bank, will best contribute to :—
>
> (*a*) the stability of the currency of Australia ; (*b*) the maintenance of full employment in Australia ; and (*c*) the economic prosperity and welfare of the people of Australia."

Provision is made for the Bank to inform the Treasurer of its monetary and banking policy. If there is a difference of opinion between the Bank and the Government on monetary and banking policy, the Treasurer and Bank shall endeavour to reach an agreement. Failing such an agreement the Bank shall give effect to the policy laid down by the Government.

(*b*) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911–1943 and under its war-time powers under the National Security Regulations, the Commonwealth Bank had gradually assumed the functions of a Central Bank. Part III. of the Act formally constitutes the Commonwealth Bank as a Central Bank and grants the Bank the necessary powers to carry on the business of a Central Bank. The capital for its Central Banking Business is £4,000,000 provided from the existing Capital and Reserve Fund of the Commonwealth Bank, and such other sums as are transferred from the Reserve Fund. The profits of the Central Banking Business are distributed as follows :—

(*a*) One quarter to be placed to the credit of the Commonwealth Bank Reserve Fund ; (*b*) one-quarter to be paid to the Mortgage Bank Department ; (*c*) one-half to be paid to the National Debt Sinking Fund.

When the capital of the Mortgage Bank Department has reached £4,000,000 the share of profits payable to that Department will be credited to the Commonwealth Bank Reserve Fund.

(*c*) *General Banking Division.* Under the Commonwealth Bank Act 1911–1943, no provision was made for the separation of the general banking business of the bank from its central banking business. Under the Commonwealth Bank Act 1945 the General Banking Division was set up to carry on the general banking business of the bank. The accounts and transactions of this division are kept separate and distinct from the other accounts of the Bank. The capital of the General Banking Division is £4,000,000 provided from the existing Capital and Reserve Fund of the Bank, and such other sums as are transferred from the General Banking Division Reserve Fund. The profits of the General Banking Division are distributed as follows :—

> (*a*) One half to be placed to the credit of the General Banking Division Reserve Fund, and (*b*) one-half to be paid to the National Debt Sinking Fund.

(*d*) *Management.* The management of the Bank is placed under the Governor of the Bank. The Governor is assisted by an Advisory Council consisting of the Secretary to the Department of the Treasury, the Deputy Governor of the Bank, an additional representative of the Department of the Treasury and two officers of the Bank. The Advisory Council advises the Governor with respect to the monetary and banking policy of the Bank and such other matters as the Governor refers to it.

(*e*) *Rural Credits Department.* The Rural Credits Department, established in 1925, is continued in the same form under this Act. The power of the Bank to issue debentures for the purposes of this department has been discontinued and the range of securities against which the department may make advances has been extended.

(*f*) *Mortgage Bank Department.* The Mortgage Bank Department established in 1943 is continued in the same form under this Act.

(*g*) *Industrial Finance Department.* The functions of the Industrial Finance Department established under this Act are :—

> " (*a*) to provide finance for the establishment and development of industrial undertakings ; (*b*) to assist in the establishment and development of industrial undertakings ; and (*c*) to provide advice on the operations of industrial undertakings with a view to promoting the efficient organization and conduct thereof."

To exercise these functions the Bank may, through the Industrial Finance Department, lend money and purchase and sell shares or securities in an industrial undertaking. The capital of this department shall be £4,000,000. Two million pounds is to be provided from the Special Reserve Account of the Note Issue Department and the other £2,000,000 is to be transferred as required from the other funds of the Bank. The Treasurer, the Bank and the Savings Bank may advance money to the Industrial Finance Department. The amount that may be advanced by the Bank is limited to £1,000,000. The profits of the Department are to be placed to the credit of the Industrial Finance Department Reserve Fund. This Department commenced business on 2nd January, 1946.

(*h*) *Housing Loans.* Special provisions are included to permit the Bank, through the General Banking Division, to make loans to individuals or building societies for the erection or purchase of homes or for the discharge of mortgages on homes. These loans must be made at the lowest possible rate of interest. Loans to individuals are to be on *crédit foncier* terms, to be secured by first mortgage on an estate or interest in land owned by the borrower and to be repaid in periods of not less than five years nor more than 35 years. Loans to building societies are to be made on such security and on such terms and conditions as the Bank determines.

(*i*) *The Commonwealth Bank Service.* Conditions of appointment and service of officers of the Bank are set out in Part XIII. of the Act. Appointments to the service of the Bank shall be made on the results of a competitive examination. Provision is made for the classification of positions in the bank and for the protection of officers with respect to promotions, tenure of office, dismissal and punishment.

(*j*) *Other.* The Note Issue Department and the Commonwealth Savings Bank are continued in the same form by the Act. Alterations to provisions under previous Acts affecting these sections are dealt with, in the case of the Note Issue Department, in the part of this chapter relating to Currency, and in the case of the Commonwealth Savings Bank in § 2 of this Part.

(iii) *Liabilities and Assets—All Departments.* Liabilities and assets of each department of the Commonwealth Bank at 30th June, 1947 are shown in the following table. The Commonwealth Savings Bank, which is operated as a separate institution, is not included (see §2, para. 11 (iii) following) :—

(*a*) All Banks did not take simultaneous action. (*b*) Bank of New South Wales reduced the rates for 6, 12 and 24 months terms by one-quarter of 1 per cent. from 23rd August, 1932. (*c*) Commonwealth Bank only. Bank of New South Wales from 2nd March and Bank of Adelaide from 3rd March, 1936. (*d*) On first £10,000 ; rate on amount in excess of £10,000 is 1 per cent.

10. **Clearing House Returns.**—(i) *Annual Clearings.* Particulars of the aggregate bank clearings for each capital city, compiled from information supplied by the Commonwealth Bank, Sydney, are given in the following table. Since October, 1920, transactions connected with the issue and redemption of Treasury Bills have resulted in largely inflated clearings. These transactions are of an abnormal character, and have been excluded from the table.

CLEARING HOUSE RETURNS : VALUE OF BILLS, CHEQUES, ETC.(*a*)

(*a*) Excludes Treasury Bill transactions.

(ii) *Index of Annual Clearings.* The following index of bank clearings in each capital city for the years 1938 to 1947 has been computed from the figures in the previous paragraph. The base used is the average of the years 1936 to 1938. Clearings connected with the issue and redemption of Treasury Bills have been excluded and no adjustment has been made on account of alterations in the banking system.

INDEX OF BANK CLEARINGS.

Base : Average of Years 1936 *to* 1938 = 1,000.

Year.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Total.

(*a*) Periods ended last Wednesday for this and following periods (see para. 3, page 568).

12. **Rates of Exchange.**—(i) *Australia on London.* The following statement gives particulars of the telegraphic transfer rates of exchange, Australia on London, in operation since 10th March, 1930. In earlier issues particulars were given of the rates in operation since 16th October, 1913. The details given show the value in Australia of £100 in London according to the rates quoted by the Associated Banks for buying and selling £100 in London on telegraphic transfer. In December, 1931 the Commonwealth Bank Board undertook the responsibility of regulating sterling exchange and announcing rates each week.

RATES OF EXCHANGE: AUSTRALIA ON LONDON, TELEGRAPHIC TRANSFER.

Date on which Rate began to operate.	Buying.	Selling.
	£ *s.* *d.*	£ *s.* *d.*
10th March, 1930	103 10 0	104 2 6
24th March, 1930	106 2 6	106 10 0
